The PRESIDING OFFICER. The Senator makes a good point. The Senate is not in order. The Chair asks to maintain order in the Chamber so that the Senator from Idaho can be heard.

The Senator from Idaho.

Mr. McCLURE. I thank the Chair.

The District of Columbia is no more than a city itself and thus, should not be granted representation in the House and Senate, in my opinion.

Although it could not have been foreseen by the Founding Fathers, Washington, D.C. has developed into a large commercial city and, except for a small Federal enclave, the District consists only of that urban center. The framers did not intend that cities should be given representation in the Congress; in fact, they specified in the Constitution that only

"States" should have a voice in the Senate and the House.

Even if one believes that the District should have representation in the Congress, it does not follow that the city of Washington should be able to elect its own Senators and Congressmen. To permit that would be to make a radical and qualitative change in our federal system.

If the Nation's Capital, with its roughly 700,000 inhabitants and 69.7 square miles, can elect its own Members of Congress, it is logical to give every other city in the United States of equivalent size and area the same rights of representation. The District has been steadily losing population in recent years (down from 802,178 in 1950), while many of the 11 cities which are larger than Washington, which are New York, Chicago, Los Angeles, Philadelphia, Houston, Detroit, Baltimore, Dallas, San Diego, San Antonio, and Indianapolis, continue to grow. Moreover, those cities are not heavily dependent on the Federal Government for their continued prosperity or even their existence. The seven least populous States, which are Alaska, Wyoming, Vermont, Delaware, Nevada, North Dakota, and South Dakota, each of which is smaller than the District, are increasing in population while the District is declining. In view of the fact that the District already receives special treatment from the Congress and has its own special committee in the House and subcommittee in the Senate to look after its problems and interests—the only city or State to be so favored—it would seem that entities of greater size are in greater need of representation than the District.

The fact that the residents of other U.S. cities can already elect representatives to Congress is irrelevant; they must share their Senators with the rest of the people in the State. If the District of Columbia were granted representation, its residents would have Senators who would share with no other people and would speak only for the interests of the District.

It would be unjust to permit residents of the District to be thus enfranchised to an extent greater than the people of, say, New York or Indianapolis. That would amount to overrepresentation of the District and its inhabitants in Congress, to the detriment of the States and other citizens of the United States.

Mr. President, I might just note that the 11 cities that I have enumerated in this amendment have populations greater than that of the District of Columbia. I do not need to go into all of the populations statistics of each of the 11, but I might just point out that they range from the 700,000 in the District of Columbia to New York City with nearly 10 million residents, and those 10 million residents do not have their own separate Senators. They share them with the rest of the residents of the State of New York. Or perhaps it might be characterized that the rest of New York is dominated by New York City and they are deprived of equal representation in the same manner that the people in Maryland want to avoid having to share their Senators with the District of Columbia.

I might also note just for the record the States which are smaller in population than is the District of Columbia:

Alaska, Wyoming, Vermont, Delaware, Nevada, North Dakota, and South Dakato, according to the U.S. Bureau of Census as of July 1, 1976.

Mr. President, it seems to me that if we are going to take this step to give the inhabitants of this city that kind of special representation, then we ought to grant to every other city of equal or greater size an equal representation or we will have gone from the wrong of lack of representation here in the District to the greater wrong of unequal representation of other larger cities.

Mr. President, I think it can also be argued that the District of Columbia is primarily a city of bureaucrats, a city which has its own special interests, a city of people who desire to have the Federal Government do things on their behalf much more uniquely than any other city. They should be less represented, not overrepresented, in the Congress of the United States.

Mr. President, I started out by saying some may think this is a frivolous amendment. I am deadly serious about the principle that is involved in granting to some people in the United States a greater degree of representation than anyone else.

I only regret that the Senate has not seen fit to treat the people here in exactly the same manner they are treated everywhere else in the United States. But the Senate has rejected my efforts to see that they get their fair, equal, and full civil rights treatment to which I think they are entitled.

Mr. President, I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, I yield myself 7 minutes.

Do I understand correctly that the Senator would permit the named cities to be considered as States for purposes of this amendment?

Mr. McCLURE. In exactly the same manner as it is proposed to treat the District of Columbia.

Mr. KENNEDY. Well then, what would happen in terms of congressional representation, representation in the House of Representatives?

Mr. McCLURE. They would receive the same representation that is provided for in the resolution for the District of Columbia.

Mr. KENNEDY. On top of what they already have, or in place of it?

Mr. McCLURE. In place of what they already have.

Mr. KENNEDY. Since the District has 690,000 people, under the census they are entitled to one or two congressional districts. I do not know of any city that is listed here that would have less than that. So——

Mr. McCLURE. As a matter of fact, I would say to the Senator the cities listed here are all larger in population than is the District of Columbia.

Mr. KENNEDY. That is right. But in terms of congressional districting for all of these major cities, therefore, you may be varying the size of their current congressional districts. Would they have more or less representation?

Mr. McCLURE. I think that would be the effect.

Mr. KENNEDY. So the Senator is reducing the number of congressmen in every one of these cities.

Mr. McCLURE. Marginally, slightly, perhaps.

Mr. KENNEDY. So there could be under the Senator's amendment a significant reduction in the number of Congressmen.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. KENNEDY. Yes.

Mr. McCLURE. That, of course, depends on the formula and the allocation against the 435-Member seating provided by statute. I do not know what the mathematics would be, very frankly, but it would treat them exactly as the District of Columbia would be treated.

Mr. KENNEDY. Beyond that, Mr. President, the significant difference is that each of these major cities in the amendment is already represented in the U.S. Senate by Members of the U.S. Senate currently serving here, and there are many distinguished ones. That is the dramatic difference.

What we are trying to do is permit the residents of the District of Columbia to have the same type of representation that New York, Chicago, Los Angeles, Philadelphia, Houston, Detroit, Baltimore, Dallas, San Diego, San Antonio, and Indianapolis have. They are not permitted that right now.

It is imperative as a matter of fairness and justice to accord to the residents of the District of Columbia the same rights and privileges and guarantees that the rest of the citizens have in this Nation.

The other cities are already represented in the Senate and the House. By the comment of the Senator from Idaho, they might even wind up with less representation under the amendment. It seems to me to be an unwise amendment.

If the Senator wants to make any additional comment I would welcome it and, at the appropriate time, would make a motion to table.

Mr. McCLURE. Let me respond only to this part of the arguments of the Senator from Massachusetts. He has completely avoided facing the issue. The issue is whether or not the residents of this District are to be granted a status and a representation that no other city has.

My amendment would give the other cities of equal or greater size precisely the same treatment that would be accorded to the District of Columbia under the pending resolution.

I say to the Senator, in regard to the number of Representatives who might serve that city under my amendment, that would be governed under article I of the Constitution according to the decennial census, and while we might speculate as to its effect with respect to the current decennial census, it would have the same effect precisely in the District or any other cities following the decennial census of 1980. So there would be no reduction in their representation according to population following the 1980 census as compared to the people in the District of Columbia.

Mr. President, the cities have been listed in the amendment, but again I would mention that New York City, with a population numbering somewhat less than 10 million; the city of Chicago with over 3 million; the city of Los Angeles with nearly 3 million; Philadelphia with slightly less than 2 million; Detroit, Mich., with 1,335,000; Houston, Tex., 1,326,000; Baltimore, Md., with 851,000; San Diego with 773,000; San Antonio with 773,000; and Indianapolis with 725,000 residents, all being cities with greater populations than that of the District of Columbia, these cities just happen to fall in the following geographical distribution: New York 1, Illinois 1, California 2, Pennsylvania 1, Texas 3, Michigan 1, Maryland 1, and Indiana 1.

Maybe the people who are opposing this amendment do not want those people to have full representation, to have full equal rights, in those cities.

Mr. KENNEDY. Mr. President, each of those cities has representation. I speak for Boston, I speak for Springfield, I speak for Lowell and Lawrence, and New Bedford and Fall River, Mass. I speak for all of them. The greater Boston area, has 3 million people, 800,000 in the 22 wards in the city. And in the U.S. Senate, when the rollcall is called this afternoon, I will be here to speak for each of the cities, and so will my colleague, Senator BROOKE.

I challenge anyone who supports this amendment to say that either Senator JAVITS and Senator MOYNIHAN do not speak for New York; or that any other Senators do not speak for any of the other cities.

When we call the roll this afternoon, there will be two Members of the Senate who will use with pride and with privilege their opportunity to speak for the people and the people's interests when the roll is called. At that time there will be 700,000 voices that will be mute. But the citizens who live here in the District of Columbia will have no voice. That is the difference.

Mr. President, there is also the uniqueness of the District, which has developed over the past 200 years. We have debated this point at length in recent days. These people here are denied representation. In any of the States, all they needed to acquire a voice in Congress and in the Senate of the United States, was a vote of the majority of the Members of the Senate to obtain statehood. But here we are requiring the people of the District of Columbia to get a two-thirds vote of both Houses and three-quarters of the people of the States.

Mr. SCOTT. Madam President, will the Senator yield, on my time?

The PRESIDING OFFICER (Mrs. HUMPHREY). The Senator from Virginia has no time.

Mr. KENNEDY. How much time do I have remaining, Madam President?

The PRESIDING OFFICER. The Senator from Massachusetts has 5 minutes.

Mr. KENNEDY. I will be happy to yield, without losing my right to the floor.

Mr. SCOTT. That, of course, will be charged to my time also.

Mr. KENNEDY. I was going to make a motion to table, but I will be glad to yield for a brief question.

Mr. SCOTT. My comments are that there are more than 3 million people of the country of Puerto Rico that also are citizens of the United States, and who speaks for them here in the Senate? Is it not a fact that there is no one except those who represent the States, no one here who was elected to represent the cities? Senators represent their States and all the people of their States, whether they are rural, urban, or suburban.

Our Government was founded as a Union of States. If this proposal is adopted, we are departing from the Federal concept of the Union of States. If we are going to depart from it, would it not be reasonable to give the citizens of Puerto Rico also, with more than 3 million people, representation in the Senate, if we are going to be consistent? Then maybe Guam and the Virgin Islands.

Mr. KENNEDY. Is the Senator indicating that if he had been here in the Senate when Alaska and Hawaii were admitted, he would have voted against those States?

Mr. SCOTT. Of course I would not have.

Mr. KENNEDY. Can the Senator tell me the difference? I will tell the Senator what the difference is between those States and Puerto Rico.

Mr. SCOTT. Go ahead.

Mr. KENNEDY. The fact of the matter is that the people of Puerto Rico voted for commonwealth status, not statehood. That is the kind of representation they wanted. That is their arrangement with the Federal Government. They chose that status.

The people of Alaska and Hawaii wanted statehood and wanted to come here, and I am delighted that they are here.

If someone represents a rural State, I welcome the fact that they are part of the Union. The fact is that the people of Puerto Rico have indicated, when offered the opportunity to choose, that they prefer commonwealth status.

Mr. SCOTT. It is my understanding that the present Governor was elected Governor with full knowledge that he favored statehood. It is also my understanding that in the last Presidential election, only 31 percent of the adult population of the District of Columbia voted. So how keenly do they want it? How keenly are they interested in having representation in the Senate?

Mr. KENNEDY. I am surprised that the level reached 31 percent. They know that their voice is muted here in the Congress of the United States. They do not have full rights as Americans. They have no voice, in Congress. As gifted as Congressman FAUNTROY is, he is a nonvoting delegate.

I also question the accuracy of that figure. It may be an artificially low figure because the percentage is based on the total voting age population. Yet many District persons retain their voting residence in other States, because they cannot vote here.

We are talking about the uniqueness of the District of Columbia. If at any time the 3 million people of Puerto Rico indicate that they want to be part of the U.S. Congress and Senate, we will make the decision on statehood. But we will not require two-thirds of the House and the Senate to agree, and we will not require three-quarters of the States to ratify it. Does the Senator agree with me on that?

Mr. SCOTT. I agree completely with the Senator that the District of Columbia is unique. It is the Federal City. It was constituted as a Federal City, so that Congress could deliberate free from influences from the various States.

When we look at the papers that the distinguished Senator has laid on each Senator's desk, the Washington Post's "Human Rights in the Capital" the Washington Post's "Open Letter to the United States Senate," the Washington Star's "The Day of Decision," we have an awful lot of pressure right now on the Congress of the United States.

The PRESIDING OFFICER. The time yielded to the Senator has expired.

Mr. KENNEDY. Will the Senator, then, yield 2 minutes of his time?

Mr. SCOTT. I am willing to do it. I am not quite sure it is in order.

Mr. KENNEDY. Just a minute and a half.

The PRESIDING OFFICER. The Senator could ask unanimous consent.

Mr. KENNEDY. I ask unanimous consent that my other time be able to be used on this.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KENNEDY. We are talking about the uniqueness of the District of Columbia. It was not so unique when those 18-year-old boys got draft cards and were sent to Vietnam. It was not unique then. No one was saying, "Well, it is the Federal district; under the Constitution, you are somehow special, you get to go to Vietnam and fight over there and die."

It is not unique when it comes to paying taxes. They pay more taxes than many States. It is not unique in that way.

No, Mr. President, it is not unique in those ways; and yet they have no voice in the decisions which are made on those vital issues.

Madam President, I move to table the amendment.

The PRESIDING OFFICER. Does the Senator from Idaho yield back the remainder of his time?

Mr. McCLURE. Madam President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. KENNEDY. I had four, but I am glad to have the Senator use what he has.

Mr. McCLURE. I beg the Chair's pardon?

The PRESIDING OFFICER. The Senator from Idaho has 8 minutes remaining. Debate is not in order on a motion to table.

Mr. KENNEDY. I withhold it, Madam President.

Mr. McCLURE. Let me respond only that certainly the purpose of my amendment is to give equality of treatment to

the people of the District of Columbia and other people similarly situated within the United States. I have tried to do that under earlier amendments that would have granted them full civil rights within the District of Columbia. The Senate has refused to allow them to have full civil rights within the District of Columbia. I now seek to give to the citizens in other cities the same rights which this joint resolution would grant to residents of the District, no more and no less. It does not seem to me that if we are going to depart from the constitutional principle of State representation in the Congress, particularly in the Senate, if we are going to depart from that principle in one instance, that we can do justice to other citizens of our country without applying it equally to them.

I would hope, Madam President, that Senators would not just out of hand reject the amendment because it happens not to suit the political conditions, or the political desires of those who are supporting the joint resolution.

Madam President, if the Senator from Massachusetts is ready to make his motion to table, I would be prepared to yield back the remainder of my time.

Mr. KENNEDY. Yes.

Mr. McCLURE. Madam President, I yield back the remainder of my time.

Mr. KENNEDY. Madam President, I move that amendment No. UP 1705 be laid on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table UP amendment 1705. The yeas and nays have previously been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Iowa (Mr. CULVER), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Ohio (Mr. METZENBAUM), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Tennessee (Mr. SASSER) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE) and the Senator from Kansas (Mr. DOLE) are necessarily absent.

The result was announced—yeas 79, nays 6, as follows:

[Rollcall Vote No. 342 Leg.]

YEAS—79

Baker	Church	Hansen
Bartlett	Clark	Hart
Bayh	Cranston	Haskell
Bellmon	Curtis	Hatch
Bentsen	Danforth	Hatfield, Mark O.
Biden	DeConcini	Hathaway
Brooke	Domenici	Heinz
Burdick	Durkin	Helms
Byrd, Harry F., Jr.	Eagleton	Hodges
Byrd, Robert C.	Ford	Hollings
Cannon	Glenn	Humphrey
Chafee	Goldwater	Jackson
Chiles	Gravel	Javits
Kennedy	Nunn	Sparkman
Laxalt	Packwood	Stafford
Leahy	Pearson	Stennis
Long	Pell	Stevenson
Magnuson	Percy	Stone
Mathias	Proxmire	Talmadge
McGovern	Randolph	Thurmond
McIntyre	Ribicoff	Tower
Melcher	Riegle	Wallop
Morgan	Roth	Weicker
Moynihan	Sarbanes	Williams
Muskie	Schmitt	Young
Nelson	Schweiker	Zorinsky

NAYS—6

Garn	Lugar	Scott
Hayakawa	McClure	Stevens

NOT VOTING—15

Abourezk	Dole	Johnston
Allen	Eastland	Matsunaga
Anderson	Hatfield, Paul G.	Metzenbaum
Bumpers	Huddleston	Sasser
Case	Inouye	
Culver		

So the motion to lay on the table UP amendment No. 1705 was agreed to.

Mr. KENNEDY. I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. SCOTT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KENNEDY. Madam President, may we have order so the Senator from Virginia may be heard?

The PRESIDING OFFICER. The Senate will be in order.

Mr. SCOTT. Madam President, I yield such time as he may consume, not exceeding 20 minutes, to the distinguished Senator from Mississippi (Mr. STENNIS).

Mr. STENNIS. Madam President, let me say in the beginning to my colleagues that, in my humble opinion, there has not been a more serious and more grave matter to come before this body. I think there has not been a more far-reaching matter come before this body in a long time.

I do not speak, Madam President, with any wisdom or anything of that kind. I do not speak with any great learning, I do not claim any learning in government or anything of that nature. But I do speak from experience, experience in this body and experience in the State governments, in the State legislature and other branches of State government. I believe I have somewhat of a feel for the Constitution of the United States and some knowledge of the history of almost 200 years that we have lived with and under, including right on down to the present time.

This is an innovation in this bill, the idea of giving power and privileges and strength to any unit of goverment without corresponding responsibilities. It is unsound, in my humble opinion, and will not work and will bring about trouble. I really cannot reconcile myself to that concept of giving to any group—any group—within the United States the power of representation on this floor, in this unique body, without the corresponding responsibilities and obligations of a State government that go with it.

I believe I feel that, after all, the Senate is the stabilizing branch of our truly great Government.

I personally feel that we are living in a time of increasing pressures, political pressures, mounting in size and volume and political strength.

Week after week, year after year, those of us that have been here can feel it. We can feel it coming. Some governmental body in the lineup has got to be at least partly removed from the immediate effects of that mounting political pressure.

I speak with all deference to the groups we now have, the State employees, the county employees, with mounting plans of action on their representatives. That was unthinkable or unheard of until recently. I understand it is growing faster than any other group.

I am not trying to discredit any group. It is just a fact of life.

This body can be well warned, as we know now, in part, that more and more of those pressure groups are coming. Say what we will, it is a threat to our system of government, the elected legislative branch.

There must be some kind of insulation protection—or whatever word we wish to use—from the immediate reaction of those that are holding the office. That is where the 6-year term comes in.

But the very idea now of not creating a State, if we are going to have this thing happen, I think it would be far better to create the District of Columbia into a State with its responsibilities and burdens. If we kept an enclave of just a little area here, if any, but without the responsibilities and burdens of State government, the people, the voters and those that they elect and select to come here, will not have the background, they will not have the same sense of obligation, and it will be harder for them to work with the ones already here. I can feel that. I can see how these things will come out.

If we are going into this for the District of Columbia, what about Puerto Rico? I am not advocating anything for them. I understand that perhaps they do not favor statehood now. But when and if they do, how are we going to turn them down? It has been a territory all these years.

I remember a more conservative political party in 1948 that early advocated statehood for Puerto Rico.

That was just an illustration. What about the others?

So I think, in addition to the change in the form of groups that can send representation here, we are further called upon to expand and extend this body, by no means perfect, but it works mightily well as a whole, extend its obligations, extend its nature, stretch it out further and further from the sound basis upon which it rests.

I could refer here, and I am not trying to take up time, I think we have gotten into a situation here where we are in a hole, so to speak.

I do not believe we can meet our obligation by merely passing this on to the States to decide, although it is inconceivable to me that three-fourths of our States, as required by the Constitution, will approve the idea of sending representation here to this body, equal to

their own—equal to their own—and thereby changing the whole system.

It does change it at its foundation level, and puts those States in competiton, so to speak, with the District of Columbia, which has no obligation, as such, of government to carry on.

I just do not believe, if it goes to the States, a person representing a rural area, we will say, a rural area of his State, can possibly see enough compatibility—enough compatibility—between his constitutents and those that are here in the District as to make him willing to let those people, so far removed from his problems, play a part in passing laws under which his people will have to live.

That is no reflection on the people here. But the persons who elect Senators to this body from the District are not going to know one iota, the voter will not know, 9 out of 10 will not know, one iota of the problems that go with farming, or agriculture in any of its phases, forestry, land care, and a host of other things.

They will not know and they have not had a chance to know very much about industry, small industry, medium-sized industry, heavy industry. They do not know and will not know, they have not had a chance to know, of all the problems that go with many of the ways of making a living.

After that is all said and done, that is what the average person has to think about every morning when he gets up. It does not make any difference whether he lives in the West, South, East, or where. He has the responsibility of making a living for his family. It is an economic problem.

We find there are no Senators here, unless it should be that greatly respected State of Rhode Island that we would have to call more or less urban because its area is small and has filled in with people that almost live in towns, but all the rest of them have knowledge of and a direct obligation to people living outside of the cities, to people living in the villages and little crossroads towns, the rural areas, and all the problems that go to make a living there.

Say what we will, unless we have the means of making a living now on the farm, on the land, it is a hard go.

Some of our very finest citizenship training comes through that kind of life.

I just back off from the idea of having people here who have not felt and do not have knowledge of those kinds of problems—not just rural areas but also small towns, small factories, small industry, and a host of other things that go along with that.

A person in here from the District could not have much knowledge of schools, the problems that go with schools, little schools, medium schools, schools scattered in various areas. All they possibly could know would be what the experiences were here, in this very fine city.

I have lived in this city virtually every day of the year for a good number of years, and I have no complaint about it, myself. I have a complaint about restructuring our system of government here merely for the fact of extending the franchise a little further to these District of Columbia people.

The citizens of New York have a small iota of representation in this body compared to the citizen from, say, Utah, a sparsely populated State. There is no such thing as equality in this representation. Now there is an attempt here to dig at the very foundation of this body—that is what this proposal does—simply in order to give these people, fine as they may be, a fraction more of representation here.

We have the local government. I think Mayor Washington has done a mighty good job, judging from contacts I have had with him, observation and otherwise, and I have been a resident taxpayer here for a number of years.

The representation here by the nonvoting delegate is worthwhile, and he renders a service. There is no necessity of just pushing in here and giving these people not just equal representation, but it works out far beyond equality. They get a premium, they get a prize, without any obligations to go with it.

I believe it is the beginning of the crumbling of the system we have. This body, with all its deficiencies—and I am not proud of every aspect of it—has a better chance to stand when the storms come than any other group in our Government.

I have other matters to which I could refer. It is not anything like prejudice or not wanting them to have some representation; but, after all, no one has to live here. No one is being punished, unless they are prisoners, by having to stay here.

We have to have a body that can take care of the massive, growing volume of legislation in this Federal City, and it has to have some kind of insulation—I do not say protection, but insulation—from the pressures of the times.

It is inconceivable to me that a State legislator could approach this picture here with knowledge of how the States fit into the economy and how his or her constituents fit into the Federal regulations of the economy, and I think that will continue. It has gone too far, in my opinion, but I do not think it would change. I just feel that he will be convinced that he is giving up almost everything in return for nothing, you might say, insofar as the handling of the affairs of the Government of the United States of America is concerned. It has its worldwide obligations, which are growing, not lessening; becoming more troublesome, not more peaceful; and the challenges of our economy are much more severe on other parts of this country than in this fine city.

I repeat that the serious problem that the average person has of making a living for his family is the thing that confronts him all the time, every day, and he has to look to this Federal Government for a great deal of guidance and control with respect to that economy. I think these smaller groups in the economy have nothing they can spare in influence. We know that they are rather near the bottom of the totem pole. And when I say making a living, I mean getting out and digging and earning your own way. They have the problem of getting out and making a living, making ends meet. That is what comes home and stays on the doorstep of our citizenry throughout the Nation.

I do not hear of any complaint from the people of California because they do not have anything like equal representation here, numerically, with respect to what a smaller State has, wherever that smaller State is. The matter is understood, and things move along.

Things work out in this body in a marvelous way, but it is becoming more difficult. The pressures are becoming more numerous and greater and more intensified.

The PRESIDING OFFICER. The Senator's 20 minutes have expired.

Mr. STENNIS. I thank the Senator for yielding time to me. I would like to have more time during the day.

Mr. SCOTT. Madam President, I would be glad to yield more time now, or later, to the distinguished Senator.

Mr. STENNIS. I thank the Senator. That is all right.

Mr. SCOTT. Madam President, I appreciate very much the remarks the Senator has made. I feel that we all know and love and respect the distinguished Senator from Mississippi. He has served in our body for 31 years. He was an attorney for a long period of time; he has been a prosecuting attorney; he has been a trial judge. He was elected to the U.S. Senate in 1947. I feel that he knows as much about this body as any other Member of the Senate. So I am especially pleased that he takes the time to address himself to the problem before us.

I understand, Madam President, that the distinguished Senator from Vermont (Mr. LEAHY) would like to propound some unanimous-consent requests.

Mr. LEAHY. If the Senator will yield to me for that purpose.

Mr. SCOTT. I yield.

(Mr. LEAHY's request for certain committees to meet is printed earlier in today's RECORD.)

UP AMENDMENT NO. 1706

(Purpose: To provide representation for the District of Columbia in the House of Representatives)

Mr. SCOTT. Madam President, I call up an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Virginia (Mr. SCOTT) proposes unprinted amendment numbered 1706.

Mr. SCOTT. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with line 3, strike out all through line 12 and insert in lieu thereof the following: "House of Representatives, the District constituting the seat of government of the United States shall be treated as though it were a State.".

On page 2, line 13, strike out "Sec. 4." and insert in lieu thereof "Sec. 2.".

Mr. SCOTT. Madam President, the real crux of this resolution is in the first section, and it reads as follows:

For purposes of representation in the House of Representatives, the District constituting the seat of government of the United States shall be treated as though it were a State.

The amendment would provide the citizens of the District of Columbia the number of Representatives in the House of Representatives to which they would be entitled if the District were a State. It also eliminates three provisions of the pending resolution.

First, it does not gives the Disrtict two Senators. Second, it does not permit the District to participate in the process of ratifying constitutional amendments as if it were a State. Finally, it retains in force the 23d amendment to the Constitution dealing with the electoral college.

This amendment is not a weakening amendment, so proponents of House Joint Resolution 554 can vote for this. In fact, it strengthens the chances of the District of Columbia having voting representation in Congress for the first time.

As Senators know, at the present time we do have an elected delegate from the District of Columbia. We also have an elected delegate from Puerto Rico, the Virgin Islands, and Guam. The delegates can vote in committee but they cannot vote in the Hall of the House of Representatives.

The District of Columbia Congressmen would be Congressmen, not delegates, with all the rights that Congressmen from any State would have.

Representation in the House of Representatives only as proposed by my amendment would preserve the unique status of the District as a Federal enclave, holding the seat of Government of the Nation which was the clear intent of the framers of the Constitution.

I believe that it would eliminate the controversial and ambiguous language found in section 2 of the pending resolution. That is the question of what constitutes the legislature that would decide such questions as whether or not the chief executive of the District of Columbia could appoint Senators, whether that would be the legislature of the District of Columbia, or whether it would be the Congress of the United States because under article I, section 8 of the Constitution Congress has exclusive legislative jurisdiction over the District of Columbia subject to such exceptions as have been delegated.

We must remember that we are considering an amendment to the Constitution of the United States, the fundamental law of the land. We should be very cautious when we propose to add language to alter provisions of that great and historic document.

This amendment offers the people of the District their best chance for representation in Congress.

In my judgment House Joint Resolution 554 just simply goes too far. Three-fourths of the States are highly unlikely to ratify it. I believe we will have much more controversy than we had over the ERA amendment.

It proposes to make the District look like a State, to place it on an equal or superior position to other States—that is what the resolution presently before us does, not my amendment—to put it on a superior footing to other States, and to award it virtually all the attributes of the State without asking it to accept the full burdens and responsibilities of statehood. That strikes me as being unnecessary and unfair to the remaining members of the Union. It is virtually a certainty that the resolution before us will not be acceptable to the necessary three-fourths of the State legislatures even if it should be passed by the Senate and signed by the President.

Madam President, the House membership, as you know, is based on population. So there is no conflict in having this representation with the Constitution. But the State representation is entirely a different matter because the Senate is composed of representatives of the States and the city of Washington is not a State. The Senate membership is not based on population in any way. It is based on the fact that each State shall have two Members of the Senate.

Madam President, I have no further comments at this time.

Mr. LEAHY. Madam President, I ask unanimous consent that Terry Cronin of Senator DURKIN'S staff, be accorded the privilege of the floor during votes and deliberations throughout the day today.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Massachusetts.

Mr. KENNEDY. Madam President. this reaches the heart of the issue that is before the Senate. Those of us who support this amendment do not do so just because we want to give something special to the District of Columbia or grant some favor. We are trying to end an injustice.

What we are trying to do is to put the people of the District of Columbia on the same footing for the House of Representatives and for the Senate of the United States as other areas in this country. The District of Columbia exceeds several States in population. The residents of the District pay taxes. They fought the war in Vietnam.

This amendment is basically flawed, Madam President, in that it provides some representation, but not full representation.

The people in the District of Columbia can vote for the President of the United States, but they cannot vote for Congress and the Senate. Now the Senator from Virginia is saying, they can vote for the President of the United States and the House of Representatives, but not for the U.S. Senate.

I can appreciate the sense of gradualism that has been part of this whole movement, but it certainly does not meet the objective of this constitutional amendment. Therefore, I intend to move to table the amendment unless the Senator wishes to make additional comments. If he does, I shall withhold that then.

The PRESIDING OFFICER (Mr. ZORINSKY). The Senator from Virginia.

Mr. SCOTT. Mr. President, this is the only thing I wish to mention. I hear the distinguished Senator speak of the people of the District of Columbia who fought and died in wars. That is true of people throughout our territories. I feel sure that there were people from Puerto Rico, with a population of more than 3 million people, who also fought in wars for this country, and certainly I have nothing but kind thoughts and commendations.

But I think that is something that is outside of the constitutional matters that we are considering.

I am sympathetic with the views and am agreeable with the views that the distinguished Senator has stated, but I just think this is sort of an emotional appeal that is being made rather than something that goes to the merits of this case.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order now to ask for the yeas and nays on a motion to table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, the only point I make is that it was also an emotional argument when they talked about taxation without representation. That was an emotional argument. But it was not just an emotional argument. It was also true.

The same thing happens to be true here. The issue affects the fundamental issues upon which this Nation was founded. The people deserve to have a voice and a vote on matters of taxation and matters of life and death. The people of the District of Columbia do not have that right.

Mr. SCOTT. Mr. President, will the Senator yield just briefly?

Mr. KENNEDY. I yield without losing my right to the floor.

Mr. SCOTT. Mr. President, it is my understanding—and this has been verified by the Library of Congress—that the District of Columbia contributes 29 cents for every dollar it receives in Federal taxes. That is not taxation without representation.

Mr. KENNEDY. Mr. President, I move to table the amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Massachusetts to lay on the table the amendment of the Senator from Virginia. The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Min-

nesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from HAWAII (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Tennessee (Mr. SASSER), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

The result was announced—yeas 60, nays 28, as follows:

[Rollcall Vote No. 343 Leg.]

YEAS—60

Bayh	Griffin	Muskie
Bellmon	Hart	Nelson
Bentsen	Haskell	Packwood
Biden	Hatfield,	Pearson
Brooke	Mark O.	Pell
Byrd, Robert C.	Hathaway	Percy
Case	Heinz	Proxmire
Chafee	Hollings	Randolph
Chiles	Humphrey	Ribicoff
Church	Jackson	Riegle
Clark	Javits	Sarbanes
Cranston	Kennedy	Sparkman
Culver	Leahy	Stafford
Danforth	Magnuson	Stevenson
DeConcini	Mathias	Stone
Dole	Matsunaga	Thurmond
Durkin	McGovern	Weicker
Eagleton	McIntyre	Williams
Ford	Melcher	Young
Glenn	Metzenbaum	
Gravel	Moynihan	

NAYS—28

Baker	Hatch	Roth
Bartlett	Hayakawa	Schmitt
Burdick	Helms	Schweiker
Byrd,	Hodges	Scott
Harry F., Jr.	Laxalt	Stennis
Cannon	Long	Stevens
Curtis	Lugar	Tower
Domenici	McClure	Wallop
Garn	Morgan	Zorinsky
Hansen	Nunn	

NOT VOTING—12

Abourezk	Goldwater	Johnston
Allen	Hatfield,	Sasser
Anderson	Paul G.	Talmadge
Bumpers	Huddleston	
Eastland	Inouye	

So the motion to lay on the table UP amendment No. 1706 was agreed to.

Mr. SCOTT. Mr. President, I yield such time as he may consume, not exceeding 20 minutes, to the distinguished Senator from Mississippi (Mr. STENNIS), and then yield to him additional time for the purpose of allocating it to Senators WALLOP and SCHMITT during my absence from the floor.

Mr. ROBERT C. BYRD. Will the Senator yield to me for a question?

Mr. SCOTT. Yes.

Mr. ROBERT C. BYRD. Does the Senator know how many amendments remain on his side of the aisle?

Mr. SCOTT. Mr. President, I do not know. I have two amendments of my own. It may be that there will be no further amendments, but I am not in a position to say that at this time. I do not know what other amendments there are. I do know there are numerous amendments, but I do not know whether they will be offered or not. My inclination or my judgment is that very few of them will be offered. What I am attempting to do now is to go downstairs and eat some lunch.

Mr. ROBERT C. BYRD. I would like to have some lunch. I usually do without, or I get a bowl of soup in my office. But that is neither here nor there. I am just trying to find out how many amendments remain. If the Senator is in a position to determine this a little later, what I am saying is it might be that we could go off this measure for an hour or 2 and do some other work and come back to it, say, at 5 o'clock, and allow an hour for debate between that and 6, if it were agreeable with the distinguished Senator.

Mr. SCOTT. Let me say to the distinguished majority leader that I will attempt to find out. I am not sure whether I will be able to, but at least I will try.

Mr. ROBERT C. BYRD. I thank the Senator.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. STENNIS. Mr. President, I have already had the privilege of speaking briefly this morning. Let me assure the membership who are here I am not here to try to take up some time. I have not written a speech just to kill time. I have what I think are some fundamental points. I know they are fundamental to me. I want to accommodate the leadership and every individual Senator. But I think these things ought to be said with as much emphasis as we know how to say them. I have put down some points ad seriatum.

I feel that if this matter should pass and be submitted to the legislatures of the various States, there ought to be something in the RECORD for the membership there who may want to look and see how different Senators feel about this thing, what they think will be the effect of it, and how it will work for Nebraska, California, Alabama, and Maine, as well as for the District of Columbia.

I am surprised that this proposal has this much support, to meddle with one of the blood cells, the very foundation of our system of government, particularly this unique body, the U.S. Senate.

No unit of Government has taken any more body blows than has the U.S. Senate. No body has absorbed more crises and calamitous situations for the country; no body has stood up more times to be counted on the whole during tumultuous times as has this body.

I read a demonstration of that the other night, when one President of the United States lacked only one vote of being found guilty on impeachment charges before this body. That was well over 100 years ago. One vote made the difference, but that left the Presidency still standing. This writer thinks that that is the vote that turned history. Otherwise, the Presidency itself would have rapidly deteriorated with the ensuing years.

That was a critical time for our country, as I see it, not those years that led to the most unfortunate of all wars, not those 4 years of that conflict between brother and brother, but those so called reconstruction years when finally the people did pull things back together, under the leadership of the President. The office itself was saved and the President remained as the leader of the Nation for a while. Things finally pulled themselves around and we got together and moved on into the greatest era any nation has ever had. And we have withstood other tests since that time, though maybe not quite as grave.

As I said before, we are here from all different groups, representing all different kinds of people, different States, where the economy varies, but we have an understanding of the system and of each other. Then there are things that bind us together. I think more than anything else it is the economy. I thank God that it is still the concern of most every American, this matter of making a living. That is the thing that holds us together.

We pull for an economy where everyone will have a chance to make a living. I hope we go back and retrain some of our citizens whom I think we have neglected in not emphasizing that enough, that every able-bodied person is expected to eventually earn his own way. Therefore, he has to be trained to do something worthwhile and constructive. That catches on with the youth if it is emphasized enough.

We have not emphasized it enough lately, I think. It was emphasized when I was coming along, when many of you were. We did not fail to get the lesson, either.

What I am leading up to now is, here we propose to bring in an altogether different kind of Senator, elected, chosen by people that all live in a city—a very prosperous city. It did have the highest per capita income of any government unit or any State in the Nation. If it is not at the top now, it is very close to it, with all these fine people who work for the Government guaranteed an increase, automatically, in salary if the economy goes up and so forth, guaranteed almost certainly against inflation.

You send from that constituency, send in a person here. He is going to be a product of their thinking without the variety of ways of making a living and ways of living and somebody—Idaho, Utah, Mississippi—somewhere, many will be adversely affected in their way of making a living when we create these policies in the economy. There are many close votes here, many close votes in committees, many in full committee, many close votes on the floor of this body.

I think one of the most important votes we have ever had here—two that I remember—just one vote decided this matter. And they are coming in here without any knowledge of life or problems of those who live in small villages, those who live out on the land—poor land, rich land, middle-type land, anything else—without any knowledge of the problems of little towns, being city government, or small cities—just the large city. That is all they know, without a—well, there may be one or two; I do not know of them, but without any industry, you might say, relatively speaking, in this fine group of 700,000 people, without a small industry, without a large industry or anything in between that is appreciable.

What about out in the West? You know, the most important assignment I ever had in the Senate was the Appropriations Committee, rivers and harbors, water resources—harbors, dams, irrigation, flood control—creating mighty wealth. I mean by that the total production of those projects caused by wealth and was divided up among the landowners and the people, a better standard of living and the paying of more taxes.

All those kinds of things go to make up the economy. If these two men come in, how are they going to stand on many other matters?

How do they stand on soybeans? I just happened to think of soybeans. They will not know top, side, nor bottom, where to go or where to stop or where to stand on soybeans and other agricultural commodities. I mean this. I see these pivot votes in these committees and subcommittees and on this floor, year after year, many, many times over. That is no discredit, but we are going into a venture here with the District of Columbia—give them two Senators but no responsibilities of statehood to go with it, no responsibilities of any kind. Why not just give it to Pittsburgh, let them have more equality or more representation?

That is the first city I thought about there. There is no such thing as having absolute equality of citizenship, anyway, in selecting Senators. The Constitution deliberately made it so that there would be unequal representation, so there is nothing sacred here that is being violated. This is the system of government we have, ladies and gentlemen, and it has virtues and values and strength because of these fundamentals.

Now we open the door one time and we shall have to open it again. We shall have to open it again.

Let us not say, well, if it is that bad, the States will turn it down. We have no basis to perform our responsibilities by saying, well, let the States correct my error. I respectfuly submit, we are in grave error here—grave error—in making this change.

My goodness alive, let it be our firm, solid, best opinion, at least, and if that goes contrary to what I advocate, then, at least, the system has worked. But let us not say, well, here, we will not bother about that; the States can take care of the situation.

I believe this, that if the States get into the facts in passing on their responsibilities, they are going to say that we are not wanting to punish anyone in being short on the privileges that go with American citizenship; we are not wanting to take away anything that belongs to another; but, at the same time, we are interested in protecting ourselves; we have to know more about this thing and we are going to protect ourourselves.

Our economy is so bound up in what the Congress does. Presidents come and go, but the continuity of Government is through the legislative branch, the Congress. And you know we pass on grave matters of the economy here every day—too many, I think. Too many, but, at the same time, it is a part of our life and of all those segments of this great economy we have. The Government is in it and I think will continue to be in it and will be controlling.

So there is nothing in the way of economic advantages or anything like that the people in the District are missing. It is this political power without obligation of statehood that goes with it, and it is political power that rightly belongs to someone else under the Constitution, intended that way.

They had quite a debate about this matter as to what State, if any State, the Capital was going to be located in. I am not a stranger to that record, what record there is, of the Constitutional Convention. They argued back and forth as much on that as anything else, and they finally reached a decsion that it would not be in any State.

In think, Mr. President, that justice can be done, good can be done on this matter of citizenship without our having to surrender one of the basic structures of our form of government.

I know this, in one form or another, has been up before. It shows a concern that is an honest concern. But ways have been found to partly meet these situations already, and I am sure other ways can be found and will be found. But I say to my colleagues, let us not set the precedent of going altogether out of bounds here and bestow statehood, in effect, upon the District of Columbia and then in the next Senate say, "No, we didn't mean what we said, we take it back."

That language in here says "shall be considered for these purposes as a State."

We know that is hocus-pocus of a kind that does not say in bad faith, but that is trying to have the cake and eat it, too.

So if we really are going to do this thing and entitle it to representation here, let us make it a State. I would not advocate making it an outright State, but that is the only way we can do it and make it consistent.

Another thing, why do they have to have two Senators? Who figured that one out?

If they have to have someone here that has the power to vote, one Senator representing 700,000 people is more representation than many of the States—some of which belong to the original 13—have here.

Take Massachusetts. Quality makes up for some things, but they have only two good Senators. But New York, long time the most populous State in the Nation, only two Senators for 21 million people, I believe it is about that many, or more now. Two Senators. High quality, but representation on a per capita basis.

California now being a little more populous, I think illustrates the same principle.

So, why two Senators for these 700,000 people? Who did that? Who said, "No, two." I do not know.

But if it is not a State and it does not have a population more than this, I cannot see any conceivable basis for saying they will have two Senators.

The PRESIDING OFFICER. The Senator's 20 minutes have expired.

Mr. STENNIS. I thank the Chair.

Mr. SCOTT. Mr. President, I am glad to yield further time to the Senator.

Mr. STENNIS. I have another point and I will go into that later.

Mr. SCOTT. Mr. President, again I thank the Senator for his comments, the remarks he made about the Senate representing the States and referring to the population of the States.

My own State of Virginia has between 5.1 million and 5.2 million with two Senators. Each of us represent approximately 2.6 million people.

AMENDMENT NO. 3525, AS MODIFIED

(Purpose: To provide a means for filling vacancies in the representation of the District of Columbia in the Congress)

Mr. SCOTT. Mr. President, I call up my amendment No. 3525, as modified, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Virginia (Mr. SCOTT), for himself and Mr. WALLOP, proposes an amendment numbered 3525, as modified.

The amendment is as follows:

On page 2, between lines 10 and 11, insert the following new section:

"SEC. 3. When vacancies happen in the representation of the District of Columbia in the Senate or the House of Representatives, the Mayor of the District of Columbia shall issue writs of election to fill such vacancies, except that the Council of the District of Columbia may empower the Mayor thereof to make temporary appointments to the Senate until the people of the District of Columbia fill the vacancies by election as the Council of the District of Columbia may direct.".

On page 2, line 11, strike out "SEC. 3." and insert "SEC. 4.".

On page 2, line 13, strike out "SEC. 4." and insert "SEC. 5.".

Mr. SCOTT. Mr. President, the modification in the printed amendment only adds the words on page 2 after "empower the mayor thereof to make temporary appointments," the words "to the Senate", because as drawn he would have had the authority to make interim appointments to both the Senate and House. That would be contrary to the Constitution and this is a clarifying amendment.

I hope that after a reasonable time to debate the matter, the distinguished Senator from Massachusetts will not move to table. In fact, I hope that he will accept this amendment because it is an amendment that will remove some of the ambiguities that are in the resolution that is now before us.

The first portion of the resolution before us grants representation in the Congress, full congressional representation, to the District of Columbia. The second would provide for participation in the election of the President and the Vice President. The same that is true today, I believe, under the 23d amendment.

But we have not discussed the third phase, to any extent I am aware.

According to article V of the Constitution, it is necessary for three-fourths of the State legislatures to ratify a proposed constitutional amendment.

Mr. KENNEDY. If the Senator will yield, does the Senator have a copy of the amendment?

Mr. SCOTT. Yes. The amendment should be on every Senator's desk. It is amendment No. 3525 and the only modification is adding the words "to the Senate" on page 2.

Mr. KENNEDY. I thank the Senator.

Mr. SCOTT. Mr. President, I do not believe we have discussed the third phase to any extent, but, according to article V of the Constitution, it is necessary for three-fourths of the State legislatures to ratify a proposed constitutional amendment that has been approved by two-thirds of the Members of both Houses of the Congress.

At the present time, we have 50 States, of course. That means that it is necessary to have 38 States to ratify it. But in the event the District of Columbia is treated as a State and in the event the District of Columbia would be counted, that would make 51 States, counting the District of Columbia as a State, and three-fourths of 51 would mean we would have 39 States that would be necessary for ratification.

This is not a crucial point, but it is a matter that I believe is worthy to at least be considered.

The second section of the joint resolution before us refers to the exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of government as shall be provided by the Congress.

Now, that is subject to a second amendment that I would offer because by the people of the District constituting the seat of Government as shall be provided by the Congress, does the Congress under article I, section 8, having exclusive legislative jurisdiction, does it make the decision or do the people of the District of Columbia acting through their Council?

This raises a number of questions, but when we look at the 17th amendment to the Constitution, we find that when vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies.

Now, that is whether it is the House or the Senate. But the further words are provided:

Provided, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

Are we talking about the legislature of the District of Columbia, the City Council, which has been delegated some legislative authority? Are we speaking of the Congress of the United States, which has exclusive legislative jurisdiction, except as to the extent that it has been delegated?

I would modify that for the purpose of clarification, so that in each instance the people of the District of Columbia or the legislature of the District of Columbia would be the ones to make it rather than the Senate. If we are going to treat the District of Columbia, for the purpose of representation, as if it were a State, then it seems reasonable to me to add this. Otherwise, we have some very vague things in this joint resolution. If we should act favorably upon this, the State legislatures are going to raise these questions.

I know that we have two bodies of Congress, and I know that there is some concern about one body not accepting the bill in exactly the same way as the other body prepares the bill. I know that it is necessary to go to conference when that is not done. But it is much easier to go to conference now and work out an imperfection, to work out a clarification in a bill, than it is to send it to the legislatures of the 50 States for their consideration.

So my amendment would add a section 3:

When vacancies happen in the representation of the District of Columbia, in the Senate or the House of Representatives, the Mayor of the District of Columbia shall issue writs of election to fill such vacancies, except that the Council of the District of Columbia may empower the Mayor thereof to make temporary appointments to the Senate until the people of the District of Columbia fill the vancancies by election, as the Council of the District of Columbia may direct.

Then it just renumbers the other paragraphs.

Mr. President, it seems unreasonable to me for those who have expressed such concern about the people of the District of Columbia making decisions with regard to voting rights and human rights to retain something in a joint resolution that is as uncertain as this. This would specify that the legislature, insofar as this bill is concerned and the representation in Congress is concerned, would be the City Council; that they could empower the mayor to make interim appointments to the Senate.

Mr. President, I yield such time as he may consume to the distinguished Senator from Wyoming.

I might add that the distinguished Senator is a cosponsor of the amendment.

Mr. WALLOP. I thank my friend and colleague, Senator SCOTT.

I shall add my remarks to those of the Senator from Virginia. I hope that, by encouragement, the sponsors and the floor managers might think very carefully about accepting this amendment, partly from the standpoint of consistency and partly because I hate to see the Senate subside into a level where it refuses to think any longer about the subject matter before it and does not take seriously the arguments that are being made.

The Senator from Massachusetts knows that I am not enthusiastic about the form of the joint resolution presently before us. There are several other preferable variations with respect to enfranchising the people of the District of Columbia. Be that as it may, we now have House Joint Resolution 554 as the document upon which we will vote.

I hope that, in the interest of consistency and of the arguments that can be made in its behalf, the amendment might be considered seriously by the floor mangers, as an amendment which those who support this measure in the House would not find difficult in accepting.

Mr. President, during the course of the debate on House Joint Resolution 554, many amendments have been offered which would have provided alternative means for insuring the residents of the District of Columbia with representation in Congress. Without exception, the proponents of the measure have voiced strong opposition to these amendments, fearing that any significant substantive change in House Joint Resolution 554 would undermine its chances for timely approval by this Congress.

The amendment offered by the Senator from Virginia (Mr. SCOTT), and me will effect an important change in House Joint Resolution 554, but one which proponents and opponents alike should support as an improvement to the proposed constitutional amendment. This amendment fills the void left by House Joint Resolution 554 with respect to procedures for filling vacancies in the House and the Senate caused by the untimely deaths of the Senators and Representative(s) of the District of Columbia or for other reasons.

Section 1 of House Joint Resolution 554 provides that the District of Columbia shall be treated as though it were a State for purposes of representation in Congress. It makes no provision for the filling of vacancies in either the House of Representatives or in the Senate in the event of the death or the resignation of the elected members from the District. Our amendment fills that gap. In short, the amendment vests the local government of the District of Columbia—the Mayor and the City Council—with the constitutional authority to fill vacancies in District seats in Congress without either the influence of, or interference from, Congress.

There is clear and unmistakable need for this amendment. Article I, section 2, clause 4 of the Constitution provides:

When vacancies happen in the representation from any State, the executive authority thereof shall issue writs of election to fill such vacancies.

The 17th amendment to the Constitution provides:

When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: *Provided*, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

House Joint Resolution 554, by its very terms, does not make the District of Columbia a State for purposes of filling vacancies in Congress. Thus, the provisions of the Constitution cited above would not apply, and there would be no explicit guidance for filling seats left vacant by the untimely passing of the representatives and senators from the District of Columbia.

The other concern is that if I were a citizen of the District of Columbia, already concerned that I am not represented, I would not want to have my Senators and Representatives chosen by the Congress of the United States.

It would be irresponsible for this body to talk around the problem without ad-

dressing and solving it. The amendment we offer will avert future legal and constitutional questions should this proposed amendment be ratified and a vacancy in a District seat occur between scheduled elections.

A case in point: At present, Congress can veto any actions taken by the City Council. If the City Council were to appoint a Representative or a Senator to fill a vacancy in the House or Senate, respectively, would not Congress have veto power over the appointment? I suggest that it would. And under section 2 of House Joint Resolution 554, would not Congress be able to provide by legislation for a special election contrary, perhaps, to the wishes of the citizens of the District? Would not Congress be in the extraordinary position of influencing the selection of the District's congressional representatives? We seek to avoid this objectionable result by providing that the District, alone, shall fill vacancies in congressional seats. The Mayor and City Council of the District of Columbia shall provide for the interim replacement and subsequent general elections to fill vacancies. They shall do so free from Congress influence and not subject to Congress veto power.

Mr. President, I compliment the distinguished floor manager on the means, manner, and method by which he has defended this proposition in the Chamber. With respect to this amendment, I would call attention to the fact that he introduced the Senate version of House Joint Resolution 554, Senate Joint Resolution 65, on May 15, 1977 for himself, Mr. BAYH, Mr. BROOKE, and Mr. Humphrey. In that proposed amendment, they provided a section 2 which specifically relates, as does this amendment, to the problem of the replacement of Senators and Representatives in the event of vacancies in congressional seats from the District of Columbia. Their language was not dissimilar from ours, which says simply that when vacancies happen in the representation of the District in either the Senate or the House of Representatives the people of the District shall fill such vacancies by election.

The floor manager, sponsors, and other proponents of House Joint Resolution 554 have recognized the need to make provisions for filling vacancies in congressional seats for the District of Columbia. They have offered language on this point in Senate Joint Resolution 65. I suggest that the language of our amendment is a slight improvement over theirs in that it deals with the two distinctions that are found in the existing Constitution of the United States for the replacement of Members of the House of Representatives and Members of the Senate and I suggest it would be consistent with their previously stated positions to support this amendment.

Mr. President, in addition, I compliment the Senator from Virginia for drafting this. I think it is not a frivolous amendment in any way.

I also was stated as a cosponsor on another amendment of his, of which I generally approved. For the reason that I want to focus on this particular problem—the filling of vacancies in District of Columbia seats—I wish to ask unanimous consent that I may be permitted to withdraw as a cosponsor of amendment No. 3524 at this time.

The PRESIDING OFFICER. Is there objection?

Without objection, the Senator's sponsorship is withdrawn.

Mr. SCOTT. I thank the Chair.

Mr. WALLOP. I thank the Chair.

The Senator is proud and pleased to associate himself on amendment No. 3525 of the distinguished Senator from Virginia.

I hope seriously that the proponents will view this argument seriously and not move the Senate to a posture of cutting off further thought on the proposition before us because the thought is too serious and whatever we do here will last 100, 150, or 200 years. It seems to me the only responsible way to approach it.

I thank the Senator from Virginia for yielding to me.

Mr. KENNEDY. Mr. President, may I ask a question of the Senator from Virginia?

In section 3, line 3, when the amendment says "when vacancies happen," just when does this apply?

Mr. SCOTT. An incumbent Senator could die. That would be it. He could resign. We have had that within the Senator's recollection.

But under the same circumstances as appointments can be made by the Governor of a State upon authorization by the legislature of a State, and I believe that that is specified in article I of the Constitution. Let me just find it here.

Mr. WALLOP. The Senator is correct. In answer to the question posed by the Senator from Massachusetts, may I refer you to article I, section 2, clause 4, and the 17th amendment of the Constitution. Both of these constitutional provisions use the language "when vacancies happen."

Mr. SCOTT. Yes. The 17th amendment would be the preferable place. Let me find the 17th amendment and respond to the Senator. The second paragraph of the 17th amendment says:

> When vacancies happen in the representation of any state in the Senate,"

The word "happen" is used in the existing Constitution—

> The executive authority of such state shall issue writs of election to fill such vacancies provided that the legislature of any state may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

My amendment would only change the joint resolution to make it in compliance with the position of all of the States insofar as the filling of vacancies are concerned. We do not know just who will fill the vacancies because as the distinguished Senator knows under article I, section 8 full legislative power is vested in Congress. Would Congress, unless this amendment is adopted, authorize the Mayor of the District of Columbia to make the appointment, or would the City Council of the city of Washington authorize the Mayor to make the appointment?

This amendment says that the City Council of the city of Washington may authorize the Mayor to make an appointment to fill the vacancy and it clarifies it, and we do not have the uncertainty. That is the purpose of the amendment.

Mr. KENNEDY. Let me ask a second question. Does this language apply immediately after this amendment is ratified by the States? Under the language, vacancies would exist, but there has not been an election. Can the Senator specify whether his language would apply under that circumstance? Should not the first action be an election, instead of an appointment to fill the vacancy?

Mr. SCOTT. I would assume and for the——

Mr. KENNEDY. There would be vacancies in the representation in the Senate and the House of Representatives.

Mr. SCOTT. For the purpose of legislative history——

Mr. KENNEDY. The Senator offers the amendment to end the confusion of language in our constitutional amendment, and here on the face of his amendment, there is a confusion of language in the form of it.

Mr. WALLOP. Mr. President, will the Senator yield to me for 1 second?

Mr. SCOTT. I am glad to yield.

Mr. WALLOP. I suggest there is no more complication than there was in the Senator's own resolution. The unique problem for the moment between ratification and the first election would probably be best dealt with by appointments made in accordance with this amendment. However, if that is particularly troublesome. I am sure that language could easily be inserted in the amendment such that it would take effect only after the first elections.

Mr. KENNEDY. I do not know whether the Senator wishes to offer that as a perfecting amendment. I was listening to my friend from Virginia and the Senator from Wyoming talking about how our language was subject to different interpretations and how they were going to resolve these different interpretations. And then they offer an amendment which is subject on its face to different interpretations.

Mr. SCOTT. Mr. President, if the Senator will——

Mr. KENNEDY. Do I not have the floor, Mr. President?

The PRESIDING OFFICER. The Senator from Massachusetts has the floor.

Mr. SCOTT. I was asking if the Senator will yield.

Mr. KENNEDY. Just let me make a brief comment.

Mr. SCOTT. All right.

Mr. KENNEDY. And then I will be glad to yield.

This amendment is offered to deal with what will happen when vacancies occur. But there has been no amendment offered to establish the elections in the first place. It seems to me we are putting the cart before the horse. How will the District of Columbia establish the various congressional districts? How will it hold the first elections? There

should be at least a sense of order in offering amendments to clarify such details. The amendment deals with what is going to happen if there is a vacancy after an election.

It was for these reasons, Mr. President, that the issues were left for future action by statute. These issues can be resolved by subsequent legislation implementing the amendment.

Some kind of statute similar to this amendment may very well be agreed to in the future. It is not necessary that it be attached to the constitutional amendment.

But the legislative history ought to be very clear that the type of question about how the elections are going to be held, how vacancies are going to be filled, can be easily answered by statutes in the the future.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. SCOTT. What this amendment is attempting to do is to make the some provisions that are presently in the Constitution with regard to the States apply to the District of Columbia. There is nothing in the Constitution that refers to the first election of the Senators that the distinguished Senator mentions. I would assume that it would not be necessary or even desirable to have the mayor appoint the first Senators from the District of Columbia.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. SCOTT. If the Senator will let me complete my statement—it seems reasonable to me that once you have your Senators who are elected by the people, and then death occurs or somebody resigns, as has happened in this body since I have been in the Senate, and you have an emergency situation and you do not want a vacancy in the Senate, until the District of Columbia actually has some Senators they are in no worse position by waiting a short period of time and letting the people elect the original Members of the Senate, in no worse position than they are today.

I am glad to yield to my friend from Wyoming.

Mr. WALLOP. I thank my colleague.

I would like to direct a couple of questions to the Senator from Massachusetts along these lines. First, if what the Senator says about filling vacancies is actually true, why did Congress bother to pass the 17th amendment, to use this very same constitutional amendment procedure for filling vacancies in Senate seats?; second, why is it now so poisonous to the Senator from Massachusetts to entertain an important amendment as this one is when it was the Senators' own language in his own proposal that was introduced in the Senate, Senate Joint Resolution 65?

You know, it does not strike me that this will in any way, affect the likely outcome of the vote that will take place this evening. It is not proposed by this Senator as threatening that vote. It really is in all honesty trying to deal with an apparent problem in H.J. Res. 554.

Mr. KENNEDY. Well, Mr. President, I certainly grant the sincerity of my colleagues from Wyoming and from Virginia.

But I still say the language included in the amendment before us is vague. I understand what the Senator is trying to do, but the language is vague because it reads "when the vacancies happen." Does a vacancy happen after ratification by the States, but before the first election?

Mr. WALLOP. Mr. President, will the Senator yield?

Mr. KENNEDY. If I can just finish in reply to the comment of the Senator. The 17th amendment is a different situation, because in the 17th amendment we were moving to the direct election of Senators, at a time when the State legislatures chose the Senators. So we had sitting Senators at that time. That is quite a different situation.

Under the 17th amendment, State legislatures chose the Members of the Senate. We did have Senators who were serving and meeting their responsibility for the Senate. So it made sense to speak of vacancies.

In issues raised by the amendment are important ones, but they can be worked out satisfactorily by statute. It is not necessary to write them into the constitutional amendment. This amendment would require a conference with the House of Representatives, and I do not think such a charge is justified.

Mr. WALLOP. I assure the Senator that is not the intent of this Senator. I would work with him to see that such result did not take place.

But I wonder how——

Mr. KENNEDY. I yield to the Senator on his time.

Mr. WALLOP. I will ask the Senator one more question, if I may.

Mr. KENNEDY. Yes, just if the Senator could use his time.

Mr. SCOTT. I am glad to yield to the distinguished Senator.

Mr. KENNEDY. The other Senator has twice as much time as I have.

Mr. WALLOP. The only thing I would ask is why, when the proposed amendment would close a gap in the resolution with respect to filling vacancies, would the proponents of House Joint Resolution 554 move to table and defeat it? Surely the proponents who advocate enfranchising the District of Columbia voters do not wish to retain the authority to exercise the congressional veto power over the City Council of the District.

It just seems to me that is the worst kind of duplicity this Senate and Congress can involve itself in.

Mr. KENNEDY. The movement toward providing the right to representation has been a gradual and evolving process. I think important progress has been made. We have not resolved all the issues or all of the problems. The questions that have been raised here by the Senators can be resolved by statute. They do not need the constitutional amendment process.

Mr. WALLOP. I just have to disagree with the Senator. No one, and nobody, has construed the 17th amendment as being vague——

Mr. KENNEDY. Regular order, Mr. President.

Mr. WALLOP. Regular order? The Senator has the floor.

Mr. KENNEDY. The Senator has the floor and asks for the regular order.

The issues and questions on future elections can be worked out with the local authorities and Congress. It can be done by statute.

The irony is that those who say we are not granting enough authority to the District of Columbia are the same persons who are voting time after time and day after day against even providing them with the right to vote in the Congress and in the Senate of the United States.

Therefore, I move to table the amendment and I ask for the yeas and nays.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator withhold his motion?

Mr. KENNEDY. I withhold the motion.

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senator from Massachusetts be recognized at the hour of 2 p.m. to make his motion to table.

The PRESIDING OFFICER (Mr. MELCHER). The Chair would inquire to table what?

Mr. KENNEDY. The amendment which is before us.

Mr. WALLOP. Mr. President, I suggest the Senator does not have the floor for the purpose of moving to table the amendment but only to make a response to the question of the Senator from Wyoming, to answer his question.

Mr. SCOTT. Mr. President, could we resolve this question by permitting me to yield to the distinguished Senator from New Mexico who desires to speak on the matter and, I think that would give us some time and we would be right at the hour of 2 o'clock? Certainly the Senator has a right—I am sorry that he takes the position that he does—but he has the right to offer a tabling motion, and I will support his right to a rollcall vote at a later time.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on the motion to table at this time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. SCOTT. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. We have not resolved the question of whether there is a sufficient second. Let us see if there is.

There is a sufficient second.

The yeas and nays were ordered.

Mr. SCOTT. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. The Senator has that right.

Mr. SCOTT. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SCOTT. Mr. President, I yield the Senator from New Mexico such time as he may consume, not exceeding 20 minutes.

Mr. KENNEDY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KENNEDY. Do I understand that I will be recognized at 2 o'clock?

The PRESIDING OFFICER. There is a unanimous-consent request to that effect pending. Is there objection?

Mr. SCOTT. Mr. President, let me personally assure the Senator from Massachusetts that he will be recognized after the distinguished Senator from New Mexico finishes his remarks.

The PRESIDING OFFICER. Is the request withdrawn?

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. The request is withdrawn. The Senator from New Mexico is recognized.

AMENDMENT NO. 3505

(Purpose: To correct a typographical error in the twenty-fifth amendment)

Mr. SCHMITT. Mr. President, I call up my printed amendment No. 3505.

The PRESIDING OFFICER. There is an amendment pending at this time. It would require unanimous consent. Does the Senator ask unanimous consent to have his amendment considered now?

Mr. SCHMITT. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside, and the Senate proceed to the consideration of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, this amendment 3505 which I have sent to the desk is to correct a typographical error, and the humor of that will be apparent momentarily.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT) proposes an amendment numbered 3505:

On page 2, after line 12, insert the following:

"SEC. 4. The twenty-fifth article of amendment to the Constitution of the United States is amended by striking out 'department' in the second paragraph of section 4 and inserting in lieu thereof 'departments' ".

On page 2, line 13, strike out "SEC. 4" and insert "SEC. 5".

Mr. SCHMITT. Mr. President, on July 6, 1965, the Congress proposed to the States a constitutional amendment which, on February 10, 1967, was ratified as the 25th amendment. This amendment contains four sections. Section 1 states that the Vice President becomes President upon the death or removal of the President. Section 2 provides for the nomination and confirmation of a Vice President whenever there is a vacancy in that office. Section 3 provides for the Vice President to assume the duties of the President should the President declare that he is unable to discharge the powers and duties of his office. Section 4 is probably the most important and potentially the most controversial. This section provides for the removal of a President who is found to be unable to discharge his duties.

Since the ratification of the 25th amendment, section 2 has been invoked twice. Two Vice Presidents have been nominated by the President and confirmed by the Congress. Neither section 3 nor section 4 has yet been invoked. I hope, Mr. President, that it never becomes necessary to invoke these provisions. There is, however, a problem with section 4 in that it contains a typographical error which could, if uncorrected, pose some problems. Let me read the first paragraph of section 1.

Whenever the Vice President and a majority of either the principal officers of the executive officers of the executive departments or of such other body as Congress may by law provide, transmit to the President pro tempore of the Senate and the Speaker of the House of Represenatives their written declaration that the President is unable to discharge the powers and duties of his office, the Vice President shall immediately assume the powers and duties of the office as Acting President.

It is clear that the framers of this amendment intended that the Vice President and the majority of the Cabinet must make this determination, unless Congress decides otherwise.

The second paragraph, however, reads:

Thereafter, when the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that no inability exists, he shall resume the powers and duties of his office unless the Vice President and a majority of either the the principal officers of the executive department or of such other body as Congress may by law provide, transmit within four days to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office.

The difference, Mr. President, is that paragraph 2 refers to the "principal officers of the executive department" rather than "departments" as in paragraph 1. The intent of the framers was clearly that the Cabinet be considered in both cases. The typographical error, not detected until after ratification, could change the meaning in the second paragraph. It may be argued in the future that it was not an error but the intent of the framer.

Mr. President, while this provision of the Constitution may never be invoked, and I hope it will never be necessary to do so, I for one would not want any problems with interpretation should it become necessary. The courts would probably rule that the framers of this provision intended that the Cabinet should be involved in the decision-making and not some other body such as the senior staff of the White House. The White House could be considered the executive department and the senior staff could be considered the principal officers. Should it become necessary to invoke this provision, it would be a crisis situation. I would not want to open the process to unnecessary court challenges as to the intent of the framers.

It is for this reason, Mr. President, that I propose this amendment to House Joint Resolution 554. While I do not intend to introduce a joint resolution proposing a separate amendment to the Constitution to correct this error, if the Congress is considering an amendment, this correction could be added. This amendment would strike the word "department" in the second paragraph of section four of the 25th amendment and insert in lieu thereof "departments."

Let me emphasize that this amendment will not change any of the provisions of House Joint Resolution 554. It would not add or detract from the issue which we are discussing. Whether the District of Columbia should have congressional representation will stand or fall on its own merits. What I am proposing, Mr. President, is more in the nature of a technical amendment to the 25th amendment.

Mr. President, I hope that the Senate will adopt this amendment to this joint resolution and to every joint resolution proposing a constitutional amendment until the error in the 25th amendment is corrected.

Mr. President, there has been some concern expressed by Senators that the adoption of the amendment of the Senator from New Mexico would potentially force the entire D.C. representation back to the House of Representatives for their approval. The precedents, coincidentally, in this matter were set in the consideration of the 25th amendment, which the Senator from New Mexico is attempting to correct.

The House agreed to the conference report on this amendment on June 30, 1965. The Senate agreed to the conference report on July 6, 1965. Therefore, it would obviously be in order for this additional amendment provided here on the floor of the Senate to be treated and agreed to by the House in conference rather than requiring any vote by the full House.

Ratification, by the way, of the 25th amendment was completed on February 10, 1967, a delay of slightly under 2 years.

I might also add that if, in fact, it was desired to submit the amended joint resolution to the full House, there is, of course, precedent for that being done also, particularly, for example, in the consideration of the 22d amendment dealing with two terms for a President. In that case, that amendment passed the House on February 6, 1947. The Senate amended the proposed article. The amended article was passed by the House, as amended, on March 24, 1947, and subsequent ratification took place February 27, 1951.

Mr. President, I reserve the remainder of my time.

Mr. LEAHY. Mr. President, the Senator from New Mexico raises an interesting point on the issue of a typographical error. I for one, having seen that point raised, would want to go back and review the Constitution very carefully and see whether there might be other typographical errors, or what may appear at least to me as typographical errors. Having found any, assuming I did, I would much prefer to go to the Judiciary Committee and the Subcommittee on Constitutional Law and ask them to look into it in some detail.

I have just checked briefly with Senator BAYH on the matter that the distinguished Senator from New Mexico has raised. I can see much merit in the point he has raised here. I understand, however, that the hearing record perhaps runs into thousands of pages on that constitutional amendment; that the transcript of the proceedings and the records of the proceedings are voluminous and have been locked away for the last 10 years.

I understand from Senator BAYH that he is perfectly willing to have the subcommittee go back into the issue, dig out the material, and find out, indeed, if there was a typographical error, and then determine how best that typographical error can be corrected, if indeed there is one.

I would suggest to the Senator from New Mexico, that being the case, that the best way to handle it would be to let the Judiciary Committee go back through it. I do not think it would come down to any kind of ideological battle if there is a typographical error, but, rather, the sole question would be how best to correct it. I would hope that the Senator from New Mexico might withdraw his amendment and allow the Judiciary Committee, and Senator BAYH's subcommittee, to make some kind of determination, I would assume working with the Senator from New Mexico, first, is there a typographical error, and, second, should there be a typographical error, what is the best way to correct it?

Mr. SCHMITT. I appreciate the comments of the distinguished Senator from Vermont. It is my personal understanding, after having talked with the Senator from Massachusetts, that he had no problems with this amendment. Certainly to this Senator's knowledge, I think the Senator from Vermont will find, after conducting his own research, that this is the only known typographical error in the present official version of the Constitution. I do not think he will find any other errors if he looks. Any other errors, so-called, would be errors of substance rather than errors of a typographical nature.

I would submit to the Senator, based upon all the research that my staff and I have been able to do on this, there is, I believe, universal agreement that this is, in fact, a true typographical error. I think there is universal agreement among the legal profession that although there is no question as to the way the courts would rule in terms of legislative history surrounding the 25th amendment, that, nonetheless, there is an opening for a court test at a time when the Nation will be undergoing a very, very severe crisis. That potential I believe should be put to zero by a clear and unequivocal correction of the error which has existed. It is not something that this Senator discovered. It is something that many people have known about for some time. It is only my intention to assist the courts in having a clear and correct Constitution in front of them for any future consideration.

Mr. LEAHY. May I ask the Senator from New Mexico, based on his examination, if there are other ways of correcting a typographical error rather than adding it as an amendment to the matter before us now? My concern, of course, is that any amendment sends this matter back to conference at a time when we are facing the possibility of a recess of the Congress in mid-October, along with all the other matters presently before us. I wonder if it is a matter that can be settled somewhat more easily somewhere else. I agree with the Senator that it should be corrected. If it can be corrected somewhere else, this Senator from Vermont would much prefer that.

Mr. SCHMITT. This Senator would also prefer that, yet we are all dependent upon our own research, and I have found no indication in that research that there is any other constitutional means by which we can correct a typographical error. It appears it has to be corrected by another amendment to the Constitution. Unless some other accommodation can be worked out, I intend to offer this amendment to all other substantive amendments that are coming before this body. I think it is something we have to do.

Although it is highly unlikely that section 4 of the 25th amendment will ever be required, nevertheless at the time it is required it needs to be as clean as possible in terms of any court test of that amendment.

Mr. LEAHY. Again might I recommend to my friend from New Mexico that the amendment is now at hand and perhaps he should allow Senator BAYH and his subcommittee to look into the matter to try to determine another vehicle rather than this one as the way of correcting this, or to handle it as a matter solely by itself.

Mr. BAYH. Will the Senator yield?

Mr. LEAHY. I yield.

Mr. BAYH. I appreciate the astute observation of our distinguished friend from New Mexico. If he and my friend from Vermont insist, of course, we can hold hearings on this matter, but I believe, as the sponsor of that 25th amendment, I can remember rather vividly what happened. I can speak with some authority. We do not need to hold hearings to assess whether that is a mistake or not. It is a mistake. In fact, since the Senator is rightly concerned that there not be any misinterpretation of this, it is my humble judgment that that can be accomplished without cranking up the process of subsequently amending the Constitution to add an "s". We were talking about "departments." If one examines the document that passed the House and the Senate, it has an "s" on it.

If one looks at the legislative history and, of course, if it ever got to the Court and the matter were contested, the Court would look to the documents on their face as they passed the bodies, not look at the typographical error, in the judgment of the Senator from Indiana; and if, indeed, they were concerned about there being some ambiguity, then they would look to the legislative history. The legislative history is replete with a number of instances where the Senator from Indiana and others who were involved in that particular issue at the time discussed at length the reasoning for the Cabinet and who should be included in the Cabinet, and we enumerated it in some detail, to point out that we are talking about more than one department.

I should say to my friend from New Mexico, he has raised this in a manner which makes it impossible for us to reinforce our judgment on that. I do not know whether he has had a chance to look at the legislative history to see the debates that did take place, but I am certain that he will find that there are a number of instances where that matter is very clearly stated.

(Mr. HART assumed the chair.)

Mr. SCHMITT. Mr. President, I believe that we have certainly continued, by this colloquy, to assist the courts in their interpretation, should they be forced to interpret. But I must repeat that it is not this Senator's intention to force a court to interpret. I am trying to make sure that, in what is obviously going to be, if it ever occurs, a time of great trial, of great uncertainty, of crisis in this country, should we ever come to the point of needing to use section 4 of the 25th amendment, in fact, it does not have any potential for a court test, because that is the last thing the country will need under those circumstances.

I would also add, in a comment on the suggestion of the Senator from Vermont that maybe we ought to correct this by a separate amendment process: I think that not only would be unlikely that we would do so for a typographical error; it also, probably obviously, is completely unnecessary, because a noncontroversial correction of the Constitution should be able to be introduced on any amendment and certainly be a conference process.

I would see no possibility whatsoever that that would cause any significant delay in the consideration by Conference of House Joint Resolution 554 before the adjournment of the 95th Congress.

I do think that if the Senators—and I particularly wish the Senator from Massachusetts had not left the floor, because it was with him that I carried on my discussion—if the distinguished Senators on the committee would agree that when there is a Senate-initiated constitutional amendment under their jurisdiction and during their tenure in the Senate, they would agree to include this error on that amendment—I realize that part of the concern—and I understand that concern—is that we would force the present joint resolution back to the House or back to conference and there would be some delay. I am sympathetic with their concerns on this. If I could have some

kind of commitment from the committee that they would, on some other resolution initiated by the Senate, add this particular correction, then I would be happy to withdraw the amendment from further consideration.

Mr. BAYH. Let me just say, Mr. President, that I should be glad to consider that. We have other vehicles moving through here that might have less of a chance of being involved in a controversy at the end of the session. I think, realistically, that the Senator from New Mexico realizes that that is a problem right now. It is rather clear, at least to the Senator from Indiana, having been involved in that, that we are talking about a mistake. There is no question about that.

I think that, on reading the legislative history and the floor debates, where we go into some detail as to what "cabinet" means, what "executive departments" mean, there can be no question in any court's minds as to what this means. But I understand the concern of the Senator from New Mexico.

(Mr. MELCHER assumed the chair.)

Mr. SCHMITT. I am not quite sure I understand the remarks of the Senator from Indiana. I should be happy to consider it. This seems to be such a noncontroversial issue that some kind of amendment to include it on the next Senate-initiated joint resolution for a constitutional amendment would be appropriate. I was hoping that the Senator from Massachusetts—who, we anticipate, will be chairman of the Committee on the Judiciary next year, unless I am as successful as I hope to be in the 1978 campaign for my other colleague—that he would make that kind of commitment. This Senator would feel very secure about alleviating this potentially very serious situation at some time in the future.

Mr. BAYH. Will the Senator yield?

Mr. SCHMITT. I am happy to yield.

Mr. BAYH. Perhaps the Senator should get the permission of the Senator from Massachusetts, but I think I know him well enough, having been his colleague all this time and having been chairman of the subcommittee that has jurisdiction on this matter, that I think our minds would be of the same notion that certainly, as the Senator with primary responsibility for holding hearings in the initial stages, I would be glad to pledge efforts to add this to another constitutional amendment, if that sits well with the Senator from New Mexico.

Mr. SCOTT. Will the Senator yield?

Mr. SCHMITT. I shall yield. I want to thank the Senator from Indiana on that commitment.

I do yield.

Mr. SCOTT. Of course, I shall not be here during the next Congress, but I have served as ranking minority member on the subcommittee with the Senator from Indiana and I say to my friend from New Mexico that the distinguished Senator from Indiana runs the subcommittee. If one gets assurance from him, that is as good as an assurance from the prospective future chairman of the full committee, because the distinguished Senator from Indiana will hold hearings—I am satisfied he will. There is friendship and cooperation between the prospective chairman and the chairman of the subcommittee. I did not hear exactly what the Senator from Indiana said, whether he had made an unequivocal commitment or not, but if he did, I assume that the Senator can depend on it.

Mr. SCHMITT. I think the commitment was as unequivocal as any Senator is capable of making it, which always leaves a little bit of room for equivocation. I would do the same if I were in his shoes.

I do see the Senator from Massachusetts here. I think the committee obviously, on an amendment as noncontroversial as this one, would, under a Senate-initiated constitutional amendment, be almost certain to include it so that it would not cause any delay in the consideration of that amendment on the floor of the Senate or of the House.

I realize that that is the concern of the managers of the bill. I do not know whether the Senator from Massachusetts would like to add his second to that of the Senator from Indiana or not.

Mr. KENNEDY. Mr. President, I think the Senator from New Mexico has served a very important purpose. I understand that the Senator has the commitment of the chairman of the Subcommittee on the Constitution to address this issue. I shall certainly work very closely with the Senator from Indiana to see that this flow is remedied. I should be glad to work with the Senator from New Mexico.

Mr. SCHMITT. I am happy to hear that from the Senator from Massachusetts and I thank the Senator from Vermont for yielding. I withdraw the amendment.

The amendment was withdrawn.

Mr. SCHMITT. Mr. President, I yield the floor to the distinguished Senator from Virginia.

AMENDMENT NO. 3525, AS MODIFIED

Mr. SCOTT. Mr. President, we were discussing amendment 3525, as modified. I want to restate that what we are attempting to do is clarify the provisions of the joint resolution now before us, 554, so that we shall know that the legislature referred to is the Council of the city of Washington, rather than the Congress of the United States, and that we are following the language of the 17th amendment that applies to the States of the Union.

While I am opposed to the resolution, it just seems to me if we are going to have a resolution to be submitted to the 50 States for their consideration, we should have as little ambiguity as possible, and that is what I have attempted to do.

I am quite willing to have a vote at this time. I understand that the distinguished Senator from Massachusetts desires to move to table. I believe it is close enough to 2 o'clock for him to make his motion at this time.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I move to table the amendment.

The PRESIDING OFFICER (Mr. SPARKMAN). The question is on agreeing to the motion to lay on the table amendment No. 3525, as modified, by the Senator from Virginia (Mr. SCOTT). The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

The result was announced—yeas 69, nays 22, as follows:

[Rollcall Vote No. 344 Leg.]

YEAS—69

Bayh	Glenn	Metzenbaum
Bellmon	Gravel	Moynihan
Bentsen	Griffin	Muskie
Biden	Hart	Nelson
Brooke	Haskell	Nunn
Bumpers	Hatfield,	Packwood
Burdick	Mark O.	Pearson
Byrd,	Hathaway	Pell
Harry F., Jr.	Heinz	Percy
Byrd, Robert C.	Hodges	Proxmire
Cannon	Hollings	Randolph
Case	Humphrey	Ribicoff
Chiles	Inouye	Riegle
Church	Jackson	Sarbanes
Clark	Javits	Sasser
Cranston	Kennedy	Schweiker
Culver	Leahy	Sparkman
Danforth	Long	Stevenson
DeConcini	Magnuson	Stone
Dole	Mathias	Thurmond
Domenici	Matsunaga	Weicker
Durkin	McGovern	Williams
Eagleton	McIntyre	Zorinsky

NAYS—22

Baker	Helms	Stafford
Bartlett	Laxalt	Stennis
Chafee	Lugar	Stevens
Curtis	McClure	Tower
Garn	Morgan	Wallop
Hansen	Roth	Young
Hatch	Schmitt	
Hayakawa	Scott	

NOT VOTING—9

Abourezk	Goldwater	Johnston
Allen	Hatfield,	Talmadge
Anderson	Paul G.	
Eastland	Huddleston	

So the motion to lay on the table amendment No. 3525, as modified, was agreed to.

Mr. BUMPERS. Mr. President, I move to reconsider the vote by which the motion to lay on the table amendment No. 3525, as modified, was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, I ask unanimous consent that David Julyan, of my staff, be accorded the privilege of the floor throughout the remainder of today during votes and deliberations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I ask unanimous consent that Wayne Mehl and Ben Strong, of my staff, be accorded the privilege of the floor during the further consideration and votes on this resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. SCOTT. Mr. President, I ask the Chair's indulgence for one moment.

The PRESIDING OFFICER. The Chair recognizes the Senator from Virginia.

AMENDMENT NO. 3524

(Purpose: To assure the right of the people of the District of Columbia to implement provisions relating to representation in the Congress)

Mr. SCOTT. Mr. President, I call up my amendment No. 3524 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Virginia (Mr. SCOTT) proposes amendment numbered 3524.

On page 2, line 9, immediately after "and", insert a comma and the following: "to the extent not in conflict with the people of the District of Columbia,".

Mr. SCOTT. Mr. President, before Senators leave, I advise them that I only intend to take 5 or 6 minutes on this amendment, and I do ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on a motion to table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. SCOTT. Mr. President, my amendment is a very minor one. It is somewhat akin to the amendment that was just tabled. I think the amendment that was tabled was a good amendment. I believe that it tended to remove some vagueness that is in the resolution before us, and I realize that the floor manager of the bill does not want to accept any amendment, good or bad, because he does not want to go to conference on this resolution.

But I say to Senators that, if we have vague proposals to submit to the 50 States, there will be a whole lot more disagreement among the 50 States than if we go to conference on a minor amendment and get an agreement in the conference.

The chances of actually having an amendment become law is going to be greater if that amendment is unclear or is vague.

All the proposed amendment does that is before us right now, this amendment No. 3524, is on page 2 add a few words to section 2.

Section 2 of the joint resolution now before us reads as follows:

The exercise of the rights and powers conferred under this article shall be made by the people of the District of Columbia constituting the seat of Government, and as shall be provided by the Congress.

That leaves a little doubt. Is the decision made by the people of the District of Columbia or is the decision made by Congress?

We all know that under article I, section 8, exclusive jurisdiction rests with Congress. Yet certain legislative authority has been delegated to the City Council of the city of Washington.

This amendment is very much like the other, but not as important an amendment and not as long an amendment. It merely adds the words: "to the extent not in conflict with the people of the District of Columbia,".

So section 2 would read:

The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of Government—

And here is the insert—

and, to the extent not in conflict with the people of the District of Columbia—

End of insert—

as shall be provided by the Congress.

In other words, if we are going to give the people of the District of Columbia the right to elect two Senators, it seems to me we should not have any vagueness as to whether decisions are made by Congress or by the City Council.

To me it is a relatively unimportant amendment. I thought the other one was much more important. I believe we are going to have a lot of conflict among the 50 States by not agreeing to the prior amendment. I think this is also a good amendment. It does relieve some uncertainties, some ambiguity, but I see no point in my discussing the matter further. I am willing to have an immediate vote on the amendment or on a motion to table in the event the distinguished Senator from Massachusetts desires to pursue his motion to table.

Mr. KENNEDY. Mr. President, the Senator is quite correct. We considered the substance of this amendment yesterday in a previous amendment by the Senator from Idaho.

In many of the amendments ratified by the States, the power to implement those amendments was retained by the Congress, and for very good reasons. It would be unwise to guarantee the right to vote, for example, by a constitutional amendment, and then fail to give Congress the power to implement it, as we did with the Voting Rights Act. In the shaping of this proposed amendment, we retain the power to implement it in the Congress of the United States.

The Senator from Virginia would transfer that power to the District.

I believe that the power to implement this amendment should be retained in Congress. The implementation will be by statute. It will take a majority of the House of Representatives and the Senate of the United States. That is the sound way to do it. That is the appropriate way to do it.

We are not interested in cluttering up the Constitution with possibilities that may or may not occur in the implementation of the amendment. It seems to me to be wise policy.

Again, those who are offering amendments say we are not going far enough in showing confidence in the people of the District of Columbia in the management of their own affairs. Yet they make arguments, as we have heard in recent days, that we are going too far in giving them Members of Congress and Members of the Senate, or not giving them the responsibilities of statehood.

The current language I think is appropriate to this amendment. It is sound, and it follows constitutional precedents. Therefore, I move to——

Mr. SCOTT. Will the Senator withhold that?

Mr. KENNEDY. I withhold that.

Mr. SCOTT. Mr. President, there has been some discussion that prior to final summation of the arguments for or against passage of the resolution we go to some other business.

I wonder if Senators on either side of the aisle who might want to speak to any extent against the resolution would see me during the rollcall and let me know. Otherwise, I am inclined to agree with whatever manner the distinguished majority leader wants to handle the time for the next couple of hours.

I just make that request and before the Senator from Massachusetts makes his motion to table.

Mr. KENNEDY. Mr. President, I move to table the amendment.

Mr. ROBERT C. BYRD. Mr. President, I want to thank the distinguished Senator from Virginia for his consideration.

The PRESIDING OFFICER (Mr. GRAVEL). The question is on agreeing to the motion of the Senator from Massachusetts to lay on the table the amendment of the Senator from Virginia. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

The result was announced—yeas 76, nays 16, as follows:

[Rollcall Vote No. 345 Leg.]

YEAS—76

NOT VOTING—8

Abourezk	Goldwater	Huddleston
Anderson	Hatfield,	Johnston
Eastland	Paul G.	Talmadge

So the motion to lay on the table amendment No. 3524 was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SCOTT. Mr. President, I yield such time as he may consume, not exceeding 15 minutes, to the distinguished Senator from California (Mr. HAYAKAWA).

The PRESIDING OFFICER. The Senator from California.

Mr. HAYAKAWA. Mr. President——

Mr. SCOTT. Mr. President, may we have order in the Chamber, so that the distinguished Senator can be heard?

The PRESIDING OFFICER. The Senate will be in order. Senators will please cease their conversations or take them to the cloakrooms, so that the Senator from California may be heard.

The Senator from California.

Mr. HAYAKAWA. Mr. President, apropos of the legislation before us on voting rights for the District of Columbia, I would like to review in capsule form some facts about the growth of the District of Columbia.

It was a relatively obscure small town except for legislative purposes, and its first great spurt of growth came during the Civil War.

From that time on it was a much larger small town, but still a small town.

Then came World War I and the town grew very much larger. Then came the stock market crash of 1929, throwing the whole country into a huge depression. Then came the Roosevelt administration to do something about the depression. From 1933 onward we have had this enormous proliferation of the District of Columbia as the center of government and, therefore, as the center of population.

Washington continued to grow during the New Deal, and then on top of that came World War II. That again meant an enormous increase in the size of Washington, D.C., the number of people needed here, the number of administrative agencies, the number of procurement agencies, the number of military agencies, and so on. After that came the Korean war and the Vietnam war. Each of these added enormously to the population and the tasks in Washington, D.C.

Each of these required, as I say, not only additional legislators and all their staffs, but additional lawyers, additional lobbyists, additional people to implement the outcome of legislation and, of course, thousands upon thousands of bureaucrats and their families.

Most recently we have had the energy crisis. As soon as we had the energy crisis then, of course, we had the Department of Energy, with its $10 billion annual budget and its enormous bureaucracy.

In other words, there is a kind of fundamental conflict of interest between the District of Columbia and the 50 States if the 50 States undergo war, depression, a disaster of any kind. If a disaster is large enough, Washington automatically prospers. It is a fundamental conflict of interest, and disasters in the 50 States are, of necessity, and historically it is a fact, bonanzas for the District of Columbia.

Try to look at all this, then, from the point of view of the owner of property in the District of Columbia, the owner of an apartment building, a department store, a chain of grocery stores, a restaurant, a hotel. What would you want your Congressmen and Senators to do?

Well, actually, if, let us say——

The PRESIDING OFFICER. Will the Senator suspend? I hope Senators will show respect for their colleague while he is addressing the Senate.

Mr. HAYAKAWA. I thank the Chair.

As I was saying, Mr. President, suppose you were the owner of property in the District of Columbia, the owner of an office building, a department store, an apartment building, a restaurant, a chain of grocery stores, a hotel. What would you want your Congressmen and Senators to do? You would want, ultimately, of course, to see to it that the population of District of Columbia would continue to increase. Suppose there was some threat that it might be decreased? Suppose there was a measure before the House to dismantle the enormous HEW, the Department of Health, Education, and Welfare, and perhaps reduce its bureaucracy by half and send that other half out into the States, or fire them altogether? Suppose someone else were to propose a reduction of HUD or the Department of Energy so that these were cut in half?

These would be disasters from the point of view of Washington, but they would be a tremendous blessing to the rest of the country.

In other words, as I say, there is a fundamental conflict of interest between the welfare of Washington and the welfare of the rest of the States. Putting it as briefly as possible, the more disasters there are in the 50 States, the more prosperity there is in Washington, D.C. As a Congressman or Senator from the District, one would have to vote against any shrinkage of the District's economy if they have the best interests of their constituency at heart.

If they have the best interests of their constituency at heart, they would want more bureaucrats in Washington, more economists, more environmentalists, more lawyers, and more lobbyists to fight all of them.

So, fundamentally, as I say, the better things are for Washington, the worse things are for the rest of the country.

Let me repeat what I said a day or two ago when I emphasized the fact that the District of Columbia produces no wealth. We have no shoe factories or automobile factories; we have no fields of corn or wheat; we have no chicken farms; we have no cattle ranges; we have no mineral resources or stands of timber. The District of Columbia produces no wealth. It lives entirely on taxes imposed upon other States.

The distinguished Senator from Mississippi, whom I am happy to see on the floor, made this point earlier today, that there is no economic base for Washington other than the tax collected from other people.

Economically, the relationship between the District and the rest of the country is parasitical. Although the District of Columbia produces no wealth, Washington wallows in wealth. We have the highest salaries for comparable tasks in this city than anywhere else in the country. Nowhere else except in Alaska is the cost of living so high. The entertainment industry, the restaurant business, all sorts of subordinate or ancillary businesses are booming. Who pays for all this? The working people of Pennsylvania, California, Mississippi, Arkansas, Maine, South Carolina, Idaho, New Mexico—we are all paying for this. We are all paying tribute to this great Capital.

I shall not dwell upon the difficult constitutional problems presented by the legislation before us, by the proposal that the District of Columbia should have representation as a State in the Union. These constitutional problems have been adequately presented by others on this floor.

I would like to add, however, that the Founding Fathers foresaw these difficulties and, therefore, very carefully wrote into the Constitution that the District of Columbia should not have the powers of a State.

I believe, Mr. President, that this whole matter of race that has been dragged into this question is a red herring. The question is not whether the people here are predominantly white or predominantly black. By gosh, if Washington, D.C., were 85 percent Japanese-Americans I would still vote against the voting rights with the kind of legislation envisioned by the Senate at the present time.

It is entirely a question, in one respect, of economics, and, in another respect, of the Constitution and the intent of our Founding Fathers to create an enclave that does not have, because it is a nonproductive entity, the possibilities of pressure that any State has to have as a State. Since this is not a State, and was never intended to be, we should not treat it as such. I urge my colleagues to vote against this highly unconstitutional and highly pernicious piece of legislation. I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. SCOTT. Mr. President, the distinguished Senator from New Mexico did request 5 minutes' time, but I do not see him in the Chamber.

Mr. President, I am glad to yield to the distinguished majority leader.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the pending measure be set aside temporarily until no later than the hour of 4 p.m. so that the Senate can take up the CETA bill in the meantime and dispose of some amendments.

I yield to the distinguished Senator from Hawaii.

Mr. MATSUNAGA. I wonder if the good Senator from Massachusetts would yield me 10 minutes to speak on this measure.

Mr. KENNEDY. Yes, I am happy to yield.

Mr. ROBERT C. BYRD. Would the Senator be content with 8 minutes?

Mr. MATSUNAGA. Seven minutes will be fine.

Mr. SCOTT. Mr. President, reserving the right to object, and I do not intend to object, I wonder if the distinguished majority leader would indicate how the time would be allocated after we reconvene and make that part of his unanimous-consent request?

Mr. ROBERT C. BYRD. I frankly have not been keeping up with the time.

An hour on each side at 4 p.m. How will that be?

Mr. SCOTT. Would the time that the distinguished Senator from Montana has reserved be a portion of my time or would it be equally divided between the Senator from Massachusetts and myself?

Mr. ROBERT C. BYRD. The suggestion has been made that, when the Senate goes back in at 4, the time be equally divided, 1 hour to each side, on representation for the District.

Mr. SCOTT. Mr. President, if the time that is reserved at the present time by the Senator from Montana would be equally divided, and he does have 20 minutes at this time, so we would have 50 minutes left, I would have no objection.

Mr. ROBERT C. BYRD. Very well. That would give the Senator from Montana 20 minutes and each side would have 50 minutes remaining.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT ON DISTRIBUTION OF TIME

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, immediately following the remarks of the distinguished Senator from Hawaii, the Senate turn to the consideration of the Comprehensive Employment and Training Act and proceed with consideration of that measure until no later than 4 p.m. today, at which time, it will return to the D.C. representation amendment; that, at that time, Mr. MELCHER have 20 minutes, Mr. SCOTT have 50 minutes, and Mr. KENNEDY have 50 minutes, unless there is additional time and unless the Senate goes back on the representation amendment before 4 p.m.; in which case, such additional time will be equally divided between Mr. KENNEDY and Mr. SCOTT.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Hawaii is recognized.

REPRESENTATION OF THE DISTRICT OF COLUMBIA IN CONGRESS

The Senate continued with the consideration of the joint resolution.

Mr. MATSUNAGA. Mr. President, I rise in support of House Joint Resolution 554, a resolution proposing a constitutional amendment which would grant the District of Columbia full voting representation in the Congress, and, at long last, grant to the citizens of our Nation's Capital a full and equal voice on all issues of national concern.

Mr. President, some people may wonder why a Senator from Hawaii—a State nearly 5,000 miles away from Washington, D.C.— should feel so strongly that the District of Columbia should be granted full representation in the Congress as to speak in its behalf. For me, Mr. President, I stand in this historic Chamber in support of this resolution for the same basic reasons that I stood with the people of Hawaii two decades ago when they struggled to achieve statehood—for full voting representation in the Congress and equal rights as American citizens.

Mr. President, I believe that it is appropriate for me to speak on this matter at a time when Hawaii celebrates its 19th anniversary of its admission to the Union. As my colleagues know, we in Hawaii, prior to statehood, suffered the same injustices which the residents of the District of Columbia now suffer. We had virtually no voice in the Congress of the United States. We had a Delegate in the House of Representatives, who, like the Delegate from the District of Columbia, could not vote on the floor of the House. He had no effective voice, because he could not vote. We were not permitted in Hawaii to vote to elect the President and the Vice President of the United States. Even in the matter of running our local affairs, we were not entitled to elect our own Governor.

The residents of the District of Columbia, who are American citizens, subject to all the obligations of citizenship, do not have voting representation in the Congress. Only since 1964, with the ratification of the 23d amendment to the Constitution, have District residents—some three-quarters of a million citizens—been entitled to vote to elect the President and Vice President of the United States. Only since 1971, with the enactment of the District of Columbia Delegate Act, which I strongly supported as a Member of the other body, have the people of the District been represented in the House by a nonvoting Delegate. I might add that the distinguished Delegate from the District of Columbia, my good friend, WALTER E. FAUNTROY, has, since April 1971, vigorously represented his constituency as a nonvoting Delegate. However, his limited status in the Congress denies to the District what is at the very foundation of this Nation—full participation in the democratic process.

Mr. President, I have listened very carefully to the arguments being presented by the opponents of this resolution. Not once, to my knowledge, has any opponent of House Joint Resolution 554 denied the fact that some three-quarters of a million residents of the District of Columbia are being denied representation in their national legislature. This fact cannot be denied, it cannot be amended, nor will it just fade away. It is in my judgment, a glaring contradiction of the high principles of American democracy which we should no longer tolerate and no longer endure and ignore.

Mr. President, I do not have to remind my colleagues that a citizen's right to be represented in the Congress of the United States is no less precious than his right to free speech, free assembly, his right to privacy, and his right to due process under the law. The right of the people to be represented is the foundation of our constitutional form of government.

Accordingly, Mr. President, I do not believe that the Founding Fathers, the framers of our Constitution, intended to deny the citizens of the Nation's Capital equal representation in the Congress and equal participation in the democratic process. To believe that this was their intention would, in my judgment, be contrary to the simple concept of representative government which is the cornerstone of our Constitution. I am sure that the existence of a large, permanent population supporting all three branches of the Federal Government and living in the District of Columbia was not anticipated by the Founding Fathers. I might point out, however, that the framers, men of great wisdom without a doubt, built into the Constitution a process through which the Congress and the States could amend that document so that we could meet circumstances unforeseeable in their time.

I would like to add one final note, Mr. President. I have, in speaking on this issue today, indicated that my State of Hawaii, prior to becoming a State, suffered the same injustices now suffered by the District of Columbia. The people of Hawaii, who were eager to share in the benefits of statehood and participate equally in our democratic government, overcame all obstacles to admission to the Union. One of the primary reasons why we overcame them was the great record of service which the members of the 100th Infantry Battalion and the 442d Regimental Combat Team, of which both Senator INOUYE and I were members, many of whom were Japanese-Americans from Hawaii, established in World War II.

With respect to the people of the District of Columbia, they, too, have proudly and honorably fought in defense of our country. As the distinguished Senator from Massachusetts (Mr. KENNEDY) pointed out in the opening day of debate, 237 citizens of the District lost their lives in the Vietnam war. In effect, the District sacrificed more lives in that war than 10 other States. However, while every State during the Vietnam period had a voice in the decisions that affected the lives of thousands of their citizens who went to war, the District of Columbia had no such representation, no such voice in the Congress.

Mr. President, it behooves us as a nation and as a people dedicated to the protection of the rights and liberties of every individual, to remedy this in-

justice. We have before the Senate today a chance to set in motion the constitutional process that will allow us to do just that. We must no longer deny or ignore our responsibility to the three-quarters of a million citizens of the District of Columbia. We must no longer withhold from them the fundamental right of equal representation in the Congress, particularly at a time in the history of our Nation when that legislative body holds such a profound and growing influence on so many aspects of American life.

For this resolution to come this far and to fail in the Senate would be, in my judgment, unconscionable. Indeed, Mr. President, future Americans will little note, nor long remember what we say in this Chamber today; but if we do not find the courage to rise above political pressures, abandon partisan politics, and vote to send this important constitutional amendment to the States for ratification, they will never forget the injustice that we did here.

Mr. President, I reserve the remainder of my time.

● Mr. HASKELL. Mr. President, I would like to add my support to this very vital issue affecting both the human and civil rights of over three-quarters of a million citizens of these United States.

The enactment of House Joint Resolution 554 is essential to provide fair representation to the residents of the Nation's Capital. This is truly an amendment whose time has come.

During these past few days of floor debate on this issue some have argued that it was not the intent of our Founding Fathers to allow the citizens of the "Federal city" the right to vote. I must strongly question this reasoning; the framers of the Constitution established the ground rules for a new nation in 1776, they provided us with the principles, the basic ingredients needed to shape the future. They had no crystal ball, they could not foresee the Washington, D.C., that exists today; a city with a population larger than 10 States, whose residents have fought and died in every war since the War for Independence, and a city whose residents pay over a billion dollars annually in taxes to the Federal Treasury.

The basic principle of our Founding Fathers was representative democracy. What could be more consistent with that goal than the enfranchisement of the 760,000 citizens of Washington, D.C., into our Federal legislative process?

I will cast my vote today in favor of this amendment with two very important beliefs of our Founding Fathers in mind; "governments are instituted among men, deriving their just powers from the consent of the governed," and "no taxation without representation." I interpret this to mean that all citizens of these United States who pay taxes, who fight in our wars, and who carry the same burdens of citizenship, should have fair and equal representation in the Congress.

I believe it is time to put an end to the existing inequity within the democratic process. If we pass this amendment today our work will not be over, for we must encourage our State legislators back home to see the issue as clearly as we have and to speedily approve the measure within their legislative bodies.

This is an important day for not only the residents of the District of Columbia but for all of us, because the passage of this amendment today will provide an example of the adaptability of the democracy to the needs of the people. It is, in short, a tribute to the vitality of our governmental process.●

● Mr. BURDICK. Mr. President, I am in opposition to House Joint Resolution 554. I am in favor of representation for the District, but the resolution we are about to vote on providing for the election of two Senators from the District of Columbia would result in an unequal and unfair distribution of congressional power. Therefore, I am compelled to vote against House Joint Resolution 554.

The history of the Constitutional Convention shows that the Founding Fathers approved a two-Chamber legislature for a reason. The Members of the House of Representatives were to represent the people as individuals, and the Members of the House were to be elected proportionate to the population. The Senate, on the other hand, derives its powers from the States, as political and coequal societies, and these are represented on the principle of equality in the Senate. This was a compromise between the large populous States and the more sparsely settled agricultural States.

Applying these principles, we find that Washington is entitled to be represented in the House of Representatives proportionate to its population. This entitles Washington to two representatives on the basis of present population. The city of Washington does not qualify for representation in the Senate, because it is not a State, nor does it have the land mass or diversity that would qualify it for a State. It could well be argued, if the resolution is approved, that the New Yorks, the Chicagos, and the Detroits should likewise be represented by two Senators.

The citizens of Washington should have representation in the Senate, and this can be accomplished by annexing the District to the State of Maryland. When the District was formed, it was carved out of Virginia and Maryland. A portion of the District which composed about one-third of the area of the original District was reunited with Virginia in 1840. The citizens of that area now vote in Virginia. This is a precedent for the remaining two-thirds of the original District to rejoin the State of Maryland. Then the citizens of the District will have all the voting rights of the citizens of Maryland.

If this resolution should pass, the citizens of Washington would have a disproportionate voice in the Nation's affairs, which is greater than any other State. I cannot support a proposition that provides for this unequal representation.●

COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1978

The PRESIDING OFFICER (Mr. HOLLINGS). Under the previous order that the pending measure be set aside, the Senate will proceed to the consideration of S. 2570, the CETA bill.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2570) to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Human Resources with an amendment in the nature of a substitute.

Mr. MELCHER. Mr. President, I ask unanimous consent that Mary Gereau of my staff be granted privilege of the floor throughout this bill and the District bill and the votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I ask unanimous consent that Jim O'Connell of my staff be granted privilege of the floor during debate and voting on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Letitia Chambers and Eileen Winkelman of my staff be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I ask unanimous consent that the following staff members be granted privileges of the floor during consideration of S. 2570, the Comprehensive Employment and Training Act Amendments of 1978: Scott K. Ginsburg, Joan Hunziker, Babette Polzer, Stephanie Smith, Craig Polhemus, Marianne Anders Benson, A. Bradley Mims, Tom Lindsley and Martin Jensen.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I introduced legislation (S. 2570) with Senators WILLIAMS, JAVITS, HATHAWAY, RIEGLE, KENNEDY, and CRANSTON on February 23, 1978, on behalf of the administration to revise and extend the programs authorized by the Comprehensive Employment and Training Act of 1973 (CETA). This legislation was thoroughly considered by the Senate Human Resources Committee, and was unanimously reported favorably to the Senate by the committee on May 15, 1978.

S. 2570 reauthorizes the CETA programs for a period of 4 years except for certain youth programs which are reauthorized only through 1980. This legislation contains many of the initiatives set forth in the administration's bill as well as other necessary amendments to the CETA programs.

The CETA legislation authorizes a number of separate programs. CETA programs include: grants to prime sponsors—generally units of local and State governments—for comprehensive employment and training services including public service jobs; the Job Corps; youth programs; and the National Manpower Commission. Each of these programs now

is authorized by the CETA legislation. The legislation pending before the Senate, S. 2570, includes two major initiatives requested by the administration: a 2-year $400 million initiative to increase the involvement of the private sector in endeavors relating to employment and training activities for economically disadvantaged persons, and a $200 million demonstration program to test the efficacy of various employment programs for welfare recipients. Both programs were requested by President Carter.

THE PRIME SPONSOR SYSTEM

Prime sponsors are units of State and local government responsible for administering CETA programs within their communities. States may act as balance-of-State prime sponsors for smaller areas within their boundaries that are ineligible to become prime sponsors. Cities or counties with populations of 100,000 or more are eligible to become sponsors. Any combination of units of general local government may be designated as a prime sponsor so long as it includes any unit of general local government which has a population of 100,000 or more. Any unit of general local government or any combination of such units without regard to population, which in exceptional circumstances is determined by the Secretary to have a special capacity for carrying out CETA programs within certain labor markets, or rural areas with high unemployment may serve as a prime sponsor. Finally, the act provides that a limited number of concentrated employment program grantees which serve rural areas with high unemployment and have demonstrated special capabilities for carrying out employment and training programs in these areas may be designated as prime sponsors.

The number and distribution of prime sponsors among the various categories for the current and preceding 3 fiscal years is indicated below:

	Total	Cities	Counties	Consortia	Rural CEP's	Balance of States	States consortia
Fiscal 1975	403	58	156	134	4	51	
Fiscal 1976	431	62	175	140	4	50	
Fiscal 1977	444	55	179	145	4	51	
Fiscal 1978	447	67	187	138	4	43	8

Since its inception in 1973, CETA has become a major Federal program that significantly impacts on the Nation's economy. In fiscal year 1978 it is estimated that $9.9 billion will be spent on CETA programs: $2.5 billion will be spent on comprehensive employment and training programs other than public service jobs; $1.2 billion will be spent on youth programs; $5.9 billion will be spent on public service jobs program; and $320 million will be spent on the Job Corps.

For fiscal year 1979, the President has requested approximately $10.8 billion for the CETA programs, and it is estimated that $11.4 billion will be expended. This money will be spent as follows: $3.1 billion for comprehensive employment and training programs; $1.9 billion for youth programs; $6.1 billion for public service jobs programs; and $326 million for the Job Corps. A more detailed analysis has been prepared of the previous and proposed authorization levels and the appropriations under the CETA legislation, and it will be included in the RECORD at the conclusion of my remarks.

CONSIDERATION OF LEGISLATION

The Senate Human Resources Subcommittee on Employment, Poverty, and Migratory Labor held 8 days of hearings on the reauthorization of CETA. The subcommittee held 5 days of hearings in Washington, D.C., and 3 days of field hearings.

The subcommittee received testimony from congressional and administration witnesses, from public and private interest groups including representatives of counties, Governors, labor unions, community-based organizations, client groups, vocational education organizations, as well as from the Chairmen of the U.S. Civil Rights Commission and the National Commission for Manpower Policy. Witnesses from the Chamber of Commerce, the Business Roundtable, the Committee for Economic Development, and the Chrysler Institute testified before the subcommittee concerning their views on the role of the private sector in CETA.

During the hearings several specific areas of concern were raised by a number of these witnesses. Testimony focused on the need for greater targeting of resources on structurally unemployed persons, abuses relating to the administration of CETA funds, the need to increase private sector involvement in CETA and facilitate the transition of CETA participants into regular public employment and private sector jobs, and the importance of maintaining a countercyclical public service jobs programs.

S. 2570, as reported by the Human Resources Committee, addresses each of these concerns as well as many issues which have been raised about the CETA programs.

PROGRAMS FOR THE STRUCTURALLY UNEMPLOYED

A major focus of the committee's reauthorization of CETA is the increased emphasis on employment and training programs for hard-core unemployed persons.

The decline in unemployment during the past 19 month has reduced the overall unemployment rate. The Bureau of Labor Statistics reported that the overall unemployment rate on January 1977, was 7.4 percent. The unemployment rate in July 1978, was set at 6.2 percent, representing a reduction of 1.2 percent unemployment over this time period. The unemployment rate among adults—aged 20 and older—was 7.4 percent in January 1977; it now stands at 5.7 percent. Among adult men, the unemployment rate in January 1977, was 5.8 percent; it now stands at 4.1 percent.

Despite these declines in unemployment, the problem of structural unemployment—especially among minorities and youth—remains. Individuals in this situation face special difficulties in obtaining meaningful employment even in the best of economic circumstances.

An examination of the July figures makes clear that the unemployment rate, which is a national average, conceals vast differences among subgroups of the population.

The unemployment rate for blacks and other minorities was 12.5 percent in July, more than double the 5.3 percent level for all whites. Adult black males experienced an 8.4 percent unemployment rate; 11.6 percent of adult black women were out of work.

Women had a more difficult time finding work than men did. The adult female unemployment rate was 6.5 percent, compared with 4.1 percent for men.

Teenagers faced the worst unemployment problems of all. The unemployment rate for those aged 16-19 was 16.3 percent, as against a 6.2 percent rate for everyone 16 and over. The 16.3 percent rate represents a good deal of deterioration from the situation in June, when 14.2 percent of youths were jobless.

The expansion of employment programs for the hard-core unemployed—those who are economically disadvantaged because they have difficulty in obtaining and retaining a job—was supported at the subcommittee hearings by the administration, public and private interest groups, economists, community-based organizations, client groups, and the business community. The reduction of structural unemployment was a primary focus of the legislation proposed by the administration to amend CETA and is consistent with the goal President Carter set forth in the 1978 annual employment and training report of the President to reduce "structural elements of general unemployment" over the next 3 years.

In its third annual report to the President and the Congress, The National Commission for Manpower Policy also recommended that:

> CETA should serve primarily as an employability development machanism to assist the structurally unemployed to improve their prospect for regular employment and to increase their earnings.

This strong public and private sentiment for expanding opportunities for the hard-core unemployed is reflected in title II of S. 2570—comprehensive employment and training services.

Title II, part B, provides comprehensive services economically disadvantaged persons, including job search, outreach, supported work programs, education and institutional skill training, on-the-job training, work experience, and a whole array of employment services. These

services are now provided under title I of current law.

The formula distribution of funds for these services also parallels current law. The formula provides: of the amount available for distribution by formula, 50 percent is allocated to each State on the basis of the State's manpower allotment for the preceding fiscal year compared to the sums received by all States for these activities in that year; 37½ percent is allocated to States on the basis of the relative number of unemployed persons residing within the State compared to the number in all States; and 12½ percent is allocated to each State on the basis of the relative number of adults in low-income families residing within the State compared to the total number in all States. Not less than $2 million is to be set aside for distribution to the U.S. Trust Territories, Guam, the Virgin Islands, American Samoa, and the Northern Marianas.

Under current law, 80 percent of funds available for these activities is distributed by formula. S. 2570 provides that 85 percent of the funds available for these title II activities is to be distributed by formula. Of the remaining amount, 5 percent is to be available for vocational education assistance; 1 percent is to be available for operation of the State employment and training councils; 1 percent is to be available for States to establish linkages between prime sponsors and educational agencies providing training programs; 4 percent is to be available for the Governors' coordination and special services responsibilities under section 105; and, the remainder of funds is to be available for discretionary distribution by the Secretary of Labor.

These title II activities require as a condition of eligibility that the participant be economically disadvantaged. Eligibility for these programs is limited to persons who are underemployed, unemployed or in school youth, and who are also economically disadvantaged. Economically disadvantaged persons are defined as individuals whose income or whose family income annualized over the preceding 6 months does not exceed 70 percent of the BLS lower living standard income level; persons whose families receive cash welfare payments under a Federal, State, or local welfare program; a foster child on behalf of whom State or local government payments are made; or, in cases permitted by regulations of the Secretary, an individual who is or was institutionalized in a prison, hospital, or similar institution and faces employment barriers as a result of that institutionalization, or is a client of a sheltered workshop.

Title II, part D, authorizes a public service employment and training program for economically disadvantaged persons who have been unemployed for 12 weeks or more.

Wages authorized for public service employment positions have been limited to minimize the possibility of attracting workers from low wage jobs to CETA positions. This wage limitation also will serve to maximize the number of persons who will be able to participate in the program. The maximum wage a person may receive for a public service employment position under title II is $10,000, adjusted upward to $12,000 in high wage areas. Contrary to present law, prime sponsors may not supplement wages under the title II public service jobs program.

Salary limitations will help to prevent the use of CETA funds to finance highly paid skilled or professional positions. It is the committee's intent that the title II public service jobs program primarily be used to finance entry level positions for persons who, due to a lack of education, training, work experience, or other employment barriers, are unable to obtain unsubsidized employment.

Under the title VI countercyclical public service jobs program, a participant may receive a maximum wage of $14,400 in a high wage area. This includes limited supplementation of $2,400 by the prime sponsor paid from local resources. The disparity in wages between public service employment performed under titles II and VI is necessitated by the fact that prime sponsors are expected to serve two discrete client groups. Under title II, structurally unemployed persons with few job skills will be served. Under title VI, countercyclically unemployed persons who have employment skills but who cannot find a job because of economic conditions are to be served. Countercyclically unemployed persons generally have work experience and job skills which make them capable of holding a more skilled job than a structurally unemployed person. Thus a higher total wage is available to persons holding a title VI public service employment job.

For public service employment for the structurally unemployed under part D, the committee adopted a different allocation formula than for public service employment under title VI.

The committee bill provides that 85 percent of the funds available for part D are to be distributed by formula. Not less than 2 percent is to be allocated to Native American entities. The remaining amount is available to the Secretary for his discretionary distribution to prime sponsors and Native American entities.

Of the amount distributed by formula, funds are allocated to prime sponsors in the following manner: one-third on the basis of the relative number of unemployed persons who reside in areas within the jurisdiction of each applicant as compared to the number of unemployed persons who reside in all such areas in all States; one-third on the basis of the relative excess number of unemployed persons—the number in excess of 4½ percent—who reside in areas within the jurisdiction of the applicant as compared to the excess number of unemployed persons who reside within the jurisdiction of all prime sponsors; and one-third to prime sponsors on the basis of the number of unemployed persons residing in areas of substantial unemployment—an area with an unemployment rate equal to or in excess of 6½ percent—within the jurisdiction of the prime sponsor compared to the number of unemployed persons residing in all areas of substantial unemployement.

In the past, CETA participants have shuffled through one CETA program after another without the benefit of knowing what employment prospects they can expect upon termination from the CETA programs. To change this situation, S. 2570 requires that an employability plan be developed for each title II participant. This is expected to help guide the prime sponsor and the participant to select the most appropriate array of services for each participant. The individual's interests, skills, career objectives, as well as the supportive services necessary for each participant should be considered in formulating the plan. Participants should be provided with a realistic assessment of the likelihood of obtaining regular public employment or private sector employment upon completion of CETA services.

The committee bill also requires that appropriate training and supportive services accompany all work experience and public service employment programs under title II. A training requirement is important to assure that CETA positions are not simply "make work" projects, but actually provide the individual with a marketable skill. The supportive services requirement will provide prime sponsors with an important tool for helping structurally unemployed persons become better prepared for labor force participation. Often a person is unemployed because he needs job-related services which he cannot afford. For example, transportation, child care, or career guidance services may be significant impediments to employment for persons who are unable to find work. These are the kind of services which are authorized to assist hard-core unemployed persons to become prepared for work.

The preparation of the structurally unemployed for regular public or private employment is neither an easy nor an inexpensive process. However, such an investment benefits both society and the individual. The attainment of self-sufficiency for economically disadvantaged persons not only decreases the need for public assistance, but also enhances the human resources available to many families and communities.

COUNTERCYCLICAL JOBS PROGRAM

In many areas of the country, the current public service jobs programs have been very controversial. A variety of reasons account for this. Some prime sponsors have used CETA positions to return political favors or to create extremely high salaried professional and administrative positions. The substitution of Federal manpower dollars for local revenues used to support regular municipal employees is another problem that has been brought to the attention of Congress and the public. Indeed, a recent study by the Brookings Institute estimated that there is a substitution of CETA funds for State and municipal revenues at an average rate of about 20 percent. In other instances, public service jobholders have engaged in "make work" jobs, and are not receiving the kind of job training or valuable job experience that makes the Federal expenditures worthwhile.

Despite these current problems, the

Human Resources Committee voted to retain a countercyclical job program which is contained in title VI of S. 2570. The committee believes that a countercyclical employment program is necessary to deal with unpredictable economic conditions that may bring about the situation in which many workers lose their jobs and are in need of employment.

Some areas of the country have not fully recovered from the recent economic slump and need a residual public service jobs program to assist them in their efforts to reduce unemployment. Indeed, witnesses pointed out at hearings on the CETA program that the dual problems of structural and countercyclical unemployment are intricately related. It was noted by these witnesses that it is not possible to solve the problem of structural unemployment when more skilled and experienced workers also are seeking gainful employment.

Given this background, two points respecting the current and proposed countercyclical jobs programs should be made. First, the current public service jobs programs, as well as the other CETA jobs programs such as the youth employment programs, have assisted in reducing unemployment. Second, the committee bill—S. 2570—significantly modifies the current public employment programs to attempt to eliminate many of the problems confronting the CETA programs.

Mr. President, the CETA programs have been responsible for assisting thousands of workers to return to work. Some 750,000 persons were employed in the public service jobs programs as of March 1978. This represented a buildup from a level of 310,000 in January 1977. During the comparable period of time, the unemployment rate declined from 7.4 percent in January 1977, to 6.2 percent this past July. This reduction in unemployment occurred at the same time that an additional 5 million persons joined the labor force.

Though the exact impact CETA has had upon this declining unemployment rate is difficult to measure, Secretary Marshall and other prominent economists have credited the public service jobs programs as a "critical factor" in this reduction. Secretary Marshall also has stated that in order to keep unemployment under 6 percent during 1979, a full-scale public service jobs program is needed.

This legislation reported to the Senate by the Human Resources Committee provides the authority for a countercyclical—title VI—and a structural—title II—public service jobs program.

The title II and title VI programs each authorize appropriations of "such sums as may be necessary." This will allow the Budget and Appropriations Committees, in conjunction with the Human Resources Committee, to establish the appropriate levels for public service jobs depending upon future economic circumstances. However, S. 2570 provides that the first $3 billion to be spent on public service jobs is to be used for the title II public service jobs for the structurally unemployed. This will insure that Federal resources are applied first to structural employment problems, which have proven to be severe under all economic circumstances.

Eligibility for the title VI program is restricted to persons who have been unemployed 45 days or longer and whose family income over the preceding 3 months, which when annualized, does not exceed 85 percent of the lower living standard income level as compiled by the Bureau of Labor Statistics. Program participation is limited to 1 year within a 5-year period, though it may be extended for a period of no more than 6 months in areas of high unemployment. Under current law, a person may participate in CETA programs for an undefined period.

S. 2570 also changes current law by restricting the total wages which may be paid to a title VI participant. Current law does not impose any restrictions on the total wage that can be paid to a public service jobholder. A maximum Federal wage base of $10,000 is provided in S. 2570, which can be adjusted up to a level of $12,000 on the basis of a wage index. Thus, high wage areas will have a higher Federal wage base than low wage areas. Supplementation of the Federal wage base by local resources equivalent to 10 percent of a prime sponsor's title VI allocation is authorized. However, no individual may have his Federal base salary supplemented by more than 20 percent. Thus, in the highest wage areas, the maximum wage a title VI participant may receive is $14,400—a maximum Federal wage of $12,000 plus the maximum local supplement of $2,400.

In 1976, the Congress adopted a provision to the CETA statute that established a national average wage for public service jobholders of $7,800 per year. The purpose of this national standard is to maximize the number of persons served by the CETA programs.

S. 2570 continues to provide for a national average wage standard, while also providing that local area average wages may be adjusted on the basis of a local wage index.

S. 2570 provides that federally supported wage rates for public service jobholders under both titles II and VI may not exceed a national average of $7,800 per year. This national average is adjustable to an area-by-area basis in accordance with an area wage adjustment index. This wage adjustment index is to be determined by comparing average wages in regular public or private employment in a given area with the average of such wages in all such areas. This will assure that the average wage paid in any area of the country is not excessively high compared to wages paid for regular private or public sector employment in that same area.

The Committee bill retains the same formula for title VI as the one used for title VI in the current law, except that 85 percent rather than 90 percent of all funds available are to be distributed by formula.

S. 2570 provides that not less than 85 percent of the amount available for title VI is to be allocated to prime sponsors in accordance with the following formula: 50 percent is allocated on the basis of the relative number of unemployed persons who reside in areas within the jurisdiction of each prime sponsor compared to the number of unemployed persons who reside in all such areas in all States; 25 percent is allocated on basis of the number of unemployed persons residing in areas of substantial unemployment—areas with an unemployment rate equal to or in excess of 6½ percent—within the jurisdiction of the prime sponsor compared to the number of unemployed persons residing in all areas of substantial unemployment; and, 25 percent on the basis of the relative excess number of unemployed persons—the number of unemployed persons in excess of 4½ percent—who reside within the jurisdiction of the prime sponsor compared to the total excess number of unemployed persons who reside within the jurisdictions of all eligible prime sponsors.

The Secretary must reserve an amount of not less than 2 percent of the sums available for title VI for Native American entities. The Secretary may use the remaining amount in his discretion to assist prime sponsors and Native American entities.

S. 2570 contains a number of provisions intended to prevent substitution. It expressly prohibits the hiring of a CETA participant when any other person is on layoff from the same or a substantially equivalent position, and it provides that CETA jobs must be in addition to those that would be funded by a State or municipality. Time limitations on program participation, limitations on wages and supplementation, as well as restricted eligibility requirements for purposes of public service employment, also will help to prevent substitution. Further, current law provides that funds expended for title VI may be used for both activities of an unlimited duration and projects which are 12 months in length. Testimony received by the committee indicates that projects tend to reduce the rate of fiscal substitution. Thus, the committee bill provides that all public service employment under title VI is to be only in projects. The projects are to be of limited duration, but may be extended beyond 12 months upon review by the prime sponsor at least once a year, in accordance with regulations issued by the Secretary.

The practice of substituting Federal manpower dollars for local resources also will be curtailed significantly by the elimination of the "sustainment jobs" provisions which were enacted as part of the 1976 CETA amendments.

Under the provisions of the 1976 CETA amendments, all public service employment positions funded in addition to

those positions existing on June 30, 1976, approximately 260,000 positions—are to be filled by persons who meet strict eligibility criteria, and these jobholders also are to be employed in 12-month projects. Generally, persons are qualified for these positions if their previous annual family income is no more than 70 percent of the BLS lower living standard budget and if they have been unemployed for at least 15 weeks, or if they are receiving public assistance. One-half of the vacancies below the June 30, 1976, sustainment level created by attrition also are required to be filled by persons who meet the strict eligibility criteria set forth above.

The remaining 50 percent of the jobs below the June 30, 1976, sustainment level, as well as another 50,000 public service employment positions under title II of the current CETA law, however, can be filled by persons who are unemployed for a very short period of time—15 days in areas having at least 7 percent unemployment rate, or by persons who have been unemployed for at least 30 days in an area with an unemployment rate of less than 7 percent. Moreover, prime sponsors are not required to employ these persons in projects of limited duration. These positions are the "sustainment jobs."

S. 2570 would eliminate these "sustainment jobs" provisions from the CETA law. This means that all positions which become available either by attrition or by new program dollars would have to meet the targeted eligibility criteria of the new title VI program.

Current law provides that no more than 15 percent of public service employment funds may be used for administrative expenses, training and other supportive services. This has led to the situation in which not enough resources have been available for training and supportive services because administrative expenses have taken up a disproportionate amount of the total funds available for all of these services. S. 2570 therefore provides that no more than 10 percent of public service employment funds under title VI may be used for administrative expenses, and an additional amount of funds of no more than 10 percent may be used for training, supportive services and similar skill development services. The committee believes that these provisions will enhance the ability of public service employees to receive the various kinds of services they need to become employed in regular public or private employment.

Mr. President, the implementation of these various program reforms will improve the countercyclical jobs programs. It is important that such a program be available to deal with national economic downturns generally as well as to assist those areas of the country whose local or regional economies are in distress. The various program reforms set forth in S. 2570 will help assure that a countercyclical jobs program is available and that the program that is available is sensitive to the past experiences of the CETA program.

PROGRAM ABUSES

Mr. President, CETA has been the subject of some controversy because investigations by the Justice Department and the Labor Department have revealed such statutory violations as political favoritism, fraud, financial conflicts of interest, and nepotism. Though such abuses have not been pervasive, neither have they been limited to a few isolated instances.

The Secretary of Labor in response to this situation has taken strong affirmative steps to investigate and impede such practices. Last April, Secretary Marshall established the Office of Special Investigations, which, among other functions, is charged with special investigative and auditing responsibilities relating to CETA programs. Additionally, the administration proposed a series of amendments to increase the Department's ability to take appropriate and swift preventive action to curb program abuses. The committee bill includes most of these recommendations.

S. 2570 provides that CETA funds may be terminated in emergency situations without a hearing so long as one is held thereafter within 30 days; the Secretary of Labor may take direct action against a subgrantee or subcontractor of a prime sponsor while a recipient who receives financial assistance directly from the Secretary concurrently will be held responsible for the actions and omissions of its subgrantees and subcontractors; no person may be discriminated against or otherwise penalized for filing a complaint or cooperating in an investigation; the Secretary may make use of State and local agencies, especially law enforcement agencies, to monitor and enforce the provisions of the act; the Secretary is directed to publish regulations against such abuses as nepotism, conflicts of interest, and kickbacks; recipients are required to keep adequate records and make them promptly available to the Secretary as the Secretary directs, and the Secretary is given authority to subpena books and witnesses in cases of investigation; this legislation establishes that it is a Federal offense to embezzle CETA funds, to engage in kickbacks, and similar schemes, or to obstruct CETA investigations; and the legislation also provides bonding for officers, directors, agents, and employees of CETA recipients who handle funds or property in the administration of the CETA programs.

Taken together the provisions adopted by the committee will protect the integrity of CETA funds from fiscal mismanagement or unscrupulous individuals who would abuse the program at the expense of both the public and those persons for whom it is the purpose of the act to assist.

The committee has placed time limitations upon the duration for which a person is eligible for CETA assistance. The bill provides that the longest period of time during which an individual may participate in the various CETA programs is a total of 2½ years within a 5-year period.

Work experience is restricted to a total of 1,000 hours per year, except for in-school youth, and a total of no more than 2,000 hours of work experience may be performed by a person within a 5-year period.

The committee continues the limitation in current law which restricts participation in institutional or classroom training programs to 2 years within a 5-year period.

An individual may hold a public service employment position under title II for no longer than 18 months. An individual may hold a public service employment position under title VI for no longer than 12 months. These time limitations may be extended for 6 months in areas of high unemployment as determined by the Secretary.

The 2½-year program participation restriction and the limitation on public service employment will eliminate long-term employment by any individual in the CETA programs. These limitations will enable program participants to receive appropriate Federal manpower assistance while emphasizing the transition from CETA programs into regular public or private employment.

PRIVATE SECTOR PARTICIPATION

CETA program linkages with private employers is viewed by employment specialists as a useful opportunity for increasing the transition of CETA participants to unsubsidized employment. Notwithstanding this belief, and despite the fact that most employment opportunities originate in the private as opposed to the public sector, the private sector has played a limited role under CETA. In fiscal year 1977, less than 10 percent of federally assisted employment and training programs involved private business.

Under the Manpower Development and Training Act (MDTA), the predecessor to CETA, the Department of Labor made substantial investments in the private sector, primarily through the use of on-the-job training programs. Program follow-up studies from MDTA indicate that a high percentage of trainees were retained by employers after training was completed. With this background, the committee agreed to make a major recommitment to the role of the private sector in CETA programs.

Under a new title VII, Private Sector Opportunities for the Economically Disadvantaged, opportunities for low income persons to work for a private employer while receiving on-the-job training will be greatly expanded. This initiative is similar to that proposed by the Carter administration. It is intended to integrate the private sector in the development and implementation of CETA programs with the goal of increasing private employment opportunities for low income persons.

Under this initiative, a prime sponsor is authorized to establish a Private Industry Council composed primarily of labor and business leaders, including representatives of small and minority-

owned businesses. The primary function of these councils is to secure contract pledges from private employers to hire economically disadvantaged persons. On-the-job training is the kind of activity authorized by title VII, though a wide range of other employment services may be provided. Among its various functions, the Private Industry Council will be responsible for advising the prime sponsor on ways of increasing private sector linkages in other CETA programs.

An authorization of $400 million is provided for fiscal year 1979 and such sums as may be necessary for fiscal year 1980.

Private employers have frequently stated that they are the last group to be consulted on national employment policies, but the first group solicited as a source of jobs for the Nation's structurally unemployed. It is the purpose of title VII to interject the expertise and energy of the business community into the mainstream of federally assisted employment programs. The combined resources of the Federal Government and the American business community should create an effective partnership for developing solutions to the problem of structural unemployment.

The committee also authorized two smaller private sector demonstration projects to test the efficacy of employment vouchers and employer incentive bonuses. Both programs are targeted on the economically disadvantaged population. These programs should provide useful information about the impact of vouchers and incentive bonuses upon factors such as the rate of displacement created by employment subsidies, the population obtaining employment as a result of such subsidies, the retention rate of participating employees beyond the duration of the training subsidy, and the types of and degree to which various business and industries utilize such subsidies. A further explanation of these amendments is included in the more detailed explanation of the committee bill.

YOUTH PROGRAMS

In recognition of the epidemic employment problems facing the Nation's youth, the committee bill places a strong emphasis on youth programs. S. 2570 authorizes the Job Corps, summer youth program, youth incentive entitlement pilot projects, youth community conservation and improvement projects, youth employment and training programs, and the Young Adult Conservation Corps.

JOB CORPS

The Job Corps was originally enacted under the Economic Opportunity Act of 1964. This program provides intensive, primarily residential, courses of education and employment services to economically disadvantaged young men and women between the ages of 14 and 22 years.

The purpose of the Job Corps is to assist young adults in achieving their career objectives. All Job Corps members are persons who are not in school, unemployed, and need additional education, vocational training, counseling, and other services to help them obtain employment, return to school or enlist in the Armed Forces.

This year more than 24,000 persons will enroll in Job Corps programs across the country. The Department of Labor is in the process of expanding this program so that it can serve twice as many persons.

SUMMER YOUTH PROGRAM

The summer youth program is targeted on economically disadvantaged youth who are 14 to 21 years of age. Summer training and employment opportunities will be available this year to some 1,072,000 youth. The young people who participate in these programs perform a variety of useful tasks including city clean up projects, community gardening projects, and conservationist practices.

To alleviate the structural employment barriers confronted by youth, the Congress enacted the Youth Employment and Demonstrations Projects Act last year. The four programs authorized by this legislation serve different aged youth in a variety of employment and training situations.

YOUTH INCENTIVE ENTITLEMENT PROJECTS

The youth incentive entitlement pilot projects provides grants to selected prime sponsors to serve all economically disadvantaged youth ages 16–19 who reside within their jurisdiction.

The program is designed to aid youth to complete high school while pursuing part-time employment and training opportunities. Eligible youth are guaranteed a year-round, part-time job or training position conditioned upon their remaining in school. Participants also are offered counseling, academic tutoring, and other services.

As of June 30, 1978, 27,768 youth were enrolled in this program.

YOUTH COMMUNITY IMPROVEMENT PROGRAM

The youth community improvement program is designed to develop the vocational potential of jobless youth through well-supervised work of tangible benefit to the community.

Services are available to unemployed youth 16 through 19 years of age. A preference is given to out-of-school youth with the severest handicaps in finding employment.

Youth are employed on community-planned projects lasting up to 1 year. Supervision is by skilled tradesmen who are good instructors and sensitive to the needs of youth. To assure that the youth get individual attention, no more than 12 persons are assigned to each supervisor. Community-based organizations such as YMCA's, the Red Cross, and other private nonprofit agencies design the projects. Schools are asked to grant credit for employment experience, thus encouraging youth to return to school and complete their education. As of June 30, 1978, 17,402 persons were enrolled in this program, youth community improvement programs.

YOUTH EMPLOYMENT AND TRAINING PROGRAM

The youth employment and training program is designed to enhance the jobs prospects and career preparation of low-income youth who have the severest problems in entering the labor market.

As of June 30, 1978, 163,935 youth between ages 14 and 21 years of age were enrolled in this program. With the exception of 10 percent of the available positions, jobs and training opportunities are available only to youth from families with income at or below 85 percent of the lower living standard.

Youth employment and training programs provide for institutional and on-the-job training, work experience, vocational education, public employment opportunities, employment counseling, and other employment related services.

At least 22 percent of each prime sponsor's funds must be used for in-school-youth programs carried out with local educational agencies. Arrangements are flexible, and the educational agencies may contract with junior colleges, post-secondary schools, and other community agencies serving low-income or in-school youth. School-based counselors advise in-school program participants as to the relevance of their career and educational programs.

YOUNG ADULT CONSERVATION CORPS

The Young Adult Conservation Corps is a program designed to give young people experience in various occupational skills through productive work on conservation and other projects on Federal and non-Federal lands and waters.

Youth ages 16 to 23 years of age may participate in this program. The program is open to all youth regardless of their family income. As of June 30, 1978, 20,663 persons were enrolled in this program.

Young adult conservation corps programs are operated under a tripartite agreement between the Department of Labor (DOL), Agriculture (USDA), and Interior (USDI). Enrollees are involved in all types of conservation work: preservation, management, and improvement of vegetation and wildlife; development, rehabilitation, and maintenance of recreational facilities; prevention and control of insects and disease; and natural disaster damage control and cleanup.

This program provides for nonresidential projects to which enrollees commute and residential camps that provide food daily and are given work assignments, lodging, and supportive services 7 days a week, 24 hours a day, and from which work projects are assigned.

Mr. President, at this point I ask unanimous consent to present in the RECORD a more detailed statement which discusses the committee's bill, S. 2570, a section-by-section analysis of the bill, and several tables relating to the program activities and funding levels of the various CETA programs.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2570—FISCAL YEAR 1979

[In thousands of dollars]

CETA title	Authorization	Budget authority	Estimated outlays
Title I: Administrative provisions			
Title II:			
Comprehensive services	Open ended	[1] 2,026,700	2,042,003
PSE	$3,000,000,000	(1)	
Title III (pts. A and B): [2]			
Migrant farmworkers	Not less than 5 percent of the 85 percent allocated to prime sponsors for comprehensive services under title II.	[3] 81,068	84,068
Indians and native Americans	Not less than 4.5 percent of the 85 percent allocated to prime sponsors for comprehensive services under title II.	[3] 64,854	62,854
Other national programs	Open ended [2]	69,200	69,200
Migrant and Indian initiatives	do [2]		25,000
STIP/HIRE	do [2]		275,000
Program support	do [2]	43,910	43,910
Welfare demonstrations		200,000	125,000

SECTION-BY-SECTION SUMMARY ANALYSIS

Section 1—Short Title

This section provides that the act, with a table of contents, may be cited as the "Comprehensive Employment and Training Act."

Section 2—Statement of Purpose

This section provides that it is the purpose of the act to provide job training and employment opportunities for economically disadvantaged, unemployed or underemployed persons by establishing a flexible, coordinated and decentralized employment and training program.

TITLE I—ADMINISTRATIVE PROVISIONS

Part A—Organizational provisions

Section 101—Prime Sponsors

Subsection (a) defines eligible prime sponsors as: (1) a State, (2) any unit of general local government with population of 100,000 or more, (3) any combination of units of general local government which includes an otherwise eligible unit, (4) units or combination of units of general local government, in rural areas without regard to population, which have high unemployment, and there is a special need for services within the area, as determined by the Secretary (5) certain existing concentrated employment program grantees, designated by the Secretary, serving areas with high unemployment, and (6) units previously designated as prime sponsors, whose populations have decreased below 100,000, but have demonstrated their effectiveness to administer programs and still have that capability.

Subsection (b) provides that a State or a unit of general local government shall not qualify with respect to any area within the jurisdiction of a geographically smaller eligible prime sponsor unless the smaller unit has not submitted an approvable plan.

Subsection (c) provides that prime sponsors must submit a notice of intent to apply for prime sponsorship by a date prescribed by the Secretary, and the Secretary shall designate those that qualify as prime sponsors.

Subsection (d) provides that State prime sponsors shall make appropriate arrangements for appropriate area planning bodies to serve subareas within the State prime sponsor area.

Section 102—Authority of Secretary To Provide Services

This section provides that the Secretary may provide services to any area not served by a prime sponsor, to any area where the prime sponsorship has been revoked by the Secretary, or to any area where a plan has not been approved.

Section 103—Comprehensive Employment and Training Agreement and Annual Plans

Subsection (a) provides that the Secretary may not provide financial assistance unless the prime sponsor submits a comprehensive employment and training plan consisting of a comprehensive employment and training agreement and an annual employment and training plan. The agreement serves as the basic charter and includes descriptions of local labor markets, basic operational information, and the procedures used by the prime sponsor to insure that conditions of this act are met.

Subsection (b) provides that prime sponsors must submit an annual employment and training plan which describes programs and services to be provided to the eligible population. Such information includes changes in the local labor market, the performance and placement goals for the program year, changes in the administrative design of the program, and a description of the relationship between and the efforts to coordinate programs under this act to other employment and training programs operating in the area.

Section 104—Review of Comprehensive Employment and Training Plans

Subsection (a) provides that a prime sponsor's plans must be submitted for comment, at least 45 days before being submitted to the Secretary, to specific offices or organizations specified in the section. The plan must also be made available for review to specified other groups and to the general public.

Subsection (b) provides that the prime sponsor shall consider any comments or recommendations received, and transmit to the Secretary comments and recommendations of the Governor, the State employment and training council, and the prime sponsor planning council.

Subsection (c) provides for the Secretary to review each prime sponsor's comprehensive employment and training plan to assure that it meets the requirements of the act, the regulations, and other applicable law.

Subsection (d) provides that the Secretary shall disapprove any plan not satisfying the review under subsection (c), provided that the prime sponsor has at least 30 days to remedy any defect.

Section 105—Governor's Coordination and Special Services Plan

Subsection (a) provides that any State seeking financial assistance under this act shall submit a Governor's coordination and special services plan to the Secretary.

Subsection (b) details what shall be included in the Governor's plan.

Subsection (c) provides that the Secretary shall only approve the Governor's plan if it meets the requirements of this subsection.

Section 106—Complaints and Sanctions

Subsection (a) provides that each prime sponsor shall establish and maintain a grievance procedure for handling complaints from participants, subgrantees, contractors, and other interested persons. It also provides that the Secretary shall promulgate regulations to insure that recipients establish formal hearing processes so that determinations as to the merits of complaints are made within 60 days. It also provides for secretarial investigations of the complaint, with a determination within 120 days.

Subsection (b) provides that the Secretary shall revoke a prime sponsor's plan and terminate financial assistance provided that prior notice and opportunity for a hearing are given, if the Secretary determines that the prime sponsor maintained a pattern or practice of discrimination. The Secretary may revoke the plan or terminate financial assistance if the prime sponsor has incurred unreasonable administrative costs, failed to give due consideration to continued funding of programs of demonstrated effectiveness, failed to give due consideration to the eligible population in areas of chronic or concentrated unemployment, materially failed to expend funds in a reasonable period of time or violated several other conditions.

Subsection (c) authorizes the Secretary, after a finding that a recipient has failed to comply with the act or regulation, to terminate or suspend, in whole or in part, financial assistance to the recipient, and where appropriate, take such corrective actions as ordering the repayment of misspent funds, withholding future funding, and taking direct legal action against recipients, subgrantees, subcontractors and operators under nonfinancial agreements, or ordering the recipient to take legal action to recover misspent funds or protect the integrity of the program. Furthermore, it provides that the Secretary may, in emergency situations, immediately terminate or suspend assistance, in whole or in part, provided that an opportunity for a hearing is given to the recipient within 30 days.

Subsection (d) authorizes the Secretary to protect persons who either make complaints or testify against a recipient from actions by the recipient.

Subsection (e) provides that nothing in this act precludes a person who alleges a violation of the act or regulations from instituting a civil action.

Subsection (f) provides that the Secretary may withhold funds otherwise payable under the act in order to recover amounts expended in any fiscal year in violation of any provision of the act.

Subsection (g) provides the Secretary with the authority to make arrangements to use appropriate State and local government personnel with reimbursement, to carry out the provisions of this section and section 134.

Subsection (h) provides that prime sponsors and other recipients receiving funds directly from the Secretary remain responsible and liable despite the right of direct action by the Secretary against subcontractors and subgrantees.

Section 107—Judicial Review

This section provides that a recipient's right of review is in the courts of appeal if the recipient is dissatisfied with the Secretary's action in finally disapproving a plan, withholding funds, or taking an action with respect to a sanction.

Section 108—Reallocation

Subsection (a) authorizes the Secretary to reallocate funds from one recipient to another if the former is unable to use such allocated funds within a reasonable period of time.

Subsection (b) provides that the Secretary will give 30 days advance notice to the prime sponsor, the Governor and the general public, during which time comments may be submitted to the Secretary. After considering any comments, the Secretary shall notify the Governor and prime sponsor of any decision to reallocate funds, and publish such decision in the Federal Register. In allocating funds, the Secretary shall first give priority to prime sponsors within the same State, then to prime sponsors within other States.

Section 109—Prime Sponsor's Planning Council

This section provides that each prime sponsor shall establish a planning council and

sets forth the composition and requirements for such council.

Section 110—State employment and training council

This section provides that each State shall establish an employment and training council and sets forth the composition and requirements for such council.

Section 111—Consultation

This requires the Secretary of Labor to consult with the Secretaries of Health, Education, and Welfare, with respect to services of a health, education, and welfare character, and other Federal officials as appropriate.

Section 112—Authorization of appropriations

Subsection (a) provides for a such sums as may be necessary authorization of the act, for titles II, III, and IV, parts B and C, title VI, and title VII, through fiscal year 1982; title IV, part A and D and title VII are authorized through 1980.

Subsection (b) provides that appropriated funds shall remain available for obligation in the succeeding fiscal year and obligated funds may be expended during a period of two years after obligation.

Subsection (c) provides authority for forward funding for programs under this act.

Subsection (d) provides that the funds available for carrying out title III shall not exceed 20 percent of the amount appropriated for the act (excluding any amount made available for carrying out title II–D and title VI) and that of the funds available for title III, the Secretary shall transfer not less than $3 million nor more than $5 million to the National Occupational Information Coordinating Committee.

Part b—General provisions

Section 121—Conditions Applicable to All Programs

This section contains the provisions applicable to all programs, including nondiscrimination, protection of employed workers, employee benefits, occupational safety and health, and prohibitions on political and sectarian activities.

Section 122—Special Conditions Applicable to Public Service Employment

This section provides conditions applicable to the public service employment program, including wage rates, protection of employed workers, and duration of employment.

Section 123—Special provisions

This section contains special provisions applicable to programs under this act.

Section 124—Wages and allowances

This section provides that basic wages and allowances will be paid to enrollees.

Section 125—Labor Standards

This section governs the applicability of the Davis-Bacon Act.

Section 126—Definitions

This section defines terms used in the act.

Section 127—Secretary's Authority and Performance Standards

This section provides the Secretary with the authority to issue rules, regulations, and guidelines for the administration of the act. It also provides that the Secretary shall assess the adequacy of each prime sponsor's proposed performance and placement goals in accordance with performance standards which recognize that performance varies with the local situation. It further provides the Secretary with the authority to enter into contracts, grants, and agreements, as deemed necessary to carry out the act.

Section 128—Reports

This section provides for an annual report by the Secretary and periodic reports by each prime sponsor.

Section 129—Services and Property

This section authorizes the Secretary to accept gifts in the name of the Department.

Section 130—Utilization of Services and Facilities

This section authorizes the Secretary to utilize services and facilities of other Federal and State agencies.

Section 131—Interstate Agreements

This section gives the consent of Congress to interstate agreements required by this act subject to the approval of the Secretary.

Section 132—Prohibition Against Political Activities

This section provides that no program funded under this act may involve political activities and states that State and local government employees whose principal employment is in connection with programs financed under this act, and who are covered by the Hatch Act, must comply with the provisions of that act.

Section 133—Nondiscrimination

This section prohibits discrimination on the basis of race, color, religion, sex, national origin, age, handicap, political affiliation, or citizenship, and provides appropriate remedies in cases where discrimination has been found to have taken place.

Section 134—Records, Audits, and Investigations

This section requires each recipient of financial assistance to maintain records on participants and programs and keep such records for the Secretary's inspection. It further provides that the Secretary may investigate any matter deemed necessary to insure that no violations of the program have occurred.

Section 135—Bonding

This section provides that all employees of recipients of financial assistance who handle funds under this act be bonded, and that the Secretary establish the amount and other bonding requirements by regulation.

TITLE II—COMPREHENSIVE EMPLOYMENT AND TRAINING SERVICES

Part A—Financial assistance provisions

Section 201—Purpose of Program

This section provides that it is the purpose of this program to provide comprehensive employment and training opportunities throughout the Nation. The programs shall include the development and creation of training, upgrading, retraining, education, and other services needed to enable individuals to secure and retain employment at their maximum capacities so as to increase their earned income.

Section 202—Allocation of Funds

Subsection (a) provides that 85 percent of the funds available for parts A, B, and C will be allocated to prime sponsors according to the following formula: 50 percent—previous year's allocation (for fiscal year 1979 this would apply to the fiscal year 1978 title I allocation); 37.5 percent—total unemployment; 12.5 percent—low-income adults; and not less than $2 million shall be allocated among Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands and the Northern Marianas).

Subsection (b) provides that 5 percent of the funds available for parts A, B, and C shall be used only for supplemental vocational education assistance.

Subsection (c) provides that 1 percent of the funds allocated under parts A, B, and C shall be available to the Secretary for paying the costs of the State employment and training council, except that no State shall receive less than $50,000.

Subsection (d) provides that 1 percent of the funds available under title II shall be available to the Governor for linkages with educational institutions and agencies.

Subsection (e) provides that 4 percent of the funds available under parts A, B, and C shall be available for Governor's coordination and special services programs.

Subsection (f) provides that the remainder of the funds shall be used at the Secretary's discretion for purposes that include providing 90 percent of the previous year's funds, continuing support for rural concentrated employment programs, continuing funding of programs of demonstrated effectiveness, and for encouragement of consortia where they demonstrate advantages.

Section 203—Conditions for Receipt of Financial Assistance

This section provides that a prime sponsor may only receive financial assistance upon submission of a satisfactory comprehensive employment and training plan, that not more than 5 percent of the prime sponsor's funds may be used for upgrading and retraining programs (part C), and that public service employment and work experience shall be combined with training and supportive services.

Section 204—Supplemental Vocational Education Assistance

This section provides that the Secretary shall make grants to Governors to provide financial assistance, through State vocational education boards, to provide needed vocational education services, and that the funds only be used for providing services to participants in programs under this title in accordance with an agreement between the State vocational education board and the prime sponsor

Section 205—Participant Assessment

This section provides that each prime sponsor shall assist each individual receiving assistance under the title in establishing a personalized employability plan in order to determine which program activities are appropriate for that individual. It also provides that an assessment of each person's need for training and supportive services shall be made at the time of entrance to a program and reviewed periodically.

Part B—Services for the economically disadvantaged

Section 211—Description of Program

This section lists the types of services and activities which may be provided under this title, including job search assistance, education and institutional skill training, on-the-job training, supported work programs and activities, the development of labor market information, necessary supportive services, and any programs authorized by part A of title III, title IV, and title VII of this act.

Section 212—Limitation on Use of Funds

This section provides that no prime sponsor receiving funds under this title shall use funds allocated for parts A, B, and C for public service employment.

Section 213—Eligibility for Participation

This section provides that a person must be economically disadvantaged and unemployed, underemployed, or in school, in order to participate in the programs authorized by this part.

Section 214—Services for Youth

This section provides that services for youth under this part shall be designed to assist eligible youth in overcoming the particular barriers to employment experienced by youth and provides that the Secretary shall insure that each prime sponsor's plan include programs and services for eligible youth.

Section 215—Services for Older Workers

This section provides that services for older workers under this part shall be designed to assist eligible participants in overcoming the particular barriers to employment experienced by older workers and provides that the Secretary shall insure that each prime sponsors' plan include programs and services for older workers.

Part C—Upgrading and retraining

Section 221—Occupational Upgrading and Retraining

This section provides that prime sponsors may conduct occupational upgrading programs, including supportive services, through agreements with public and private employers, pursuant to regulations of the Secretary, for individuals operating at less than their full skill potential, primarily those in entry level positions or positions with little normal advancement opportunities. Further, prime sponsors may also conduct retraining programs, directly or through agreements with public and private employers, pursuant to regulations of the Secretary.

If either upgrading or retraining programs concern jobs covered by collected bargaining agreements, such programs shall have the concurrence of labor organizations representing the employees in those jobs.

Part D—Public service employment opportunities for the economically disadvantaged

Section 231—Statement of Purpose

This section provides that it is the purpose of this title to provide economically disadvantaged persons who are unemployed with transitional employment in jobs providing needed public services, and related training and services to enable such persons to move into unsubsidized employment or training.

Section 232—Authorization

This section provides that there are authorized to be appropriated such sums as may be necessary for fiscal year 1979 and the three succeeding fiscal years. Further, the section provides that from the sums appropriated under this act for any fiscal year for public service employment under this part and title VI, the Secretary shall first make available $3 billion for carrying out this part for such fiscal year.

Section 233—Financial Assistance

This section provides that the Secretary shall provide financial assistance to prime sponsors under this part for transitional public service employment and that not less than 90 percent of the allocated funds used by a prime sponsor shall be used for public service employment wages, benefits, training, and supportive services. The remainder of the funds are available for administrative and other allowable costs.

Section 234—Allocation of Funds

This section provides that of the funds made available for this part, 2 percent shall be made available to Native American entries described in 302(c)(1)(A) and 85 percent shall be made available to be allocated to prime sponsor. The prime sponsors shall be allocated in accordance with the following formula:

33⅓ percent on the relative number of sponsor's area;

33⅓ on the excess number of unemployed in the prime sponsor's area; and

33⅓ percent on the relative number of unemployed in areas of substantial unemployment.

The remainder of funds not so allocated is to be used by the Secretary for discretionary purposes.

Section 235—Expenditure of Funds

This section provides that funds available under this part shall only be available for public service employment activities or projects carried out by project applicants as defined in section 126 or activities set forth in section 211.

Section 236—Prime Sponsors and Program Agents

This section provides that the provisions of section 606 with respect to prime sponsors and program agents shall apply to this part.

Section 237—Eligibility

This section provides that to be eligible a person must be unemployed for at least 12 weeks and be economically disadvantaged. The section also restates that the provisions of section 122(i) with respect to duration apply to this part.

Section 238—Wages

This section provides that no person shall be paid wages at a rate in excess of $10,000 per year, adjusted upward for an area by the ratio that the local wage rates bear to the national average, but not by more than 20 percent; and shall be paid in accordance with the hourly wage of section 124. The section further provides that persons in public service employment under this part may not have their wages supplemented.

TITLE III—SPECIAL FEDERAL RESPONSIBILITIES

Part A—Special national programs and activities

Section 301—Special Programs and Activities

This section provides that the Secretary shall use funds available under this title to provide additional employment and training services to segments of the population who are in particular need of them because they have particular disadvantages in the labor market, including offenders, persons of limited English proficiency, handicapped individuals, single parents, displaced homemakers, youth and older workers.

Section 302—Native American Employment and Training Programs

This section provides for employment and training programs for native Americans, Alaskan Natives and Hawaiian natives. To carry out these programs, the Secretary shall reserve not less than 4.5 percent of the funds allocated under section 202(a)(1).

Section 303—Migrant and Seasonal Farmworkers Employment and Training Programs

This section provides employment and training programs for migrant and seasonal farmworkers. To carry out this program the Secretary shall reserve not less than 5 percent of the funds allocated under section 202(a)(1).

Section 304—Job Search and Relocation Assistance

This section provides that the Secretary may provide job search and special relocation assistance. Job search assistance is available for economically disadvantaged, unemployed, and underemployed persons. Relocation assistance is available only to involuntarily unemployed persons who cannot reasonably be expected to secure full-time employment in the community in which they reside and have a bona fide offer of employment.

Section 305—Veterans Information and Outreach

This section provides that the Secretary, in consultation with the Secretary of Health, Education, and Welfare and the Administrator of the Veterans' Administration, shall provide for an outreach and public information program for veterans.

Part B—Research, training, and evaluation

Section 311—Research

This section provides that the Secretary shall establish a comprehensive program of employment and training research and for experimental, demonstration, and pilot projects, including a variety of welfare demonstration programs.

Section 312—Labor Market Information and Job Bank Program

This section provides for the development of a comprehensive system of labor market information on a national, State, local or other appropriate basis and for the development of a computerized job bank.

Section 313—Evaluation

This section provides that the Secretary shall provide for the continuing evaluation of all programs conducted under this act and for studies of the comparative effectiveness of programs under this act and those under title IV–C of the Social Security Act (work incentive program).

Section 314—Training and Technical Assistance

This section provides for technical assistance to prime sponsors by the Secretary of Labor in consultation with the Secretary of Health, Education, and Welfare and other appropriate officials.

Section 315—National Occupational Information Coordinating Committee

This section authorizes the National Occupational Information Coordinating Committee to use the funds available under section 112(d) in giving special attention to the labor market information needs of youth.

Section 316—Evaluation and Incentive Grants

This section provides that a prime sponsor may volunteer for an evaluation of its title II program by the Secretary of Labor. The Secretary awards funds to these prime sponsors who do well.

Section 317—Voucher Demonstration Projects

This section provides for a demonstration program of employment and training vouchers for use with private employers by economically disadvantaged persons who are unemployed or underemployed.

TITLE IV—YOUTH PROGRAMS

Part A—Youth employment demonstration programs

Section 401—Statement of Purpose

This section establishes pilot, demonstration, and experimental programs to explore methods of dealing with youth employment and training, but it is explicitly not its purpose to provide make-work.

Subpart 1—Youth incentive entitlement pilot projects

Section 411—Entitlement Pilot Projects Authorized

This section authorizes the Secretary to enter into arrangements with selected prime sponsors to demonstrate the efficacy of guaranteeing employment to economically disadvantaged youth who are aged 16–19 and in school, or are willing to return to school for the purpose of obtaining a diploma or seek a high school equivalency certificate.

Section 412—Employment Guarantees

This section details the eligible employment opportunities and training or combination thereof which shall be part-time up to an average of 20 hours per week during the school year and may be full-time up to an average of 40 hours per week during the summer.

Section 413—Selecting Prime Sponsors

Subsection (a) provides that the Secretary shall take into consideration the extent to which the selected prime sponsors devote funds available under title II and part C of this title for the entitlement program. The Secretary shall not select any prime sponsor failing to submit specified information and assurances.

Subsection (b) provides that in approving incentive entitlement projects, the Secretary may test a variety of approaches such as subsidies to for-profit employers, arrangements with unions for apprenticeship training, alternative administrative mechanisms, the addition of economically disadvantaged youth between 19 and 25 who have not received their high school diploma, the inclusion of career counseling, outreach, on-the-

job training, and apprenticeship, and the inclusion of adjudicated youth.

Section 414—Special Provisions

This section lists examples of eligible employment and prohibits funds from being used to provide public service previously provided by a political subdivision or local educational agency in the area served.

Section 415—Reports

This section provides that the Secretary is required to submit an interim report on December 31, 1978 and a final report on March 15, 1979, to Congress on the projects funded under this section.

Subpart 2—Youth community conservation and improvement projects

Section 421—Statement of Purpose

This section provides the purpose of subpart 2 is to establish a program of community conservation and improvement projects to provide work and training opportunities for eligible youths for a period not to exceed 12 months.

Section 422—Definitions

This section defines terms for purposes of subpart 2.

Section 423—Allocation of Funds

Subsection (a) of this section provides that funds for subpart 2 shall be allocated so that not less than 75 percent shall be allocated among the States on the basis of the relative number of unemployed persons within each State as compared to all States. No State would be allocated less than one-half of 1 percent, and one-half of 1 percent would be allocated in the aggregate for Guam, the Virgin Islands, American Samoa, the Northern Marianas Islands, and the Trust Territory of the Pacific Islands.

Subsection (b) provides that of the funds for subpart 2, there would be made available 2 percent for projects for native American eligible youth, and 2 percent for projects for eligible youths in migrant and seasonal farmworker families.

Subsection (c) provides that the remaining subpart 2 funds are to be allocated as the Secretary deems appropriate.

Section 424—Community Conservation and Improvement Youth Employment Program

This section authorizes the Secretary of Labor to enter into agreements with eligible applicants to pay the costs of community improvement projects to be carried out by project applicants employing eligible youths and appropriate supervisory personnel.

Section 425—Project Applications

Subsection (a) of this section provides that project applicants shall submit applications for funding of projects under this subpart to the appropriate eligible applicant.

Subsection (b) requires that project applicants provide descriptions and assurances with respect to projects.

Section 426—Proposed Agreements

Subsection (a) of this section provides that any eligible applicant desiring funding under this subpart shall submit a proposed agreement to the Secretary and shall make available to the Secretary all project applications approved by the eligible applicant and by any program agent in the area served by the eligible applicant.

Subsection (b) provides that the proposed agreement shall describe the method of recruiting youths and a description of job training and skill development opportunities.

Subsection (c) provides for review of all project applications by the prime sponsor's planning council prior to being submitted to the Secretary.

Section 427—Approval of Agreements

Subsection (a) of this section provides that the Secretary may approve or deny on an individual basis any of the project applications submitted by an eligible applicant.

Subsection (b) provides that assurances must be satisfactory to the Secretary that programs will permit in-school youths to coordinate their jobs with classroom instruction and, to the extent feasible, permit youths to receive credit from the appropriate educational agency, postsecondary institution, or particular school involved.

Section 428—Work Limitation

This section provides that no eligible youth shall be employed for more than 12 months in work financed under this part, except as provided by the Secretary.

Subpart 3—Youth employment and training programs

Section 431—Statement of Purpose

This section sets forth the purpose of part C to establish comprehensive programs to enhance the job prospects and career opportunities of young persons.

Section 432—Programs Authorized

This section authorizes the Secretary to provide financial assistance to enable eligible applicants to provide employment opportunities and appropriate training and supporting services for eligible participants.

Section 433—Allocation of Funds

Subsection (a) provides: (1) 75 percent of the funds available for such subpart shall be allocated by formula to prime sponsors; (2) 5 percent of the total amount available for part A shall be allocated by formula to Government for special statewide services; (3) not less than 2 percent of the total amount available for part A shall be made available for native American programs (deducting funds available under subpart 2 for native American projects); (4) not less than 2 percent of the total amount available for part A shall be made available for migrant and seasonal farmworker programs (deducting funds made available under subpart 2 for migrant and seasonal farmworkers programs); and (5) the remainder of the funds available for subpart 3 shall be available for the Secretary's discretionary projects.

Subsection (b) provides that the allocated funds will be distributed as follows:

37.5 percent—total unemployment.

37.5 percent—total number residing in areas of substantial unemployment—(unemployment in excess of 6.5 percent).

25 percent—total low-income.

Subsection (c) provides that the amounts available for the Governors will be used for the activities listed in the section.

Subsection (d) provides that not less than 22 percent of the funds allocated to each prime sponsor are to be used for in-school youth programs operated under joint agreements between the prime sponsor and the local education agency or agencies in the prime sponsor area.

Section 434—Eligible Applicants

This section provides that eligible applicants are prime sponsors, sponsors of native American programs under section 302(c)(1), and sponsors of migrant and seasonal farmworkers programs under section 303.

Section 435—Eligible Participants

This section, provides that an eligible youth is (1) unemployed, underemployed, or in school and 16–21 years, inclusive (or if authorized by regulations, 14–15 years), and (2) from families with incomes at or below 85 percent of the BLS lower living standard budget. The section further provides that 10 percent of the funds for this subpart may be used to fund programs which include youth from all economic backgrounds.

Section 436—Conditions for Receipt of Financial Assistance

Subsection (a) of this section provides that the Secretary shall not provide financial assistance to an eligible applicant unless it has provided specific descriptions and assurances.

Subsection (b) provides for establishing a youth council to make recommendations to the prime sponsor's planning council with respect to the planning and review of activities under subparts 2 and 3.

Subsection (c) provides that no work experience for in-school youth program shall be entered into unless an agreement has been made between the prime sponsors and a local education agency. Each agreement shall be administered, under contracts with the prime sponsor, by a local educational agency or agencies or a postsecondary educational institution or institutions. Certain assurances are required to be set forth in the agreement.

Section 437—Review of Plans by Secretary

This section provides that provisions of section 102, 106, and 107 of the act apply to programs and activities under section 482.

Section 438—Secretary's Discretionary Projects

This section provides that the remainder of the funds are available for the Secretary to use to support innovative and experimental programs to test new approaches for dealing with the unemployment problems of youth and to enable eligible participants to prepare for, enhance their prospects for, or secure employment in occupations through which they may reasonably be expected to advance to productive working lives.

Section 439—Youth Employment Incentive and Social Bonus Program

This section provides that the Secretary shall carry out in no more than ten areas of high youth unemployment, a program to provide bonuses of up to $2,500 per youth to employers who employ at least 5 youths for 1 year, who prior to employment are economically disadvantaged, unemployed, and have no significant previous employment.

Subpart 4—General provisions

Section 441—Authorization of Appropriations

This section provides that of the funds available for carrying out part A:

15 percent are for subpart 1.

15 percent are for subpart 2.

15 percent are for subpart 3.

Section 443—Special Conditions

This section sets forth maintenance of effort, labor standards, participant protections, and similar requirements.

Section 444—Special Provisions for Subparts 2 and 3

This section provides that appropriate efforts shall be made to insure that youths participating under subparts 2 and 3 shall be youths experiencing handicaps in obtaining employment, and it further provides the Secretary with authority to reallocate funds under subparts 2 and 3.

Section 445—Academic Credit, Education Credit, Counseling and Placement Services and Basic Skills Development

This section provides that the Secretary make efforts to encourage academic credit for activities under the act, and provide appropriate counseling and placement services to facilitate transition.

Section 446—Disregarding Earnings

This section provides that earnings by a youth under this part be disregarded for family income determinations under other Federal or federally assisted programs.

Part B—Job Corps

Section 450—Statement of Purpose

This section states that it is the purpose of Job Corps to assist young persons who need and can benefit from this unusually intensive program.

Section 451—Establishment of the Job Corps

This section provides that there is established with the Department of Labor a Job Corps.

Section 452—Individuals Eligible for the Job Corps

This section provides that an eligible youth is one who: (1) requires additional training, education, or intensive counseling; (2) is currently living in a deprived environment; and (3) has the capabilities to be a Job Corps enrollee.

Section 453—Screening and Selection of Applicants—General Provisions

This section authorizes the Secretary to prescribe certain specific standards and procedures for the screening and selection of Job Corps enrollees.

Section 454—Screening and Selection—Special Limitation

This section provides that no individual can become a member of Job Corps unless there is reasonable expectation that the person can participate successfully in group situations. It further provides that a person on probation or parole may be selected only if such selection is satisfactory to those individuals supervising that person and does not violate applicable laws and regulations.

Section 456—Job Corps Centers

This section provides that no individual may be enrolled for longer than two years (except as authorized by the Secretary), that enrollment in Job Corps does not relieve a person from military obligations, and, except for good cause, an enrollee will be assigned to a center nearest the enrollee's home.

Section 456—Job Corps Centers

This section provides for the establishment of Job Corps centers.

Section 457—Program Activities

This section details the activities and training which may be offered at a Job Corps center.

Section 458—Allowances and Support

This section details the basic, readjustment, and dependent allowances that may be provided to a Job Corps enrollee.

Section 459—Standard of Conduct

This section provides that Job Corps standards of conduct shall be provided and enforced, and that dismissal can result from violations of the standards.

Section 460—Community Participation

This section provides that the Secretary shall encourage and cooperate in activities to establish a mutually beneficial relationship between Job Corps centers and nearby communities. This includes the establishment of community advisory councils to facilitate joint discussion of common problems and planning programs of mutual interest.

Section 461—Counseling and Job Placement

This section provides that the Secretary shall counsel and test each enrollee at regular intervals and make every effort to place the enrollees in jobs in the vocation for which the enrollee was trained.

Section 462—Evaluation and Developmental Projects

This section authorizes the Secretary to undertake experimental, research, or demonstration projects in order to promote better efficiency and effectiveness in the program.

Section 463—Advisory Boards and Committees

This section authorizes the Secretary to make use of advisory boards and committees in connection with the operation of Job Corps.

Section 464—Participation of the States

This section provides that the Secretary shall take action to facilitate the participation of States in the Job Corps program, including entering into agreements with States to assist in the operation or administration of Job Corps center.

Section 465—Application of Provisions of Federal Law

This section provides that Job Corps enrollees will not be deemed Federal employees for all purposes, including hours of work, rates of compensation, leave, unemployment compensation, and Federal employee benefits, except they shall be deemed employees for the following purposes: title II of the Social Security Act, workers' compensation, tort claims, and income tax.

Section 466—Special Provisions

This section provides that the Secretary shall take immediate steps to achieve an enrollment of 50 percent women, consistent with economy, administrative practice, and the needs of the population to be served and that all studies, evaluations, proposals, and data produced or developed with Federal funds become the property of the Federal Government.

Section 467—General Provisions

This section contains general conditions applicable to the administration and operation of the program.

Section 468—Utilization of Funds

This section provides that funds from title II and part C of title IV which are used for the Job Corps program, may be used in accordance with the provisions of this part.

Section 469—Secretarial Reports

This section provides that the Secretary of Labor shall submit a report on Job Corps to Congress by March 1 of each year.

Part C—Summer youth program

Section 480—Establishment of Program

This section provides for the establishment of a summer youth employment program, which shall provide eligible youth with useful work and sufficient basic education and institutional or on-the-job training to assist these youths to develop their maximum employment potential and to obtain employment not subsidized under this act.

Section 481—Eligible Sponsors

This section provides that program sponsors will be those prime sponsors qualified under title I and Native American entities described under section 302(c)(1).

Section 482—Financial Assistance

Subsection (a) provides that 95 percent of the funds shall be allocated to prime sponsors and the remainder shall be used at the Secretary's discretion.

Subsection (b) provides that unused funds for the previous year will be added to the amount available for allocation.

Subsection (c) provides that 95 percent of the funds will be allocated in the following manner to prime sponsors:

50 percent on the basis of the previous year's allocation.

37.5 percent on total unemployment.

12.5 percent on the total number of low-income adults.

In no case shall a prime sponsor receive a lower allocation than in the previous year. Out of the discretionary funds, funds for Native American entities shall be allocated on the relative number of Native American youths 14–21 years, inclusive; and funds for Guam, the Virgin Islands, American Samoa, Northern Mariana Islands, and the Trust Territory of the Pacific Islands shall be equal to the same percentage of total funds as in the previous year.

Section 483—Secretarial Authority

This section provides authority for the Secretary to issue such regulations, rules, and guidelines as are necessary.

Part D—Young adult conservation corps

Section 490—Statement of Purpose

This section sets forth the purpose of part D, which is to establish a Young Adult Conservation Corps to provide youth employment in conservation and other work on Federal and non-Federal public lands and waters.

Section 491—Establishment of Young Adult Conservation Corps

This section provides for the establishment of a Young Adult Conservation Corps to carry out projects on Federal or non-Federal public lands and waters. The Secretary of Labor is to administer this part through interagency agreements with the Secretaries of the Interior and Agriculture, who are to have responsibility for the management and program of each Corps center.

Section 492—Selection of Enrollees

Subsection (a) of this section provides that enrollees of the Corps shall be selected by the Secretaries of the Interior and Agriculture only from candidates referred by the Secretary of Labor.

Subsection (b) provides that membership in the Corps shall be limited to unemployed individuals who are 16 to 23 years old, inclusive.

Subsection (c) provides that the Secretary of Labor shall make arrangements for obtaining referral of candidates for the Corps from the public employment service, prime sponsors, and sponsors of native American and migrant programs under the act, the Secretaries of the Interior and Agriculture, and such other agencies and organizations as the Secretary of Labor deems appropriate. The Secretary of Labor shall undertake to have an equitable proportion of candidates referred from each State.

Subsection (d) provides that in referring candidates from each State, preference shall be given to rural and urban areas within the State which have substantial youth unemployment, including areas having unemployment rates of 6.5 percent or greater.

Subsection (e) provides that no individual may be employed in the Corps for a total period of more than 12 months.

Section 493—Activities of the Corps

Subsection (a) of this section provides that, consistent with each inter-agency agreement, the Secretary of the Interior or Agriculture, as appropriate, shall determine the location of each residential or nonresidential campsite, in consultation with the Secretary of Labor. This subsection lists types of conservation and natural resource work which may be performed.

Subsection (b) provides that the Secretaries of the Interior and Agriculture shall undertake to assure that projects are consistent with the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976 as well as such other standards as each Secretary shall prescribe consistent with the provisions of Federal law.

Subsection (c) provides that, to the maximum extent practicable, appropriate projects shall be highly labor intensive, be projects for which work plans can be readily developed, be able to be initiated promptly, be projects likely to have a lasting impact both as to the work performed and the benefits to the youths participating, provide work experience to participants in skill areas needed in work on projects, be located where existing residential facilities are available, and be similar to activities of persons employed in seasonal or part-time work for specified Interior and Agriculture Department agencies.

Subsection (d) provides that the Secretaries of the Interior and Agriculture may provide for such transportation, lodging, subsistence, medical treatment, and other appropriate services, supplies, equipment, and facilities. Wherever economically feasible, existing but unoccupied or underutilized Federal, State, and local government facilities, and equipment of all types (including military facilities and equipment) shall, where appropriate, be utilized for purposes

of the Corps work camps with the approval of the Federal agency, State, or local government involved.

Subsection (e) provides that where appropriate, the Secretary, in conjunction with the Department of Health, Education, and Welfare, shall make suitable arrangements to have academic credit awarded by educational agencies for competencies derived from work experience obtained through programs under this part.

Section 494—Conditions Applicable to Corps Members

Subsection (a) of this section provides that members of the Corps shall not be deemed Federal employees except for purposes of the Federal Employees Compensation Act, the Federal Tort Claims Act, title II of the Social Security Act, the Internal Revenue Code, and 5 U.S.C. 5911 relating to allowances for quarters.

Subsection (b) provides that the Secretary of Labor shall, in consultation with the Secretaries of the Interior and Agriculture, establish standards for rates of pay (which shall be at least the minimum wage rate set forth in section 6(a)(1) of the Fair Labor Standards Act); for reasonable hours and conditions of employment; for safe and healthful working and living conditions.

Section 495—State and Local Programs and Special Projects

Subsection (a) of this section provides that, consistent with interagency agreements with the Secretary of Labor, the Secretaries of the Interior and Agriculture may make grants or enter into arrangements to carry out projects under this part with any State agency or institution, any unit of general local government, any public agency or organization, or any private nonprofit agency or organization which has been in existence for at least 2 years.

Subsection (b) provides labor protections including maintenance of effort provisions applicable to the State and local projects.

Subsection (c) provides for reserving 30 percent of the funds appropriated for the State and local projects.

Section 496—Secretarial Reports

This section requires that a report on the activities of the Corps be submitted to Congress no later than February 1 of each year.

Section 497—Antidiscrimination

This section provides that the Corps will be open to youth from all parts of the country of both sexes and youth of all social, economic, and racial classifications.

Section 498—Transfer of Funds

This section provides that the funds necessary to carry out this program will be transferred from the Secretary of Labor to the Secretaries of the Interior and Agriculture according to their interagency agreements.

Section 499—Authorization of Appropriations

This section authorizes such sums as may be necessary for fiscal year 1978 and 2 succeeding fiscal years.

TITLE V—NATIONAL COMMISSION FOR EMPLOYMENT AND TRAINING POLICY

Section 501—Statement of Purpose

This section provides that the National Commission for Employment and Training Policy will have the responsibility for advising the President and Congress on national employment and training issues.

Section 502—Commission Established

This section provides for the establishment of the National Commission for Employment and Training Policy and states what the composition of the Commission is to be, and how it is to operate.

Section 503—Functions of the Commission

This section describes the functions of the Commission.

Section 504—Reports

This section provides that the Commission shall report at least annually to the President and the Congress.

Section 505—Authorization of Appropriations

This section authorizes $3 million for fiscal year 1978 and such sums for the 3 succeeding fiscal years.

TITLE VI—PUBLIC SERVICE EMPLOYMENT PROGRAM

Section 601—Statement of Purpose

This section states that it is the purpose of this title to provide eligible persons who are unemployed with transitional employment in jobs providing needed public services in qualifying areas.

Section 602—Authorization

This section provides that such sums as may be necessary are authorized for fiscal year 1979 and 3 succeding fiscal years.

Section 603—Financial Assistance

Subsection (a) provides that not less than 80 percent of the funds allocated are to be used for public service employment wages and benefits; not less than 10 percent of the funds shall be expended for training and employability counseling and services for persons under this title. The remainder may be used for administrative and other allowable costs.

Subsection (b) provides that in filling teacher positions in elementary and secondary schools each prime sponsors will give special consideration to unemployed persons with previous teaching experience who are certified in the prime sponsor's State.

Section 604—Allocation of Funds

Subsection (a) provides that not less than 2 percent of the amounts authorized shall be available for programs to be carried out by native American entities.

Subsection (b) provides that not less than 85 percent of the funds shall be allocated to prime sponsors in the following manner:

50 percent—total unemployment in the prime sponsor area.

25 percent—number of unemployed persons residing in areas of substantial unemployment (unemployment of at least 6.5 percent).

25 percent—number of unemployed persons in excess of 4.5 percent in the prime sponsor area.

Subsection (c) provides that the remainder is available at the Secretary's discretion.

Section 605—Expenditure of Funds

Subsection (a) provides that funds under this title shall be used for projects which are no longer than 12 months in duration, except that a program may be extended where the project has demonstrated its effectiveness.

Subsection (b) provides that each project applicant shall submit an application to the appropriate program agent or prime sponsor and shall contain such information as is required by regulation.

Subsection (c) provides for expenditure of the 10 percent of funds for training and employability counseling available under section 603.

Section 606—Prime Sponsors and Program Agents

This section provides that financial assistance is available to prime sponsors, native American entities described under section 302(c)(1)(A), and program agents.

Section 607—Eligibility

This section provides that a person, in order to be eligible, must be unemployed for at least 45 consecutive days and have a family income not exceeding 85 percent of the BLS lower living standard budget; it limits individual participation to 12 months after September 30, 1978 (subject to a waiver provision of the Secretary).

Section 608—Wages

This section provides that no person employed in public service employment under this title may be paid at a rate in excess of $10,000, adjusted upward by the ratio which local wage rates bear to the national average.

Section 609—Wage Supplementation

This section provides that participants in programs under this title may have their wages supplemented, but (1) the total amount of funds used to supplement wages may not exceed the equivalent of 10 percent of the prime sponsor's allocation under the title, and (2) the total wages paid to any participant may not exceed an amount equal to 20 percent of the maximum federally supported wages for the prime sponsor area.

TITLE VII—PRIVATE SECTOR OPPORTUNITIES FOR THE ECONOMICALLY DISADVANTAGED

Section 701—Statement of Purpose

This section provides that it is the purpose of this title to demonstate the effectiveness of a variety of approaches to increase the involvement of the business community in employment and training activities under this act, and to increase the private sector employment opportunities for persons who are economically disadvantaged and unemployed or underemployed.

Section 702—Allocation of Funds

Subsection (a) provides that financial assistance will be available to each prime sponsor—95 percent of the funds are allocated according to the title II–A formula, and the remainder is available for prime sponsors who join together to establish a single private industry council and native American entities described under section 302(c)(1)(A).

Section 703—Conditions for Receipt of Financial Assistance

This section provides the requirements a prime sponsor must meet in order to receive assistance under this title.

Section 704—Private Industry Councils

This section provides for the establishment of private industry councils (a majority of whose members will be from the business sector), and provides that the council shall participate with the prime sponsor in the development and implementation of programs under this title.

Section 705—Program Activities

This section describes the types of activities that can be carried out in order to demonstrate the purposes of this title.

Section 706—Report

This section requires the Secretary to report to Congress by March 1, 1980, on an evaluation of the activities conducted under this title, and any accompanying legislative recommendations.

Section 707—Authorization of Appropriations

This section provides that there are authorized to be appropriated $400,000,000 for fiscal year 1979 and such sums for fiscal year 1980.

Section 3—Criminal Provision

This section provides for criminal penalties for theft or embezzlement of CETA funds, improper inducement, and obstruction of investigations.

Section 4—Transitional Provision

This section provides that, in order for an orderly transition from the current program to the requirements contained in these amendments, the Secretary may provide financial assistance in the same manner and on the same conditions as currently provided until April 1, 1979.

Section 5—Reports

This section provides that the Secretary shall submit by February 1, 1979, recommendations on improvements in the Wagner-Peyser Act. The Secretary shall also develop

methods to ascertain annual energy development and conservation employment impact data by type and scale of energy technologies used and present such data to the Congress, OMB, the Department of Energy, and the Department of HUD.

Section 6—Assistance to Plant, Area, and Industry-Wide Labor-Management Committees

This section provides for the establishment of joint labor-management committees on plant, area, and industry-wide bases to improve labor-management relationships, job security, and organizational effectiveness under the direction of the Federal Mediation and Conciliation Service.

Section 7—Repealer

This section repeals section 104 of the Emergency Jobs and Unemployment Assistance Act of 1974, Public Law 94-563.

Section 8—Assistant Secretary

This section provides that the Department of Labor shall have an additional Assistant Secretary, and that the current Deputy Undersecretary for Legislation and Intergovernmental Relations may fill the Assistant Secretary's position without confirmation.

COMMITTEE BILL (S. 2570)—ORGANIZATION OF TITLES

S. 2570 restructures the Comprehensive Employment and Training Act Amendments of 1973 as follows:

TITLE I

Title I of the current CETA law authorizes a nationwide program of comprehensive employment services including institutional training, on-the-job training, work experience, public service employment, job counseling, testing, and placement services.

Title I of S. 2570 authorizes most of the administrative and general provisions applicable to the CETA programs.

TITLE II

Title II of the current CETA law authorizes a program of transitional public service employment and other employment services in areas with an unemployment rate of at least 6.5 percent for 3 consecutive months.

Title II of S. 2570 provides for services authorized by Title I of the current CETA law. It further authorizes an upgrading and retraining program as well as a transitional public service employment program for the structurally unemployed.

TITLE III

Title III of the current CETA law authorizes national employment programs for special target groups such as youth offenders, older workers, persons of limited English-speaking ability, Native Americans, migrant and seasonal farmworkers, and others with particular labor market disadvantages. The Secretary of Labor is authorized to undertake research, demonstration, and evaluation programs. Title III authorizes the Summer Youth Program and the Youth Employment and Demonstration Projects Act of 1977, except for the Young Adult Conservation Corps which is authorized in title VIII.

Title III of S. 2570 also authorizes services for groups with particular employment problems as well as research, demonstration, and evaluation programs. The Committee bill further authorizes a voucher program, welfare demonstration project, and incentive programs for prime sponsors who administer exemplary programs. Youth programs authorized by the current title III are placed in Title IV under the Committee bill.

TITLE IV

Title IV of the current CETA law authorizes the Job Corps, a program of intensive education and employment services for disadvantaged youth, to be carried out primarily in a residential setting.

Title IV of S. 2570 authorizes youth programs including the Job Corps, Summer Youth Program, Youth Employment and Training Program, Youth Incentive Entitlement Pilot Projects, Youth Community Conservation and Improvement Projects, and Youth Adult Conservation Corps.

TITLE V

Title V of the current CETA law authorizes the National Commission for Manpower Policy, an advisory group that has been assigned responsibilities for examining the Nation's employment needs and goals and advising the Secretary of Labor on national employment issues.

Title V of S. 2570 authorizes and reconstitutes the Commission. The Commission is renamed the National Commission for Employent and Training Policy.

TITLE VI

Title VI of the current CETA law authorizes a countercyclical public service employment program.

Title VI of S. 2570 also authorizes a countercyclical public service employment program; however, various provisions of the program have been modified substantially.

TITLE VII

Title VII of the current CETA law authorizes most of the administrative and general provisions applicable to CETA.

Title VII of S. 2570 authorizes a new private sector program. The primary purpose of this initiative is to create private sector jobs for economically disadvantaged persons.

TITLE VIII

Title VIII of the current CETA law authorizes the Young Adult Conservation Corps, which provides employment to youth in conservation and other projects of a public nature on Federal and non-Federal public lands and waters.

S. 2570 does not authorize a Title VIII. The Young Adult Conservation Corps program is authorized by Title IV.

Mr. NELSON. Mr. President, I ask unanimous consent that a letter to me as chairman from Mr. Marshall, the Secretary of Labor, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF LABOR,
Washington, D.C., August 21, 1978.

Hon. GAYLORD NELSON,
Chairman, Subcommittee on Employment, Poverty, and Migratory Labor, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This letter is to express the views of the Department of Labor with respect to S. 2570, the "Comprehensive Employment and Training Amendments of 1978." The Department strongly supports passage of this bill which would reauthorize the Comprehensive Employment and Training Act of 1973 (CETA) for another four years, while making important changes in the design and management requirements of the programs conducted under the umbrella of CETA.

S. 2570 makes significant improvements in CETA. The bill targets CETA towards those most in need by imposing strict income and unemployment eligibility tests. It limits the length of time any individual can stay in a CETA program so as to eliminate substitution of CETA workers for permanent workers, to increase the number of persons who can be served, and to increase the transition from CETA into regular jobs.

S. 2570 also places strict limitations on the Federal wages that can be paid PSE workers and the amount by which local jurisdictions can supplement the Federal base. This will assure that CETA jobs are not more attractive than career-type jobs in the private economy.

The bill also increases the authority of the Secretary to eliminate fraud and abuse in the CETA program by giving him increased regulatory authority and by allowing him to directly attack violations of CETA by subgrantees and subcontractors of prime sponsors if the prime sponsor takes no action.

S. 2570 simplifies the paperwork burden on prime sponsors. Prime sponsors will have to provide in their comprehensive employment and training plans each year only the information that had changed from the previous year. In addition the information required of prime sponsors has been limited to that information that is necessary for the Secretary to determine that the program is being conducted efficiently, effectively, and in conformance with the Act's requirements and purposes.

We strongly support the passage of S. 2570. CETA has met the needs of this Nation for a program that will train the structurally unemployed so that they can have marketable skills. At the same time it has served the Nation well in a time of economic crisis by providing employment to those persons who were countercyclically unemployed.

Under the proposed legislation, an increased emphasis would be placed on training as a component of any public service employment. Special programs would be conducted to help individuals facing special disadvantages in the labor market—such as the elderly and the young, the handicapped, displaced homemakers, and those of limited English-speaking proficiency. The Job Corps and the summer youth proggram would be extended, as would the youth programs that are experimenting with methods for improving the unsatisfactory unemployment situation of this Nation's young adults.

In addition, title VII of the bill would introduce into CETA a major new attempt to involve the private sector in the design and implementation of programs. Under the new Private Sector Opportunities for the Economically Disadvantaged program, the private sector of the economy would work with prime sponsors to create opportunities for the economically disadvantaged in private industry. This program represents a critical effort to create permanent, career-type jobs in the private sector for those who are not in the mainstream of the economy.

We understand that Senator Bellmon intends to offer a series of amendments to S. 2570 that would increase the integration of CETA with State public assistance offices, would increase services to those on public assistance, and would make clear the eligibility for public service employment of those families receiving aid under title IV (Aid to Families with Dependent Children) and title XVI (Supplemental Security Income) of the Social Security Act. We support the purpose of these amendments and hope they will be adopted.

The amendments also include a proposal to eliminate the requirement that before any funds can be made available for title VI countercyclical PSE, $3 billion must be available for title II structural PSE. We support this amendment. As we have seen in the past, the needs of the economy for structural or countercyclical PSE job opportunities change over time. We do not believe that the authorizing legislation should lock CETA into so rigid a formula. We believe it would be preferable to leave the amounts for title II and title VI to the flexibility of the budget and appropriation processes.

Finally, we are opposed to any amendment that may be offered to remove the Young Adult Conservation Corps (YACC) from the jurisdiction of the Labor Department. The current arrangement, whereby the Department makes referrals to the Departments of Agriculture and the Interior for the program and also promulgates certain regulations within our specific expertise and jurisdiction,

has created a strong and smoothly run program. We believe that this program stability and the benefits generated by the central coordination of all employment and training policies in the Department of Labor are essential to maintain.

The Office of Management and Budget advises that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

RAY MARSHALL,
Secretary of Labor.

Mr. NELSON. Mr. President, the distinguished Senator from New York (Mr. JAVITS), who is the ranking minority member, and I have worked on this legislation over a period of years and along with the rest of the committee and staff in great detail this year.

I yield the floor.

Mr. JAVITS. Mr. President, as the ranking minority member of both the Human Resources Committee and its Subcommittee on Employment, Poverty and Migratory Labor, I urge my colleagues, on both sides of the aisle, to give their support to S. 2570, the Comprehensive Employment and Training Act Amendments of 1978.

Thanks to the leadership of our chairman, the Senator from New Jersey (Mr. WILLIAMS) and our subcommittee chairman, the Senator from Wisconsin (Mr. NELSON), the bill reported by our committee reflects a continuation of the strong spirit of bipartisan collaboration that has long characterized congressional action on manpower legislation. We have been working with the White House, Secretary Marshall and Assistant Secretary Green in framing the CETA bill, and the result is that we bring to the Senate a bill that truly deserves the affirmative vote of a substantial majority of our colleagues.

The experience of the CETA program since its enactment in 1973 has not been without its share of problems. We have had the whole issue of the categorization of programs, and the philosophical debate over whether CETA should be administered like a manpower revenue-sharing program or whether the balance should be more in favor of somewhat more centralization of administration. There have been some serious problems, including "fiscal substitution," that is, the use of Federal funds to finance what local governments could have financed with their own resources; inadequate training of the structurally unemployed; inadequacy of private sector involvement; underrepresentation of the unemployed poor in the program; sometimes excessive wages; participant ineligibility; low rates of transition to unsubsidized employment; and the tendency of some CETA participants to remain in the program for too long. The Human Resources Committee has been very much aware of these and other expressed concerns and, in cooperation with the administration, has worked hard to remedy the defects of the program as much as possible. The provisions of S. 2570 will ameliorate the problems with which we have all been properly concerned.

But I do not wish to dwell unnecessarily upon the negative today; it is not a time for recrimination. CETA and the prime sponsor network it established have done a commendable job in dealing with the problem of unemployment and have facilitated our transition to a decentralized employment and training delivery system in our country. Our prime sponsors, on the whole, deserve much credit for taking on the administration of Federal manpower programs and for helping make CETA work, even though the near catastrophic recession of 1974–75 occurred almost immediately after CETA took effect on July 1, 1974. Their exemplary performance in the economic stimulus buildup last year, when the PSE program was expanded from 310,000 to 725,000 job slots in less than 1 year, went largely unheralded, except by those of us who appreciate the speed with which the employment-generating effects were felt.

Much of the credit for the sharp improvement in the unemployment situation in recent months should be given to CETA and our prime sponsor network. Our committee's decision to maintain our decentralized CETA system for an additional 4 years should properly be interpreted as a vote of confidence in our prime sponsors.

On balance, therefore, Mr. President, the pluses have far outweighed the minuses in CETA and, for the most part, the minuses do not reflect major inherent defects in the concept of a decentralized, decategorized approach.

In my judgment, the committee has left no stone unturned in meeting its responsibility to make the necessary statutory changes to improve the operation of the CETA programs, and presents to the Senate what I believe is a tight, 4-year bill. We have addressed every major issue in this multifaceted law and have recommended language which we believe will make a significant contribution in relieving the burden of unemployment in our country and in remedying the problems that have characterized the operation of these programs.

Mr. President, before describing the major provisions of the committee bill, I wish to discuss the organization of S. 2570.

STRUCTURE OF THE BILL

The Human Resources Committee recommends that several major changes be made in the organization of the Comprehensive Employment and Training Act.

Title I of the existing law, enacted in December 1973, establishes the principal administrative arrangements for our decentralized manpower delivery system and contains authority for the conduct by prime sponsors of comprehensive employment and training programs. Approximately $2 billion is appropriated for title I, to fund about 430,000 annual slots, in round figures.

The Human Resources Committee adopted the administration's proposal that, in the interests of streamlining the CETA grant mechanism and reducing the excessive burden of paperwork under which our prime sponsors have labored, title I be redesigned to contain only the administrative provisions. The committee bill, therefore, transfers all of the present administrative provisions of CETA to title I and proposes to establish a single grant application procedure for for prime sponsors. In addition, the general provisions applicable to all programs—for example, wage standards—are transferred from title VII of the existing law to the new title I. This new format should help simplify the local administration of CETA programs by reducing the redundancy that has often characterized separate application and reporting procedures under each title.

In this connection, Mr. President, I point out that the committee has modified the administration proposal in respect of the staff of local planning councils. The administration bill would have required prime sponsors to appoint an "independent" staff "solely accountable" to the planning council. The committee was concerned that this approach might fractionalize the planning process so S. 2570 requires prime sponsors only to provide a full-time staff which is "responsible for serving the council." The staff may be affiliated with the local prime sponsor, therefore, and may be accountable in its work to the prime sponsor and the council.

The committee also adopted the administration's proposal to transfer the program authority for comprehensive employment and training services from title I of existing law to title II of the new bill.

Title II of the present law, also enacted in 1973, authorizes establishment of a transitional public employment program in areas of substantial unemployment (ASU). About $1.125 billion is currently appropriated for title II, to provide some 125,000 positions per year. The administration proposed originally to consolidate all authority for public service employment into a revised title VI—the existing countercyclical jobs title. Under that plan, public employment programs now authorized under title II and title VI of existing law would have been combined into a single new title VI, and the new title II would have contained only authority for the comprehensive manpower services outlined above.

I had a number of serious reservations about this plan, including the fact that the proposed consolidated title VI would have reduced targeting on the long-term unemployed and would not have channeled any more funds into areas of high unemployment. In addition, I had made up my mind some time ago and, indeed, proposed in my own CETA bill (S. 2435) that Congress needs to delineate more clearly between Federal jobs programs for the structurally unemployed and those for the cyclically unemployed. To the extent that it is possible to distinguish between these two types of unemployed—and the experts, at places such as Brookings, seem to think it is—we ought to design our remedial programs accordingly. Thus, I proposed, as I had in S. 2435, that a new public service employment program, targeted specifically at the structurally unemployed—defined as the low-income, long-term unemployed—be written into title II of the committee bill. Title VI could then remain as our temporary, counter-

cyclical unemployment program. I felt this to be the only way we could take account adequately of the significant differences in the problems and the employment and training needs of the structurally and cyclically unemployed.

The Human Resources Committee shared these concerns and, consequently, S. 2570 proposes establishment of a special new public service employment program for the economically disadvantaged, in a new part D of title II. The key features of title II–D are: First, targeting on those individuals who are unemployed 12 or more weeks and who are in families with incomes at or below 70 percent of the BLS lower living standard budget; second, a heavy emphasis on training and employability development for the structurally unemployed; and third, a somewhat more targeted allocation formula, to provide increased Federal assistance to those areas which have high concentrations of the eligible unemployed.

The allocation formula in title VI of the committee bill is the same as that in title VI of the existing law, to wit: 50 percent is allocated on the basis of relative "total unemployment" in the prime sponsor area; 25 percent is allocated on the basis of the relative number of unemployed persons in "areas of substantial unemployment" (ASU) in the prime sponsor's jurisdiction; and 25 percent is allocated on the basis of relative "excess unemployment" (numbers of unemployed over 4½ percent of the prime sponsor labor force).

The allocation formula recommended by the committee for the new PSE program in title II-D is only slightly different from that of title VI, to wit: precisely the same formula factors: total unemployment, ASU unemployment, and excess unemployment but a change in their relative weights. Instead of 50–25–25, as in title VI, we have recommended 33⅓–33⅓–33⅓ for title II–D. In other words, compared with title VI, the formula in II–D gives equal weight to total unemployment, ASU unemployment and excess unemployment. In addition, the amendment offered in committee by the Senator from Massachusetts (Mr. KENNEDY) and I, would change the time frame used in computing ASU unemployment, after fiscal year 1979, from the highest consecutive 3 months unemployment in a particular year to the annual average number of unemployed persons in the areas of substantial unemployment.

For the new public service employment program for the economically disadvantaged in title II, therefore, the committee opted to recommend that the same weight be placed on the severity of unemployment in an area as is placed on total unemployment.

I might add, Mr. President, that there were a number of options before the committee that would have produced a drastic geographic redirection of CETA funds. Some would have had the committee make CETA a symbol of the "frostbelt-sunbelt" controversy. The committee concluded, however, that some form of unemployment characterizes almost all prime sponsor areas and that, since the existing formulas in titles I and VI do enable the unemployed to be assisted wherever they reside, even though CETA funds are spread very thinly over the country, they should not be altered at this time.

With respect to the new public service employment program for the structurally unemployed, however, the committee did feel that in allocating funds some distinction should be made among the types of unemployment in an area—frictional, seasonal, cyclical and structural—and that, among these, relatively greater weight should be placed upon severe structural unemployment.

In recognition of the high priority the committee places upon the public service employment program for the structurally unemployed, S. 2570 provides that no funds may be appropriated for title VI PSE until at least $3 billion (or about 350,000 slots) has been appropriated for title II–D.

Title VI of the committee bill, in contrast to title II–D, deals with the unique and serious unemployment problems of those persons thrown out of work during a period of economic recession.

Mr. President, there could not be a more propitious time for Senate consideration of title VI. I do not wish to sound like a harbinger of doom, but we must acknowledge the possibility that our country may slip into another recession in 1979. The sudden resurgence of inflation to an annual rate in excess of 7 percent has tempered what can be done through conventional stimulative policies to reduce further the national unemployment rate. Moreover, exceptionally slow or stagnant economic growth in the remainder of this year and next may cause the unemployment rate to move back up to 7 percent or higher. If this scenario transpires, and many economists anticipate just that, or worse, CETA must be ready to step into the breach to afford short-term employment opportunities, in my judgment, to at least 25 percent of the unemployed in excess of the number unemployed at a 5-percent unemployment rate. In round figures, if the rate moves up to 7 percent or 7 million unemployed, we will need at least 500,000 temporary jobs for the cyclically unemployed.

The committee has designed title VI specifically to deal with this problem. Those eligible would include persons unemployed for at least 45 consecutive days and whose incomes are at or below 85 percent of the BLS lower living standard budget. It is true that these requirements are somewhat looser than those of title II–D, which are heavily targeted at the hardest hit of the structurally unemployed, but the committee had in mind the recession situation, which calls for a different approach. The committee felt that in the recession situation, when the "working poor" sometimes taste unemployment for the first time in their lives, it would be unfair to stipulate that persons who had been earning $9,000 per year, as opposed to $7,500, would be ineligible unless they waited another month.

Mr. President, another organizational improvement the committee proposes is to consolidate all authority for youth employment programs in title IV. Presently, the Summer Program for the Economically Disadvantaged, and the new youth programs enacted last year in the Youth Employment and Demonstration Projects Act, are in title III. Job Corps, which is a comprehensive program for unemployed youth is authorized in title IV. And the Young Adult Conservation Corps, also enacted last year as part of YEDPA, is authorized in title VIII. Under the committee bill, all of these programs, which together account for some $2.2 billion per year in budget authority would be authorized under title IV.

Mr. President, I would like now to turn to some of the specific provisions of S. 2570.

ELIGIBILITY

Mr. President, the committee bill proposes to improve the targeting of all CETA programs at those individuals who are most in need of Federal employment and training assistance. Under current law, all of the unemployed, underemployed and disadvantaged are eligible to participate in CETA programs and, consequently, the poor have not always been given first priority. In fiscal year 1977, for example, while 78 percent of title I participants were economically disadvantaged, only 49 percent and 67 percent, respectively, of title II and VI participants were disadvantaged. Sections 213, 237, and 607 of S. 2570 would require that all CETA participants in titles II and VI be economically disadvantaged, that is, be members of families whose earnings are below the lower living standard budget of the Bureau of Labor Statistics—70 percent of this standard (or about $7,500) for titles II and III and 85 percent (or about $9,000) for title VI.

The effect of these provisions will be to recast CETA as a jobs and training program for those situated at the lower ranges of family income. The committee has heeded the counsel of the distinguished minority leader (Mr. BAKER) the Senator from Oklahoma (Mr. BELLMON) and others, including this Senator (my own bill, S. 2435 proposed similar targeting) who urged that we try to target CETA more sharply at the structurally unemployed. Beginning in October of this year, it will be possible to characterize CETA as an employment program for the poor and near poor—those on whom the burden of unemployment is most oppressive. It is my hope that prime sponsors will do everything possible to implement these new requirements as swiftly as is consistent with prudent program management.

I might note, in concluding this section of my statement, Mr. President, that I am deeply concerned about the mismatch that may occur between the funding formulas of CETA and the new eligibility criteria. S. 2570 would, as I have just explained, sharply target CETA programs at the hardest-to-employ (in terms of low income and length of unemployment) without making the corresponding changes in the funding formulas, because of data inadequacies, and so forth. I would hope the Department would monitor this potential prob-

lem very carefully—including insuring that prime sponsors are enrolling only those persons who satisfy the eligibility criteria. In addition, the Department will need to be prepared to reallocate funds from those areas which have difficulty locating enough eligibles to those areas that have large concentrations of eligible persons. I, for one, will watch this very closely and do all I can to see that Federal funds are directed to those areas most in need.

WAGES

Related to the subject of participant eligibility are the questions of CETA wage levels and the duration of individual participation in CETA programs. The committee is well aware that there have been instances of high-wage CETA jobs in some areas, even though the Federal maximum has been $10,000 under existing law. Prime sponsors have been free to supplement the Federal contribution with local funds without limit, and the result has been that wages in some CETA-supported slots exceed $20,000 per year. The principal effect of this phenomenon, in my judgment, is that some prime sponsors, in trying to maximize the potential service benefits to themselves, have created too many CETA positions in the higher wage-higher skilled jobs, for which the structurally unemployed can not always qualify.

The question of CETA wage levels, therefore, requires that a decision be made on whether CETA is to be principally a program to supplement municipal services or a program of jobs and training for the hard-to-employ. There is some trade-off between these objectives because if the former objective is to be emphasized, the law must permit prime sponsors to pay wages high enough to attract and maintain persons who are qualified to perform such local public services. If the latter consideration is to be given the highest priority, however, then the wage levels must themselves serve as the automatic allocative mechanism for discouraging the more highly skilled from competing for available CETA positions. Thus, the wage standards can be the principal device for insuring that those most in need of Federal employment and training assistance are given priority for assistance in CETA programs.

At the same time, however, those wage levels need to be high enough, one, to enable participants to have access to meaningful employment so they can obtain useful work experience from their participation in these programs and, two, to take account of the near 30 percent inflation that has occurred since 1973. Furthermore, we must be careful not to create a situation in which there is a chance that local "equal pay for equal work" standards might be vitiated by placing lower wage workers into higher wage classifications, thus encouraging displacement of existing personnel. All of this is further complicated by the fact that wage levels vary considerably from region to region in the United States, so what may be appropriate in one area may be insufficient in another.

The Human Resources Committee grappled with all these considerations in its deliberations on S. 2570 and I believe it has formulated what is a generally acceptable approach. First, the maximum federally assisted CETA wage provided for in the committee bill is $10,000, adjusted upward to reflect area wage levels by an appropriate area wage index. The extent of the adjustment is limited to no greater than 20 percent of the Federal maximum, or $2,000. Thus, the maximum Federal wage in a title II or title VI PSE position, in even the highest wage areas of our country, would be $12,000 per year.

This does not mean, however, that every PSE jobholder would earn $12,000, even in the highest wage areas of our country. The committee bill requires that prime sponsors maintain in their jurisdiction an average CETA Federal wage no greater than $7,800 per year, as adjusted upward by the index referred to above. In the high wage areas, therefore, while some jobholders could earn $12,000 per year in Federal funds, an average PSE wage of about $9,300 would have to be maintained. This would serve to self-limit the number of higher wage CETA jobs that would be available in a given locality.

SUPPLEMENTATION

In addition, the Human Resources Committee considered the question of permissible wage supplementation with non-Federal funds. The committee received testimony ranging from those who would allow prime sponsors to use their own funds to supplement Federal wages without restriction to those who would place a blanket prohibition on all local supplementation. Guided by our desire to limit wage levels in order to facilitate greater targeting of CETA jobs, the committee agreed to place strict limitations on wage supplementation. First of all, supplementation is prohibited in title II public service employment. The committee felt that since extra training and support services would be mandated in the jobs program for the structurally unemployed—title II–D—the total cost per job would be excessive if supplementation were also permitted. Also, since title II–D jobholders could be assigned to regular job classifications, that is, not restricted to separate 1-year projects, we wished to insure that, to the maximum extent possible, positions be reserved for the hardest-to-employ.

Supplementation is permitted in title VI, under strict limitations. The total amount of non-Federal funds which can be used by a prime sponsor to supplement wages of jobholders may not exceed an amount equivalent to 10 percent of the title VI CETA grant allocated to the prime sponsor. Moreover, the wage of a particular job may not be supplemented by more than 20 percent of the maximum federally supported wage. Thus, if a prime sponsor is in a high-wage area and can pay a maximum Federal wage of $12,000, it may supplement CETA wages with non-Federal funds, but by no more than 20 percent, or $2,400. Some title VI jobholders in high wage areas could earn up to $14,400, therefore, when Federal and non-Federal funds are combined. The number of such jobholders would, of course, be limited both by the 10 percent of allocation restriction and by the requirement that an average wage of $7,800, adjusted, be maintained by the prime sponsor, though the value of non-Federal supplements is not included in the calculation of the area's average Federal wage.

The restrictions on supplementation do not apply to those currently in PSE positions, since this would constitute a change in a term of their employment and could lead to drastic wage cuts.

LENGTH OF PARTICIPATION

A corollary of the wage issue is the matter of participation duration. There have been instances where CETA enrolees have remained on the program for long periods of time—some, we are told, have been enrolled since the Emergency Employment Act of 1971. In many cases this has occurred because conditions of very high unemployment in an area have left few alternatives to CETA. In at least as many instances, however, the incentives to transition out of CETA and into other employment have not been great enough.

S. 2570 deals with this issue in section 122(i) (2) and (3), respectively, where participation in PSE is limited to 78 weeks in any 5-year period for new employees and to 52 weeks for those on board as of October 1, 1978. Existing CETA workers will be given 1 more year of participation, therefore, while new enrollees will be allowed to remain in the program for a year and a half. Under title VI, participation is limited to 1 year for all enrollees.

Our committee was cognizant of the possibility, however, that in areas of severe unemployment it might be improvident to force enrollees off the CETA program and into an uncertain labor market. For this reason, section 122(i)(4) provides the Secretary of Labor with authority to waive the limitation on participation and grant an extension of up to 6 months for individuals. The authority to grant 6-month extensions to prime sponsors in exceptional circumstances would enable them to maintain either existing or new enrollees beyond the expiration dates. It is my expectation that in granting these waivers, the Secretary will take account of the unusual unemployment problems of our cities, and that he will be alert to the possibly severe disruption of essential services that could result if all existing CETA employees are summarily dismissed on October 1, 1979. We need a weaning process here and I believe the waiver authority gives us sufficient flexibility.

EDUCATION-WORK LINKAGES

As some of my colleagues know, the late Senator Humphrey and I collaborated last year to draft a new program in our Youth Employment bill, which was enacted ultimately in Public Law 95–93, to initiate a new partnership between prime sponsors and local education agencies in improving the transition of youth from school to work. I feel just as strongly today, indeed I am encouraged by the experience we have had with this program throughout our country so far.

The very brief experience chronicled in the March 1978 report of the De-

partment, "Youth Initiatives," and in the first interim report of the National Council on Employment Policy indicates that a new spirit of collaboration has been initiated between prime sponsors and local education agencies; these separate human development systems are working together as never before at the local level, jointly to design and administer programs to strengthen the linkages between the classroom and the workplace. I am hopeful that these "collaborative processes", as former Labor Secretary Wirtz calls them, will enable us to build better bridges between the world of education and the world of work to improve the transition of the youth of our country from school to work.

I understand, Mr. President, that there has been some confusion over our intent with respect to the role of community colleges in the 22 percent setaside program of section 433(d). Let me say first that it was never my intent to exclude the postsecondary institutions from participation in programs administered pursuant to agreements between local education agencies and prime sponsors. In fact, it was my expectation that community colleges would be included in some of the programs operated pursuant to these agreements. However, we did not intend that prime sponsors should negotiate agreements with postsecondary institutions, for the simple reason that it was our judgment that poor youths enrolled in secondary schools deserved greater priority for Federal assistance than youths enrolled in postsecondary institutions. After all, most community college students are high school graduates and have embarked already upon career tracks. Given the extremely limited funding available for this program and the fact that there are some 15,000 school districts in the United States, one can understand that we did not wish to have excessive dilution of the impact of this new program. Were prime sponsors given the opportunity to negotiate with community colleges as well as local education agencies, secondary school youth—many of whom may drop out of the school systems permanently—might not be assisted. So the emphasis clearly was, and continues to be, on the relationship between prime sponsors and local education agencies in the 22 percent setaside program of title IV.

In the bill before us today, however, we have tried to enhance the involvement of all educational institutions, including postsecondary institutions, in the development, review and implementation of CETA programs. I wish to pay tribute, in this regard, to Senators WILLIAMS, NELSON, CRANSTON, RIEGLE, and CHAFEE, all of whom supported my efforts to extend the opportunities for improved education—work linkages in the committee bill. There are a number of specific new provisions which should be highlighted at this point.

Most prominent among these is the 1 percent setaside of title II, found in section 202(d). This provision would make available to State Governors an amount equivalent to 1 percent of the total appropriation for title II for the purpose of encouraging cooperative arrangements between prime sponsors and educational institutions. There is so much that can be accomplished in alleviating the problems of unemployment and underemployment in our country if collaboration processes between these agencies can be encouraged.

Frequently we hear criticism from manpower officials that educational institutions do not adequately prepare people for work; that today's curricula are not relevant enough to labor market conditions. Educators reply that some CETA manpower programs' participants receive little training and employability development. They go on to complain that PSE is often a temporary stop-gap measure, lacking in much long-run value to the CETA participants. Is it not apparent that manpower agencies and educators need to be working partners and to learn from each other?

My own view of this is that State Governors—the chief elected officials of the State—are in the best position to nudge the manpower and educational systems together. In so many ways, such as incentive grants for joint programs, in-service programs and conferences and technical assistance the Governor can be the catalyst for initiating a new partnership between prime sponsors and educational institutions. Indeed, my own proposal for the 1-percent setaside is complemented by the provisions of section 105(b)(1) of the committee bill, which provide that coordination of employment, training and education programs shall be a new function of Governors in CETA programs, and shall be described in the Governor's Coordination and Special Services Plan submitted to the Secretary.

Beyond these innovative provisions, title I of S. 2570 includes language in section 103, which requires prime sponsors to consult with and involve educational agencies in the development and implementation of CETA programs; and in section 104, which directs prime sponsors to make their proposed comprehensive employment and training plans available to educational agencies and institutions for their review and comment. In short, it is the intent of our committee that prime sponsors take affirmative action to involve educational institutions—local education agencies, postsecondary institutions, vocational education agencies, and so forth—in the planning, development and implementation of their CETA programs.

This does not mean, of course, that educational agenices will have any presumptive role in the delivery of services to eligible participants. But, prime sponsors will have to take a hard look at the ability of educational institutions to provide the kind of training and employability development so desperately needed in today's labor markets.

TRAINING IN CETA

In this connection, Mr. President, I wish to discuss very briefly what the committee has done in mandating that we have more training in our CETA programs. This has long been a major personal concern of mine—to wit, that participants in PSE and non-PSE activities do not receive enough training. I share the view that we should not raise unrealistic expectations by operating training programs in fields and areas where no jobs are likely to materialize. This practice is unfair to participants and indeed, is dishonest.

But we cannot ignore the fact that 4 million new jobs were created in 1977 and over 1.5 million new jobs in the first 4 months of this year. So the jobs are there, in many cases, but our workers need the skills that are required to get and keep these jobs. Even in our cities, where unemployment is so shocking, there is demand for skilled clerical and service employees, for example.

It appears that there have been some reasons for the neglect of training, especially in PSE programs. Under existing law, 85 percent of the funds allocated to prime sponsors had to be used for wages—so little was left over for administration, overhead, training and supportive services such as counseling. And in the big buildup of 1977, pirme sponsors were under some pressure to place people on projects as quickly as possible. This left little time for prudent labor market planning or for the design of appropriate supplemental training programs.

The Human Resources Committee, on the recommendations of Senator NELSON and I, has taken several steps to insure that training is afforded CETA participants. First, training will be a mandated part of the title II–D program, "Public Service Employment for the Economically Disadvantaged." Every participant placed in a PSE slot under title II–D must be given appropriate training. Second, title II–D PSE programs must be designed, according to the statement of purpose in section 231, "to provide * * * transitional employment * * * to enable persons to move into employment or training not supported under this act."

In other words, Mr. President, PSE programs shall be designed to transition persons into unsubsidized employment, so prime sponsors will be required to operate those kinds of programs which improve the chances that participants will transition into permanent employment opportunities.

We intend title II–D to be a springboard into unsubsidized employment, therefore, and we have reinforced that intent by limiting enrollee participation to 18 months.

Title II–D, will become, I hope, like a "work/training-study program" for the structurally unemployed. I would like to see prime sponsors fund those kinds of programs in which the structurally unemployed spend, for example, two-thirds of their time on the job and one-third learning the necessary skills in classrooms or other modes. This is why it is so essential that educational institutions and community based organizations be involved in the design and implementation of title II–D as well as the rest of title II. These organizations can help prime sponsors design employment programs that emphasize the training aspects; they can insure that the idea of job preparation through work/study becomes a reality for people of all ages. Why

should we not experiment with PSA programs that entail part-time work and part-time learning, particularly for single heads of households? In my judgment, if we can have a jobs programs that has training built into it, which we do not now have, CETA will work far more effectively and it can become a permanent part of our country's human resources development strategy. Just think of the impact a work/training program of this kind could have on our welfare population.

In short, Mr. President, I think we can lay to rest once and for all the allegation of "make-work," and so forth by establishing this new work/training-study program in which the principal thrust is employment, but the principal objective is employability development and labor market preparation. I might add in this connection, Mr. President, that prime sponsors will not be required to place enrollees into projects in title II–D PSE because we wish to maximize the transition potential of this program and because it is unlikely that the low income, long-term unemployed are substitutable for regular personnel.

The third thing we have done in the committee is to give our prime sponsors the wherewithal they need to implement the training aspects that would be mandated in the bill. Section 233(b) of S. 2570 provides that not less than 90 percent of the funds allocated to prime sponsors be used for wages, training and supportive services. In other words, we have transferred training funds from the 15-percent pot in which they have been included historically, to the same pot where wages are provided for. Thus, training funds are given equal weight with wage funds in title II–D, PSE, in order to make possible a significant expansion of training and education.

Indeed, this is precisely the recommendation made by the National Commission for Manpower Policy in its recent interim report to Congress on "Job Creation Through Public Service Employment":

> Since the Commission looks upon PSE as providing temporary employment opportunities for the structurally unemployed, their transition into regular jobs must be the goal. While the length of time enrollees should spend on a PSE position may have to be adjusted in light of conditions in the local labor market, the proposed assignment should be in the range of twelve to eighteen months. Limits on the duration of participation in a PSE job are needed to enable a larger number of people to participate, to encourage enrollees to search for unsubsidized positions, and to limit job displacement.
>
> While a PSE position for this stipulated period may provide the support essential to some workers to facilitate their transition into regular employment, the Commission believes that for other workers with inadequate competences or obsolete skills, it is essential that they be afforded the opportunity to acquire new skills to improve their prospects of obtaining regular jobs. In order to improve the prospects of successful transition, the Commission recommends (4) that local sponsors be required to provide remedial education and skill training to enrollees in need of such assistance, and that they be directed to involve local employers more actively in the planning of local PSE programs so that they can contribute to designs aimed at improving transition.

INVOLVING THE PRIVATE SECTOR

This discussion of job training and of preparation for unsubsidized employment brings me to the next important part of the committee bill—title VII, "Private Sector Opportunities for the Economically Disadvantaged." Mr. President, I wish to be absolutely clear about one thing in this respect: I believe this proposal—to engage the private business community more directly in the development and operation of our training programs for the hard-to-employ—could not be more timely or more creative. I have advised the President personally that this may be the most important thing we do in CETA this year, and he deserves credit for proposing the idea this year.

I have long been identified in the Senate as the principal advocate of business-government partnerships to deal most effectively with many of our domestic social problems. Just last November, in a speech in New Orleans before the U.S. Conference of Mayors, I said:

> I believe a private-public partnership needs to be re-established so that the long term unemployed can be given training and a real chance at lifelong careers. And in late 1976, the late Senator Humphrey and I teamed up on a proposal in our youth employment bill, S. 170 to establish a program called "Youth Opportunities in Private Enterprise."

This program, like that described in title VII of S. 2570, was designed to foster improved cooperation between the public and private sectors in the development of job opportunities and would have encouraged prime sponsor local governments to fund on-the-job training programs in which for-profit employers and community based organizations were involved.

The key concept of title VII and of the proposals I have authored in this connection is that our Federal employment and training programs must concentrate both upon the supply side of the labor market, that is, upon skills development, education and training, and upon the demand side of the labor market—that is, upon the hiring and training decisions of individual firms.

It is true that OJT and private sector placement are going on in our CETA programs; we do not suggest here today or in our bill that prime sponsors or nonprofit community based organizations bear the responsibility for the lack of greater business community involvement. As Labor Secretary Marshall has pointed out, there has been a "missing link" in our CETA programs and we have not had the funds or the authority to marshal adequately the resources of the business community in training and placing the unemployed.

Since Senator NELSON has already explained in detail the provisions of title VII of S. 2570, and since I discussed these myself at great length on May 25 in a Senate speech following the White House meeting called by the President, I will not describe title VII at this point. But I do wish to underscore the role of community based organizations and local education agencies in the private industry councils that prime sponsors will establish under title VII.

The PIC's, as they are called, will have the responsibility of encouraging businesses to become involved in CETA training programs; the PIC's will promote OJT, for example, and will be the prime sponsor's direct link to the private sector. Heretofore, prime sponsors have not had at their disposal a link with the private business sector. There were various organizations, of course, that had greater or lesser success in private sector job development, but these did not exist in every area. Now every prime sponsor will be required to designate a PIC—which may be either an existing organization or an organization newly formed for this purpose, or may be a group of persons selected individually by the prime sponsor—which will be an operational entity promoting, fostering, and facilitating private sector participation.

There are two things that remain to be clarified about title VII. The first is that activities conducted under title VII, particularly OJT, should in no way displace similar activities being conducted under title I by other organizations. We have to be careful, amid all the fanfare about title VII, that we do not undercut implicitly or otherwise, the solid OJT programs now operated under title I. We would not like to see the PIC's, for example, competitively promoting OJT contracts among the same employers now engaged by prime sponsors or their grantees.

In this connection, I want to reassure my colleagues that the PIC's will not undercut the prime sponsors' role in CETA. Section 703(a)(b) and section 704(c) together provide that a condition of financial assistance under title VII will be that the prime sponsor and the PIC shall develop jointly the private sector initiatives program to be operated under title VII; that no activity will be funded which does not have the approval of both the prime sponsor and the PIC; and that the proposed plan for activities to be conducted under title VII shall be jointly agreed to before it is submitted to the Secretary by the prime sponsor. Some had expressed the concern, on the basis of the introduced bill that, in effect, there was no prime sponsor for title VII. The committee has addressed this concern directly through the new language of section 703(a) which reaffirms the preeminent role of the prime sponsor in the overall CETA plan while providing the opportunity for a relationship of collegiality and comity in the mutual consideration and approval of title VII activities.

This brings me to my next point, Mr. President, the role of CBO's and LEA's on the private industry councils. While in committee I was unsuccessful in mandating that these organizations be represented on the PIC's, I did succeed in obtaining language in section 704 which permits their representatives to be appointed by prime sponsors. This is an important provision because many community-based organizations (CBO) and local education agencies (LEA) have a demonstrated record of effectiveness in working with the private sector to obtain

employment and training opportunities for the disadvantaged.

I was very concerned that in the original title VII as sent up by the President CBO's and LEA's seemed to be overlooked and I feared they might interpret our actions as a vote of no confidence in what they have been doing. They are responsible for much of the OJT that takes place today and, in any event, do not deserve to be faulted because there is not more OJT. The Urban League, OIC, SER, VERA, and the other voluntary associations can teach us so much about placing and preparing the disadvantaged for employment in the private sector and, thus, should not be overlooked in title VII. I hope prime sponsors will take advantage of what CBO's and LEA's have to offer to help the PIC's succeed in what will be a difficult enterprise: getting the disadvantaged into regular employment. Indeed, there is no question in my mind but that the two institutions are indispensable to the success of title VII.

COMMUNITY BASED ORGANIZATIONS

Mr. President. this brings me to another subject of great importance. S. 2570 proposes significantly to enhance the role of community-based organizations in local CETA programs. I was a strong supporter of the amendment offered by Senators SCHWEIKER and RANDOLPH to direct that in selecting program operators prime sponsors give special consideration to community based organizations of demonstrated effectiveness. These organizations have a special relationship to the poverty community CETA is intended to serve and, thus, are well situated to reach the disadvantaged. This is a particularly valid consideration in the minority communities—black and Hispanic—where the Opportunities Industrialization Centers OIC's and Urban League affiliates, for example, have had such great success. Our committee intends that prime sponsors take a very hard look at the CBO's and consider carefully whether other competing program operators have the same capabilities and effectiveness that characterize the CBO's of our country.

I might add at this point that I do not believe prime sponsors have utilized adequately the services of community development corporations. The CDC's are authorized under title VII of the Economic Opportunity Act and are included in the definition community-based organizations in section 125(1) of this bill. CDC's like Bedford-Stuyvesant restoration in Brooklyn, N.Y., are private enterprise oriented, and can provide valuable private sector work experience for the unemployed, especially minority youth. Also, they are located in special impact urban and rural poverty areas and thus are situated where the endemic problems of minority unemployement are most debilitating. I hope the Department of Labor will encourage prime sponsors to use the CDC's capacity for providing private sector training opportunities as the vital bridge—intermediaries—to unsubsidized employment for disadvantaged minorities.

RETIREMENT

Another important subject that warrants attention today is the question of the appropriateness of using CETA funds for contributions to PSE workers' retirement systems. The Subcommittee on Employment, Poverty, and Migratory Labor heard a great deal of testimony on this subject, which was precipitated by recent regulations prohibiting the use of CETA funds for this purpose.

The problem, of course, is that few federally funded public service employees can be expected to remain in their positions long enough to vest and thus qualify for benefits, hence the use of CETA funds can become, in effect, revenue sharing for municipal pension funds. On the other hand, current law does provide that CETA jobholders are entitled to the same benefits received by regular personnel of the same employer. Prime sponsors find themselves between the rock and a hard place, therefore, because they are required to make contributions to retirement funds on behalf of PSE workers but cannot use CETA funds for that purpose. Section 121(o) of S. 2570 deals with the problem by authorizing the Secretary of Labor to issue regulations providing for the use of CETA funds for contributions to retirement systems, where those contributions bear a reasonable relationship to the costs of providing retirement benefits to CETA participants. In other words, the contributions permitted must be based upon some actuarially sound estimate of the benefits that will accrue to CETA participants.

This provision of the committee bill is central to the amendment the managers have worked out with a number of Senators and which the committee will accept. The amendment provides that local governments may classify CETA workers as temporary personnel for purposes of determining the appropriate retirement coverage, if any, and that allowable Federal costs shall be as provided for in section 121(o), to wit: based on the cost of providing retirement benefits to participants. In addition, existing CETA employees are "grandfathered in," and CETA funds may continue to be used for retirement contributions as long as they remain in the program. Thus, the test of "reasonable relationship of retirement costs to participant benefits" would apply only to participants enrolled after July 1, 1979.

PROGRAM FOR OFFENDERS

Mr. President, I also wish to touch upon the new provisions in title III, section 301(b)(2). which I sought, which directs the Secretary of Labor to conduct a special program to provide employment and training assistance for offenders.

In my judgment, we have really missed the boat in this vital area, and the statistics on the rate of recidivism in our country are evidence of that fact. We must make a major effort to provide special training programs to enable offenders to become productive members of society. A criminal record is such a great obstacle to regular employment that many offenders find it so difficult to believe that employers share the view that they have paid their debt to society. And this barrier is compounded by the fact that most ex-offenders lack marketable job skills. Small wonder it is that many ex-offenders resort to crime again when they are unable to find employment.

I hope Secretary Marshall will get squarely behind this program and encourage prime sponsors to submit innovative proposals in this area. My knowledge of present programs, like those operated by the Vocational Foundation in New York City and the supported work program, which receive really de minimis amounts of money, indicates that the benefits to society can be enormous relative to the economic, social, and human costs of crime. In my judgment, it would be appropriate for the Department to seek at least $5 million for the offenders program for fiscal year 1980 and to begin gearing up for that level by using as much of the fiscal year 1979 appropriation for title III as can be made available.

CETA-ES RELATIONSHIP

Mr. President, the relationship between CETA prime sponsors and State employment security (ES) offices has been a strained one since CETA was enacted in 1973. The employment service was left in somewhat of an anomalous position by CETA because its enactment brought about a major restructuring of our manpower delivery system. The then-existing networks of Federal-State-local relationships were severely disrupted as the decentralized-decategorized system was put in place. There have been many suggestions to deal with this situation, most notably the very gifted and provocative proposal of Representative BILL STEIGER. Others have suggested that it would be prudent to assign functional responsibility for delivery of specific services to CETA and to ES—employability development to the former and job development to the latter.

The Subcommittee on Employment, Poverty, and Migratory Labor studied many of the suggestions that have been put forward but decided in the end that it would be premature to mandate any consolidation of CETA and ES at this time. I have been persuaded that, to a greater or lesser extent, cooperation between prime sponsors and the Employment Service seems to be evolving quite naturally around the country and that the necessary accommodations are being made to achieve a working relationship. Furthermore, I suspect that some tension between these two agencies may be healthy, particularly in a decentralized system.

In any event, the committee decided not to take any action that would mandate a linkage between CETA and ES. The committee has directed the Secretary to report to Congress on the need, if any, for reform of the Wagner-Peyser Act, and plans to take up that legislation next year. While the Secretary of Labor will be making recommendations for legislation, the committee intends that the Department utilize available expertise in and out of Government in studying the Wagner-Peyser Act. I raised my concern in committee about the idea of the Department studying and reporting on itself, especially in respect of a matter as important as the CETA-ES relationship. I would hope the Department

would also contract for a study of the Wagner-Peyser Act to be done by some of the institutions which have an expertise in this area, such as Brookings, the Urban Institute, the National Academy of Sciences or one of the other expert groups. Alternatively, the Human Resources Committee might contract for such a study to be done. Then the committee will have the best possible expertise available to it in its deliberations on this matter next year.

LABOR-MANAGEMENT COMMITTEES

Mr. President, finally I wish to discuss today the provisions of section 6 of the committee bill, which would establish authority for the Federal Mediation and Conciliation Service to conduct a program in encouraging and assisting plant, industry, and area-wide labor-management cooperative committees.

I had been almost a lone voice in this "desert" for many years, Mr. President, in proclaiming the benefits that could redound to our country if we would begin to consider some innovative means to enlarge the commonality of interests which are outside of collective bargaining between labor and management. The collective bargaining process is, of course, our principal means for joint determination of the terms and conditions of employment. But there is a need for a new, supplemental dimension in labor-mangement relations in our country, to wit; a forum in which an ongoing dialog could be established, to discuss and involve workers in matters not addressed normally in the framework of collective bargaining. I refer to problems in the workplace—alcoholism, drug abuse, work hazards, continuing education, culture and the arts, recreation, group activity, participation in plant decisionmaking and working life values.

With the proper safeguards to protect the collective bargaining process, joint labor-management cooperative committees can do much to harmonize the relationship between labor and management in the workplace—and stabilize the labor relations climate—in a particular area and bring out new values. This in turn can help to improve employee morale, reduce tensions in the workplace and foster local and regional economic development.

I understand, Mr. President, that some have expressed concern about the fact that the proposed administering agency for this program is FMCS and not the Labor Department and its Labor-Management Services Administration or the Commerce Department. I wish to make clear that the decision of the committee to go instead with FMCS was a considered one and, I think, eminently justified. There are three criteria which are indispensable to the successful administration of this program, to wit: First, experience with labor-management committees; second, a reputation for absolute impartiality between business and labor; and third, a field staff of professionals who know and understand the local conditions under which these committees may operate. The Federal Mediation and Conciliation Service satisfies all three of these prerequisities. I hope the judgment of the Human Resources Committee will be sustained by the Senate and that we will be able to get this innovative program underway soon.

Mr. President, I hope my statement will bring about a better understanding of the concepts of the committee bill. Programs funded under the Comprehensive Employment and Training Act will be of even greater importance in the coming years, Mr. President, particularly if we are facing limits on what we are able to do in reducing unemployment through direct aid and budgetary policy. It may very well be that we have reached the phase where further reductions in unemployment will require much greater use of CETA's targeted structural and countercyclical employment and training programs.

The CETA bill reported by the committee meets this challenge and that of severe and prolonged structural unemployment—especially in our cities and among minorities. We may well encounter this situation—or worse—in the coming months and years. I commend S. 2570 to the Senate.

Mr. WILLIAMS. Mr. President, it is with great pleasure that I welcome the Senate's decision to proceed to the consideration at this time of S. 2570, the Comprehensive Employment and Training Amendments of 1978.

As chairman of the Committee on Human Resources, I can assure you that the road to this point has been long and hard and studded with controversy. There have been innumerable difficult decisions that had to be made, and there will be more in the days ahead as the Congress moves toward enactment of this important legislation.

But I am greatly encouraged by the signs of gathering consensus that the CETA program is valuable to the Nation, that it should be reauthorized, and that the committee's bill is a solid effort to strengthen the program and refocus it on the most pressing needs of today and of the months ahead.

The administration of President Carter has endorsed the bill with minor changes that we are prepared to accept. The State and local officials who comprise the system of CETA prime sponsors that operate the program have stated their support. Several of my colleagues have prepared amendments to further strengthen the bill and have offered their support for the legislation as so amended.

Mr. President, we owe a special debt of gratitude for their tireless and inspired work on this legislation to the distinguished chairman of the Subcommittee on Employment, Poverty, and Migratory Labor (Mr. NELSON) and the distinguished ranking minority member of the subcommittee and the full committee (Mr. JAVITS). Their expert and determined leadership has made it possible to bring before the Senate a very complex and meaningful bill which I believe has earned the overwhelming support of our colleagues.

Over its 5-year history, CETA has become one of the Federal Government's most important programs. It is one of the cornerstones of a new and thriving partnership that engages the cooperation of the Congress, the administration, and State and local governments in common effort to meet national priority needs. But more important, it has become a basic tool for helping unemployed and disheartened citizens find a meaningful and satisfying place for themselves in a working nation. Each year, more than 4 million Americans are provided the chance for job training or temporary employment under the CETA program.

From the standpoint of the Nation's economic health, CETA has been vital in the recovery from the worst recession in 40 years. The system of State and local prime sponsors was in its infancy when that recession began 4 years ago. We asked them to make it their first priority to provide jobs for workers who were thrown out of work by the economic contraction. The original priority of providing training and job development for the chronically unemployed had to be compromised in the economic emergency.

Under the extremely difficult circumstances, the prime sponsors performed well. They developed thousands of public service work projects, the overwhelming bulk of which contributed demonstrably to their communities. At the same time, they tended to the skill development needs of the chronically unemployed, provided hundreds of thousands of summer jobs for youth each year, and developed new and imaginative youth employment and training programs for dealing with the Nation's most severe unemployment problems.

Mr. President, with S. 2570 we are requesting that the prime sponsor system readjust its focus to meet the needs of the chronically unemployed in a recovering economy. Training and employability development, which are more pertinent to this challenge, would be greatly emphasized under this legislation. And the participation of private business would be specifically expanded in an effort to convert new skills into permanent employment in the private sector.

Critics of the program, becoming all the more disenchanted with reports of abuses of CETA funds, have leveled their sights on this legislation. The criticism of abuses has been well deserved, although it is important to bear in mind that misuse of funds constitutes a small percentage of the overall CETA effort.

But abuse must be rooted out, and the committee has taken strong steps to insure that it is. The bill mandates greater accountability over the management of funds by prime sponsors, their program agents, and subcontractors. New anti-abuse and fraud amendments were added by the committee to improve audit procedures, provide for ready access by the Secretary of Labor to prime sponsor records, and provide criminal penalties for obstructing investigations.

Another area of major concern has been the substitution of CETA workers for regular employees of public and nonprofit bodies and for providing services that customarily had been provided with other financial resources. The committee has dealt with this concern, as well.

The bill would tighten eligibility requirements for public service employment, place restrictions on the maximum

level of Federal wages paid to participants, limit the amount by which wages may be supplemented by local funds, restrict participation to long-term unemployed persons, and require termination of employment of participants to insure that CETA jobs provide only temporary employment.

A new provision added in committee requires an assessment of each participant's employment and training needs upon entry into CETA, and the development of a personalized employability plan. The responsibility of the prime sponsors and program agents would be to develop the participant's employability through a mix of services designed especially for that individual.

In an effort to target program services on special groups most in need, the bill contains a number of demonstration programs with limited authorizations so that different approaches to the problems can be explored in model programs.

The achievement of long-term economic objectives and lower unemployment rates depends partly on the success of policies to reduce structural unemployment. How well the structural aspects of unemployment are reduced will determine how far we can go in reducing unemployment without risking a new round of inflation.

AN INFLATION HEDGE

S. 2570 is a tool not only for cutting unemployment but also for ameliorating the inflation rates that threaten to steer the economy into another recession.

The economic report of the President, released this year, reinforced the critical role of CETA in economic policy:

> Reaching a low rate of unemployment without initiating increases in the rate of inflation will require effective structural programs as well as overall monetary and fiscal policy. Programs that increase access to jobs for groups with high unemployment not only serve the interests of economic justice, but help us avoid the excessively tight labor markets and inflationary pressures that might otherwise arise in a period of high unemployment.

The Committee for Economic Development, an independent group of businessmen, released a report in which a clear consensus emerged that "unemployment and underemployment are costly both to society and to the economy." The CED study recommended that—

> Government programs to train and provide jobs for the hard-to-employ, including public service employment, must continue to play a major role in national manpower policy.

The business group welcomed "recent increased emphasis by both Congress and the administration on direct measures to deal with the unemployment problems of hard-hit groups, particularly disadvantaged youths and veterans."

Assistant Secretary of Labor for Policy, Evaluation, and Research, Arnold Packer, in testimony before the Joint Economic Committee, explained the importance of CETA to the Nation's economy:

> During a time of increasing risk of accelerating inflation, targeted employment and training programs can play an important role. First, since PSE jobs targeted to the structurally unemployed do not attract workers with skills likely to be in short supply, it is less inflationary to expand PSE employment by increasing aggregate demand through a tax cut or other form of macro stimulus. Second, successful training programs increase the pool of skilled workers from which firms may draw, and thus help to eliminate labor market bottlenecks and inflationary wage pressure in the private sector.

The activities proposed in this legislation would utilize this tremendous human resource through training, skill development, public service employment, location of jobs for special groups with very high unemployment rates, and improved coordination of information for career choices by new entrants in the labor force.

ABUSE PREVENTION

Abuses in CETA programs are manageable and would be reduced substantially under the committee's amendments. Secretary Marshall has noted that out of 450 local prime sponsors and 2,800 subgrantees, the Department received and investigated 203 allegations of improper activities inolving the CETA system last year. The Department's investigations concluded that, at a minimum, well over 95 percent of the agencies that administer the CETA program are operating effectively.

In the past, the major problem for the Department's investigative actions was in getting timely access to CETA records. These proposed amendments would make destruction of CETA records, as an effort to thwart an investigation or audit, a criminal offense.

In order to provide the most effective review and investigation of potential program abuses, the Department of Labor has consolidated the functions of audit and investigation into one permanent Office of Special Investigations. Their ability to effectively monitor and investigate the CETA programs has been greatly enhanced as a result, and new resources are being brought to bear in order to minimize the administrative problems involved in such a large, decentralized system.

SUBSTITUTION CONTROL

Two key provisions of the current law are designed to prevent substitution of Federal CETA funds for local revenues to maintain services and pay regular employees. One prohibits local governments from using CETA funds for regular services that would be provided customarily by local governments in the absence of CETA; the other prohibits the hiring of CETA employees to displace regular civil service employees or to fill job openings created by layoffs or termination of regular workers. CETA employees are to provide services that would not otherwise be provided, and their place on the public payroll is to supplement, not to supplant, regular public employee positions.

Most of the abuses of the program cited in previous studies occurred under the original version of PSE enacted in 1975. The level of substitution decreased measurably after the 1976 amendments which required that jobs be of 1-year duration in projects of demonstrable public benefit, and that participants be long-term, low-income unemployed or welfare recipients.

Assistant Secretary of Labor Ernest Green stated before the committee that the Department's experience with the project approach has substantially reduced the incidence of substitution. The new criteria were of greater consequence, tighter eligibility requirements reduced the number of public employees who might qualify, and the projects provided services outside the scope of regular public services.

The committee amendments in S. 2570 assure further control over the drain of substitution. Low-income persons at or below 70 percent of the lower-living-standard budget become the target group. New limitations on the length of participation and the level of wages received by participants will encourage a transition into unsubsidized employment.

WELFARE PREVENTION

In addition to the committee bill's general new focus on efforts to assist the poor and disadvantaged, title III authorizes the Secretary to conduct demonstration and experimental programs to test and analyze a variety of employment and training alternatives to public assistance and other forms of income assistance for employable persons.

The committee bill, in addition, would expand program eligibility to new groups receiving or eligible for public assistance. The bill includes specific new definitions of "economically disadvantaged," "under-employed persons," "unemployed persons," and the "low-income level" which expand services to welfare recipients, foster children, families with income below the poverty level, and institutionalized persons in sheltered workshops, prisons and hospitals.

The committee bill refocuses CETA resources on training and employability development for the hard-core unemployed. It would be the framework of public policy for introducing individuals into a structured work environment who would otherwise be passed over by the private sector and provides an opportunity—and for many the only opportunity—from which welfare-prone individuals could subsequently advance to steady unsubsidized jobs.

A new section was added to the committee bill—section 205—that requires an assessment of each participant's employment and training needs upon entry into CETA, and the development of a personalized employability plan. The primary responsibility of the prime sponsor would be to develop the participant's employability, rather than merely to employ.

Under title II, comprehensive employment and training services for the disadvantaged, the committee bill adds a new section—section 214—to explicate services for youth. Combined with the new programs authorized under the Youth Employment and Demonstration Projects Act of 1977 (YEDPA), CETA services to youth would provide a broad range of alternatives to a future cycle of welfare dependence.

PRIVATE SECTOR INITIATIVES

Another important addition in the committee bill is a new title VII to es-

tablish demonstration programs for increasing private sector involvement in employment and training programs for the economically disadvantaged. It would develop greater opportunities for a direct transition into private sector employment with a chance for advancement.

In its recent study, the Committee for Economic Development (CED), said that a clear consensus has emerged that the private sector must step up efforts to train and employ the disadvantaged because "unemployment and underemployment are costly both to society and to the economy." They welcomed recent increased emphasis by both Congress and the administration on direct measures to deal with the unemployment problems of hard-hit groups, particularly disadvantaged youths.

The CED report also stated to its members that the principal stress of public policy should be on developing productive jobs rather than on paying people for not working They noted that the chronically jobless usually receive transfer payments such as unemployment insurance, welfare payments, and food stamps and concluded that putting them into productive work in the private sector could lessen some inflationary Government expenditures.

The White House has already received the commitment of business and industry leaders to participate in title VII activities.

Mr. President, we cannot allow ourselves to lose sight of the purposes of this act. We cannot close our eyes to the human faces of unemployment and discouragement that daily stand in line at the unemployment office or wait to buy food stamps. We should not forget to count the ones whose unemployment benefits—meager amounts in State after State—are about to run out. Their worry and despair continues to grow as joblessness lingers on.

This is not an imaginary picture of the future. This is the way things are now for millions upon millions of American families who are lost in the monthly statistics, computer projections, and economic analyses.

For the 6.2 million American workers now unemployed, the situation is too critical to wait for future improvement in the economy. For them, what counts is a chance for a job or the chance to acquire skills that will land a job.

Today's economy, troubled as it is, cannot be compared fully to the rickety structure that fell apart in 1929 to create the Great Depression. We have unemployment insurance, social security, protection for savings accounts, and public assistance programs that were not there in the 1930's.

But the important point is that there are nearly as many individuals out of work today, and we are doing less to help them get a job.

Our commitment to the unemployed must be reaffirmed. The Federal Government has a duty to stimulate economic expansions, but it also has a responsibility to directly create new job and training opportunities for those who can find no other productive work. I see no alternative for taking up the slack while the Government experiments with new and unfamiliar economic remedies.

Any threat to cut our commitment to jobless Americans runs the risk of destroying the progress already made in putting America back to work. Secretary Marshall warned on July 25 that to base a change in CETA policy on the popular notion that unemployment has declined so much that we no longer need a large-scale public service jobs program "is a very dangerous misconception." He added that unemployment cannot be kept under 6 percent next year without a full-scale PSE program. Marshall declared that—

To begin to dismantle the CETA program now is like disbanding your army in the middle of a war just because you have won an important battle.

I am confident that we are not prepared to backtrack on that commitment. We must hold to our conviction that our Nation must provide for those in need or be prepared to suffer not only future economic stagnation, but stagnation of the spirit as well.

Mr. NELSON. Mr. President, I realize we only have until 4 p.m. and then this legislation is to be set aside. Senator DOMENICI has some amendments which we have explored with him and which we are prepared to accept.

I understand, first, the distinguished Senator from Maine wishes 30 seconds.

Mr. HATHAWAY. I thank the Senator.

I am waiting for Senator WALLOP to come to the Chamber.

Mr. NELSON. All right.

I yield the floor to the Senator from New Mexico.

Mr. DOMENICI. Mr. President, first, I thank not only Senator NELSON and Senator JAVITS, but also the majority and minority leaders for accommodating me this afternoon. I have had a genuine interest in this bill. If we had not proceeded in this manner, I might not have been able to participate. I am most appreciative.

UP AMENDMENT NO. 1707

Mr. DOMENICI. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes unprinted amendment numbered 1707.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 254, line 14, strike lines 14–17 and insert the following:

"(1)(A) To coordinate programs under this Act with existing vocational education programs.

"(B) To provide needed vocational education services.

"(2) To coordinate the utilization of funds under this Act and the Vocational Education Act of 1963 to enhance economic growth and development in the State.

"(3) To develop linkages between vocational education, education, and training programs under this Act and private sector employers.

"(4) To provide technical assistance to vocational education institutions and local education agencies to aid them in making cooperative arrangements with appropriate prime sponsors.

"(5) To provide information, curriculum materials, and technical assistance in curriculum development and staff developments to prime sponsors.

Mr. DOMENICI. Mr. President, this amendment will more specifically define the role of the State boards of vocational education in using funds under section 204 of CETA.

As we all know, our present CETA and vocational education programs have served our Nation very well for the most part. However, expansion of employment opportunities under these two programs can be improved if we can achieve better coordination between CETA prime sponsors and vocational education program administrators. Better coordination will go a long way toward minimizing duplication of effort and insuring that these two valuable programs no longer work at cross purposes.

Better technical assistance must be provided to vocational and local educational agencies so that they can make more efficient use of CETA funds. Furthermore, adequate information on curriculum materials, technical assistance in curriculum development, and staffing—must be provided to prime sponsors. My amendment, if implemented, will achieve both goals.

This amendment addresses the need to coordinate the use of funds under the Comprehensive Employment and Training Act and the Vocational Education Act of 1963. Improved coordination will enhance economic growth and development throughout the Nation. Furthermore, my amendment envisions the establishment of definite links between CETA, vocational education, and private sector employers.

Duplication of effort by CETA and vocational education program sponsors is a waste of precious resources and simply must be eliminated. My amendment will not only provide coordination between these two programs but it will also harness the creative potential of the private sector in our efforts to provide meaningful training and employment opportunities for Americans who need them.

Mr. President, I hope the managers of the bill will see the wisdom of my amendment and accept it and work for its retention in conference.

It is my understanding that this amendment is acceptable to the managers of the bill.

Mr. NELSON. Yes. We have looked at the amendment and it clarifies the issue as to the role of vocational education. It properly states our intended objective in the bill.

I have no objection to it.

Mr. JAVITS. Mr. President, I have no objection to the amendment. We too have considered it and we think it is helpful with respect to the bill and its fundamental purpose.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. DOMENICI. I yield back my time.

Mr. JAVITS. I yield back my time.

The PRESIDING OFFICER. Does the Senator from Wisconsin yield back the remainder of his time?

Mr. NELSON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I am not going to offer an amendment on the eligibility criteria. Most of those goals are covered by CETA. However, I wish to briefly discuss a concern.

Mr. President, my research and study of the present CETA eligibility criteria convinces me that the present standards mitigate against broad scale participation in the CETA program, by single individuals particularly, women and elderly persons. During the past few weeks, my staff and I have looked at eligibility criteria contained in various Federal employment programs, but were unable, due to time constraints and the complexity of the subject, to come up with a well-thought-out and equitable set of eligibility standards which could be applied to women and the elderly.

I am very pleased, therefore, that the Human Resources Committee has, at my suggestion, included language in S. 2570 authorizing the National Commission on Employment Policy to conduct a study of present CETA eligibility requirements and their impact upon women and older persons. Although our present eligibility criteria have proved adequate for most segments of our population, which are tied to 70 percent of the Bureau of Labor statistics lower living standard budget, they must be reviewed and revised with a view toward facilitating increased participation in the CETA program by women and the elderly. Arriving at an equitable formula will be a difficult task which will warrant all the time, expertise, and attention that the National Commission on Employment Policy can render. Again, I am most pleased that language authorizing this study is being incorporated into S. 2570 and I look forward to the positive recommendations I know the Commission will produce.

Mr. President, the distinguished Senator from Florida (Mr. CHILES), and I presented many ideas, including our own bill, as a format to the Human Resources Committee. I am most appreciative for the consideration they gave to many of our ideas.

Although the Human Resources Committee agreed to include extensive report language in this bill outlining the voucher demonstration project authorized under CETA, this language was inadvertently omitted from the committee report.

I am pleased that the committee agreed to include detailed descriptions of the voucher plan in the opening statements the managers have presented here to the Senate.

The provisions authorize the Secretary to demonstrate the efficacy of providing vouchers to unemployed or underemployed persons who are economically disadvantaged. These are important provisions, and I thank the floor managers for including language in their statements which will clarify this matter for the Secretary. I hope, we will be able to get some tax language passed in the new tax reform bill that will make these tax deductions work so that the package can be put together.

Mr. President, although the Senate Human Resources Committee agreed to include extensive report language on S. 2570 outlining the voucher demonstration project authorized under CETA, this language was inadvertently omitted from the committee report. I am pleased that the committee agreed to include a detailed description of the voucher plan in the opening statement of the floor managers on the CETA reauthorization bill now under consideration.

This provision authorizes the Secretary to demonstrate the efficiency of providing vouchers to unemployed or underemployed persons who are economically disadvantaged. The vouchers will serve to subsidize, temporarily, a CETA trainee's first experiences in the private job market. Two years after enactment of the 1978 CETA amendments, the Secretary shall report on the effectiveness of the voucher demonstration project and make appropriate legislative recommendations to Congress.

Mr. President, S. 2805, the Comprehensive Education and Training Act amendments which I introduced with Senator CHILES contained a voucher program similar to the one in S. 2570. I am pleased that the Human Resources Committee has decided to test the voucher system as one tool to increasing employment opportunities among economically disadvantaged persons. As a strong proponent of increased private sector involvement in the CETA program, I am anxious to see this demonstration project implemented. This approach appears to me to be an excellent way to encourage private sector employers to hire CETA-trained personnel whose previous employment record might not qualify them for entrance into the labor market at the prevailing minimum wage.

The voucher demonstration language which is now included in the floor managers' statement will serve to strengthen linkage, cooperation, and coordination between CETA and the private sector. I look forward to the role these provisions will play in strengthening Federal efforts to reduce hard core structural unemployment.

I understand the distinguished senior Senator from Florida (Mr. CHILES) is here. I very much appreciate the leadership he has taken with reference to this CETA bill. In particular, I appreciate Senator CHILES' work on the older workers provisions in the bill.

Mr. President, recent hearings on retirement, work, and lifelong learning, conducted by the Senate Special Committee on Aging, focused extensively on the employment needs of older Americans. In increasing numbers, today's healthier and more energetic senior citizens desire to remain productive for longer and longer periods of time. The Congress must begin to accommodate these seniors by making Federal employment programs more responsive to their needs to remain in or reenter the work force.

In his testimony during these hearings, Secretary Marshall indicated that Labor Department efforts to provide increased work opportunities to older Americans are already underway. However, Labor's CETA program has potential for older workers that has not yet been realized. According to the Civil Service Commission, there is conclusive evidence of age discrimination in CETA. This is a severe underutilization of potentially a productive segment of our society.

I am very pleased that the Human Resources Committee has incorporated into the Comprehensive Employment and Training Act amendments to the older workers program Senator CHILES and I have proposed. It is hoped that this section of the bill will accomplish the following goals:

First. Assist older workers to develop employment skills which will enable them to remain in or reenter the work force;

Second. Ease the transition of older workers from one occupation to another within the labor force, and from nonparticipation to participation in the labor force;

Third. Provide outreach, orientation, counseling, and placement assistance to potential older workers;

Fourth. Provide assistance to employers as they implement flextime, work sharing, and other innovative work arrangements;

Fifth. Help to overcome sex stereotyping in employment practices. This provision will especially benefit the displaced homemaker;

Sixth. Coordinate services for older workers with services provided by senior centers, area agencies on aging, and State agencies on aging; and

Seventh. Enable CETA prime sponsors to contract with State and area agencies on aging and other public and private nonprofit organizations for services to older workers.

One of the most persistent criticism of the CETA program has been its failure to provide additional job opportunities to older workers. By providing an older workers program which is geared to the needs of this large and growing segment of the population, we seek to address what is becoming a major economic problem in this country. It is critical that we provide suitable work modes for an aging work force.

In closing, Mr. President, let me say that over the past 5 years the CETA program has become a viable partnership among all levels of government—Federal, State, and local. We have learned a great deal from the experiences of the last 5 years. Senator CHILES and I have sought to build upon this foundation with our older workers program and

we believe our efforts will significantly expand the effectiveness of this vital program.

Mr. President, I would like to ask the floor managers of the bill a few questions with regard to the older workers provisions.

Do the managers believe that the age discrimination in employment amendments, which will become effective January 1, 1979, will eliminate the discrimination found in CETA by the Civil Rights Commission?

Mr. NELSON. Mr. Arthur Flemming of the Civil Rights Commission, testified on that point, and he testified that they had found discrimination in CETA and other Federal programs based on age and sex. We are satisfied that if the law is complied with as now drafted that that discrimination that was found by them will be eliminated.

Mr. DOMENICI. I thank the distinguished Senator.

The Senator from Florida had some questions on this same subject.

Mr. CHILES. Mr. President, if I might ask the distinguished chairman, frequently, older women, who have become displaced homemakers, have limited or no employment skills. How can we insure that the special employment needs of displaced older homemakers are met in the regular CETA program under titles II and VI, as well as in the new title III categorical section?

Mr. NELSON. Under section 122(c)(3)(A) we provide that special emphasis will be given to displaced homemakers for public service employment jobs in titles II and VI, as well as in the new title III categorical sections.

Mr. CHILES. I thank the distinguished Senator for that answer.

Many older workers are not desirous of full-time employment. Their needs are for part-time work, work sharing, and flexitime arrangements. How can the CETA program help fill the older workers' needs for innovative work modes?

Mr. NELSON. Titles II and VI provide for alternative work schedules to be provided to meet the need that the Senator raises.

Incidentally, we also, as you know, reported or will be reporting shortly from the Human Resources Committee the flexitime bill that would provide a number of alternative working arrangements to workers in the Federal Government. These alternative working arrangements are intended to assist a number of worker groups including older Americans.

Mr. CHILES. Would it be advisable to recruit qualified seniors into the actual administration of CETA programs throughout the country? Could recruitment of older personnel into the CETA program itself insure a heightened sensitivity to the employment needs of the older worker?

Mr. NELSON. Well, I have no doubt that there are a good many senior citizens who are well qualified to assist in the actual administration of CETA programs. But that is a managerial question for the prime sponsor, I think, to decide and not for us to try to mandate in the management or running of a local program by a prime sponsor.

Mr. CHILES. But the Senator's opinion would be that that could be beneficial to the program?

Mr. NELSON. I think it could be, and I think there are programs that are using qualified senior citizens now in the management side of these programs.

Mr. CHILES. I thank the distinguished chairman.

Mr. President, now that the age discrimination in employment amendments have been enacted, we must begin to focus on ways to make our Federal employment programs more responsive to the needs of senior citizens. The CETA program, which has a tremendous capability to fill the employment needs of older Americans, is an appropriate place to begin to remove the barriers seniors face as they attempt to enter or reenter the work force.

The older workers provisions which Senator DOMENICI and I have incorporated into the CETA reauthorization bill stress not only the importance of assistance in the development of employment skills, but also outreach, orientation, counseling, and placement services to potential older workers. Furthermore, by enabling CETA prime sponsors to contract with State area agencies on aging and other public and private nonprofit organizations, our provisions will dramatically increase older worker participation in the CETA program.

With regard to senior citizen employment, the need, for the most part, is not full-time jobs. Older Americans are more interested in innovative work modes, like work-sharing and flextime arrangements. Our older workers provisions provide assistance to employers as they implement the kinds of alternative work styles for which seniors are best suited.

The following are other important components of the CETA older workers program:

First. Career training to facilitate the transition of older workers from one occupation to another;

Second. Elimination of barriers to employment presently facing older women who have become displaced homemakers; and

Third. Job placement assistance to overcome age stereotyping and age discrimination.

I believe that our older workers program represents a comprehensive attempt to facilitate the entrance or reentrance of senior citizens into the labor force. These provisions, if vigorously enforced, will insure increased utilization of the as yet often untapped resources of our older Americans.

I yield to the distinguished Senator from New Mexico.

Mr. DOMENICI. I thank the Senator from Florida.

UP AMENDMENT NO. 1708

Mr. President, I have an unprinted amendment which I send to the desk in behalf of Senators CHILES, BELLMON, MCCLURE, BROOKE, and BARTLETT, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI), for himself and others, proposes an amendment numbered 1708.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 190, line 5, insert the following: delete "and" and add the following new subsections:

Page 190 1.7, insert the following:

(11) Include a detailed description of record keeping procedures which will allow the Secretary to audit and monitor the prime sponsor's program, concerning eligibility of participants and propriety of participant selection procedures and practice;

(12) Include a detailed description of procedures for the monitoring and auditing of any subgrantees or subcontractors; and page 190, line 6, redesignate (11) as (13)

Page 244, after line 17, insert the following:

"(f) In the annual report required under subsection (a), the Secretary shall report on the monitoring and auditing activities of the Department, on administrative changes made or proposed to improve such activities, and on actions taken under section 106, and shall make any necessary proposals for legislative action."

Page 383, line 3, at the beginning of the line, insert:

"knowingly hires an ineligible individual or individuals,"

Page 197, line 11, insert the following new section:

"Section 106 (a) There is hereby established in the office of the Secretary a division for monitoring and compliance. This office shall monitor and audit program recipients with regard to eligibility of participants, abuses in participant selection, and any other violations or improprieties."

Page 197, line 11, redesignate section (a (1) as (b).

Mr. DOMENICI. Mr. President, this amendment addresses the issue of fraud in the CETA program. Instances of fraud and abuse within the CETA program have received widespread coverage in the press in recent months.

When this program was first enacted, I remember telling the senior Senator from New York (Mr. JAVITS) that we had experimented with a pooling of the old job-training programs in the city of Albuquerque when I was its mayor. I expressed the hope that we would pool all of the job-training programs. The focal point of CETA was to let it be run by State governments and local prime sponsors.

What has happened now is that there are those around the country who are beginning to say, "You see, we told you the States could not run these programs." That is simply not true. They run them as well as the Federal Government. But they must be more careful. They must vigorously follow the rules set down in this bill with reference to favoritism, nepotism, and political opportunism. The contractors and subcontractors that are used in the field by the prime sponsors are not adequately monitored. If these sponsors do not perform the work expected of them, if they create sham corporations, if they are guilty of abusing the tax dollars and the confidence of the American people then we

have failed to administer this vital program in a prudent and appropriate manner.

We need a national system to monitor prime sponsors, subcontractors, and contractors. In this manner, the fraud and abuse we have found can be eliminated. Although I do not think the abuse is as rampant as the initial stories indicate, I still feel we must put in the bill language with some real teeth for a system of national and local monitoring and auditing. Ultimately we must strengthen the sanctions against nepotism and favoritism in this bill.

Basically, my amendment sets up a monitoring system, and extends the criminal penalties that are already in the bill to the contractors and subcontractors. Mr. President, I remain committed to the concept that local governments and local prime sponsors can manage this program better than the Federal Government. I would hope that the State and local sponsors would get behind my amendment and help to fully implement as promptly as possible.

Mr. President, instances of fraud and abuse within the CETA program have received widespread coverage by the press in recent months. It is extremely unfortunate that a program like this, with its great potential for combating structural unemployment, has been subject to fraud and mismanagement. However, there are many fine and effective programs being administered under CETA. Not all of the taxpayers' dollars are being misused or spent for frivolous purposes.

However, the problem of abuse in some States is very real—and definite steps must be taken to eliminate fraud and management of CETA funds. I am proposing an amendment to the CETA reauthorization bill designed to eliminate misuse of CETA dollars. My proposal allows the Secretary of Labor to audit and monitor prime sponsor programs. Emphasis is placed upon the importance of thorough auditing and monitoring of subgrantees and subcontractors. My amendment further requires the Secretary to report on the monitoring and auditing procedures undertaken by his department, to note any noncompliance actions taken under section 106, and to propose legislative remedies to the Congress, if necessary. In addition, this amendment provides for the establishment of a monitoring and compliance division within the Office of the Secretary of Labor to report on any abuses in participant selection, and other violations or improprieties.

I believe my fraud and abuse amendment represents a comprehensive attempt to ferret out fraud and abuse within the CETA program. These provisions, if vigorously enforced, will eliminate many imperfections in the CETA program and eradicate the misuse of Federal dollars. At the same time we can insure that CETA's positive role in reducing hardcore unemployment is retained.

This amendment to control fraud focuses on strict monitoring of the participant selection process making it a criminal offense to knowingly hire an ineligible participant. In addition, this auditing of prime sponsors and subcontractors will focus on the provisions already included by the committee in section 123(h) to control and eliminate nepotism, conflict of interest, kickbacks, political patronage, and other fraudulent behavior.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield to the Senator from Florida.

Mr. CHILES. I just wish to associate myself with the Senator's remarks and say I am delighted to be a cosponsor of the amendment to monitor fraud and abuse in the CETA program. I think it adds a lot to the bill. Many of us know that CETA has done some good and important work and there is much to be done, especially with structural unemployment, with the problems of disadvantaged workers who need training and trying to deal with some of the problems like older Americans who cannot get work. I am particularly pleased that the thrust of this bill as reported by the committee is to redirect the program to the problems of the hardest persons to employ. One reason that the program has lost public credibility is that we have pushed local governments to hire more people than they can absorb. We have the feeling on the part of people that CETA is the biggest ripoff program that ever came down the pike. We have all seen the horror stories, and certainly there have been too many of them. There have been all the problems that the Senator from New Mexico has raised.

Unless we can assure the people that those things can be stopped, that it is not going to be used by someone as the favorite tool to put his relatives on the payroll or for political patronage or for out-and-out stealing, unless we can assure people of that, there will not be a CETA program. And there should not be, unless it can be run on a better basis and eliminate many of the problems that have come up in the past.

I think setting in motion this kind of effort to investigate fraud and abuse is exactly what we need to do. We have given the Secretary a very broad requirement, not just to investigate strict violations of the law, but to investigate any improprieties in the selections of participants, even if they technically fit the eligibility requirements. That will let us get at problems like the hiring of relatives. I have gone a step further and asked the chairman of the Appropriations Committee to send its new investigations unit into some of these areas and tell us just how the fraud and abuse is occurring, so that we can take corrective action from the Appropriations side. I think the amendment would be helpful to the bill, and I urge my colleagues to support it.

Mr. DOMENICI. I thank the Senator.

Mr. NELSON. Mr. President, I am agreeable, as manager of the bill, to this amendment. I understand that if we can agree to yield back the time and vote by a quarter to four, we can vote today. Is there anyone who needs time on the amendment?

Mr. BROOKE. I do. I have an amendment to the amendment, but I will be very brief.

Mr. NELSON. Mr. President, I yield to the Senator from Washington for a unanimous-consent request.

Mr. JACKSON. Mr. President, I ask unanimous consent that Mike Harvey of my staff be given the privilege of the floor for today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I thoroughly approve of this amendment. I shall vote for it, and believe the sooner we get to a vote, the better.

I shall enlarge my remarks similarly, on the assurances respecting the advantages, many of which are written into the bill. I approve the work, thoroughly endorse it, and will support it.

The PRESIDING OFFICER. The Senator from Massachusetts.

UP AMENDMENT NO. 1709

(Purpose: To provide for an Office of Management Assistance)

Mr. BROOKE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment is not in order until time on the principal amendment is either consumed or yielded back.

Mr. DOMENICI. I yield back the remainder of my time on my amendment.

Mr. NELSON. The amendment, since it is a perfecting amendment, is acceptable. I yield back the remainder of my time.

Mr. BROOKE. Mr. President, I rise in support of the amendment offered by my distinguished colleague, Senator DOMENICI. For I believe this amendment would contribute to the diminishment of inconsistencies which may be found in the CETA program.

However, I do wish to state at the outset that it is my opinion that CETA has served as a positive step toward meeting the needs of the unemployed, the underemployed, and the economically disadvantaged. And, I believe that on the whole, CETA has functioned well and must be considered as an integral part of any program to reach the goal of full employment.

Yet, there are some serious flaws within the existing CETA program. And, I believe that the amendment now being considered, in conjunction with the perfecting amendment which I intend to introduce, will help to insure the delivery of effective and efficient employment and training services.

Indeed, the need for this legislation and these amendments have arisen, in part, from the tremendous burden which has been placed on the CETA program by the creation of three-quarters of a million public service jobs. The rapid expansion of these jobs programs has resulted in inadequate resources being devoted to the supervising, auditing, and monitoring of prime sponsor CETA programs. And, this inadequacy has contributed to the widespread suspicion of fraud and abuse.

Therefore, the division for monitoring and compliance, as set forth in the

Domenici amendment, is designed to assist in the Federal oversight of instances where fraud and abuse may be found. This amendment, coupled with the existing provisions in the bill, will aid in promoting economy and efficiency in program operations.

My perfecting amendment would establish an Office of Management Assistance to enable the Department of Labor to offer complete management and technical advice to prime sponsors where needed, and particularly when recommended by the Division for monitoring and compliance. This office would also be responsible for providing technical assistance to prime sponsors, when requested. Certainly, this will have a salutory effect on the CETA program in general.

Mr. President, I submit that these amendments and this bill will serve to provide substantive and substantial improvement in the CETA programs, while helping to curb and eliminate instances of fraud and abuse. I am hopeful that a majority of my colleagues will join me in adopting these sorely needed amendments.

I have discussed this with the proponent of the amendment and the floor manager (Mr. NELSON) and I understand it is acceptable. Is that correct?

Mr. NELSON. Mr. President, does the Senator from New Mexico wish the yeas and nays?

The PRESIDING OFFICER. The amendment will be reported.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. BROOKE)—

Mr. BROOKE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment add the following:

On page 249, between lines 6 and 7, insert the following new section:

"OFFICE OF MANAGEMENT ASSISTANCE

"SEC. 135. The Secretary shall establish, in the office of the Secretary, an Office of Management Assistance and shall assign to such office such especially qualified accountants, management specialists, and other professionals as may be necessary and available to provide management assistance to any prime sponsor—

"(1) seeking the service of such office on its own initiative to assist it in overcoming problems in the management, operation, or supervision of any program or project under this Act; and

"(2) identified, pursuant to a complaint investigation, internal audit, or audit or investigation conducted by the Division of Monitoring and Compliance, as not being in compliance with any important requirement of this Act of regulations issued thereunder, or of the comprehensive employment and training plant. Service under this section may be provided on a reimbursable or nonreimbursable basis, as determined by the Secretary, and shall be allocated in a manner to assure equitable but effective distribution of such services. The Secretary shall periodically publish any proposals for corrective action made by the Office which may be useful to other prime sponsors.

On page 249, line 8, strike out "SEC. 135." and insert in lieu thereof "SEC. 136.".

On page 178, in the Table of Contents, redesignate "SEC. 135." as "SEC. 136." and insert after "SEC. 134." the following:

"SEC. 135. Office of Management Assistance.".

Mr. JAVITS. Mr. President, we have not seen the amendment until this moment, but I understand what it does is provide for an office to do what the basic amendment proposes.

Mr. BROOKE. That is absolutely correct.

Mr. JAVITS. I am thoroughly for it.

Mr. NELSON. We have looked at the amendment, and are satisfied with it.

Mr. BROOKE. Will the Senator from New Mexico accept the amendment?

Mr. DOMENICI. I accept the amendment. I have looked at it. I think it is a welcome addition.

The PRESIDING OFFICER. Do Senators yield back the remainder of their time?

Mr. DOMENICI. I ask for the yeas and nays on my amendment, as amended.

The PRESIDING OFFICER. First we have to act on the Brooke amendment.

Mr. DOMENICI. I thought we had.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The question is on agreeing to the amendment of the Senator from New Mexico, as amended. The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment (UP No. 1708), as modified. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Louisiana (Mr. LONG), the Senator from Rhode Island (Mr. PELL), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Virginia (Mr. SCOTT) are necessarily absent.

The result was announced—yeas 91, nays 0, as follows:

[Rollcall Vote No. 346 Leg.]

YEAS—91

Abourezk	Curtis	Hollings

NAYS—0

NOT VOTING—9

Eastland	Huddleston	Scott
Goldwater	Johnston	Talmadge
Hatfield, Paul G.	Long	
	Pell	

So the amendment (UP No. 1708), as amended, was agreed to.

Mr. JAVITS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NELSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order.

REPRESENTATION OF THE DISTRICT OF COLUMBIA IN CONGRESS

The PRESIDING OFFICER. The Senate will now resume consideration of House Joint Resolution 554.

The Senate continued with the consideration of the joint resolution.

The PRESIDING OFFICER. Who yields time?

Mr. HATHAWAY. Will the Senator from Massachusetts yield to me?

Mr. KENNEDY. Mr. President, what is the time situation?

The PRESIDING OFFICER. The Senator from Massachusetts has 47 minutes; the Senator from Virginia has 47 minutes. The Senator from Montana has 16 minutes.

Mr. KENNEDY. I yield to the Senator from Maine.

INTELLIGENCE AND INTELLIGENCE-RELATED ACTIVITIES AUTHORIZATION ACT, 1979—CONFERENCE REPORT

Mr. HATHAWAY. Mr. President, I submit a report of the committee of conference on H.R. 12240 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.). The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12240) to authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the United States Government, the Intelligence Community Staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of August 2, 1978.)

The PRESIDING OFFICER. The

question is on agreeing to the conference report.

Mr. BAYH. Mr. President, will the Senator from Massachusetts yield 1 minute to me?

Mr. KENNEDY. I yield 1 minute.

The PRESIDING OFFICER. The question is on agreeing to the conference report. Does the Senator wish to speak on the conference report?

Mr. BAYH. Yes.

Mr. President, I wish to alert the Senate to the fact that this is a critical measure involving the resolution of differences that exist between the House and the Senate on the intelligence and intelligence-related activities authorization bill. The Intelligence Committee is indebted to the Senator from Maine for the leadership he provided as chairman of the subcommittee that went through the entire hearing process on the authorization. If the oversight of the Senate is to mean anything, it is the oversight capacity we bring to the expenditure of moneys in this area. I wish it were possible, but because of security, it is not, to have seen the Senator from Maine ask the probing questions and help us guide our judgments as we arrived at our final decisions. I salute him for his effort and hope the Senate will support this measure.

Mr. HATHAWAY. Mr. President, I thank the distinguished chairman of the committee for his very kind remarks and wish to return the compliment and praise him for the leadership he has afforded me and the committee.

I would like also to take this opportunity to thank our distinguished vice chairman, Senator GOLDWATER, the other members of the committee, and the many staff members, all of whom devoted a great deal of time and dedication to this very important task.

Mr. BAKER. Mr. President, I am sorry, but I was not on the floor at the time the conference report was called up and made the pending business. I should like just a moment, if I may, so, for the moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. BAKER. Whose time do we have, Mr. President? Who is in charge on this measure?

The PRESIDING OFFICER. The Senator from Massachusetts, the Senator from Virginia, and the Senator from Montana.

Mr. BAKER. Mr. President, I am advised it has been cleared on this side. I withdraw my request for the quorum.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

REPRESENTATION OF THE DISTRICT OF COLUMBIA IN CONGRESS

The Senate continued with the consideration of House Joint Resolution 554.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, we are prepared to move to a vote, unless there is a——

Mr. SCOTT. Mr. President, we have a number of speakers and I am sure the distinguished Senator from Massachusetts has some speakers, also.

If the Senator from Mississippi is prepared, Mr. President, at this time I would be glad to yield 10 minutes to him.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. STENNIS. Mr. President, I say to the Members of the Senate that I have had a chance heretofore to speak to give my views and my analysis of this situation. But there are some who are here now and I will take just a few minutes of the Senator's time to go into this matter.

Mr. President, it is always a serious matter to amend the Constitution of the United States. It is very clear that the entire Congress has a positive, affirmative duty here to pass on these matters.

A two-thirds vote is required and three-fourths of the States. So it certainly brings it down to the people, involving virtually all of their representatives in legislative bodies.

But on this amendment, Mr. President, even though it is designed in good faith to meet a situation here, whereby the inhabitants of this District do have less than full privileges of voting, they are certainly not without considerable privilege of voting. They stay here in the District of their own choice, and there is a special reason.

Beginning way back, the wisdom of the Founding Fathers has proven sound for almost these 200 years now when they decided that the Central Government's primary operation would not be located in any State—not any State. They tried to see which State and agreed it not be in a State, but would be in a separate area, conclave, I do not think the District name came in until later.

But, anyway, it was agreed it be a separate piece of ground, so to speak, in which those who chose to live there would have a different status in relation to the Government.

As I understand, there is nothing written on it, but George Washington was delegated to select the site. He did. It was here and it is here.

What attribute in human nature has proven sounder and what principle of human nature has changed less in these 200 years than the one here with reference to an atmosphere and an independence for the central operation of the Federal Government?

The larger it has grown, the more that attribute and that privilege to the Government is needed.

Now, just to meet a situation here, the District already has a mayor, and so forth, and we will not repeat all that now, but just to meet a situation of these people that have a little different situation, but they do not have to stay, to meet that we are going to open the doors of the Senate and let men be sworn here as Members. No one has ever approached that rostrum—no one ever has, and I hope they never do—except as they are representatives of some State in this Union.

We are lowering the guard. We are taking down the gates. We are lessening the requirements. We are increasing the privileges, really, by lessening the requirements to get in here, in the first place, and become Members of this body that legislate for the entire Nation.

Two Senators, not one. Not one. These people help elect the President and the Vice President, have a mayor, and so forth, now. They are going to send in, under this, two Senators.

As I say, who thought up the idea of giving them two? One. One is a whole lot more than nearly all other 700,000 people in the Union have. But this particular group is going to have two Senators.

That is enough to dominate here over and over again in many close votes. Consumer against producer, agricultural, or raw material as against consumer. Many close votes.

I just think it is fundamentally unfair to the rest of the States, to the people in the other States, to the State governments. There are no State governments involved here in the District now under this amendment. No responsibilities. No obligations. Nothing to carry out or live up to. Not a thing in the world.

Here comes a gift on the morning breeze, because it is popular. Two Senators to be sworn in at the bar, and for the first time they ever have been except representing the State.

So we are turning this thing around. I believe that people will sense it. They will sense it at many levels of our State government.

I do not believe any man can go home and say, "I did something for you today"—talking to his own constituents—"I diluted your votes in the Senate. I made it less likely—less likely—that your vote would count for more, it will count for less."

I do not believe that the agricultural people, for instance, as an illustration, with all of their problems—and they have to come here for special programs—I just do not believe that they are going to think this is fair to them. It upsets the equilibrium. It takes away their chances to get Senators who understand their problem. There is no manufacturing here, as someone has said already; no appreciable industry. It is slight. Most of them make their living working for the Government or are in the services or are in an establishment such as a store. They are elsewhere, but they are not here.

I believe that we not only are tearing down the groundwork of our system which has worked so well with all these problems, but also, we open the door to a multiude of new problems and new demands and all kinds of possibilities, with all kinds of problems. We had better stay within the boundaries and stick here to the groundwork as laid out and has been proved sound over and over, and work at these problems some other way. There must not be a surrender.

We have no power, no right to give away, under these conditions. the power of our States, the prerogatives of our people. We should be as generous as we can to these people in the District, and we have the same duty to our own constituents.

I hope that in every State legislature this debate will be pursued with vigor by the State legislators, considering the ideas that have been advanced here, pro

and con, but particularly those that relate to their problems at home.

I thank the Senator from Virginia for yielding me time.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I yield 4 minutes to the Senator from Vermont.

Mr. LEAHY. Mr. President, I have been told that the first person who went to the guillotine said that if it were not for the honor, he would have been happy to have passed up the occasion. Following the distinguished Senator from Mississippi, especially when I am on the other side of the issue, I feel that way.

There is no Member of the U.S. Senate whom I hold in greater esteem or greater fondness than my distinguished friend from Mississippi. I think every Senator will agree that no other Member of the Senate holds a higher regard for the Senate as an institution than does the Senator from Mississippi.

Mr. President, I come from a rural State, and a great deal has been said here today about the feelings of rural States. No State is more rural than the State of Vermont. Vermont was the 14th State to join the Union. Perhaps, typical of Vermont nature, we stood there a while and made sure the other 13 were going to make it, and then we joined on.

My family has been in Vermont for well over a century. I was born there. It is my home. It is the place I live. It is a way of life. It is a way of life that I would never trade with anyone else, anywhere. I cherish that way of life. I cherish what we have done in Vermont.

Mr. President, when I came down here, I had the honor—some have described it other ways—of being apponted chairman of the Subcommittee on Appropriations for the District of Columbia. I became far more involved with the city than I ever might have otherwise; and perhaps I might have thought otherwise about the way I am going to vote tonight, had I been faced with it the day I arrived in the District of Columbia.

There is no question in my mind, having served in that capacity for 2 years now, that I will vote for this constitutional amendment; because I do not see it as a case of rural versus urban. We have had too much of that. We have seen too many Federal programs that come out with a bias, because we look at them as rural versus urban.

I am absolutely certain that is not a situation that will occur, because of what we will see here. The population of the District is half again as large as that of Vermont. In rural areas as well as urban areas, we recognize simple justice.

Quite frankly, when I look at this city—this beautiful city, the seat of our Government, the city that my eldest son was born in—I feel as a Vermonter. What we can do here is show simple justice, overdue justice. Because of that, this Senator, who comes from a rural State, will vote without any hesitancy for this constitutional amendment.

Mr. KENNEDY. Mr. President, I understand that the Senator from Oklahoma has an amendment, and I would be glad to yield 4 minutes to him.

Mr. BARTLETT. I thank the Senator.

UP AMENDMENT NO. 1710

(Purpose: To prohibit the establishment by Congress of any committee or subcommittee with jurisdiction over legislative matters applicable to the District of Columbia)

Mr. BARTLETT. Mr. President, I send and unprinted amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oklahoma (Mr. BARTLETT) proposes an unprinted amendment numbered 1710:

On page 2, after line 16, add the following section:

SEC. 2. Upon ratification by the requisite number of states of the Amendment to the Constitution as set forth in section 1, neither the Senate nor the House of Representatives shall permit, under its rules, the operation of any committee, subcommittee, or other committee which shall have as its continuing deliniated purpose the primary or secondary jurisdiction for the consideration of legislative matters applicable solely to the District of Columbia.

Mr. BARTLETT. Mr. President, the proponents of the resolution argue that the residents of the District do not receive adequate representation and say that in order to have adequate representation, they need two Senators and the appropriate number of Representatives to represent them.

When the Founding Fathers established the Constitution and submitted it to the Colonies, they established the States as all being equal and the District as being separate and unique. What is proposed would create a hybrid State or a hybrid city, however one looks at it—sort of a super city or a super State—which would have the prerequisites of the District as it now has them and also would have the voting representation that a State has, without having the responsibilities of a State.

One of the perquisites that the District has is to have representation by the entire Senate and House of Representatives. In order for that representation to be able to zero in on the problems of the District, there are created in both bodies special committees and subcommittees on authorization and appropriation, and Senators and House Members who are particularly interested in the District generally serve on those committees. I had the pleasure of serving on the District Committee for 2 years, and I enjoyed it very much.

I feel that the present arrangement provides adequate representation for the District. But with this resolution possibly passing and being submitted to the States and possibly being ratified, I think it is important to decide whether or not the District should have the representation it now has with the present committees and subcommittees and two Senators ard two Representatives.

So the purpose of this proposal is to add to the resolution, not to the constitutional amendment, to the resolution a section which would say:

Upon ratification by the requisite number of states of the Amendment to the Constitution as set forth in Section 1, neither the Senate nor the House of Representatives shall permit, under its rules, the operation of any committee, subcommittee, or other committee which shall have as its continuing delineated purpose the primary or secondary jurisdiction for the consideration of legislative matters applicable solely to the District of Columbia.

The PRESIDING OFFICER. The Senator's 4 minutes have expired.

Mr. KENNEDY. I yield a minute to the Senator from Indiana.

Mr. BAYH. Mr. President, the Senator from Oklahoma and the Senator from Indiana discussed this issue yesterday, and I understand his feeling on this. But I must say with all respect I think he overlooks what we are trying to accomplish with this resolution.

We are not trying to make the District of Columbia a State. We are trying to give the people who live here the right to be heard when national issues are decided in this body.

We had committees in the House of Representatives and the Senate to deal with District problems as those problems are part of our Capital City to suggest that the District is represented by a handful of Senators and Congressmen who do not live here is to ignore the fact that more often than not—perhaps that is an extreme case—but let me say on many instances the majority of the people of those District of Columbia committees do not vote the way the people of the District would vote if they were given the opportunity to.

So let me suggest, with all respect, the District committees are needed to provide that important framework to deal with the Federal City question. This amendment which we address ourselves to is to give the people of the District the right to be heard on issues of national importance that affect their everyday lives.

Mr. SCOTT. Mr. President, I am glad to yield not in excess of 5 minutes to the distinguished Senator from Alaska.

Mr. STEVENS. Mr. President, I had a prepared statement but in view of the statement just made by my good friend from Indiana, the State of my birth, I am constrained to make other remarks.

The Federal City has no land. It faces no resource problems. It does not have the diversity in population that exists in other States. On what basis should the people of the District of Columbia be given the voting rights of a State without actually becoming a State?

Mr. BAYH addressed the Chair.

Mr. STEVENS. If the Senator has his own time I will be glad to yield to him, otherwise I must use all of mine.

The residents of the District of Columbia are American citizens, and we have offered a way for them to vote just as we offered a way for those people who were in the original portion of the District when that portion was ceded to the State of Virginia, the State represented by the distinguished occupant of the chair (Mr. HARRY F. BYRD, JR.).

Why should those of us from the West be continually plagued, and I certainly am plagued now, by people who do not understand what it means to represent geography as well as people. After all, the Senate as an institution was designed to represent States. The House of Representatives was to represent population.

If it is a question of District residents voting, then they should vote in Maryland. If it is a question of the District becoming a State, then let us put that question before the Senate and before the people of the United States fairly. The Senator wants to call the District of Columbia something different than a State. He wants to give them voting representation here in the Senate as though they were a State.

I say that would be the first step, Mr. President, toward the decline of the American system.

Mr. MATHIAS. Mr. President, will the Senator yield for a question?

Mr. STEVENS. I do not know if the distinguished Senator has any time. I have 5 minutes and I intend to use it all.

Mr. KENNEDY. I yield 2 minutes to the Senator from Maryland to have whatever colloquy that he engages in.

Mr. MATHIAS. I shall pose a question to the distinguished Senator from Alaska. The Constitution of the United States says in article I that the Congress is:

> To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular states and the acceptance of Congress, become the seat of the Government.

How can we discharge that constitutional mandate in the light of the amendment that is proposed by the Senator from Oklahoma? That is my question to the Senator from Alaska.

Mr. STEVENS. Let me answer my good friend from Maryland in this way: I am preparing an amendment to once again raise the question of moving the capital out toward the center of the country where those people would welcome it and might be more willing to vote in the adjacent States, without seeking to become a State as the people of the District of Columbia are seeking. This is the seat of the Government. And Senators say that they represent States who have just as much interest in the public land in Alaska as we do. We from Alaska have just as much interest in the seat of Government, the District of Columbia, as do the residents of the District of Columbia.

They are not entitled to any greater consideration as citizens of the United States and are citizens of Alaska. And the citizens of Alaska fought for statehood; they fought for equal rights in this body. They did not come into the Union to see their rights diluted by giving two Senators to a city that is the seat of Government.

If this area is tired of being the seat of Government, if it does not wish to vote in Maryland and not have the seat of Government moved, I would be happy to suggest the Capitol be moved. We went through it once in the forties. I would be more than happy to go through it again. And I shall propose it next year. Let us move the Capitol. Let us build a Federal City in which nobody lives, in which there are just buildings and the seat of Government. Let us make Washington, D.C., a historical monument, another part of the Park Service, if you will. So many people are interested in making much of my State a national park. I will be delighted to assist in making this a national park so everybody in the world will come and see how we ran the Government of the United States for the first 200 years.

But this is nonsense. It is absolute nonsense to say that because they are residents of the Federal City they should have greater rights, greater rights, not equal rights, greater rights than the people of a State. I oppose this because I think it is a step toward the downfall of our Government as we saw the downfall of the Grecian Government for those who are familiar with history. I shall oppose this every time it comes up, Mr. President.

Mr. BAYH. Mr. President, will the Senator yield me 30 seconds?

Mr. KENNEDY. I yield 30 seconds.

Mr. BAYH. Mr. President, as a member of the Appropriations Committee that tried whenever possible to help the Senator from Alaska to get resources for his railroad and other things, I understand a little bit about the financial problems they have in Alaska. But I think we also need to understand that there are many financial problems imposed upon the District of Columbia because the National city is here, the fire, the police protection, all of the regalia that goes with the pomp and circumstance of a National city that is imposed on this Capital City and the District residents and why we need those two separate committees.

Mr. BARTLETT. Mr. President, it is my understanding that the Senator from Maryland has 1 minute. May I ask him to yield to me 30 seconds?

Mr. MATHIAS. I will yield 30 seconds to the Senator from Oklahoma.

Mr. BARTLETT. I will say this in response to his remarks earlier and his question that the matter can be handled very well by the standing committees, in other words, if it is a building project in the District, they can go to Public Works or if it is a matter of appropriations it will go to the general Appropriations Committee but there will not be a subcommittee specially for these particular issues, thoughts, and interests of the District.

Mr. MATHIAS. I have great respect for the view of the Senator from Oklahoma. But let me say that it is a tough job now to integrate all of the thinking, all of the planning, all of the action that deals with the city of Washington and with the elected officials of the city of Washington and to try to make the city move forward and to keep the budget under control and to appropriate the necessary amount of money, and I think to spread that through 16 committees would create utter chaos.

Mr. BARTLETT. You are going to have two full-time Senators for the District.

Mr. KENNEDY. Mr. President, I move to table the amendment of the Senator from Oklahoma and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Furthermore, I ask unanimous consent that the time for the vote be charged equally to the Senator from Virginia and the Senator from Massachusetts.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The question is on agreeing to the motion of the Senator from Massachusetts to lay on the table the amendment of the Senator from Oklahoma. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Montana (Mr. HATFIELD), and the Senator from Kentucky (Mr. HUDDLESTON) are necessarily abent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

The result was announced—yeas 63, nays 31, as follows:

[Rollcall Vote No. 347 Leg.]

YEAS—63

NOT VOTING—6

Eastland	Huddleston
Goldwater	Johnston
Hatfield, Paul G.	Young

So the motion to lay on the table UP amendment No. 1710 was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. SCOTT. Mr. President, I yield 5 minutes to the Senator from Utah (Mr. HATCH) to make a point of order.

Mr. KENNEDY. Before the Senator does that, I yield 10 seconds for a unanimous-consent request.

Mr. CHILES. Mr. President, I ask unanimous consent that Russell King of

Senator TALMADGE's staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. I make the same request in behalf of Frankie Sue Del Pappa.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. And for Janet Harrell of Senator HASKELL'S staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Utah is recognized for 5 minutes.

Mr. HATCH. I yield for a unanimous-consent request to the Senator from Maryland.

Mr. MATHIAS. Mr. President, I ask unanimous consent that Riley Temple of my staff have the privilege of the floor during the remainder of the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. The same request for Miss Nancy Barrow of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. I ask unanimous consent that Mike Copps of my staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I rise to make the point of order that House Joint Resolution 554, the pending joint resolution, is not in order in that it violates article V of the Constitution by specifying a method for adoption by the States without providing, in accordance with the last proviso of article V, that each of the 50 States must consent to the proposed amendment because the proposed amendment would affect the equal suffrage of each State in the U.S. Senate.

In other words, by bringing in a non-State and giving it two Senators, the express language of article V is violated.

We passed out a sheet to everybody expressing exactly what this point of order says. It is underlined in red at the bottom of article V. That proviso says:

No State, without its Consent, shall be deprived of its equal Suffrage in the Senate.

I have been making the point that the problem with this resolution is that it is constitutionally defective, because what it is trying to do is create a quasi-State out of a city, out of a District, or a political subdivision contrary to the Constitution. In order to do that under article V you have to have the consent of the States, not only 38 States ratifying but the consent to dilute their suffrage, their equal suffrage, State equal suffrage, if you will, from all 50.

(Mr. ANDERSON assumed the chair.)

Mr. HATCH. In other words, this joint resolution would allow a city or a political subdivision not a State to have a new class of suffrage which, by necessity, deprives the 50 States of the "equal suffrage" granted by the express language of article V above. Under the precedents, I might say that the constitutional points of order must be submitted to the Senate, and they are debatable.

The point I am making is that here we have a quasi-State being created, and before you can dilute Maryland or New York or California or Alaska or Utah or Georgia or any other State—before you dilute their equal rights of suffrage—you are going to have to have the consent of all 50 States. That is what the Founding Fathers set this up for, that States have Senators because of diversity of politics, diversity of geography, diversity of the cities, towns and counties, diversity of beliefs, and, of course, diversity of manufacturing, agriculture, mining, and so forth.

This is no small matter. It is one of the most important and momentous constitutional decisions any of us can make. If we deny the express language of the Constitution here today, I think we will find that the Supreme Court of the United States will call this unconstitutional anyway.

I do not see how any sitting U.S. Senator can ignore the express language in article V when it says, "no State, without its Consent, shall be deprived of its equal Suffrage in the Senate."

Mr. President, I reserve the remainder of my time.

Mr. President——

The PRESIDING OFFICER. The Senator's point of order will not lie until the time on the joint resolution has expired at 6 p.m.

The Senator from Massachusetts.

Mr. HATCH. If the Senator from Massachusetts will yield, I want to ask for the yeas and nays on my point of order.

The PRESIDING OFFICER. The point of order does not lie until the end of the time. It would take unanimous consent to order the yeas and nays.

Mr. KENNEDY. I reserve the right to object and also hope the Senator will include in his unanimous-consent request, unanimous consent to permit the yeas and nays for a tabling motion and that it be in order at the present time.

Mr. HATCH. I ask unanimous consent to ask for the yeas and nays and unanimous consent that the Senator from Massachusetts can move to table my point of order, which is a constitutional point of order under the rules.

Mr. SCOTT. Mr. President, reserving the right to object, if the vote could come after 6 o'clock, I have no objection, but I am constrained to object unless that is included in the unanimous-consent request.

Mr. HATCH. I do not care when the vote comes as long as it comes before the final vote on the joint resolution.

The PRESIDING OFFICER. The point of order will not lie until 6 p.m. and the vote will not occur until such time.

Several Senators addreseed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I yield myself 1 minute.

The point the Senator from Utah makes is basically a conflict in logic. What he is saying is that the amendment is unconstitutional, when actually what we are considering is a constitutional amendment. It fails in terms of the logic. How can a constitutional amendment be unconstitutional?

But in any event, the amendment does not violate article V. The Senator's point of order has been raised occasionally, but it has been rejected by virtually all constitutional lawyers. For example, Prof. Charles Alan Wright, from the State of Texas, testified explicitly at the hearings that article V is not violated by this amendment. If you follow the logic of the Senator's argument, going back to the Thirteen Original States with 26 Senators, every time we added an additional State to the Union, we diluted the suffrage of the older States and violated that particular provision. Clearly we have not.

We have expanded the Senate to 100 Members from the 50 States. If this objection did not lie for the expansion of the Senate since the time of the original 13 States, it must fail at the present time.

Article V means only that States are to be treated on equal terms in the Senate. It was a result of the big State-small State compromise at the Constitutional Convention in 1787. The House of Representatives was to be based on population, and the Senate was to represent the States. Article V was included to prevent the Senate from being shifted to a population basis of representation.

Now, Mr. President, I move to table the Senator's point of order and ask for the yeas and nays.

The PRESIDING OFFICER. The point of order is not in order until 6 o'clock and, therefore, the motion to table is not in order until the point of order is made.

Mr. HATCH. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HATCH. Has the Chair ruled that the yeas and nays have been ordered on the point of order and the motion to table by the distinguished Senator from Massachusetts?

The PRESIDING OFFICER. No.

Mr. HATCH. I ask unanimous consent that it be in order to order the yeas and nays on my point of order and on the motion to table.

The PRESIDING OFFICER. Is there objection?

SEVERAL SENATORS. Objection.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. A parliamentary inquiry.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield 15 seconds.

Mr. HATCH. When can I request the yeas and nays? At 6 o'clock?

The PRESIDING OFFICER. When the point of order is submitted.

Mr. HATCH. How will the point of order be submitted?

The PRESIDING OFFICER. By the Presiding Officer.

Mr. HATCH. Have I not submitted the point of order at this time?

The PRESIDING OFFICER. The point of order cannot be made until 6 o'clock.

Mr. HATCH. In other words, I can order the yeas and nays at 6 o'clock?

The PRESIDING OFFICER. That is correct.

SEVERAL SENATORS. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. I yield time to myself.

Mr. METZENBAUM. I ask if the Senator from Massachusetts will yield to me.

Mr. KENNEDY. I yield 15 seconds.

Mr. METZENBAUM. I ask whether or not we can have a rollcall vote on a parliamentary inquiry until such time as the Chair has ruled.

The PRESIDING OFFICER. The rollcall vote will be on the point of order submitted to the Senate. Who yields time?

Mr. KENNEDY. I yield to the Senator from South Dakota.

The PRESIDING OFFICER. May we have order in the Chamber?

Mr. McGOVERN. Mr. President, I want to just take a couple of minutes to express my personal appreciation to Senator KENNEDY, Congressman FAUNTROY, and all the others who have led this fight for full representation for the people of the District of Columbia.

Second, as one who has been privileged to live in this city, the site of our National Capital, during most of the last 22 years, I want to express my appreciation to the people of the District of Columbia.

There have been some unflattering comments during the debate here on the Senate floor.

Mr. KENNEDY. Mr. President, may we have order?

The PRESIDING OFFICER. May we have order in the Chamber?

Mr. McGOVERN. One of the Senators has referred several times to a Washington columnist who described the District of Columbia as an enclave surrounded on four sides by reality. But I know that the columnist, who takes pride in his own, continues to live in Washington and to enjoy its cultural, political, and economic assets.

I think it is the most inspiring and one of the most diverse, if not the most beautiful, of all of our major cities.

I might just add on a personal note, Mr. President, its people exercised unusually good political judgment, even in the dark days of the 1972 Presidential contest when most of the rest of the Nation was confused. The District of Columbia and the Commonwealth of Massachusetts stood out as two shining pillars of wisdom and foresight, which has been fully vindicated by history. [Laughter.]

On that basis alone, the voters of the District of Columbia are entitled to full representation in this body. [Laughter.]

Mr. President, may I have one additional moment to make a more serious point?

Mr. KENNEDY. I yield 30 seconds.

The PRESIDING OFFICER. May we have order?

Mr. McGOVERN. The transcendent issue, to me, in this entire debate, Mr. President, is whether or not we are going to be faithful to the rallying cry with which this country began, "No taxation without representation." We know that the people of the District of Columbia pay taxes, they have offered their sons in time of war, they have supported the Nation. They are entitled to full representation in the Congress of the United States.

I thank the Senator from Massachusetts for yielding time.

The PRESIDING OFFICER. Who yields time?

Mr. SCOTT. Mr. President, I yield 3 minutes to the distinguished Senator from North Carolina (Mr. MORGAN).

Mr. MORGAN. Mr. President, I agree fully that the residents of the District of Columbia are entitled to representation, but I do no agree that the residents of a district that is composed entirely of one medium-sized city are entitled to two representatives in the U.S. Senate.

I cosponsored with Senator McCLURE this morning an amendment which would have given the District full representation in the House of Representatives and allowed its residents to vote in the Maryland election for the Senate, as they did during the first decade of the District's existence—as I think they really have the legal right to do today, because when a State cedes property to the Federal Government, it cedes police power but does not cede other political power. Residents have that right.

I am for that kind of representation, but I do not believe that two Senators who would represent no farmers, no rural citizens, no manufacturing, no heavy industry, no mining, should be in the Senate. I think it will destroy or do damage to our Federal system.

Mr. President, this is not a new question. Shortly after the right to vote was taken away from the District, in about 1800, a similar amendment to the one that may be adopted today came up in 1801. It was raised again in 1803. It was raised in the 1880's. It is not a new question.

The PRESIDING OFFICER. May we have order?

The Senator from North Carolina may proceed.

Mr. MORGAN. Mr. President, I say that I think the distinguished Senator from Massachusetts, when he said in his opening statement that some of us would oppose this amendment because the Senators would be either too liberal or too black, did an injustice to those of us who are opposing it. For 175 years, this amendment was not adopted and the District was not predominantly black until the 1960's and it will not be predominantly black in 10 years. I think this amendment does harm to our constitutional system.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Who yields time?

UP AMENDMENT NO. 1711

(Purpose: To Elect House Members from the District and for Senators, the District residents shall vote as if residents of Maryland)

Mr. MELCHER. Mr. President, I yield such time as I may consume. I have an amendment at the desk, Mr. President, I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) for himself and Mr. MORGAN, proposes unprinted amendment No. 1711.

Mr. MELCHER. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the resolving clause and insert the following:

That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within nine years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. For purposes of representation in the House of Representatives, the District constituting the seat of government of the United States shall be treated as though it were a State. For purposes of representation in the Senate, the District constituting the seat of the government of the United States shall be treated as though it were part of the State of Maryland. For the purposes of ratification and initiation of constitutional amendments, the District constituting the seat of the government of the United States shall be treated as though it were a State.

"SEC. 2. The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of government, and as shall be provided by the Congress.

"SEC. 3. The twenty-third article of amendment to the Constitution of the United States is amended by striking out ', but in no event more than the least populous State'.

"SEC. 4. The Congress shall have power to enforce this article by appropriate legislation.

"SEC. 5. The Governor of the State of Maryland shall consult with the District government prior to either implementing changes in the law governing the election of Senators, or making a temporary appointment to fill a vacancy in Maryland's representation in the Senate.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within nine years from the date of its submission.".

Mr. MELCHER. Mr. President, this is a very similar amendment to the amendment I offered on Thursday. It follows the same basic rules that I espoused then, which has long been my feeling toward the residents of the District of Columbia.

I have always supported voting rights for the District and I voted for a constitutional amendment, while a Member of the House in the last Congress, very similar to this one.

There is no question in my mind that it is very easy to allow the District to have two House Members. It fits in, fits in with everything we conceive in our bicameral government. It is right. It is absolutely right. I view the Constitution in this regard to have been flawed, to have been in error during all of these years. So I would preserve—not preserve, I would give back to the District what is theirs, what should always have been theirs—the right to vote.

But when we come to the question of the Senate——

Mr. STENNIS. Mr. President, may we have order so we may hear?

The PRESIDING OFFICER. Let us have order.

Mr. MELCHER. But when we come to the Senate, Mr. President and my colleagues, it is a different situation to say that the District of Columbia is the same as a State. It flies in the face of Jefferson's words when he said a State has both expansiveness and diversity. Those very words are the background of what we have heard so often in the past few days on how a State is interested in various industries—whether it is mining or agriculture or timber products or what-have-you. That is the diversity of a State. The Senate is different in representation because of that diversity, to give the opportunity to have a balance. No words here in the Senate, no words here in Washington, are going to change the fact that the District is not, in any sense of the word, comparable to a State in diversity.

I have sympathy with the argument that the District has been wronged. I have sympathy with the argument that the District has provided more than their share of lives lost in Vietnam. But our job here is to be fair to the District and to the States.

I note that the editorial in the Washington Post is highly in favor of the resolution and immediate adoption by two-thirds vote of the Senate of this constitutional amendment. It does not see the issue in the proper light, it only discusses the issue in terms of people having a right to vote. On that point, I agree and I have long agreed. My amendment, similar to the amendment that I had on Thursday, would give to the District that right, the right to elect their own House Members—two, just as many as in my State and the right to vote in Maryland as if they were residents of Maryland, for their Senators.

The Senators from Maryland, speaking for their constituents, say, "Hold on; we don't know about that. That is a different thing."

But it was not a different thing for the residents of the District on this side of the Potomac prior to the year 1800, when they did vote in Maryland. And if the constitutional error had not been made, if that wrong had not been done in the Constitution, it is exactly the way the residents of the District would be today. I cannot see anything wrong with that concept, but I do understand it is something less than having two Senators from the District. In my view, to correct a wrong does not mean you have to add two Senators for a small area, contrary to all of the rest of the 50 States, which are States.

I would preserve, Mr. President, that part that Jefferson spoke so well. I do not believe this is necessarily a political argument. I do not see this resolution, if two-thirds of the Senate approve it tonight, when it is faced by each State legislature, that they will view it as a Republican issue or Democratic issue; I do not see that.

I think they will look at it in respect to their State and what it does to them.

If the argument is made that those two Senators may cancel out the two Senate votes we have in the Senate from our State, it is a rather compelling argument to say "no."

I say to the Senate tonight, having long wanted to right this wrong in the Constitution, I encourage Senators, not only on the merits of my amendment, but for the sake of the District people themselves, to support it. Under the terms of the resolution, if it is not approved by the necessary 38 States within 7 years, it is done. It is over with. And if it is not approved, the District is still without representation, in the House or in the Senate.

On the other hand, if my amendment is accepted, it will easily pass the two-thirds vote and, in my judgment, would rapidly be ratified by almost every State. So the District then would have their proper representation.

Mr. President, I withdraw my amendment.

I do so because I do not want to take up any time for voting now. But I inform the Members of the Senate I will call for a vote at the proper time, at 6 o'clock.

Mr. McCLURE. Will the Senator yield?

The PRESIDING OFFICER. Who yields time?

Mr. MELCHER. I yield 30 seconds.

Mr. McCLURE. I thank the Senator for yielding.

Mr. President, I rise in strong support of the amendment which the Senator from Montana has offered. I think it would accomplish the objectives which I have at various times tried to reach on this matter on this floor. I hope other Members will give it serious consideration. I hope it will pass.

The PRESIDING OFFICER. Who yields time?

May we have order?

Mr. GRAVEL. Will the Senator yield?

Mr. KENNEDY. I yield 4 minutes to the Senator from Alaska.

Mr. GRAVEL. Mr. President, many years ago I came out very clearly in support of——

Mr. KENNEDY. Mr. President, the Senate is still not in order.

The PRESIDING OFFICER. May we have order?

The Senator from Alaska.

Mr. GRAVEL. Mr. President, I had come out very much in support of voting rights for the District of Columbia population.

In the last few weeks, starting last week, I had some serious second thoughts about that subject, and I still do. For that reason, I have asked for some time so that I might express those second thoughts and the reasons behind them.

I want to really put one thing aside. There is no question in my mind that the most important thing of all is representation for the Americans who live in the District. Representation equal to anybody else in the United States.

When I say that, I put aside the argument which affects my State, that it is likely the individuals that would be elected to the Senate would be voting against the Alaskan position on d-2 land, would be voting against strong views I hold with respect to oil and energy, with respect to minerals and land.

I also think of a secondary consideration which is the bias that these two people will have toward the implementation of more government rather than more implementation through the private sector.

I think both of those arguments are very strong ones and very persuasive arguments, and in some degree, may operate against my own State's interest.

But let me say very clearly that the most important thing under our system is the equal right of representation. That is what our system is all about. So, if that is not preeminent, then there exist some serious flaws.

So, where did my doubts come in? I question the method of arriving at this kind of representation. I think the way to do it is not the way we are doing it. I think the way to do it is through retrocession.

I think what is going to happen by passing this is that we are going to see very serious destabilization take place throughout the Nation, because in the next 7 years people are going to have to go from State to State and fight this issue, and, unfortunately, it may not be handled as sophisticatedly as it has been handled here by the leadership on both sides of this issue in the Senate.

So I think this will have somewhat of an unfortunate, negative effect in the Nation.

I have a fear this may sap the strength of the civil rights movement because I do not think this is the most important thing the civil rights movement can do in this country.

I think the most important thing they can do is raise the economic stakes for their minorities because the numbers are there, rather than the numbers here in the District.

The PRESIDING OFFICER. The time has expired.

Mr. GRAVEL. Would the Senator yield me an additional 2 minutes, please?

Mr. KENNEDY. Two minutes.

The PRESIDING OFFICER. The Senator from Alaska is recognized for 2 minutes.

Mr GRAVEL. The problem is, how do we get to retrocession?

If this amendment was defeated, we could turn around and put in a bill. Bills do not pass this body unless they have constituencies, and the tragedy with respect to retrocession is that there is no constituency for it today, but there is tactical convenience. But no constituency.

Maryland does not want it and the District does not want it. The leadership of the District is bent upon possible membership in this body.

Certainly, I would not fault them, they express the same emotion I have expressed time and time again.

So, without a constituency, if this amendment were to fail, there is no way we can get to retrocession in a reasonable fashion except to go through the period of 7 years, or how long it takes until the people of the District were

to succeed under this particular vehicle or fail and retreat back to what would be a more normal approach, because, quite obviously, being a part of Maryland where they could vote for State senators, vote for State representatives, vote for Governor, vote for Senators, vote for Congressmen, is a lot more normal than the abnormality that will be created in this regard.

But I think the case that these people are entitled to the same rights as any other human beings in the United States, and that is representation, which is the touchstone of our society, is overshadowing in all this.

For that reason, and the thoughts I have had, the difficulty I had wrestling with the issue, I come down with what I consider an imperfect decision, but a decision nevertheless, to vote for D.C. representation.

Mr. BIDEN. Will the Senator from Massachusetts yield me 60 seconds?

Mr. KENNEDY. How much time remains, Mr. President?

The PRESIDING OFFICER. May we have order?

The Senator from Massachusetts has 9 minutes. The Senator from Virginia has 14.

The Senator from Delaware.

Mr. BIDEN. Mr. President, I agree with the bottom line of the Senator from Alaska. I think his logic is very valid. I do not understand the logic of some who have spoken here today. I understand the political logic of the Senator from Montana, but I do not understand the constitutional logic.

We are all saying, "Taxation without representation is not warranted."

Well, it seems to me the way to say that is, "Taxation without full representation."

It seems to me there is only one of two ways we can go. We can either say the District has no representation in either House, because unless they have it in both Houses they do not have full representation. We either say they have it in neither House or they have it in both Houses.

I do not quite understand those who stand up and offer amendments and say they want them represented in the House but not in the Senate, so they can be represented in the Congress, because there is no logic in that.

Mr. President, I yield the rest of any time I have.

The PRESIDING OFFICER. Who yields time?

Mr. RANDOLPH. Will the Senator yield?

Mr. KENNEDY. I yield 30 seconds to the Senator from West Virginia.

Mr. RANDOLPH. I will need 1 minute.

Mr. KENNEDY. One minute for Fayette County and Logan County.

Mr. RANDOLPH. And Randolph County, too.

Mr. KENNEDY. And for Randolph County.

Mr. RANDOLPH. Mr. President, I will vote for the resolution to submit to the States the opportunity of approving or disapproving full congressional representation for the citizens of the District of Columbia.

This is a procedure which gives to the States, through their elected representatives, the responsibility to decide constitutional changes. It is a procedure in the best tradition of our democratic system.

I authored constitutional amendment No. 26 for 18-year-old voting. It was passed by Congress. It was ratified by the States more quickly than any other constitutional amendment—only 90 days.

District of Columbia representation, in my judgment, is a very similar issue. We are attempting to provide a body of citizens with the right of franchise.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield to my colleague from Massachusetts 1½ minutes.

Mr. BROOKE. Mr. President, my enthusiastic endorsement of House Joint Resolution 554 is based primarily on fundamental concepts of liberty and justice, but my support and interest are also intensely personal, for my roots are in Washington, D.C.

I was born and raised here. I attended and graduated from Shaw Junior High School, Dunbar High School, and Howard University. For as long as I can remember, I have fought, along with family and friends and colleagues, to attain the goal of providing for the citizens of the District of Columbia the same rights and privileges that older citizens throughout the Nation have enjoyed.

Mr. President, there is no self-government in the power to tax one, to imprison one, and to send one to war is not in one's self, but in those to whom one has voluntarily confided as one's representative.

Those statements were made back in 1916, and here we are in 1978 still trying to give this basic right of representation to the people of the District of Columbia.

I hope and pray that my colleagues will go along with this and pass this measure by an overwhelming vote and give the citizens of the District of Columbia a right they have so long been denied.

Mr. SCOTT. I yield myself 5 minutes.

Mr. President, I will sum up my opposition to the resolution.

Ours is a Federal Government, a union of States, one of dual sovereignty. The Senate is composed of two Senators from each of the 50 States. The District of Columbia was constituted the Federal city, neutral territory, a place where Congress could legislate in the national interest, free of pressure, free of local intrigue or local politics.

Washington is a city, not a State. Its principal business is government. It has no farming; it has no mining; it has little, if any, manufacturing. It has few of the diversified interests that the States have.

If the city of Washington is given two Senators, the local media will work in tandem with those two Senators to further the interests of government, the only major industry in the city.

The city of Washington is unique, being an area ceded by sovereign States as a Federal city.

We are not a national Government, although each year we appear to be reducing the rights of the States and becoming more centralized. This is merely another step in that direction.

The measure before us has not been considered by the Senate Judiciary Committee. We have a House resolution before us. Hearings were held by a subcommittee, but action by the committee was short-circuited by bringing up the House bill during the absence from the country of the chairman of the Senate Judiciary Committee.

All amendments we have offered to the proposal, those which would have provided voting rights for the people of the District through retrocession, even technical perfecting amendments, have been tabled.

Providing Senate representation to a city, to any political entity other than a State, sets a bad precedent. Puerto Rico has more than 3 million people; the District of Columbia has less than 700,000. Will Puerto Rico be the next area under consideration for two Members of the Senate? Will Guam be next? Will the Virgin Islands be next?

Mr. President, I feel very strongly that we should reflect upon the effect that this will have upon our own States, upon our representation of those States. We should consider whether or not it is in the national interest as well as in the interests of the people of the District of Columbia.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GRIFFIN. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Montana has 9 minutes, and the Senator from Virginia has 11 minutes. The Senator from Massachusetts has 5 minutes.

Mr. KENNEDY. I yield 30 seconds.

Mr. GRIFFIN. Mr. President, taxation with representation is bad enough. But taxation without representation is a disgrace—particularly in the Nation's Capital.

For nearly 180 years, the District of Columbia has been a Federal enclave. It never was meant to be—and should cease to be—a Federal fiefdom.

This once-tiny settlement in the Potomac swamps has grown as the Founding Fathers never could have imagined. By 1970, the population of the District of Columbia was three-quarters of a million people—greater than that of 10 States. Among them, those States are represented in Congress by a total of 34 Senators and Representatives; the District of Columbia has none, even though some 150 proposals to change that have been introduced in Congress during the last 90 years.

Numerous press accounts in recent months have recited that the issue of full D.C. representation in Congress was never put to a vote in either House until 1976. That is not quite true.

On March 10, 1971, during Senate consideration of the constitutional proposal to lower the voting age to 18, Sen-

ator KENNEDY offered an amendment that would have extended full voting representation to the District of Columbia.

That proposal was tabled on a vote of 68 to 23. I was one of those in the minority that day.

Only since 1961 have D.C. residents been able to vote for President; only since 1971 have they had a nonvoting delegate to the House of Representatives; only since 1975 (after a hiatus of more than a century) have they been able to elect their mayor and city council.

In only one other country in the world—Brazil—are residents of the capital city denied representation in their national legislature.

Even though residents of Washington are denied the privileges of citizenship, it is noteworthy that they are more than meeting the obligations of citizenship.

District of Columbia residents pay more than $1 billion a year in Federal taxes—which is more than paid by 11 States; last year, per capita taxation in Washington was $491 more than the national average—which is a heavier individual tax burden than all but one State, Alaska.

During the unpopular Vietnam war, 237 D.C. residents gave their lives in the service of their country—a grim total that was higher than casualty figures for 10 States and was fourth-highest per capita of any jurisdiction in the Nation.

I submit, Mr. President, that it is a dark shadow on the citadel of democracy for the United States to tax any of its citizens, or send any of its sons off to war, without giving them a voice in shaping the policies that affect them.

As I listened to the eloquent remarks of our esteemed colleague from Massachusetts (Mr. BROOKE), I was struck by the poignant irony of his presence among us.

Senator BROOKE was born and raised in Washington, D.C.; he attended Howard University, not far from this Capitol. Yet, had he continued to make his home in the District of Columbia, he could not have been a U.S. Senator—and this Nation would have been deprived of his distinguished, dedicated service during the past 12 years.

It was one of Senator BROOKE's predecessors from Massachusetts—the great Daniel Webster—who summed up the mission of America in a speech more than 150 years ago: "One country, one constitution, one destiny."

Mr. President, if we are to fulfill that mission as a united people, we can no longer keep the residents of the District of Columbia in subjugation as second-class citizens. It is time they joined the rest of us as full citizens of the United States and as full partners in the pursuit of our common destiny.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I yield 2 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I support the amendment. In the first place, I think it is a fair thing to do. We are advocating one-man, one-vote. We are advocating democratic processes in this country.

We have more than 700,000 people in the District of Columbia who do not have voting representation. I think it is nothing but right that we allow these people that representation.

We are advocating democratic processes all over the world. We are holding ourselves up as the exemplary Nation that others may emulate in ideas of democracy. How can we do that when three-quarters of a million people are not allowed to have voting representation in the capital city of this Nation?

If we propose this amendment, and that is what we are doing, it still has to be ratified by the States. If the people in the States do not like the amendment, they will not ratify it. If they do like the amendment, they will ratify it. If they do ratify it, then that is what the people want. So we will leave it to the States, after we act here. The States will have the power to make the final decision.

I hope the amendment is passed.

The PRESIDING OFFICER. Who yields time?

Mr. SCOTT. Mr. President, I yield 3 minutes to the distinguished Senator from Mississippi (Mr. STENNIS).

The PRESIDING OFFICER. The Senate will be in order.

Mr. STENNIS. Mr. President, I want to call the attention of the Senate to the matter raised here by Senator HATCH, which I think may come up in the way of a point of order, and refer to article V of our Constitution.

We have heard talk here about representation and equal representation and the right to representation. Those things are fundamental and very good, but the question is, how, under our present Constitution?

It is clear from the framework of the entire Constitution that representation in this body comes by being a State and comes by that method alone. Nothing else is contemplated. Nothing else, so far as I know, ever has been proposed. It takes a State to be the vehicle to bring two Senators in here.

That is the whole plan, and that matter is clearly nailed down here in article V of the original Constitution. When this whole matter held up the Constitutional Convention for days and weeks and the Constitutional Convention was almost a collapse this method was worked out that States would have representation in this body. States, nothing else. Nothing else is mentioned or contemplated, and that representation would be two to each State and it would never be changed without the consent of that State.

It is true we have admitted other States here in our decades, and they came in with representation. This time you are not admitting a State. You are not proposing a State. There is no State. All there is in this resolution is nonState, or a Not-State, n-o-t. There is no actual State in it.

How in the world, even by this proposal, could you create here an imaginary something and give it two Senators and bring them in here with a membership that dilutes and changes voting strength as well as the nature of this constitutional body, the U.S. Senate? And I hope that point of order will be sustained.

I thank the Senator from Virginia.

The PRESIDING OFFICER. Who yields time?

The Senator from Montana.

Mr. MELCHER. Mr. President, we have long established, I hope, that the overwhelming majority of this Senate believes in representative government and believes that it belongs to the District. I do not think that is the question that is being argued. As I understand the debate, and it is positively my side of the argument, the question is, does the District get two Senators? No other city in the United States has been granted that. But is the situation here so unique that this is the only resolution of the problem? I do not believe so.

If we remember that the residents who lived here on this side of the Potomac before 1800 voted in Maryland, and if Senators agree with me and I hope a vast majority of them will agree with me, the Constitution was wrong in prohibiting voting rights for residents of the District. If Senators believe with me on that, then I ask them to pay attention to my amendment, because it will correct it. It will correct it just as other cities and other States get their representation through their Senators elected in that State. It will not turn back the property. Maybe retrocession should be accomplished sometime. I do not know. But it is not here now. I am talking about retrocession of the land. I am talking about having the privilege of voting for Senators in the State of Maryland just as the residents who were here prior to 1800 had that same opportunity of senatorial representation then.

Mr. President, this is a symbolic vote as I take it it is being interpreted. Let it be dealt with on the basis of the merits and on the basis of complete fairness for this institution, this Senate, and all the 50 States, including the people in the District of Columbia.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. SCOTT. Mr. President, I yield 2 minutes to the Senator from Idaho (Mr. MCCLURE).

The PRESIDING OFFICER. May we have order?

The Senator from Idaho.

Mr. MCCLURE. Mr. President, I thank the Senator for yielding his time to me and I am grateful for the opportunity to present at least a portion of the case to more Members than have attended at most of the debate during the course of the debate on this issue.

Mr. President, the Senator from Montana is exactly right. There is no justice in creating in the District a status that is inferior to all of the other States. The citizens of the District under this proposal will not have their full civil rights. They will have a part of it. At the same time they will be given two Senators without being a State, which is a different right than the citizens of any other city in the United States enjoy.

Mr. President, it was not the Constitution of the United States that deprived the people of the District of Columbia the right to vote in the State of Maryland. That was done by statute. For sev-

eral years, after the District was formed and ceded by the State of Maryland to this Federal Government, the residents of the District both in Virginia and in Maryland continued to vote in their respective States.

That right to vote was taken away as a matter of a statutory enactment.

The only reason that it is not possible to give them that right by statutory enactment that they exercised until the early 1900's is because the people of Maryland do not want them to have the right to vote in Maryland. They do not want them to have the right to vote for Senators in Maryland. They do not want them to have the right to vote for a Governor in Maryland. We can right that historic injustice without creating another injustice by adopting the amendment of the Senator from Montana, which I hope we will do.

The PRESIDING OFFICER. Who yields time?

Mr. SCOTT. Mr. President, I yield 2 minutes to the distinguished Senator from Utah (Mr. HATCH).

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, as I said earlier in the debate, I intend to raise a point of order at the expiration of the time, and I expect to be recognized and ask for the yeas and nays thereon.

The point of order is that article V of the Constitution says that no State without its consent shall be deprived of its equal suffrage in the Senate. In other words, the Founding Fathers and those who formed this Government literally when they started did not want the States to be diluted by larger States.

As a matter of fact, what we are saying here is that although we can add States which themselves will have two Senators and do it properly and constitutionally, that does not dilute or diminish or deprive equal suffrage in the Senate.

But if, as here we have a quasi-State, a city, if you will, a political entity, that is not a State and clearly not a State, and we give them two Senators, that does dilute, that does diminish, that does deprive the States of equal suffrage in the Senate in violation of the Constitution.

There are no precedents on this. The only precedent there is the Constitution and the language is explicit. I do not see how we can ignore the language.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HATCH. I thank the Senator from Virginia.

The PRESIDING OFFICER. Who yields time?

Mr. SCOTT. Mr. President, if we look at article I of the Constitution we find that the Senate of the United States shall be composed of two Senators from each State chosen by the legislatures thereof.

Then we turn to the 17th amendment, and we find the same language except "elected by the people thereof for 6 years, and each Senator shall have one vote."

But if we look at article II, section 8, we find that—

> Congress shall have power to exercise exclusive legislation in all cases whatsoever over such district not exceeding ten miles square as may by cession of particular States and acceptance by Congress become the seat of government of the United States.

That is the purpose of the District of Columbia, the seat of Government of the United States. We are a Federal Union, with the seat of Government in Washington, D.C. That is the way, in my judgment, the Founding Fathers wanted it. That was what Madison said in No. 3 of the Federalist Papers. That is the way, in my judgment, which has proven wise over the years, and should not be changed today.

The PRESIDING OFFICER. Who yields time?

Mr. MELCHER. I yield 3 minutes to the Senator from Massachusetts.

Mr. KENNEDY. I yield a minute to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, in one minute I can tell you this issue was addressed in Kansas City, Mo., in 1976 in the Republican platform. It is right there. It says:

> We support giving the District of Columbia voting representation in the U.S. Senate and House of Representatives.

That is the Republican platform. We fought over it, we traveled across the country saying, "Look at our platform." Our leaders said, "Look at the platform," and pointed to it with pride as an excellent expression of Republican ideals and principles.

The time has come for action, and if this platform means anything it means the Republican Party supports this resolution.

Mr. President, on Saturday I announced my support for House Joint Resolution 554 at a meeting with D.C. Republican leaders who support voting representation for the District. There are convincing reasons to support this measure which compel me to vote "yes." The absence of voting representation for the District in Congress is an anomaly which the Senate can no longer sanction. It is an unjustifiable gap in our scheme of representative government—a gap which we can fill this afternoon by passing this resolution.

Many of my distinguished colleagues have raised important issues regarding the nature of our Federal Republic and the representation of States in the U.S. Senate. I appreciate having the benefit of their discussion. However, it is my view that we can recognize the District as a State for purposes of representation without damaging the fabric or structure of our democracy. In fact, granting effective representation to three-quarter million people will strengthen our system of democracy by extending the benefits of representation and by giving residents of the District a stake in our system of legislative participation.

It seems clear that the framers of the Constitution did not intend to disenfranchise a significant number of Americans by establishing a Federal District. I believe that the framers would have found the current situation offensive to their notions of fairness and participatory government.

REPUBLICAN PLATFORM—1976

Two years ago the Republican Party took a clear and unequivocal stand in favor of D.C. voting representation. The 1976 platform states:

> We support giving the District of Columbia voting representation in the U.S. Senate and House of Representatives. . . .

As delegate, platform committee member, and temporary chairman of the convention, I helped write that platform. As Vice Presidential nominee, I helped carry its message to the American people.

I consider its principles and policies to be representative of the thinking of Republicans on most issues. Its D.C. plank represented a clear commitment to voters in the District of Columbia—a commitment which I will not lightly cast aside.

Republicans rallied to that platform in great numbers. Our most distinguished leaders enthusiastically adopted it as an excellent expression of Republican principles and ideals. By all accounts, it was a platform that conservatives could be proud of.

I am particularly proud of my party for adopting this plank because the conventional wisdom is that, for the near future, Democrats would be favored to win these new seats.

The Republican Party supported D.C. voting representation because it was just, and in justice we could do nothing else. We supported full rights of citizenship because from the first—from Lincoln forward—we have supported the full rights of citizenship for all Americans.

THE HEALTH OF OUR DEMOCRACY

The health of any democracy depends on a general willingness to put aside narrow partisan concerns in favor of improving the system and extending its benefits to others. Whether we are amending the constitution, regulating elections, or judging Senate election contests, we must place fairness ahead of party. I would hope that Members from both sides of the aisle will do this in the future on other fundamental issues with partisan ramifications.

In addition to narrow partisan concerns, there are other considerations which we must put aside in the face of more important considerations.

Throughout our Nation's history more and more Americans have been enfranchised by the system. As we sought to eliminate economic discrimination, race discrimination, and sex discrimination, we extended the right to vote—to meaningfully participate in congressional elections—to an increasingly larger number of people. First, nonlandowners were given the right to vote during the first half of the last century. Later came former slaves, women, and 18-year-olds.

Today we are being asked to end our discrimination against people who happen to live in the District of Columbia. I realize that some are concerned about diluting the power of their States as a result. But in every instance where more Americans were brought into the electoral system in the past, the segment of our population that had 100 percent of

the voting power was asked to give up some of that power to someone else in the interest of improving our system of democracy. This is no time to reverse that trend—this is no reason to oppose this bill.

THE BURDENS AND BENEFITS OF CITIZENSHIP

The reasons for granting voting representation in Congress are compelling. District residents pay taxes, fight wars, and cope with Federal regulation just as other American. The burdens of citizenship are borne by them just as much as they are by our constituents.

Generally, they also participate in the advantages of citizenship, including the protections of the bill of rights. However, there is something missing, and we are being called upon to rectify that today. In a democracy, nothing is so fundamental as the right to vote and the right to representation, and I see no good reason why that basic principle should not apply to the District as well as to our respective States.

The District of Columbia is not just a plot of land full of big white buildings and people who have come here temporarily to work for the Federal Government. Rather, it is home to almost three-quarters of a million people, who should be granted congressional representation just as the citizens in all of our States are.

I thank the distinguished Senator from Massachusetts.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield a minute to the Senator from Indiana.

Mr. BAYH. Mr. President, it seems to me that the question here is not trees or cows or factories; the question is representation. The question is one of full representation. It gets right down to whether you should have representation in the U.S. Senate or not. And if we believe in full representation we have to understand the unique contribution that the Senate makes in the governmental process.

The PRESIDING OFFICER. May we have order?

Mr. BAYH. The citizens of the District are entitled to be represented when we decide on treaties to determine war and peace; they are entitled to be represented when we fight the great battles, like we did over qualifications of a Supreme Court justice; they are entitled to representation when you try a President for impeachment.

The only way you are going to get that full representation is by giving the District citizens two U.S. Senators. That is why I think we ought to support this measure, because that is the only way you are going to give them full representation. If we are going to do the job, let us go all the way. Let us not go halfway.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, many in this body are sensitive about the pride and traditions of the Senate and its long historical record as an institution in which only States are represented.

I understand that tradition. I have served here for 16 years now, and I yield to no one in my respect for this great body and my pride in its work.

Some of the greatest debates in this Chamber have involved the admission of new Members to this body. There was the Missouri Compromise of 1820, and the Compromise of 1850, which almost succeeded in saving the Union from civil war.

The growing pains of the Nation were clearly reflected in the growing pains of the Senate.

A few steps from here we can see the small restored Chamber in which the early Senate met.

We grew from a body of 26 Senators at the beginning to 100 Senators today.

In a sense, the wheel has come full circle. For decades in the 19th century, the admission of Mountain and Western States to the Union was delayed, because Eastern Senators feared the impact of new voices from the West with a different philosophy. But the Senate was enriched, and our Nation was enriched by the admission of those States.

And now, similar arguments of opposition are heard against the acceptance of the District in the Senate.

But the District has waited longer than any State ever had to wait—100 years since the first such amendment was introduced by Senator Henry Blair of New Hampshire.

We have been an institution with a tradition of representation of States. But that tradition is in obvious conflict with what I think is a higher tradition of our Nation, the right of self-government, the right of representation in our democracy.

Over the years, we have also established another tradition—the tradition of amending the Constitution to enlarge our democracy and broaden the participation of the people in their Government. Six of the last twelve amendments have broadened this right of participation.

The 15th amendment outlawed racial restrictions on the right to vote. The 17th amendment provided for direct popular election of Senators. The 19th amendment was the womens suffrage amendment. The 23d amendment gave the District the right to vote for President. The 24th amendment outlawed the poll tax.

In recent days, we have gone over the case in detail for representation in the House and Senate for the people of the District of Columbia:

They have more people than seven States. They pay more Federal taxes than 11 States. They lost more sons in Vietnam than 10 States. Almost every other foreign democracy gives representation to its capital city in the legislature.

In 1961, we went part way; we gave the District the right to vote for President. Now it is time to do the rest of the job, by giving the people of the District a voice in the Congress.

This issue has come a long way. And it has been a long wait—almost 100 years since the first constitutional amendment was proposed.

At a time when our Nation is speaking out eloquently on human rights around the world, we must also recognize that civil rights and human rights begin at home.

Victor Hugo wrote in 1852:

> Greater than the tread of mighty armies is an idea whose time has come.

Mr. President, representation in Congress for the District of Columbia is an idea whose time has come, and the Senate should welcome the representatives of the District into our Chamber.

Mr. SCOTT. Mr. President, how much time remains?

The PRESIDING OFFICER. One minute.

Mr. SCOTT. I yield 1 minute to the distinguished Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas.

Mr. TOWER. Mr. President, I have listened with great interest to the debate on House Joint Resolution 554, and I have had a number of conversations with individauls, both here and in Texas, who have strong feelings on this issue. In fact, I have been the subject of a good deal of lobbying on this bill, and while I share the genuine concern of those who seek to assure full voting particpation to citizens of the District of Columbia, I am not convinced that the pending resolution is a justifiable means of accomplishing that purpose.

In terms of voting representation, House Joint Resolution 554 confers upon the District a unique sort of "quasi-State" status. In my view, this presents complex challenges to the Constitution, and directly contravenes the intent of the Founding Fathers in this regard.

A reading of article I of the Constitution, under clause 17, section 8, clearly demonstrates the purpose of the framers in seeking to preserve as a separate Federal enclave that territory housing the seat of our Nation's Government. In this section, the Constitution provides for the establishment of a Federal district over which "Congress shall have power * * * to exercise exclusive legislation in all cases whatsoever."

By refusing to create a separate and sovereign State in this instance, the framers emphasized the need to provide insulation for the Federal Government against the potential conflicts arising out of local needs and interests. In Federalist No. 43, James Madison discusses "the indispensable necessity of complete authority at the seat of government" and points out that—

> This consideration has the more weight as the gradual accumulation of public improvements at the stationary residence of the government would be both too great a public pledge to be left in the hands of a single state. . . .

The interests of the District of Columbia are well represented in the Congress by a full committee in the House and a subcommittee here in the Senate. In addition, the citizens of the District elect a nonvoting delegate to the House, and he has become a very effective proponent of District needs and interests in House committee proceedings and floor debate.

No other city and, in fact, no other State in the Union, is entitled to such special attention here in Congress, and it is difficult for me to accept proponents'

arguments that the District is a stepchild when it comes to Federal legislation. In addition, I think it is well to bear in mind that the District is heavily supported by Federal tax dollars. In fiscal year 1977, for example, the District received a total of $749,740,600 in Federal funds—and this is exclusive of the payments for Metro. I understand that the fiscal year 1979 appropriations for the District of Columbia are well over a billion dollars.

I hardly think that these figures indicate a lack of Federal concern for the District. Only New York City, with its 8 million inhabitants, receives more financial assistance from the Federal Government. Considering the fact that three Texas cities—Houston, Dallas, and San Antonio—are larger than the District, maybe we are the ones getting shortchanged in this deal.

Another problem I have with the pending resolution concerns the position of District residents vis-a-vis citizens of other States in terms of the manner in which they exercise their voting rights. For example, section 1 of the resolution would treat three different voting procedures—that of electing Members of Congress, electing a President and Vice President, and ratifying constitutional amendments—as though they were identical processes. In fact, they are not.

Only Senators and Members of the House are elected by the people directly in the various States. In the case of constitutional amendments, it is the State legislatures who decide whether or not to ratify, but the District, of course, does not have a State legislature, since it is not a State. Therefore, we could have a situation where District citizens could vote directly on ratification—a privilege which no other voter in any of the States would have. On the other hand, you could have the decision made right here in Congress, which is the ultimate "government" for the District. In that case, Congress would have two votes on each proposed amendment; one vote to send the measure to the States, and one for the District.

Just yesterday, my colleague from Idaho, Senator McCLURE, attempted to amend this resolution to eliminate some of the confusion on this very point. Unfortunately, the amendment was tabled, which simply underscores, in my view, the proponents' unwillingness to accommodate logic and equity in dealing with this issue.

Finally, Mr. President, I must take issue with the idea of giving full representation to a constituency which reflects no other State in terms of diversity of interests, either geographical or economic. There is very little manufacturing here, certainly no great agricultural interests, no vast wilderness to protect and no production of energy resources. What we are talking about here is a one-industry town, and that industry is the Federal Government itself. Nearly 60 percent of the District's population is employed in some Government-related occupation, and I daresay there are a great many others whose livelihoods depend on the Federal community.

It seems to me that what we are doing here is giving the Federal bureaucracy itself voting representation in the Congress. At a time when most Americans decry the size and scope of the Federal Government and its activities, we are seeking to enfranchise those whose interests may be best served by the continued growth of Government.

Mr. President, we will soon be voting on House Joint Resolution 554, and I do not intend to consume a great deal of the Senate's time here. I hope that my colleagues will consider carefully the serious flaws in the pending resolution, and that it will be defeated.

Mr. President, I think the question here is a very fundamental question. It was the intent of the framers of the Constitution that the Senate should be represented by each State equally, because it was the concept that the Senate would represent each State as a corporate entity.

If we adopt this resolution and submit this amendment, and if it is subsequently ratified, it will mean that we have fundamentally altered the nature of the American federation, and we will open the door, in my view, to other types of amendments that will change not only the original intent of the founders but to change the entire character of the Federal Republic.

For that reason, and for that reason if no other, this proposed amendment should be rejected.

The PRESIDING OFFICER. Who yields time?

Mr. MELCHER. Mr. President, I yield myself such time as I may consume, and I will be very brief.

I only take this time now to remind the Members of the Senate that at the appropriate time, following 6 o'clock, I will ask that my amendment, which I have withdrawn, be called up, and that a vote occur immediately, and asking for the yeas and nays at that time.

The arguments of all of the proponents for the constitutional amendment as it is presented to us are compelling and they touch my heart.

But the responsibility of the Senate in a bicameral form of government, the form of government that we have, is to allow a difference in representation for the diversity that we find in a State.

The amendment I offer will provide the opportunity for the residents of the District to vote for their Senators. I would say that no one should interpret the remarks made here as indicating that the Senators from Maryland are incapable of wise, prudent, forceful, and good representation for all of the people in this area, just as they represent Prince Georges County, where I live, and the vast area that surrounds us on this side of the Potomac.

They do a fine job. The area of the District fits within those confines and I hope my amendment will prevail.

● Mr. SCHMITT. Mr. President, I cannot support the constitutional amendment to grant the District of Columbia full voting representation in Congress. Representation in the Congress of the United States is a unique privilege; however, it was clearly the intent of the Founding Fathers, an intent fully supported by history up to this time, that with the privilege of representation must come the responsibilities of statehood.

Article I, section 3 of the Constitution, under which all present States have labored together, reads in part as follows:

> The Senate of the United States shall be composed of two Senators from each *State* (emphasis added).

It does not provide for any exceptions. Specifically, there is no exception for the representation of groups of people except as they are organized into States. The special interests of groups of people are clearly provided by Representatives in the House of Representatives but, again, in a manner dependent on organization as a State. This is provided for in article I, section 2 which reads in part as follows:

> The House of Representatives shall be composed of Members chosen every second Year by the People of the several *States* (emphasis added).

The holding of elections for both Senators and Representatives is the duty and the right of the States. Article I, section 4, clause 1 states:

> The Times, Places and Manner of holding Elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof.

Amendment X states that—

> The powers delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

It is clear that the framers of the Constitution understood rights and duties in terms of States, not individuals.

What we have before us today is clearly contrary to both the intent and the word of the Constitution. It is in no American's long term interest to exaggerate the special privileges of our city any more than is absolutely necessary. Such an action will only create resentments and other pressures from other areas for special treatment.

The issue should be statehood for the District of Columbia or, better yet, the rejoining of the District with Maryland for political representation within the bounds provided by the Constitution. I have supported both such proposals for presentation to the 50 States for ratification. I am truly sorry these proposals have been defeated.

Finally, Mr. President, those of us from the West understand from our own struggles for statehood the yearnings of the residents of the District of Columbia. However, those yearnings must be directed toward obtaining the responsibilities as well as the privileges of being part of a State. I do not believe the 50 States will accept anything less.

By passing an amendment that has no chance of ratification by the necessary number of States, we will delay indefinitely the development of an acceptable method for the political representation of the people of the District. This is just as unfair to the District as the proposed amendment is unfair to the 50 States.●

● Mrs. HUMPHREY. Mr. President, today we are debating an historic issue which is at the very heart of our demo-

cratic system—representative government. The resolution before the Senate is designed to give the District of Columbia full voting representation in the Congress. Clearly, the issue merits the very thoughtful consideration it is receiving. But, the time has come for the Senate to work its will in a final vote on this resolution proposing a constitutional amendment.

One fundamental question is involved in this vote: Shall we continue to deny over 700,000 residents of the District of Columbia the basic privilege enjoyed by all other American citizens to elect the women and men who control their Government?

Taxation without representation was one of the principal reasons our forefathers revolted against England. Residents of the District of Columbia see this same issue at stake in the debate over this resolution today.

Residents of the District pay over $1 billion annually in Federal taxes. But who represents them in the Senate? Who looks out for their interests and votes on issues of importance to them? There are some who would answer that we all do. But we must honestly admit that on any issue where the interests of residents of the District of Columbia and of our respective States are in conflict, we generally will give priority consideration to the views of our own constituents.

The alternate proposal for retroceding non-Federal land within the District to the State of Maryland would not have solved the problem, and the Senate's action yesterday to table this amendment recognized, in part, that additional problems would have been created. I need only mention such matters as District representation in the Maryland Legislature, District representation in the electoral college as provided for in the 23d amendment, and Federal jurisdiction over District activities as deemed necessary by the special nature of our Federal city.

Beyond all this, however, is a more important issue—people. Not land, not legislative control, but people. The issue is what is required to guarantee to all American citizens the right to have a meaningful and effective voice in the workings of their Government?

Mr. President, 29 years ago, Hubert Humphrey was a freshman Member of the Senate. At that time, he advocated home rule for the District on this very floor. The issue of home rule, granted by the Congress to the District with reservations in 1974, is not so far removed from congressional representation that his statement in advocacy of that bill would not be appropriate now. At that time, he said:

> I believe the first thing which should be done by the Congress is to give as much power as possible to the people of the District of Columbia. I submit that when we are dealing with (700,000 people), they should not be dealt with lightly. . ."

When Hubert reiterated his position in 1973, he went on to say:

> That this greatest of all democracies withholds from the citizens of its Capital City the right to elect their government leaders is hypocrisy of the first order and a source of increasing embarrassment to our Nation.

I urge my colleagues to reaffirm their support for our system of government by voting in favor of House Joint Resolution 554.●

● Mr. HOLLINGS. Mr. President, I rise today in support of bringing government of the people, by the people, and for the people to the nearly 700,000 residents of the District of Columbia. Thomas Jefferson said,

> It is an axiom in my mind that our liberty can never be safe but in the hands of the people themselves.

The constitutional amendment we propound today is the logical, and necessary, culmination of those great principles of liberty and democracy for which Jefferson and his generation fought. And for which the sons and daughters of America, including many from this Nation's capital, have fought so many times since.

The principle of democracy is not secure when the vote of any citizens is denied. Yet today, more than 200 years since the founding of an independent America, there exists right outside the wall of this building a denial of democracy so great as to be a denial of ourselves. And because it exists just outside these walls, it exists inside, too—right here in the U.S. Senate where you will look in vain for any Senator representing the needs and convictions of 700,000 people.

The issue we confront today is not one of comparing the size of Washington with the size of other cities. Nor can the issue be avoided by irrelevant arguments that perhaps New York, Chicago, or Los Angeles will also deserve their own Senators and Congressmen if Washington is so treated. Those other cities have representation. Who is going to argue that our distinguished colleagues Mr. JAVITS and Mr. MOYNIHAN do not directly represent the cities of their State? Who would argue that the voice of Chicago or Los Angeles or any other city cannot be heard within this Chamber? Surely any such contention merits nothing but ridicule.

Mr. President, all the facts and statistics have been cited in behalf of our approving sending this amendment to the States.

We know the District contributes more taxes to the Federal Government than do 19 of our States.

We know that the overwhelming majority of other nations which have elected legislatures do not discriminate against residents of their capital cities concerning representation in their respective national legislatures.

These points, and many more, have been made again and again, and they are points which cannot be gainsaid.

But far more than any of these, we confront foursquare an issue that goes to the heart and soul of America. The citizen who pays his taxes, supports his government, and marches off to die in his Nation's wars has a right—an inalienable right—to full representation. "Taxation without representation is tyranny," said the great patriot, James Otis. So also, would come the refrain from a thousand battlefields around the world, is death.

The right to representation is fundamental. It is basic. Without it, the promise of America is mocked. We must not discuss this in any careless or callous fashion. This is no perfecting amendment nor private relief bill. It is relief from a denial that has kept hundreds of thousands—and over the years, millions—from enjoying their most basic rights as citizens of America. The sad fact is that these people, these residents, of Wahington, D.C., are not citizens. They cannot be citizens until they possess democracy's greatest prize—representative government. This is an absolute right that must be absolutely granted, and until it is, we are blighted and blemished. We have fought around the globe to make the world safe for democracy. Now we must bring democracy home.●

● Mr. BAKER. Mr. President, as I have previously indicated, I will support the constitutional amendment before the Senate today providing for full voting representation in the Congress for the District of Columbia.

By now the arguments for and against this amendment are familiar to all of us, and as usual, there is merit in both sides of the debate.

But I have concluded that we simply cannot continue to deny 700,000 American citizens their right to equal representation in the national Government, that this basic right is a bedrock of our Republic that cannot be overturned.

The District of Columbia is not a State. It was conceived as a special Federal enclave over which no State government would have control. But the District is more than a city: the fact that the District casts three electoral votes in Presidential elections, as no city in America does, is proof enough of this.

It does not matter that residents of the District pay more Federal taxes per capita than residents of 49 States in the Union—although they do. It does not matter that the District's residents have fought in every American war since its creation, or that the District's casualty level in the Vietnam war was greater than that of 10 States—although it was. It does not matter that the population of the District exceeds that of seven States—although it does.

What matters is that the people of the District of Columbia are American citizens who have a right to be heard in the Congress of the United States, a right not only to a voice but a vote.

The 1976 platforms of both major political parties endorsed D.C. representation. The basic principles on which the Nation was founded insist on it, and I urge my colleagues to join me in voting for passage of this amendment.●

● Mr. WEICKER. Mr. President, I voted in favor of House Joint Resolution 554, a constitutional amendment that would provide voting representation for the District of Columbia. Indeed, I have long advocated that the citizens of the District should have full voting representation in the Congress.

However, I would like to make it very clear that I think that the Congress is

avoiding the central issue in the debate over representation. The issue is whether the District of Columbia should be a State—with all the attendant privileges, as well as, I might add, all the headaches which statehood entails.

Article I, section 8, clause 17 of the U.S. Constitution empowers Congress "to exercise exclusive legislation in all cases whatsoever over such district (not exceeding 10 miles square) as may by cession of particular States, and the acceptance of the Congress become the seat of the Government of the United States." The question of the representation of District residents received little express attention during the course of the drafting of this clause, as the District's small size and the proximity of its residents to Congress made the problem of representation less than pressing for our forefathers. Indeed, James Madison, writing in The Federalist No. 43 in 1788, assumed that District residents would receive adequate informal representation by Senators and Congressmen residing in the District.

Times have changed since 1787. The District of Columbia is no longer a hamlet with a population under 14,000. The latest census places the District's population in excess of 700,000, which is larger than the population of seven States. Clearly, it is time to provide the citizens of the District with representation in the Congress. To do so, the Constitution must be amended. Indeed, that is the beauty of our Constitution—it is a flexible, growing document that has thrived for nearly 200 years.

But it would not continue to be a viable document if it is amended in knee-jerk fashion. And believe me, what we are doing here today is amending the Constitution in a knee-jerk fashion. We are responding to pressures which make our actions in providing for a constitutional amendment politically attractive. Sure, we can go home and say to our constituents that we believe in the tenets of the Constitution and make sure that all Americans are represented in Congress by voting for this amendment. We made sure that there was no taxation without representation.

However, we just are not telling the truth. What we have done is the politically expedient thing—not the right thing. We have changed the Constitution to embrace a few people. We have not amended the Constitution to further the rights of all Americans.

If my colleagues will look to the 26 present amendments to the Constitution and to the proposed 27th amendment, they will see that only one amendment does not deal with the rights of all Americans. That is the 23d amendment, which provides for Presidential electors for the District of Columbia. Each of the other amendments applies to all Americans—not just to those confined in a finite geographical region.

What we have done today is to take the first step to carving out another exception to the Constitution. I do not argue that as far as the District of Columbia is concerned we are going to have to deal with the Constitution—as the Constitution itself makes explicit provision for the District. What I object to is altering the Constitution each time something has to be done concerning the District. Who knows for what the next "politically expedient" carving out will be? But mark my words, there will be one unless we face up to the issue before us.

What we must do is amend the Constitution to provide for statehood for the District. Until we do that, the District of Columbia will not truly enjoy full rights.

Mr. President, I will shortly introduce an amendment to the Constitution which will provide for full statehood for the District of Columbia. This amendment would entitle the District to the representation it needs and deserves. It would also make it stand on its own two feet.

Mr. President, the States have 7 years to act on the amendment to provide voting representation for the District of Columbia. That gives Congress time to address the underlying issue head on. That issue is the one of statehood for the District. If we Senators fail to perform our duties and avoid the underlying issue by thrusting the decision of the status of the District upon the people of the country, then I reserve the right to campaign actively in Connecticut against the ratification of the amendment to provide voting representation for the District.●

● Mr. STONE. I support full representation for the District of Columbia in the U.S. Congress. I have considered this issue very carefully, taking into account constitutional arguments and fundamental fairness.

The nature of the District of Columbia as a political entity today is quite different from what it was when it first became our Nation's capital in the 19th century. Today it has more residents than seven States and an active, independent political life. No constitutional purpose is served by exclusion of the District of Columbia from full representation, and I do not believe that is the intent of the Constitution.

The District of Columbia is not a State, but it is treated like a State already for other purposes. For example, its residents share the burden of Federal taxes; enjoy the right to trial by jury; and Congress regulates commerce between the District and the States as it does for interstate commerce.

The concept of representation for members of a nation's capital district is not new. In fact, in most other countries, West Germany, the capital's residents have full representation in the national legislature.

Fundamental fairness demands that the District have full representation in Congress. Its residents paid more in 1975 in Federal income taxes than the residents of 14 other States. Its population exceeded that of 10 States in the last census. And, in 1976 its per capita Federal income tax payment was $77 higher than the national average. The residents of only seven States paid more per capita in Federal income taxes. What's more, District of Columbia residents have served fathfully and in disproportionately high numbers in our major wars, demonstrating a commitment and loyalty to the United States not reciprocated with a full voice in the Senate and House.

I believe that a denial of full representation in the national legislature to residents of the District of Columbia is a denial of their share of the birthright that belongs to all U.S. citizens—that of electing Members of Congress to express their views and to represent them in national debate on issues that have a major impact on their lives and welfare.●

Mr. MELCHER. I yield the additional minute I have remaining to the majority leader.

Mr. ROBERT C. BYRD. Mr. President, the Constitutional framers in 1787 provided that States have Senators to represent them in this body. But the framers also foresaw that that Constitution would be a living document which could respond to change, and they provided for that change by the first few words of article V which says, in part:

> The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution . . .

Not to just portions of this Constitution, not just articles of this Constitution, not just article II of this Constitution, but "to this Constitution."

The objection is going to be made here by the distinguished Senator from Utah that House Joint Resolution 554 is proposing something that is unconstitutional because it would give to an entity that is not a State representation in this Senate and would thereby dilute the representation of the 50 States that are represented in this Senate.

To state the obvious, however, what House Joint Resolution 554 proposes is a constitutional amendment, and since by definition a constitutional amendment cannot be unconstitutional, the suggestion that House Joint Resolution 554 is unconstitutional is a contradiction in terms and a fatal flaw in the logic of those who make this very curious objection.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. In any event, it is too late in history to argue that granting representation in Congress to the District of Columbia would deprive any State of its equal suffrage in the Senate. Since the ratification of the Constitution by the original 13 States, 37 additional States have come into the Union. As a result, the suffrage of the original 13 States has been diluted nearly fourfold, and yet no one seriously argues that any of the older States has been deprived of its equal suffrage in the Senate by the admission of new States.

I hope that the point of order will not be sustained, and that the Senate, if the constitutional point of order is submitted to it, will vote down the point of order.

The VICE PRESIDENT. The Senator from Massachusetts has 2 minutes remaining. The Senator from Massachusetts.

Mr. ROBERT C. BYRD. The Senator from Massachusetts yielded me his time. That is why I kept going.

Mr. KENNEDY. I yielded the time for the Senator.

The VICE PRESIDENT. There are 2

minutes remaining for the Senator from Massachusetts.

Mr. HATCH. Mr. President, will the distinguished majority leader yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. HATCH. Will the Senator yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. HATCH. On the Senator's point that this is a constitutional amendment and, thereby, stand in and of itself, you have article V which says that "no State without its consent, shall be deprived of its equal suffrage in the Senate."

Mr. ROBERT C. BYRD. Yes, but I have the floor, and let me answer the Senator.

Mr. HATCH. Let me ask the question.

Mr. ROBERT C. BYRD. No, the Senator has asked his question.

Mr. HATCH. I would like to ask a question.

Mr. ROBERT C. BYRD. The Senator from West Virginia does not yield. The Senator from West Virginia has already answered that question. The constitutional authors provided by article V the very vehicle by which the people themselves would amend the Constitution. I say let us give it to the people to make their decisions.

I have already answered the question about dilution of equal suffrage in the Senate, and the Senator begs the question when he wants me to go over that again.

Mr. HATCH. Would the Senator yield for another question?

Mr. ROBERT C. BYRD. Yes.

Mr. HATCH. Is it not true that when it says "no State without its consent," includes all 50 States and not just 38?

Mr. ROBERT C. BYRD. Well, but the Senator seeks to evade the point here.

Mr. HATCH. No, I do not.

Mr. ROBERT C. BYRD. No State is being deprived of its equal suffrage in the Senate. Once this amendment is submitted to the people according to article V, and three-fourths of the States ratify that amendment, no State is denied its equal suffrage.

To argue that is to argue that the 13 original States were denied their equal suffrage when 37 additional States were admitted to the Union.

Mr. HATCH. Not at all. Will the Senator yield again for one more question? If the 12 States did not——

SEVERAL SENATORS. Regular order! Regular order!

The VICE PRESIDENT. The time has expired.

Mr. HATCH. Mr. President, if the time has expired, may I make my point of order?

The VICE PRESIDENT. The Senator will state his point of order.

Mr. HATCH. I make the point of order that House Joint Resolution 554, the pending joint resolution, is not in order in that it violates Article V of the Constitution by specifying a method for adoption by the States without providing, in accordance with the last proviso of Article V of the Constitution that each of the 50 States must consent to the proposed amendment, because the proposed amendment would affect the equal suffrage of each State in the U.S. Senate. In other words, by bringing in a non-State and giving it two Senators, the express language of Article V, which reads:

No State, without its Consent—

The VICE PRESIDENT. The Senator will state his point of view.

Mr. HATCH. I am stating it:

shall be deprived of its equal Suffrage in the Senate.

Therefore, I submit that a point of order should lie that this joint resolution is not in order, because of that reservation.

The VICE PRESIDENT. Under the uniform practices of the Senate, whenever a question of constitutionality is raised, it is submitted to the Senate.

Mr. ROBERT C. BYRD. Mr. President, I move to table the point of order, and I ask for the yeas and nays.

The VICE PRESIDENT. Is there a sufficient second?

Mr. HATCH. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state his inquiry.

Mr. HATCH. On a point of order made on a constitutional amendment, is it proper, since there is absolutely no precedent, and since the rules state that that point or order must be submitted to the Senate, to move to table?

The VICE PRESIDENT. It is within the rules.

Mr. HATCH. Then I ask for the yeas and nays.

Mr. ROBERT C. BYRD. It has been ordered.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The VICE PRESIDENT. The question is on agreeing to the motion to lay on the table the point of order raised by the Senator from Utah. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND) and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

The result was announced—yeas 65, nays 32, as follows:

[Rollcall Vote No. 348 Leg.]

YEAS—65

Abourezk	Glenn	Metzenbaum
Anderson	Gravel	Moynihan
Baker	Griffin	Muskie

NOT VOTING—3

Eastland	Goldwater	Talmadge

So the motion to lay on the table the point of order was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. KENNEDY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1711

(Purpose: To elect House Members from the District and for Senators the District residents shall vote as if residents of Maryland)

Mr. MELCHER. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) for himself and Mr. MORGAN, proposes an unprinted amendment numbered 1711.

Strike all after the resolving clause and insert the following:

That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within nine years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. For purposes of representation in the House of Representatives, the District constituting the seat of government of the United States shall be treated as though it were a State. For purposes of representation in the Senate, the District constituting the seat of the government of the United States shall be treated as though it were part of the State of Maryland. For the purposes of ratification and initiation of constitutional amendments, the District constituting the seat of the government of the United States shall be treated as though it were a State.

"SEC. 2. The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of government, and as shall be provided by the Congress.

"SEC. 3. The twenty-third article of amendment to the Constitution of the United States is amended by striking out '*, but in no event more than the least populous State*'.

"SEC. 4. The Congress shall have power to enforce this article by appropriate legislation.

SEC. 5. The Governor of the State of Maryland shall consult with the District government prior to either implementing changes in the law governing the election of senators, or making a temporary appointment to fill a vacancy in Maryland's representation in the Senate.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the leg-

islatures of three-fourths of the several States within nine years from the date of its submission.".

Mr. KENNEDY. Mr. President, the effect of adoption of this amendment would be to defeat it.

The VICE PRESIDENT. The Senator is advised that the amendment is not debatable.

Mr. KENNEDY. I move to lay the amendment on the table and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND) and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) is necessarily absent.

The result was announced—yeas 60, nays 37, as follows:

[Rollcall Vote No. 349 Leg.]

YEAS—60

Abourezk	Griffin	Metzenbaum
Anderson	Hart	Moynihan
Baker	Haskell	Muskie
Bayh	Hatfield,	Nelson
Bentsen	Mark O.	Packwood
Biden	Hathaway	Pearson
Brooke	Heinz	Percy

NOT VOTING—3

Eastland	Goldwater	Talmadge

So the motion to lay UP amendment No. 1711 on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, after the disposition of House Joint Resolution 554, there will be a rollcall vote on the Outer Continental Shelf conference report. There is a time agreement on that matter of 40 minutes, which will not be taken.

Mr. President, I ask for the yeas and nays on the adoption of the joint resolution.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask that the clerk repeat each name as the Senator responds.

SEVERAL SENATORS. Regular order.

The VICE PRESIDENT. If there be no further amendment to be offered, the question is on the third reading of the joint resolution.

The joint resolution (H.J. Res. 554) was ordered to a third reading and was read the third time.

The VICE PRESIDENT. The joint resolution having been read the third time, the question is, shall the joint resolution pass?

The yeas and nays have been ordered and the clerk will call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask that there be order after the vote is announced.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND) is necessarily absent.

The yeas and nays resulted—yeas 67, nays 32, as follows:

[Rollcall Vote No. 350 Leg.]

YEAS—67

Abourezk	Gravel	Moynihan
Anderson	Griffin	Muskie

NOT VOTING—1

Eastland

The VICE PRESIDENT. On this vote there are 67 yeas and 32 nays. Two-thirds of the Senators present and voting having voted in the affirmative, the resolution is passed.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask that there be order in the Senate. May we have order in the galleries and in the aisles of the Senate? May we have order in the Senate? There is still work to be done.

The PRESIDING OFFICER (Mr. MATSUNAGA). The Senate will be in order. Visitors in the galleries will keep silence. Senators will cease conversation. Authorized staff will please retire to the seats designated in the rear of the Chamber. Visitors in the gallery will please keep silence as they move out.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from Washington so that he may call up a conference report.

Mr. JACKSON. Mr. President, I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I want to praise the enormous contribution that Members of this body and outside groups have made in achieving this historic moment.

Mr. CULVER. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senator will cease until there is order in the Senate. Senators will retire to the cloakroom if they wish to carry on conversations.

Mr. KENNEDY. Mr. President, this success would not have been achieved but for the extraordinary efforts of the majority leader of the United States Senate and his great skill not only in parliamentary tactics but also in persuasion, in the eloquence of his voice, and in the very hard and dedicated work that he performed in explaining this issue to many of the Members.

Senator CRANSTON, who is also our whip, made a very important contribution and was of enormous help to all of us who supported this proposal.

Senator BAYH, who is the chairman of the Subcommittee on the Constitution which held the hearings, has been one of the clearest and most forceful advocates of this constitutional amendment. All of us in this body know the very great achievements that he has made in the area of constitutional rights.

Senator LEAHY, who is the chairman of the District of Columbia Appropriations Subcommittee, and Senator EAGLETON, the chairman of the District of Columbia Subcommittee in the Governmental Affairs Committee brought to this debate long experience in dealing with the District of Columbia affairs, and their help and support was invaluable.

Senator HOLLINGS, of South Carolina, was a very early supporter of this proposal and was of great value.

On the other side of the aisle, Mr. President, I express my appreciation to the leader of the Republican Party, Senator BAKER; my colleague in the U.S. Senate, Senator BROOKE, who has been a long-time supporter and spoke so eloquently this afternoon; Senator MATHIAS, a member of the Judiciary Committee and a strong supporter. Senator THURMOND, who is a member of the Judiciary Committee, took great interest in

the consideration of this measure. Senator DOLE spoke strongly in favor of it and his support was very much appreciated in recent days. Senator GOLDWATER spoke in favor of it at a very early time, and was most helpful in launching it on the right foot when it reached the Senate last March.

Mr. President, I also praise the strong statement that President Carter made in support of this proposal. All of us know that, as the Chief Executive of this country, his support for this issue, and for human rights everywhere, has raised the consciousness of the Nation and the world on these issues. Vice President MONDALE was also tireless in his support for this proposal; as a former Member of this body, he was thoroughly familiar with the issue and provided effective help in recent months. Their assistants, Dan Tate, Bob Thompson, Jim Dyke, and Bob Malson, were of enormous help.

I also praise WALTER FAUNTROY whose name leads all the rest, Mr. President, in working so effectively for this amendment. I also commend his able staff, Johnny Barnes and Eldridge Spearman, who were of such great help.

Another key group was the Self-Determination for District of Columbia Coalition, led by Sterling Tucker, Dick Clark, Elena Hess, and Melanie Woolfton. I also commend the Leadership Conference on Civil Rights, especially Clarence Mitchell and Joe Rauh, as well as Walter Washington, the Mayor of this city. Voters also did outstanding work, and I commend both Cathy Dealy and the National League, and Meg Aylward, and the D.C. League.

But most of all, I commend the 700,000 people of the District of Columbia, who have waited so long for this action.

Finally I express my respect for those who were in opposition, the leader of the opposition, the Senator from Virginia, Senator SCOTT, and also Senator HATCH, Senator MCCLURE, Senator BARTLETT, Senator MELCHER, and all who took great interest in this issue and offered their amendments. Their efforts were thoughtful and constructive, and helped to bring to the Members of the Senate the important questions raised by the amendment. The record made during these days will be of great value, hopefully, to the States that will make the ultimate decision as to whether this amendment becomes part of the Constitution.

The Senate now sends this measure to the several States. It will be the people's representatives in those States who will make the ultimate and final determination.

I am very hopeful that their decision will be made in behalf of human rights and on behalf of the civil rights of the people of this District. I am indeed grateful to all the Members who saw the merits of this measure and supported it with their votes.

I thank the Senator.

The PRESIDING OFFICER. The Senator from Washington has the floor.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield the floor?

The PRESIDING OFFICER. The Senator from Washington has the floor.

Mr. JACKSON. Mr. President, I ask unanimous consent that this time not come out of my time. We have 40 minutes on the conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield to me?

Mr. KENNEDY. Yes.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator for his kind remarks. He has mentioned everyone but himself and he, in my judgment, is entitled to more credit than any other single individual for the success of the effort that has been made, and I pay him much plaudits and salute him for his diligence, untiring efforts, and able leadership in this historic event.

I also express my compliments to those who opposed the amendment. They conducted a very substantive debate. It was of a very high degree and it was an honorable, dedicated, and sincere effort on their part, and they are entitled to plaudits as well.

Mr. BAKER. Mr. President, will the Senator yield to me briefly?

Mr. KENNEDY. Yes, if I may just take 10 seconds, Mr. President, to mention the two members of my staff, Carey Parker and Peter Parham, and Fred Williams of Senator BAYH's staff, whose assistance was valuable to me and to those who supported this. I also praise the efforts of Natasha Pearl, a high school student who graduated from Woodrow Wilson High School in the District this year, who worked hard for this amendment with youth groups which bodes well for the concern of our leaders of tomorrow on these basic issues of democracy. I yield to the Senator from Tennessee.

Mr. BAKER. Mr. President, I will not take long. I rise to express my congratulations to those who prevailed and my compliments to those who fought valiantly——

Mr. STENNIS. Let us hear the leader.

Mr. BAKER (continuing). In opposing this.

The PRESIDING OFFICER. The point of order is well taken. The Senate will be in order.

The Senator from Tennessee.

Mr. BAKER. Mr. President, especially I express my appreciation to the distinguished senior Senator from Massachusetts for his leadership in this role; of course, to the majority leader; but especially also to those Members of the Senate on this side of the aisle who expressed their view in support of the resolution early and effectively; and I am thinking particularly of the distinguished Senator from South Carolina, who was probably more instrumental than anyone else in this Chamber excepting only the managers of the bill, in seeing that this measure reached this point of development; the distinguished Senator from Arizona, Senator GOLDWATER, who added impetus to the effort; the distinguished Senator from Kansas (Mr. DOLE) without whose assistance I very much doubt that this measure could have prevailed; and the many others on this side.

It is an issue that sharply divided this side of the aisle. I note that the votes on the Republican side were divided evenly, 19 and 19, which is some measure of the conflict within the Senate surrounding this historic issue.

But most especially, Mr. President, I express my appreciation to the distinguished Senator from Virginia (Mr. SCOTT) for agreeing to manage this resolution on behalf of the opposition. As the second ranking member of the Judiciary Committee, he expressed the point of view of those in opposition effectively, cogently, and consistently over a long period of time. I offer him my congratulations for a job well done as I do all of those who participated in this debate.

I thank the Senator from Massachusetts.

Mr. SCOTT. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Chair will advise the Senator that the Senator from Washington has the floor. The Senator from Washington (Mr. JACKSON) has the floor.

Mr. JACKSON. Mr. President, I ask unanimous consent that all of the preceding comments not come out of my time. Our 40 minutes will soon be gone.

The PRESIDING OFFICER. Without objection, it is so ordered.

Does the Senator from Washington still yield to the Senator from Massachusetts?

Mr. JACKSON. Yes, I yield as long as it does not come out of my time now or previously.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. I ask unanimous consent to be able to proceed for 30 more seconds.

The PRESIDING OFFICER. Without objection.

Mr. KENNEDY. Mr. President, finally, I give strong praise to the chairman of the Republican National Committee, Bill Brock, who was of great help and value, and also to John White, chairman of the Democratic National Committee, who worked effectively to achieve this victory.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. SCOTT. Mr. President, I congratulate the distinguished Senator from Massachusetts and all those who worked with him.

I would like to commend every Senator here whom he did not mention. I think he mentioned the vast majority of the Senate.

The Senate has worked its will as far as proposing a constitutional amendment is concerned. Now it is up to the States to make the decision as to whether or not they will ratify the proposal presented by the Senate.

Naturally, I am disappointed in the result. But this is the type of government that we have in which we conduct our business in an orderly way.

I thank all of those who worked on this side of the aisle in order to enable us to obtain 32 votes, two short of the necessary number by which the resolution would have been rejected.

The PRESIDING OFFICER (Mr. HODGES). The Senator from Washington.

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1978—CONFERENCE REPORT

Mr. JACKSON. Mr. President, I submit a report of the committee of conference on S. 9 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their repective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of August 10, 1978.)

Mr. JACKSON. Mr. President, Senate approval of the conference report before us today on S. 9, the Outer Continental Shelf Land Act Amendments of 1978 will culminate 5 years of effort by the Congress to establish a modern national policy for the development of OCS oil and gas resources.

During those 5 years, OCS reform legislation has passed the Senate three times by substantial margins, twice in the face of strong opposition by previous administrations. Fortunately, S. 9 enjoys strong support by the Carter administration. Last summer this bill passed the Senate by a vote of 60 to 18. The conference report was approved by seven of the eight Senate conferees and has already been adopted by the House of Representatives by a vote of 338 to 18.

S. 9 strikes a balance between oil and gas development and potentially adverse economic, social and environmental impacts that accompany it. It goes a long way toward alleviating the public's fears that were spawned by the disastrous Santa Barbara Channel blowout 9 years ago and by other environmentally destructive oil spills, primarily from tankers, which followed. Offshore oil and gas exploration and development can now proceed on schedule in an atmosphere of business certainty and environmental security toward the goal of providing increased domestic energy supplies under these new policies.

Mr. President, the major provisions of the conference report provide for:

The establishment of national policy guidelines for OCS development;

Separation of the decision process between exploration and development;

Revision of the leasing process with the addition of new bidding alternatives that must be utilized;

Increasing the role of coastal States in Federal OCS decisions;

Establishment of absolute liability of oil spill damage with payment for a liability fund;

Improvement of safety standards; and

Establishment of a fund to pay for damage to commercial fishing vessels and gear resulting from OCS development activities.

S. 9 represents good, sound policy for the management of the public's resources.

Mr. President, the Outer Continental Shelf is America's best hope for finding additional oil and gas resources and reducing our dependence on foreign oil. The Federal Government is charged with the responsibility of managing this resource for the best interests of all the public. There is no question but that this significant reform legislation, S. 9, will aid in the attainment of our vital national energy and environmental goals.

I urge my colleagues to adopt the conference report, and thus clear the legislation for Presidential approval.

The PRESIDING OFFICER. Who yields time?

Mr. JACKSON. I yield to the Senator from Wyoming.

Mr. HANSEN. Mr. President, as ranking minority member of the Committee on Energy and Natural Resources I rise in support of the conference report and the bill. I want to make it clear that even though I voted against the Senate bill, I have decided to support the conference report since it represents what I consider to be an acceptable compromise and an important policy decision by the Congress.

Mr. President, for some years now OCS leasing has been delayed because of concern that political pressure from States which are adjacent to new leasing areas would force the congress to dictate new directions in OCS leasing policy. The department has been asking the Congress for several years to address these issues. Thus the bill that is before us now represents the definitive congressional statement on what new directions, if any, the Congress has decided to take.

The conference report that is before the Senate today, Mr. President, can best be characterized as steady as you go. It sets only a slight change in course in a policy sense. I think that is good. Since our OCS development efforts in the Gulf of Mexico have been so successful, we should build on that record. We may have made some mistakes early in the program but they have been corrected. In my view we should build on that record. To a large degree this bill does just that.

I would hope as well, Mr. President, that the resolution of these issues by the Congress will remove the uncertainty which has plagued the OCS leasing program for years and lead the way to an aggressive and expedited OCS leasing and development program.

It seems to me, Mr. President, that the most important portions of this conference report are the decisions that have been made by the conferees on the major policy issues.

On Federal exploration, the conferees removed specific authority contained in the Senate bill for the Federal Government to undertake exploratory activities. The bill instead retains the neutral language of the 1953 act. Any exploratory work the Secretary of the Interior wishes to begin will have to be approved in advance by the Congress through the usual authorization and appropriation process.

The dual leasing authority in the Senate bill was similarly dropped from the conference report as was the mandate for on-structure drilling programs contained in the House bill.

The use of new or alternative bidding systems by the Secretary has been restricted to a level which will permit a reasonable test of these systems, hopefully without disrupting the necessary investment flow into the offshore area.

The conferees worked a long time on the clean air provisions of the House bill. They agreed that offshore operations should not prevent the attainment of onshore ambient air quality standards. The conferees instructed the Secretary of the Interior to promulgate regulations which will control those emissions to the degree specified in the conference report.

The conferees also made a wise choice on the very complicated issue of manning and crewing of offshore facilities by Americans. Under the conference report, manning and crewing requirements on foreign vessels and platforms will track exactly the manning and crewing requirements that U.S. operators have to live with in foreign waters.

The conferees also resolved a major dispute over pipeline competition by requiring that the development of pipeline systems in the newly developed areas be completed using sound competitive principles and assuring that all potential shippers are treated fairly.

Because of the very important role of existing lines in the Gulf of Mexico, the conferees were firm that this area be exempted from these requirements. There was no suggestion in the conference or in the conference report that the Federal Energy Regulatory Commission reexamine exemptions for gathering lines or apply these new conditions to existing pipelines in the Gulf of Mexico. Of course, for all new lines established in new producing areas, all of these new requirements would apply.

This conference took a long time, Mr. President, to work through these issues. They are important and far-reaching issues and these are very significant decisions this conference has reached. I am pleased that it is possible for me to concur in nearly all of them.

As in any bill, however, Mr. President, there is a down side. Let me elaborate briefly.

Over the past 3½ years, while this bill has been pending before the Senate and House, I have on numerous occasions indicated strong disagreement with the regulatory climate that has been developing regarding the production of oil and gas on the Outer Continental Shelf. It was my feeling then, and it is my feeling now, that the regulatory procedures which currently govern OCS operations are excessive. They slow down and in-

hibit efforts to develop oil and gas to meet our energy needs and ultimately cost the consumer far more than the benefits realized from those regulations.

It should be clear to all concerned, Mr. President, that the regulatory tangle we are currently facing is not a product of the bill we are considering today. It is a regulatory approach which has grown like a cancer within the bureaucracy in recent years. This growth in regulatory requirements has been fed by concerns expressed by people living near new leasing areas which might be oil and gas producing areas if discoveries are made. As bureaucrats usually do, they tried to address these concerns by making more paperwork.

Because of the high level of safety already practiced in OCS operation, I must point out to my colleagues that these new regulations have made only a very marginal, if any, improvement in the safety of offshore operations. The experience in the Gulf of Mexico is convincing evidence that the regulatory approach of the past is more than adequate to prevent despoliation of beaches, of near-shore habitat, of tidelands, or other coastal environmental areas. Twenty thousand wells or more have been drilled in the Gulf of Mexico and the coastline is still producing the traditional seafood of the area at record rates. More regulations will not mean safer operations, they only lead to delay, litigation, and higher costs.

To find out what the Secretary absolutely needed to carry out a safe and efficient leasing and development program on the OCS, I wrote to the Secretary of Interior just before the Conference started asking him what provisions in either the House amendment or the Senate bill represented new authority, other than that contained in the 1953 OCS Act, which he needed to handle offshore operations problems. The response I received from the Secretary indicated that only three provisions were necessary. One was the authority for the Secretary to cancel a lease and to provide compensation to the lessee subsequent to cancellation. Second, the Secretary felt he needed authority to apply sanctions against any State employee who released privileged information that was provided by a Federal agency. Third, the Secretary felt he needed statutory authority to establish funds to compensate fishermen who had fishing gear damaged as a result of offshore operations and to pay for cleaning up oil spills resulting from OCS operations. It should be pointed out that all three of these are provided for in the conference report. I think they are good ideas and I have supported each of them from the outset of this conference.

But I feel constrained, Mr. President, to point out to my colleagues that this bill also represents a ratification of the regulatory system that has developed over the years within the Department of the Interior. We have literally written into this statute all of the regulatory authority now being exercised by the Secretary of Interior. This aspect of the bill gives me great concern since, as I mentioned previously, the current regulatory approach is far too burdensome both on the producing industries and on the oil and gas consumer.

Therefore, I would hope that the President and Secretary would draw the line on further regulations. I would hope that they would take the current system and say that this is as far as we will go. From now on we will make these regulations work; we will make them work faster; we will make them work more efficiently; we will reduce the burden on the producing industries and on the public.

The fastest way to develop new oil and gas resources is to remove regulatory and market paraphernalia which stymie the abilities of the private sector to provide for the energy needs of Americans. The free market has worked in the past and there is no reason it cannot work now. But since the Congress does not seem to be in such a frame of mind of late, the second best way to discover oil and gas in this country is to streamline the regulatory approach and to expedite the process of identifying areas for leasing, issuing the leases and granting permits so that whatever oil and gas we find will be brought to shore as soon as possible. I would hope that the Secretary would see this as an absolute mandate from the Congress. I urge support for the conference report.

I yield to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BARTLETT. Mr. President, although there is no doubt in my mind that the conference report on the Outer Continental Shelf Lands Act Amendments of 1978 will shortly be adopted by this body and signed into law by the President, I would like to state for the record why I did not sign the conference report and why I do not intend to vote for it.

The House and Senate OCS conferees are to be congratulated for their successful efforts in greatly improving on a bad piece of legislation. The conference report represents a dramatic improvement over the Senate-passed OCS bill. However, that is not sufficient justification to sign the conference report or to vote for the bill.

The bill is not needed. Past and present Interior Department Secretaries under the broad grant of authority delegated to them under the original 1953 act have promulgated hundreds of pages of OCS regulations which are, for the most part, merely replicated in this bill.

But, more importantly, the most serious cause of delays in the OCS program to date has been the series of vexatious environmental suits which have delayed a number of OCS lease sales. I am referring to the NEPA lawsuit filed on November 1, 1971, attempting to block a Gulf of Mexico lease sale; the suit filed on December 14, 1973, to block the MAFLA OCS lease sale; the suit filed in August 1974 to prevent the southern California lease sale; the 1974 suit to halt the Gulf of Alaska lease sale; the March 9, 1976, suit against the already delayed Gulf of Alaska lease sale; the suit filed on February 11, 1976, that halted the Middle Atlantic OCS lease sale; the suit filed on February 1, 1977, to block the Lower Inlet OCS lease sale; and most recently the suit of January 17, 1978, which halted the proposed Georges Bank lease sale. This list does not include the countless number of suits that have been filed in various State courts.

The Secretary of the Interior and many of the major sponsors of the bill in both the Senate and House have argued that with the enactment of this legislation the environmentalists will be so appeased and pleased that there will be no more lawsuits the purpose of which is to slow down or stop OCS development. I believe such statements could not be farther from the truth.

All suits to date have challenged the adequacy of the environmental impact statements prepared in anticipation of OCS lease sales. This bill allows such suits to continue.

Additionally, it allows even more NEPA suits by mandating a second EIS statement at least once in each frontier area between the completion of the exploration phase and commencement of the development and production phase. I predict we will see a rash of new lawsuits challenging environmental impact statements filed before the development and production phase.

On top of that, Mr. President, section 23 of the bill opens the door to a plethora of other citizen suits challenging not only environmental impact statements but any other action the Secretary or lessees take to which the litigants are opposed. Thus, instead of cutting back on OCS lawsuits, this bill will foster a growth of delay-causing lawsuits that has never been experienced before in the history of the administration of the OCS Lands Act since 1953.

In title I of the bill mention is made, with some qualification, of the need to expedite OCS development. I, of course, agree that we as a Nation do need to expedite OCS development. However, I believe that in fact this will slow down OCS development by:

First, instigating a mass of delay-causing lawsuits;

Second, expanding the regulatory burden on the offshore industry;

Third, increasing the number of bureaucrats in numerous agencies which manage the OCS program;

Fourth, increasing to a point of no return the extent of local and State government agency involvement in what used to be a purely Federal program; and

Fifth, as a result of the compounding effect of these four major obstacles to progress, the cost of developing offshore oil and gas will skyrocket with attendant inflationary effects—all of which will have to be borne by American consumers at the same time they are forced to pay through the nose for increasing amounts of imported oil.

For these reasons, Mr. President, I intend to vote against the bill.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. BARTLETT. Mr. President, I yield back my 8 minutes.

● Mr. WEICKER. Mr. President, on

August 10, 1978, the Senate and House filed the conference report on S. 9 (H.R. 1614), the Outer Continental Shelf Lands Act Amendments of 1977.

I would like to commend my colleagues that served on the OCS conference for completing a most difficult task.

When the OCS amendments become law, this Nation will have taken an important step in the wise exploration and development of offshore oil and gas, and to assure that environmental safeguards are met.

This legislation provides a balance between economic and environmental concerns and will allow this country to pursue offshore energy production in a systematic way. I believe that we must get on with energy production, and the untapped offshore oil and gas reserves offer a great new promise for this country to meet increasing pressure to become energy self-sufficient. Increased production of offshore oil and gas is not going to achieve this self-sufficiency but will add significantly to our reserves.

Among my main concerns regarding this legislation is the conflict that will inevitably arise between offshore oil and gas development and the fishing industry.

Some of the most potential oil resources are in rich fishing grounds particularly George's Bank off New England.

George's Bank is one of the most productive fishing grounds in the world as well as spawning grounds for many commercially important species.

A survey of fishing vessels made in 1977 shows that 739 vessels fish George's Bank.

The New England fishing industry lands in excess of $150 million worth of fish annually.

A total of 15.6 million acres of George's Bank was made available for nomination to lease by the Bureau of Land Management in 1975. Estimates of undiscovered recoverable oil and natural gas for this area are conservatively 0.9 billion barrels and 4.4 trillion cubic feet respectively, and could be much more.

The great push for oil and gas development on George's Bank and other areas of the Continental Shelf, along with increasing activities of the fishing industry will cause problems particularly snagged and damaged fishing gear resulting from oil related debris.

The OCS amendments of 1977 include title IV, the fishermen's contingency fund which I introduced in committee and was subsequently introduced by Congressman STUDDS on the House side.

The fund is designed to help fishermen deal with damages to their gear and vessels caused by oil and gas development. Basically, title IV provides for payment to a fisherman to replace his damaged goods when he shows reasonable proof that it was caused by debris or some other reason as a result of OCS activities.

The conferees have made a fair compromise between the Senate and House versions of the fund, and I believe the fishing industry as well as the oil companies will benefit from their work.

The OCS amendments also include language that would mandate the Secretary of Commerce in cooperation with the Coast Guard and the National Institute of Occupational Safety to conduct studies related to diving safety.

These studies are intended to address those areas that are not considered by present studies.

Many of the largest U.S. diving companies have the most sophisticated experimental diving systems in the world and are capable of developing their own tables and physiological safeguards.

I believe these companies are presently doing an excellent job of researching and developing diving safety techniques on their own. The intention of the studies as set forth in the OCS amendments is not to duplicate their efforts but to fill gaps in existing research. It is the Government's job, I believe to study such things as the cause and effects of bone necrosis which is presently plaguing the industry with high insurance rates. There is very little known about the prevention of bone necrosis and over a long period of time it can be debilitating to its victims. Other studies involving shallow water air saturation diving and excursions are also necessary.

I believe that these studies will be useful to the commercial industry and to diving in general.

Mr. President, it is my firm belief that the oceans will provide us with numerous more resources in the future. The Outer Continental Shelf Lands Act Amendments of 1978 will set a precedent in how we handle the development, utilization, and environmental protection aspects of other resources from the sea. We should, therefore, watch the results of this legislation carefully.●

● Mr. JOHNSTON. Mr. President, may I ask my good friend and chairman of the Energy and Natural Resources Committee, Senator JACKSON from Washington, a question I have concerning the conference report on S. 9, the Outer Continental Shelf Lands Act Amendments of 1978?

It is my understanding that when the conferees acted on the issue of the grandfathering of certain exploration activities from the new requirements to be imposed by our amendments to section 11 of the OCS Lands Act, the intent was clear that delays in current, ongoing exploration activities were to be mitigated to the fullest extent possible.

That is, by specifically providing that those exploration activities conducted pursuant to existing leases on which drilling permits had been issued or for which exploration plans had been approved prior to 90 days after the date of enactment of these amendments shall be considered in compliance with the requirements of this act. The conference also intended that the Secretary of the Interior consider those plans submitted to him up to and through such 90-day period under existing regulations and not unduly delay such consideration while awaiting the development of new regulations. The reason for this is as much to encourage industry to submit exploration plans as they are prepared in the normal course of business without the need for delay while awaiting the promulgation of new regulations. We do not want the Secretary "dragging his feet" on plans which have undergone detailed analysis and costly preparation based upon existing valid regulations or arbitrarily to return to exploration plans he received prior to promulgation of any new regulations when the exploration plans conform to existing regulations. Is it not your understanding that the conferees intended to avoid such delays whenever possible?

Mr. JACKSON. I believe that my colleague from Louisiana has correctly stated the intent of the conferees on this point. The conferees were vitally interested in making sure that undue delays in all phases of OCS resource development be kept to an absolute minimum. At the same time, however, the conferees did recognize that the Secretary could require additional information from lessees or could require a revised exploration plan, although our intent to prevent undue delays was clear.●

● Mr. McCLURE. Mr. President, I am pleased that the conference committee in consideration of the Outer Continental Shelf Lands Act Amendments of 1978, agreed on language of documentation, registration, and manning requirements in section 30 of the new sections of this act.

This section protects the opportunity for Americans to obtain and keep jobs for the purpose of finding and producing energy resources on the Outer Continental Shelf. Minimum standards for vessels, rigs, platforms, other rigs and structures, should make a positive contribution toward safe and environmentally sound operations on OCS areas. There is enough flexibility in this provision, while protecting job opportunities, to serve notice on foreign nations that the United States intends to take a balanced approach toward manning requirements consistent with actions of other nations under similar circumstances where American workers are involved.●

● Mr. MUSKIE. Mr. President, great concern has been expressed about the potentially great impact that activities on the Outer Continental Shelf may have on the air quality of adjacent States. It is undisputed that OCS-related activities will increase onshore air pollution levels.

In response to anticipated exploration off of the southern California coast, EPA has issued a notice of determination that the Clean Air Act, and all regulations promulgated thereunder, apply to activities on the Outer Continental Shelf when such activities could affect the air quality of an adjacent State.

All requirements under the Clean Air Act are thus applicable to OCS activities. This includes attainment and maintenance of ambient air quality standards when the State affected has not yet achieved those standards. It includes prevention of significant deterioration requirements when the State affected has air quality better than the ambient

standards. It includes compliance with all new source performance standards promulgated by EPA which apply to an OCS facility. It includes compliance with all State air quality requirements authorized to be established by the Federal clean air law. It includes all permit requirements applicable prior to construction of a facility with a potential air quality impact on a State. It includes all enforcement authority required to be exercised by the Administrator of the Environmental Protection Agency.

In short, exploration, development, and production activities on the Outer Continental Shelf are no different than any other source of pollution; they are regulated to the extent they interfere with the efforts of a State to comply with the Federal mandate to clean up its air or to keep its air clean, and to the extent EPA has promulgated new source standards for OCS activities. As one of the principal authors of the Clean Air Act, I can say that without question the law is intended to regulate any OCS activity which may affect the onshore air quality of a State, and EPA's notice of determination implements this congressional intent.

Mr. President, the conference report on the Outer Continental Shelf Act contains language which in my opinion reinforces the Clean Air Act to activities on the Outer Continental Shelf.

The bill requires that the Secretary of the Interior promulgate regulations to insure that exploration, development and production activities comply with "national ambient air quality standards pursuant to the Clean Air Act, to the extent that activities authorized under this act significantly affect the air quality of any State."

The role of the Secretary is only to insure that exploration plans and development and production plans provide for compliance with all statutory requirements of the Clean Air Act, and regulations promulgated pursuant to it.

The regulations of the Secretary of the Interior are in addition to the requirements under the Clean Air Act. They supplement the Clean Air Act; they are not a substitute for the Clean Air Act.

Such provisions for compliance with the Clean Air Act are required in the plans whenever OCS activities may have a significant effect on an adjacent State's air quality, whether it is better or worse, than the ambient air quality standards. The determination of significant air quality effect will be made by the Environmental Protection Agency to fulfill its mandatory responsibility under the Clean Air Act. The Secretary will then carry out his duties under the Outer Continental Shelf Act based on EPA's air quality evaluation of proposed OCS activities.

The Secretary's role is primarily in the nature of a procedural safeguard, not one of promulgating substantive clean air regulations or one of enforcement of the Clean Air Act. The Administrator of EPA retains responsibility for implementing the clean air law. Even if the Secretary fails to exercise his responsibility under the Outer Continental Shelf Act, the applicability and enforceability of the Clean Air Act is not affected.

I would like to direct an inquiry to the distinguished chairman of the Energy Committee (Mr. JACKSON): Would the Senator describe the role of the Secretary as a supplemental one, to assure that provision is made for compliance with clean air requirements?

Mr. JACKSON. Yes, the language of the Outer Continental Shelf Act is not intended to affect the present applicability of the Clean Air Act to OCS activities, or the primary responsibility of the EPA Administrator to enforce such requirements. The Secretary is expected to consult closely with EPA and to rely on its technical expertise when incorporating clean air requirements into exploration plans and development and production plans and when analyzing the air pollution impact of OCS activities.●

● Mr. HOLLINGS. Mr. President, I would like to speak to the conference report on S. 9, the Outer Continental Shelf Lands Act Amendments.

Praise certainly is in order for the tremendous efforts of the Committee on Energy and Natural Resources, the House OCS Committee, and their respective chairmen, Senator JACKSON and Congressman MURPHY. The time and energy devoted to producing this compromise stretches over several years. The chairmen and their committees deserve recognition for coming out with this hard-fought compromise.

Today I would like to speak to one particular part of the conference report on S. 9, the amendments to the Coastal Zone Management Act of 1972, as amended; for here we have an unusual situation which bears complete explanation for the record.

This conference report contains amendments to the Coastal Zone Management Act of 1972. As such, it includes matters which are within the exclusive jurisdiction of the Senate Committee on Commerce, Science, and Transportation under rule XXV of the standing rules of the Senate. The Committee on Energy and Natural Resources has no claim whatsoever to that jurisdiction, and this is readily conceded by that committee.

The Energy Committee took up these amendments to the Coastal Zone Management Act within the context of the OCS amendments solely with the permission of, and on the basis of an agreement with, the Commerce Committee. The agreement, which is part of the record for July 14, 1977, is basically this. My colleague from Louisiana, Senator JOHNSTON, had an interest in amending the formula grant segment of the coastal energy impact fund. The amendments were ones in which the Commerce Committee could concur substantively. Therefore, in the interests of expediting the OCS amendments as well as the amendment of the Coastal Zone Management Act, the Commerce Committee agreed to permit the Energy and Natural Resources Committee to take up the amendments in this manner, rather than request referral. Furthermore, the agreement laid to rest any further disagreement between my colleague from Louisiana and myself over what the formula grants were or were not originally intended to do.

Everyone has proceeded with this understanding in good faith. The Senate version of the OCS Lands Act amendments passed the Senate with commensurate action on the House side; a conference was held and we now have before us the conference report.

Now that we are voting on the conference report, the agreement for handling the coastal zone amendments in this manner has reached its natural conclusion, and any consideration of the Coastal Zone Management Act of 1972, as amended, reverts exclusively to the Committee on Commerce, Science, and Transportation as laid out in the Senate Rules.

Relations between our two committees have been very fine for some years now, and I certainly want to see that continue. And while I may seem to be stressing this jurisdictional matter unnecessarily, I and my colleagues on the Commerce Committee would rather see this matter settled clearly so that there is no room for misunderstanding. Too many times we see in the Senate the confusion and bad feelings that can be caused over jurisdictional issues, and I for one do not want that to be the case between these two committees.

On the issue of the handling of the coastal zone amendments in the OCS bill, the chairman of the Energy and Natural Resources Committee, Senator JACKSON, worked in good faith with us and did what he could to try and keep the spending down in the amendments. I certainly have no complaints here. On the contrary, Senator JACKSON was in a difficult position and made a point of consulting with me frequently. I do not by this mean to say that I am in total agreement with all the changes that were ultimately made, but Senator JACKSON was a man of his word. He and his colleagues, balancing the need to complete this legislation after years of effort, made the compromises that they believed were necessary to get the job done. I want to recognize Senator JACKSON'S efforts in this regard, as well as those of Senator JOHNSTON.

I have with me a copy of the agreement reached here on the floor last year, and I ask that it be printed in the RECORD.

The agreement follows:

Mr. President, the amendment is the culmination of a lot of work in consultation with members of the Committee on Commerce, with members of the States that are affected by the offshore drilling and prospective offshore drilling.

I yield to my distinguished friend from Washington.

Mr. MAGNUSON. Of course, the Senator from Louisiana, I want the record to show, realizes that this is a matter which is in the clear jurisdiction of the Committee on Commerce.

Mr. JOHNSTON. Yes, Mr. President.

Mr. MAGNUSON. And I joined with him in the amendment because I do think that if it had been sent to the Commerce Commit-

tee, they would have approved the modified amendment and passed it right back.

Senator HOLLINGS, myself, and others, have agreed to it to save time. But I want the record to show that this is establishing absolutely no precedent at all on the jurisdiction of the Commerce Committee on coastal zone management matters. Under the reorganization of the Senate, we have clear jurisdiction and I am sure the Senator from Louisiana realizes that.

Mr. JOHNSTON. Mr. President, the Senator from Washington is correct. It has clear jurisdiction over that act. The Energy Committee makes no claim on that jurisdiction.

What this amendment represents is the culmination of about 3 years of negotiations on this particular amendment, which will now be culminated and consummated and we will make no further claim on the coastal zone management bill.

Mr. MAGNUSON. I want the record also to show, if the Senator will yield, that there was some suggestion made by the Senator from Louisiana to me and others that 2 years ago we made some kind of agreement on this type of amendment, as to jurisdiction.

I do not quite recall what we did. I recall the Senator from Louisiana was quite provoked at one time that we could not get an agreement.

But since that time, we have had a reorganization, regardless of this, and, clearly, we have had an awful fight to keep coastal zone management in the proper committee. We held hearings on it, worked on it for years. Now it is clearly there.

I am glad to join with the Senator in this matter to expedite what I think will be a good amendment.

I wish the Senator would yield also to my colleague from South Carolina.

Mr. JOHNSTON. Yes.

Mr. HOLLINGS. I thank the distinguished chairman, the Senator from Washington, and my colleague, the Senator from Louisiana.

Actually, the Senator from Louisiana and I sat in conference together when we were marking up that impact fund. I chaired that conference and I understood the misgiving that the Senator from Louisiana had because, in a sense, we had temporary agreement at one time—generally speaking, this same kind of approach that the Senator now submits in the form of his amendment. At no time was there any question about the jurisdiction.

I am glad we can accommodate our distinguished friend from Louisiana who has led the way, along with the Senator from Alaska and myself and the Senator from Washington, on the institution of the coastal energy impact fund.

Mr. President, I join the chairman of the Committee on Commerce, Science, and Transportation, Senator MAGNUSON, in cosponsoring the amendment offered by the distinguished junior Senator from Louisiana.

Although this amendment, by directly affecting the Coastal Zone Management Act of 1972, clearly falls within the jurisdiction of the Commerce Committee alone, the committee has agreed to make an exception in this one case, in order to address some of the problems being encountered in coastal States experiencing impacts from Outer Continental Shelf oil and gas activity. I am pleased to join in this agreement to enable the coastal zone management program to be more responsive to needs growing from OCS activity in our fragile and invaluable coastal areas. As I understand it, this amendment will enable coastal States, through the coastal zone management program, to deal with impacts from both frontier areas that will be leased and coming into production, as well as some of the problems already existing from current OCS activity. I feel that this is a sound compromise, and I fully endorse it.

Mr. JOHNSTON. Mr. President, I thank the Senator from Washington and the Senator from South Carolina, along with the distinguished chairman of my committee, for the many hours of work in helping us get this worked out so amicably and so helpfully.

Mr. MAGNUSON. Mr. President, the bill now before the Senate, S. 9—the Outer Continental Shelf Lands Act Amendments of 1977—contains matters which are within the exclusive jurisdiction of the Senate Committee on Commerce under the new jurisdictional rules recently adopted by the Senate. Section 506 of that bill contains an amendment to the Coastal Zone Management Act of 1972, as amended. That legislation is solely within the jurisdiction of the Committee on Commerce under rule XXV of the standing rules of the Senate, as recently amended. The Committee on Energy and Natural Resources has no claim whatsoever to that jurisdiction.

While members of the Energy Committee concede this jurisdiction, they desire this amendment without action in the Committee on Commerce. I consider this process highly unusual, particularly since it does not provide our committee with an ability to examine thoroughly this amendment or the substitute which Senator JOHNSTON now desires to offer.

But in the spirit of compromise I am willing to lay aside the jurisdiction issue if Senator JOHNSTON changes his amendment such that no coastal State is harmed in his attempt to aid his State of Louisiana. As shown to me, his original substitute amendment would have deprived certain west coast States of impact aid which they would receive under the present terms of the coastal energy impact program. This is the very reason I raised the jurisdictional issue. I have asked him to change his substitute amendment to insure that other States are not harmed.

Under his original proposal, the funding authorization for formula grants under the Coastal Energy Impact Program (CEIP) would be changed from an 8-year, $50 million per year level to a 4-year, $100 million per year level. This creates great uncertainty for those States which are on the far end of the Outer Continental Shelf leasing program, namely the west coast States. Under this proposal, my own State of Washington would lose in excess of $2 million.

I propose to continue the 8-year authorization, but to raise it to $75 million per year. This seems to be far more equitable to all States.

Coastal States will have to show actual need for these funds before they can qualify and appropriations for the CEIP must be approved by Congress. So this is not an unreasonable proposal.

The other parts of Senator JOHNSTON's amendment have, I understand, the blessing of the administration. Since the Commerce Committee has not had time to analyze the ramifications of the changes to section 308(b)(4), the committee reserves the right to reexamine these changes if we feel it is necessary.●

Mr. JACKSON. Mr. President, I am prepared to yield back the remainder of my time.

Mr. HANSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. JACKSON. I yield such time as he may need to the Senator from Alaska.

Mr. STEVENS. I shall not delay the Senate, Mr. President, except to say that 70 percent of this land is off my State, and I find very interesting the distinctions that are made in terms of the treatment of this oil as compared to the oil that is produced on the North Slope of Alaska.

For instance, the fee to create a compensation fund that is established under this conference report is 3 cents a barrel. When the Alaska oil pipeline compensation fund was determined the fee per barrel for that compensation fund was 5 cents a barrel.

I also find the amendment that we placed in the bill at the time it passed the Senate which would have separated exploration and development so that we could have cited specific determinations of the effect of offshore development in the highly productive fishery zone off my State has been deleted.

For these reasons, therefore, I shall oppose the bill and join the Senator from Oklahoma in voting against it.

SEVERAL SENATORS. Vote! Vote!

Mr. JACKSON. Did the Senator want the yeas and nays?

Mr. BARTLETT. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is all time yielded back? All time having been yielded back, the question is on agreeing to the conference report. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. Mr. President, this is the last rollcall vote today.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Colorado (Mr. HART), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Nebraska (Mr. CURTIS), the Senator from Arizona (Mr. GOLDWATER), the Senator from Nevada (Mr. LAXALT), the Senator from Kansas (Mr. PEARSON), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

The result was announced—yeas 82, nays 7, as follows:

[Rollcall Vote No. 351 Leg.]

YEAS—82

Allen	Griffin	Morgan
Baker	Hansen	Moynihan
Bayh	Haskell	Muskie
Bentsen	Hatfield, Mark O.	Nelson
Biden	Hatfield, Paul G.	Nunn
Brooke	Hathaway	Packwood
Bumpers	Hayakawa	Pell
Burdick	Heinz	Percy
Byrd, Harry F., Jr.	Helms	Proxmire
Byrd, Robert C.	Hodges	Randolph
Cannon	Hollings	Ribicoff
Case	Huddleston	Riegle
Chafee	Humphrey	Roth
Chiles	Inouye	Sarbanes
Church	Jackson	Sasser
Clark	Javits	Schweiker
Cranston	Kennedy	Scott
Culver	Leahy	Sparkman
Danforth	Lugar	Stafford
DeConcini	Magnuson	Stennis
Dole	Mathias	Stevenson
Domenici	Matsunaga	Stone
Durkin	McClure	Thurmond
Eagleton	McGovern	Wallop
Ford	McIntyre	Weicker
Garn	Melcher	Williams
Glenn	Metzenbaum	Zorinsky
Gravel		

NAYS—7

Bartlett	Long	Tower
Bellmon	Schmitt	
Hatch	Stevens	

NOT VOTING—11

Abourezk	Goldwater	Pearson
Anderson	Hart	Talmadge
Curtis	Johnston	Young
Eastland	Laxalt	

So the conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. JACKSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Washington.

Mr. JACKSON. Mr. President, I want to express my appreciation to our staff for their outstanding contribution in making this first legislation since 1953 affecting the Outer Continental Shelf.

Mike Harvey, general counsel of the committee, is the individual who is, indeed, knowledgeable in this field affecting the Outer Continental Shelf public land law. I must say, and I know that members of the staff and members of the committee will agree, that his knowledge in this field is encyclopedic.

I must point out that his wise counsel and help made possible, really, after all of the efforts that had been made to no avail in the past, the updating of the law affecting the Outer Continental Shelf.

He has been ably assisted on our side by associate counsel, R. D. Folsom, who worked long and hard.

I want to point out that Dave Swanson, on the minority side, worked as a part of the team. I want to say to my colleagues that this matter from a professional standpoint could not have been handled better. There has not been any partisanship in terms of doing the professional work of the committee. I commend Dave Swanson and my distinguished colleague and ranking member on the minority side, the able Senator from Wyoming (Mr. HANSEN).

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. HANSEN. Mr. President, let me express my appreciation and gratitude to the chairman of the Energy and Natural Resources Committee (Mr. JACKSON) and to the staff, as he has already done. I join with him in saying we have seen a very professional job performed by the staff. I certainly echo the laudatory things he said about all members. I want to particularly note the contribution made by the minority staff, Mr. Swanson, whose knowledge and expertise I believe has been invaluable as a complementing force to that provided by the majority side.

I would like to say that I had the feeling that this bill was unnecesary in the first place, but, nevertheless, it is the will of the Congress that we have a new bill. I think everything considered, we can be proud of the job that has been done in drafting the OCS bill, which has gone to conference and which the Senate has now approved.

The PRESIDING OFFICER. The Senator from West Virginia.

EDUCATION AMENDMENTS OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar Order No. 787, S. 1753.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1753) to extend the Elementary and Secondary Education Act of 1965, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Human Resources with an amendment in the nature of a substitute.

Mr. PERCY. Mr. President, I ask unanimous consent that Lucinda Oliver and Barbara Block of my staff be granted the privilege of the floor during debate and votes on S. 2570, the Comprehensive Employment and Training Act Amendments of 1978.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond 30 minutes, with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session, the Presiding Officer laid before the Senate a message from the President of the United States submitting the nomination of William H. Luers, of Illinois, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Venezuela; to the Committee on Foreign Relations.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CHILES, from the Committee on Governmental Affairs, without amendment:

S. 3259. A bill to authorize the permanent establishment of a system of Federal Information Centers (Rept. No. 95–1129).

By Mr. ABOUREZK, from the Select Committee on Indian Affairs, without amendment:

S. Res. 544. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to consideration of H.R. 11092, a bill to amend the act of December 22, 1974 (88 Stat. 1712) relating to the Navajo and Hopi Indian Relocation Commission. Referred to the Committee on the Budget.

S. 3184. A bill to designate the Indian Health Facility in Ada, Okla., the "Carl Albert Indian Health Facility" (Rept. No. 95–1130).

By Mr. ABOUREZK, from the Select Committee on Indian Affairs, with an amendment:

S. 2358. A bill to declare that the United States holds in trust for the Pueblo of Zia certain public domain lands (Rept. No. 95-1131).

By Mr. ABOUREZK, from the Select Committee on Indian Affairs, with amendments:

S. 2588. A bill to declare that the United States holds in trust for the Pueblo of Santa Ana certain public domain lands (Rept. No. 95–1132).

By Mr. ABOUREZK, from the Select Committee on Indian Affairs, without amendment:

H.R. 8397. An act to provide that a certain tract of land in Pinal County, Ariz., held in trust by the United States for the Papago Indian Tribe, be declared a part of the Papago Indian Reservation (Rept. No. 95–1133).

By Mr. NUNN, from the Committee on Armed Services, without amendment:

H.R. 3532. An act to amend chaper 639 of title 10, United States Code, to enable the Secretary of the Navy to change the name of a publication of the Naval Observatory providing data for navigators and astronomers (Rept. No. 95–1134).

H.R. 7161. An act to amend title 10, United States Code, to allow nationals, as well as citizens, of the United States to participate in the Junior Reserve Officers' Training Corps program (Rept. No. 95–1135).

H.R. 8471. An act to authorize the Governor of the State of Wyoming to exhibit the nameplate, ship's bell, and silver service of the U.S. ship *Wyoming* without restriction as to the place of such exhibition (Rept. No. 95–1136).

By Mr. NUNN, from the Committee on Armed Services, with amendments and an amendment to the title:

S. 3373. A bill to amend title 10, United States Code, to authorize the Secretary of Defense to provide transportation to the Girl Scouts of the United States of America in connection with international world, friendship events or troops on foreign soil meetings, and for other purposes (Rept. No. 95–1137).

By Mr. NUNN, from the Committee on Armed Services, with an amendment:

H.R. 3702. An act to amend title 10, United States Code, to make certain changes in the Retired Serviceman's Family Protection Plan and the Survivor Benefit Plan as authorized by chapter 73 of that title, and for other purposes (Rept. No. 95–1138).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Mary S. Olmsted, of Tennessee, now Ambassador Extraordinary and Plenipotentiary of the United States to Papua New Guinea, to serve concurrently as Ambassador Extraordinary and Plenipotentiary of the United States to Solomn Islands.

(The above nomination from the Committee on Foreign Relations was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

POLITICAL CONTRIBUTIONS STATEMENT

Nominee: Mary S. Olmsted.
Post: Honiara, Solomon Islands.

Contribution, amount, date, and donee:
1. Self: None.
2. Spouse: (No spouse).
3. Children (No children).
4. Parents: Mr. and Mrs. George C. (Zadia S.) Olmsted (Deceased more than four year).
5. Grandparents: Mr. and Mrs. Henry T. (Mary S.) Olmsted (Deceased more than four years). Mr. and Mrs. John A. (Sarah R.) McDonald (Deceased more than four years).
6. Brothers and spouses: Mr. and Mrs. John M. (Loretta S.) Olmsted. None.
7. Sisters and spouses (no sisters).

By Mr. SPARKMAN, from the Committee on Foreign Relations:

The following-named persons to be representative and alternate representatives of the United States to the 22d Session of the General Conference of the International Atomic Energy Agency:

Dale D. Myers, of Virginia, Representative;

Gerard C. Smith, of the District of Columbia, Alternate Representative; and

Roger Kirk, of the District of Columbia, Alternate Representative.

(The above nominations from the Committee on Foreign Relations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. ROBERT C. BYRD, from the Committee on the Judiciary:

Tyree A. Richburg, of Alabama, to be U.S. marshal for the southern district of Alabama.

(The above nomination from the Committee on the Judiciary was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. NUNN. Mr. President, from the Committee on Armed Services, I report favorably the nominations of Maj. Gen. Howard Mac Lane, U.S. Air Force, to be lieutenant general; and Vice Adm. Harry D. Train II, U.S., Navy, to be admiral; and Adm. Isaac C. Kidd, Jr., U.S. Navy, age 58, for appointment to the grade of admiral on the retired list. I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. In addition, there are 1,325 for promotion in the Regular Army of the United States, to be lieutenant colonel and below, list beginning with Rudolph E. Abbott; and there are 78 for reappointment and appointment in the Regular Army of the United States, in the grade of colonel and below, list begining with Frederick T. Abt; and there are 12 in the Navy, to be permanent and temporary commanders and below, list beginning with Keith E. Burtner. Also, there are 28 chief warrant officers, W–2, in the Navy, for promotion to the grade of chief warrant officer, W–2, list beginning with Denis R. Boudreau; and there are 448 in the Navy and Naval Reserve, for temporary and permanent promotion to captain and below, list beginning with Leon E. Ackart. Also, there are 2,199 in the Navy for temporary promotion to the grade of lieutenant, junior grade, list beginning with William C. Absher; and there are 14 chief warrant officers, W–1, in the Navy, for temporary promotion to the grade of chief warrant officer, W–2, list beginning with Paul A. Anderson. Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD on July 24 and July 28, 1978, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. MORGAN (for himself, Mr. BAKER, Mr. SASSER, Mr. MAGNUSON, Mr. HODGES, Mr. INOUYE, Mr. PERCY, and Mr. MATHIAS):

S. 3441. A bill to amend the tax laws of the United States to encourage the preservation of independent local newspapers; to the Committee on Finance.

By Mr. BUMPERS (for himself and Mr. HODGES):

S. 3442. A bill to name a certain Federal building in Jonesboro, Arkansas, the "E. C. 'Took' Gathings Building"; to the Committee on Environment and Public Works.

By Mr. ANDERSON:

S. 3443. A bill for the relief of M. Javier Rivera; to the Committee on the Judiciary.

By Mr. MARK O. HATFIELD (for himself, Mr. EASTLAND, Mr. HANSEN, Mr. MCCLURE, Mr. YOUNG, Mr. CURTIS, and Mr. LAXALT):

S. 3444. A bill to repeal the Color of Title Act; to establish standards and procedures whereby certain persons in adverse possession of public lands may acquire legal title thereto; and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. JACKSON:

S. 3445. A bill for the relief of Marian Law Shale Holloway, Adeline Mary Gill Charles, and Eliza Shale Carstens; to the Committee on Energy and Natural Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MORGAN (for himself, Mr. BAKER, Mr. SASSER, Mr. MAGNUSON, Mr. HODGES, Mr. INOUYE, Mr. PERCY, and Mr. MATHIAS):

S. 3441. A bill to amend the tax laws of the United States to encourage the preservation of independent local newspapers; to the Committee on Finance.

(The remarks of Mr. MORGAN when he introduced the bill appear elsewhere in today's proceedings.)

By Mr. BUMPERS (for himself and Mr. HODGES):

S. 3442. A bill to name a certain Federal building in Jonesboro, Arkansas, the "E. C. 'Took' Gathings Building"; to the Committee on Environment and Public Works.

E. C. "TOOK" GATHINGS BUILDING

● Mr. BUMPERS. Mr. President, today I am introducing a bill to name the Federal Building in Jonesboro, Ark., the "E. C. 'Took' Gathings Building." Took Gathings is a member of what I hope is not a vanishing breed—Arkansas public servants who have played a vital role in our Nation's history. He served as First District Representative in the House of Representatives from January 1939 to January 1969. In so doing, he served through five Presidencies and three wars.

As ranking member of the House Agriculture Committee, he was in a position to look after the interests of Arkansas farmers, a task he performed well. At a time when cotton was Arkansas' most important crop, he chaired the Cotton Subcommittee. Not content to remain in Washington, Took traveled across the country and was an effective spokesman for cotton.

He was born on November 3, 1903, in Prairie, Miss., and attended public schools in Arkansas. After receiving his law degree from the University of Arkansas at Fayetteville, he was admitted to the Arkansas Bar and practiced law. In 1935 he was elected to the Arkansas State Senate. Only 4 years later the people of Arkansas sent him to Congress.

After his retirement from the House, he and Tolise, his wife, moved back to West Memphis, Ark., where he set up a law practice. Mr. President, Took is still going strong. It is only fitting that a facility providing Federal services should be named after him. I urge expeditious action by the Senate.●

By Mr. MARK O. HATFIELD (for himself, Mr. EASTLAND, Mr. HANSEN, Mr. MCCLURE, Mr. YOUNG, Mr. CURTIS, and Mr. LAXALT):

S. 3444. A bill to repeal the Color of Title Act; to establish standards and procedures whereby certain persons in adverse possession of public lands may acquire legal title thereto; and for other purposes; to the Committee on Energy and Natural Resources.

● Mr. MARK O. HATFIELD. Mr. President, today I am introducing legislation aimed at providing relief for unsuspecting landowners who find themselves in conflict with the Federal Government over property resurveys. Each year, when Government land is resurveyed, many people run the risk of unexpectedly being labeled as trespassers, with no means to refute the charge. My proposal is aimed at resolving the inequities which have fallen upon these landowners.

Although this is a problem felt by the Congress, the courts and Federal agencies, its most basic impact is the personal suffering of an unintentional trespasser. When a dispute with the Federal Government arises, these people face difficult and sometimes heartbreaking problems under current law.

As an example, I would like to share with my colleagues the problems faced by Mr. and Mrs. Noel McClure of Blue River, Oreg. About 26 years ago, the couple bought their house and a small parcel of land near the Willamette National Forest. Over the next quarter of a cen-

tury, they made a home for themselves there. Adding a carport and machine shed, planting flowers and shrubs, they improved the site and were later joined by their son and his family. After years of working, they decided to retire at this location.

They paid little attention to resurveys of nearby land until a letter from the Forest Service arrived. They were not near the National Forest as they had believed, the Forest Service said, but in it. According to the new surveys, they did not actually own the land they had purchased, improved, and lived on for those 26 years. To make matters worse, the Forest Service now wanted this land back.

About this time, the McClures, as well as several of their neighbors who were faced with the same problems, contacted me. In turn, I asked for a review by the Forest Service and by special permit, renewed annually at a cost to the McClures, the couple will be allowed to remain in their home. But when they move or die, the property will revert to the Government.

For the McClures, this situation is very trying at the least. They cannot will the property to their son, nor can they sell it to him. If they decide to relocate somewhere nearer to medical facilities, they will not have the benefits of a house sale to help with the move. Under the law as it exists today, they are without a home and without a means to clarify their status as landowners.

Mr. President, the roots of the present problem are long and set deep into American history. In the first place, nearly all lands, public and private, in the original 13 States were surveyed by metes and bounds. Under this age-old system, each tract of land was set out by arbitrarily establishing some point in the boundary of the property as a starting point and then reciting the courses (or directions) and distances from point to point around the tract. Surveyors took notes as property was measured, creating land descriptions which are incomprehensible to the layman and useless even to the expert unless tied to the land by some identifiable monument such as a boundary stone, a distinctive tree, or a unique river bend. The surveying tools of the time were highly erratic magnetic compasses and chains and tapes—rarely standardized, stretchable, and subject to wear.

The inadequacies and complexities of the metes and bounds system were recognized even during the colonial period, and this soon led to changes in American survey techniques. In 1785, the Continental Congress designated the rectangular survey as the sole acceptable method of surveying any public lands which might thereafter be acquired. This system prevails even today as the official method of Government survey. Gradually but implacably, a uniform surveyor's grid of 1 mile by 1 mile square with sides running north and south and east and west has been laid out on most of the public lands.

Theoretically, under the rectangular system, any given tract of surveyed land "can readily, easily, and briefly be described and distinguished from all other tracts;" and boundary lines and corners, even if obliterated, can usually be retraced. In actuality, rectangular surveys, like metes and bounds surveys, are often the source of property disputes.

When the use of the rectangular system was instituted, surveying was not as much a science as an art—and it was a young art at that. Surveying tools and techniques were crude and often inaccurate. The same magnetic compass which introduced errors into metes and bounds surveys was used in all early rectangular surveys. The reliable solar compass used by modern surveyors did not even exist at the time much of the public domain was being surveyed.

Fraudulent and slipshod surveying and recording undoubtedly occurred. Field surveyors worked long hours for low wages with crude instruments. They often found themselves knee deep in mud or snow, tortured by flies and mosquitoes, and frightened by the very wilderness they had come to map.

As Vernon Carenstan points out in his book on the history of public lands, "(P)erhaps no one had a right to expect the task (of surveying) to be done well: the remarkable thing was that it was done at all, that the whole machinery did not collapse."

The job of surveying the public lands is yet to be completed. According to the BLM's own statistics, at the close of the 1975 fiscal year, 405,027,320 acres of federally owned property in the United States remained to be surveyed. Of the unsurveyed land, 77 percent, or nearly 314 million acres, lies in Alaska. The remaining acres are located exclusively in 11 Western States.

Arizona has about 11 million acres of public land still unsurveyed; California has 9.2 million acres; Colorado, 3.7 million; Idaho, 8.8 million acres; Montana, 9.0 million acres; Nevada, 19.5 million acres; North Dakota, 4.7 million acres; Oregon, 2.8 million acres; Utah, 8.9 million acres; Washington, 6.3 million acres; and Wyoming, 6.7 million acres. In States like Nevada, where the Government holds 86 percent of all real property, the fact that Federal surveys are unfinished means that much of the land area of the State is unsurveyed.

It is the law that before the United States has conveyed lands, it may make as many surveys of a tract of public lands as it desires and the last accepted survey will control. It is also the law, however, that once property rights are acquired on the faith of a Government survey, that survey, even if erroneous, becomes controlling.

By statute, property rights once vested in bona fide private owners and claimants cannot be affected by subsequent resurveys which change the boundaries of the public lands. The essential rule of a resurvey, is, therefore, to follow the steps of the first survey. The clear duty of the retracting surveyor is to determine what the first surveyor did, not what he should have done.

Because of the complex detective work a surveyor must perform in order to reestablish lost boundary lines, the task of resurveying the public lands is not likely to be accomplished quickly.

Because many original surveys were not properly or uniformly conducted, recreating them may not always be possible, regardless of the diligence of BLM surveyors. The Government and private landowners are certain to disagree in some instances on just where a boundary originally lay. Because of this, resurveys can beexpected to create nearly as many problems as they solve.

Due to the expanse of public land across the country, many honest disputes can develop between the Government and private citizens. Although the exact size of the unintentional trespass problem is difficult to judge, one observer, commenting on the findings of the Public Land Law Review Commission, termed it not severe, but substantial nonetheless.

For anyone who has paid full value for land they thought was theirs, made valuable improvements, mortgaged it, met tax assessments against it and become emotionally attached to it, the problem can only be termed harsh.

To remedy this situation, the bill I am proposing would go beyond the sharply limited relief currently available to a narrowly defined group of people. In place of existing law, I am proposing a procedure which would allow innocent trespassers enough aid to resolve their disputes with the Federal Government.

In general terms, this legislation would provide that:

First. Claimants who meet the requirements for color of title do not have to purchase the land from the Government as currently required under law.

Second. Claimants must have held the land in good faith and in peaceful adverse possession for at least 20 years while making valuable improvements on the land. In the absence of work on valuable improvements, the land would have to be held for at least 30 years.

Third. The Secretary is not always required to transfer a specific portion of land if it is needed by the Government for other purposes.

Fourth. All mineral rights are reserved to the United States.

Fifth. The actions of the Secretary are expressly made subject to judicial review.

Congressional interest in balancing public and private interests has been a recurrent theme in public land policy over the years, and I believe my proposal closely follows this tradition. Land, after all, is one of our most important material resources, whether private or public. Central to this legislation is the fundamental belief that both public and private interests need to be protected.

Obviously, the bill is aimed at providing a large measure of help for private parties. At the same time, it was carefully drafted to incorporate important safeguards for public domain. By reserving all mineral rights, the possibility of using the provisions for land speculation are greatly reduced. Yet another impor-

tant protective measure is available to the Secretary in cases where public land must be retained. Under those circumstances, the Secretary has the authority to keep the land and offer the claimant a comparable piece of property or a cash payment equal to the value of the property plus improvements.

Mr. President, existing laws also carry the same safeguards for the public incorporated in my proposal, but there are district limits on the aid available to unintentional trespassers. The Quiet Title Act of 1972, while a very important statute for many, does not help those people who technically do not have good title because of surveying errors discovered in recent resurveys. Another useful statute, the Color of Title Act, does provide some relief of victims of surveying errors, but again its aid is limited.

Based on review of these laws and a recognition of the real problems encountered by innocent landowners who run afoul of Government resurveys, I believe the legislation I am proposing today represents an important tool in reestablishing equity to such situations. We should not underestimate the magnitude of the problem we are addressing here. Public land accounts for over one-third of our total land surface, encompassing large areas in both the Eastern and Western reaches of the Nation. In order to insure that we remedy the problems confronting many private landowners, I hope that this legislation will serve as a starting point for Senate action.

Mr. President, I would like to make one final point concerning my proposal. When survey problems for several families in the community of Blue River first became apparent, students and faculty at the University of Oregon law school were quick to respond to my request for help in researching the situation. One student in the Environmental Law Clinic, Mary Fiebing, played a crucial role in writing this legislation. Her thorough background studies and careful drafting of the bill were immense aids to me. It does no good to talk about the difficulties facing many landowners following resurveys when Federal law lacks the necessary tools to be of assistance. Ms. Fiebing helped focus attention on the problem and then helped immensely in working out possible solutions. And I want to again thank her for the time and effort.

So that my colleagues may review this proposal in detail I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3444

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That as used in this Act, the term—

(1) "Secretary" means the Secretary of the Interior;

(2) "qualified person" means—

(A) any individual who is authorized to hold title in the State in which the property is located.

(B) any partnership or association, each of the members of which is within the purview of clause (A) of this paragraph; or

(C) any corporation organized under the laws of the United States or of any State thereof, and authorized to hold title to real property in the State in which the property is located;

(A) land owned by the United States, including land permanently or temporarily withdrawn, withheld or reserved from private appropriation and disposal, as well as land available for private appropriation and disposal, but excluding land dedicated to Indian reservations;

(B) any interest of the United States in land, other than a security interest or water right;

(4) "color of title" means a written instrument which gives the semblance or appearance of title but is not title in fact;

(5) "good faith" means a good faith at the time of acquisition of color of title.

PETITIONS FOR GRANT OF PATENT

SEC. 2. (a)(1) Any qualified person who believes he has a valid claim under color of title to an interest in public land, and meets the standards as provided in Section 2(b) of this Act, may file a petition for a patent thereto with the Secretary.

(1) Application under this Act may be made for government-surveyed land. If unsurveyed, the petition shall include a description sufficiently complete to identify the location, boundary, and area of the land, and, if possible, the approximate description or location of the land by section township and range. If unsurveyed land is claimed, final action will be suspended until the plat of survey has been officially filed.

(3) Each petition shall include information relating to all record and nonrecord conveyances, and to all nonrecord claims of title affecting the land. The statements of record conveyances must be certified by the proper county official or supported by an abstract of title. The petitioner may be called upon to submit documentary or other evidence relating to conveyances or claims.

(b) A patent shall be granted to a tract, a portion of a tract, or an interest in a tract claimed if the petitioner, his ancestors, or grantors have held said tract in good faith and in peaceful adverse possession under color of title for at least twenty (20) years and have made valuable improvements thereon, or reduced a portion thereof to cultivation. Discovery of a defect in title after acquisition of title, but short of twenty years of adverse possession, shall not defeat a petition for grant of patent under this Act.

(c)(1) Within a reasonable time after receipt of a petition for grant of patent, the Secretary shall determine the sufficiency of the petition and any supporting documentary evidence. If the Secretary determines that the petition and any supporting evidence is insufficient, and adjudicatory hearing shall be held regarding the claim according to appropriate procedures set forth in Sections 554, 556, and 557 of Title 5, United States Code.

(2) If the Secretary determines the petition is sufficient, initially or upon completion of a hearing held pursuant to subsection (c)(1) above, he shall issue a patent for the interest claimed, up to and including a fee simple, in an area of public land not to exceed fifty (50) acres upon the payment of not more than $1.25 per acre.

(3) If the tract claimed is in excess of 50 acres, the Secretary may:

(A) determine which particular portion of the land, not exceeding 50 acres, shall be patented, based on existing improvements and public need for the land, or

(B) in his discretion, issue grants in excess of 50 acres upon a finding that such excess acreage is not needed for public purposes and will be put to active use by the petitioner. This grant shall be made available upon payment of $1.25 per acre.

(4) Where land claimed under this Act has been withdrawn, withheld, or reserved in aid of a function of a Federal department or agency other than the Department of the Interior, or of a State, county, municipality, water district, or other local governmental subdivision or agency, the Secretary may issue a patent thereto only with the consent of the head of the governmental unit concerned and under such terms and conditions as such unit head may deem necessary.

(5) If the Secretary determines that a petition is sufficient but (A) the consent required by subsection (c)(4) above is not given or terms and conditions imposed on such consent are unacceptable to the petitioner, or (B) the particular land claimed is needed for public purposes, the Secretary shall either issue the petitioner a patent for a comparable tract of Federal land upon payment by the petitioner of $1.25 per acre, or pay the petitioner the fair market value of the land or interest in land claimed, including any improvements placed upon such land by the petitioner, his ancestors or grantors. A petitioner who qualifies for a patent under this Act, but is denied title to the particular tract claimed under this subsection, shall have the option of electing monetary compensation over a patent to substitute land.

(6) If a petitioner is to be given monetary compensation for lands claimed, improvements thereon, or both, as allowed under this subsection, the Secretary shall cause the land or improvements, or both, to be appraised, said appraisal to be on the basis of the value of the and or improvements, or both, exclusive of mineral interests, at the time of such appraisal.

(7) No patent for substitute land and no monetary compensation shall be granted until arrangements satisfactory to the Secretary have been made for termination of the petitioner's occupancy of the land claimed.

(8) The mineral interests of the United States in any land to which patent is issued under this Act shall be reserved to the United States, and shall be subject to sale, lease, and disposal under applicable leasing and mineral land laws. No right of surface ingress or egress is reserved to the United States.

CONFLICTING CLAIMS

SEC. 3. No patent shall issue under this Act for any tract to which there is a conflicting claim adverse to that of the petitioner, unless and until such claim shall have been finally adjudicated in favor of such petitioner.

JUDICIAL REVIEW

SEC. 4. Any final action of the Secretary under this Act, including appraisals under Section 2(c)(7), shall be subject to judicial review by the United States court of appeals for the circuit in which the property claimed is located upon the filing in such court within 60 days from the date of such action of a petition by any aggrieved person. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary or other officer designated by him for that purpose. Upon the filing of the petition, the court shall have jurisdiction to review the action in accordance with Chapter 7 of Title 5 of the United States Code and to grant appropriate relief as provided in such chapter.

RULES AND REGULATIONS

SEC. 5. The Secretary is hereby authorized to make such rules and regulations as are necessary to carry out the provisions of this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 6. There are hereby authorized to be appropriated such sums as may be necessary to implement the provisions of this Act.

COLOR OF TITLE ACT

SEC. 7. The provisions of this Act are intended to be supplemental to, an not intended to supersede or replace, the provisions of the Color of Title Act (43 U.S.C. 1068 et seq.).

By Mr. JACKSON:

S. 3445. A bill for the relief of Marian Law Shale Holloway, Adeline Mary Gill Charles, and Eliza Shale Carstens; to the Committee on Energy and Natural Resources.

● Mr. JACKSON. Mr. President, the bill I am introducing today for the relief of Marian Law Shale Holloway, Adeline Mary Gill Charles and Eliza Shale Carstens, corrects a mistake made by the Bureau of Indian Affairs in erroneously approving a purported sale of property.

The individuals, or their estates, who are named in this relief bill, would be compensated by approximately $14,000 as a result of this erroneous conveyance. I ask unanimous consent that a letter from the Department of the Interior explaining this situation be printed in the RECORD.

I urge my colleagues to support this bill.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., August 10, 1976.

Hon. HENRY M. JACKSON,
Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Your Committee has requested the views of this Department on S. 3537,, a bill "For the relief of Marian Law Shale Holloway, Adeline Mary Gill Charles and Eliza Shale Carstens."

We recommend that the bill be enacted.

S. 3537 would authorize and direct the Secretary of the Interior to pay, out of any money appropriated to the Department of the Interior, to Marian Law Shale Holloway, Adeline Mary Gill Charles, and Eliza Shale Carstens (or to their estates) such sums as he determines each is legally and equitably entitled to as compensation for losses (including reasonable attorney fees) resulting from his "erroneous approval of purported conveyances" of some 18.75 acres of trust land located on the Quinault Indian Reservation in Washington and more specifically described in the bill. Section 2 would provide a standard prohibition against the payment of more than ten percent of the funds appropriated for said payments for the services of any agent or attorney in connection with this claim.

The trust land in question was validly conveyed in 1931 by Harry Shale to his wife, Eliza Shale. In 1951, Bureau of Indian Affairs officials, acting on behalf of the United States and the Secretary of the Interior, inadvertently and erroneously approved a purported sale of the same trust land from Harry Shale to the United States in trust for Marian Law Shale Holloway. Ms. Holloway, who is a Quinault Indian, paid $5,000 for the land from funds held in trust for her by the Bureau of Indian Affairs on behalf of the United States and the Secretary of the Interior.

In 1953 and 1955, the Bureau of Indian Affairs inadvertently and erroneously approved purported sales by Ms. Holloway of two two-acre portions of the land involved in the purported 1951 sale for which she received a total of $2,400. The purchasers in these purported sales were also Quinault Indians who utilized trust funds in their purchases.

The mistake of the 1951 approval was not discovered until 1968, some twelve years after the death of Harry Shale. Mr. Shale's estate has been probated and proceeds distributed so that no recourse is available against him or his estate for his purported sale of the land in 1951 which he had previously sold in 1931 to his then wife, Eliza Shale.

As indicated below, we believe that the United States owed Ms. Holloway and the 1953 and 1955 Quinault purchasers the duty of assuring that they would obtain clear titles prior to approving the purchases and sales of the restricted land involved and prior to approving the related expenditures of trust funds. Under the provision set out in 25 U.S.C. 379, such purchases and sales require the approval of the Secretary of the Interior (or his delegate) who has set up a procedure by which such sales can be made (25 CFR 121.22 to 121.31).

Pursuant to the statutory provision set out in 25 U.S.C. 5, the Secretary has established a system to maintain land records and title documents (25 CFR 120.1). These land records are maintained by the Secretary on behalf of the United States and are the only title records of Indian land. As such, they are relied upon by Indian people and by all persons who have transactions with Indians related to trust lands.

We do not mean to imply that a duty to maintain these land records is owed by the United States to everyone who deals with Indian people. However, it is inescapable that the United States, acting through the Secretary of the Interior and his delegates, has an obligation to maintain these records as part of its trust responsibilities in approving sales of trust land and in approving the expenditure of trust funds for such land. We believe that this trust responsibiltiy was breached by approval of the deeds and sales of restricted land in each of the three purported sales (1951, 1953, and 1955) and by the approval of the expenditures of trust funds in connection with each such sale.

Any right of action relating to those purported sales, Ms. Holloway or the 1953 and 1955 purchasers may have had to sue the United States is apparently now barred by the statute of limitations (25 U.S.C. sec. 2401 and sec. 2501). However, we understand that a suit (*Holloway* v. *United States*—USDC, W.D. Wash.—Civil No. 40–7167) is being held in abeyance to give the plaintiff the opportunity to appeal to the Congress for relief.

We believe that the erroneous approval by the Bureau of Indian Affairs (on behalf of the United States) of the purported 1951 sale to Ms. Holloway and the related expenditures of her trust funds justifies the United States providing compensation. Similarly, the erroneous approvals of the purported 1953 and 1955 sales and the related expenditures of the purchasers' of trust funds, justifies the United States providing compensation to those purchasers. Ms. Holloway's losses were lessened by the 1953 and 1955 sales and her compensation should be adjusted accordingly. Therefore, compensating the 1953 and 1955 purchasers would not increase the total compensation paid by the United States.

The amount of compensation due Ms. Holloway would be the sum of (1) the $5,000 she paid for the land in 1951 plus interest compounded at the interest rates and intervals which would have applied if the funds had stayed in trust until the purported 1953 sale, plus (2) the interest calculated on the balance of such trust fund at the time of the purported 1953 sales less the $2,000 received by Ms. Holloway at that time with such interest compounded at the rates and intervals which would have applied if the funds had stayed in trust until the purported 1955 sale, plus (3) the interest calculated on the balance of such trust fund at the time of the purported 1955 sale less the $400 received by Ms. Holloway at that time with such interest compounded at the rates and intervals which would have applied if the funds had stayed in trust until the date the compensation is paid by the United States to Ms. Holloway. In addition, S. 3537 would allow her to receive compensation for reasonable attorney fees which she has incurred as the result of the erroneous approval by the Secretary.

The purported 1953 sale was to Adeline Mary Gill Charles (Quinault Allottee No. 1094) and the purported 1955 sale was to Eliza Shale Carstens (Quinault Allottee No. 918). The amount of compensation to be paid to each of these persons would be calculated in the same manner as described above for Ms. Holloway.

If the payments are calculated as set out above and are paid this calendar year, we estimate the total to be about $14,000.

It should be noted that Eliza Shale Carstens, the purchaser of the two acres in the purported 1955 sale was also the purchaser (Eliza Shale) of the entire 18.75 acres in the valid 1931 sale. However, we do not feel that this fact alters the justification for compensation to her for her loss of funds due to the Bureau of Indian Affairs approval of both the 1955 sale and the related expenditure of her trust funds.

In line with section 1(b) of S. 3537, the payment to each of the three parties would be in full satisfaction of all claims they may have against the United States in connection with the approvals of the purchases and sales and the expenditures of trust funds and they would be required to execute releases to that effect and such other documents as may be necessary to clear any cloud on the title to the land in question. In addition, the 1953 and 1955 purchasers would be required to execute releases for any claims they may have against Ms. Holloway in connection with the purported 1953 and 1955 sales.

Information available in the Office of the Area Geologist, Menlo Park, California, shows that the acreage in question is located within an area which has been classified valuable prospectively for oil and gas. Exploratory drilling has produced indications of oil and gas but, as yet, no producible quantities have resulted.

The Office of Management and Budget has advised that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely yours,

RONALD G. COLEMAN,
Assistant Secretary of the Interior.●

ADDITIONAL COSPONSORS

S. 2502

At the request of Mr. ABOUREZK, the Senator from North Dakota (Mr. BURDICK) and the Senator from Colorado (Mr. HASKELL) were added as cosponsors of S. 2502, a bill to authorize the States and the Indian tribes to enter into mutual agreements and compacts respecting jurisdiction and governmental operations in Indian country.

SENATE RESOLUTION 519

At the request of Mr. ANDERSON, the Senator from Massachusetts (Mr. BROOKE) was added as a cosponsor of Senate Resolution 519, expressing the sense of the Senate that the 1980 Summer Olympic Games be held at a site outside the Soviet Union.

SENATE RESOLUTION 526

At the request of Mr. DOLE, the Senator from New York (Mr. MOYNIHAN) and the Senator from Florida (Mr. STONE) were added as cosponsors of Senate Resolution 526, commemorating the 10th anniversary of the invasion of Czechoslovakia.

SENATE RESOLUTION 544—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. ABOUREZK, from the Select Committee on Indian Affairs, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 544

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of H.R. 11092, a bill to amend the Act of December 22, 1974 (88 Stat. 1712) relating to the Navajo and Hopi Indians Relocating Commission. This waiver is necessary because the Commission estimates that during fiscal year 1979 it will relocate approximately 500 families of the estimated 1,100 Navajo and Hopi families to be relocated from areas of the joint use area partitioned to the respective Navajo and Hopi Tribes of which the relocatees are not members. H.R. 11092 increases the authorization of appropriations for the operation of the Commission from $500,000 a year to $1 million a year. In anticipation of enactment of H.R. 11092 the House and Senate Committees on Appropriations have reported out appropriations bills which increases the appropriations for the operation of the Commission (by $490,000 and $430,000 respectively) over and above the $500,000 presently authorized by the Act of December 22, 1974. The existing authorization for the Commission's operating expenses is insufficient for the Commission's enormous task in relocating the estimated 500 families and fulfilling their other duties under the law during fiscal year 1979. The increased authorization will enable the Commission to hire the additional personnel needed to adequately carry out their activities.

H.R. 11092 passed the House of Representatives April 11, 1978, however, the Senate Select Committee was not able to take action on the bill until well after May 15, 1978, because of ongoing research and investigation of other issues related to the implementation of the relocation efforts.

AMENDMENTS SUBMITTED FOR PRINTING

COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS—S. 2570

AMENDMENT NO. 3526

(Ordered to be printed and to lie on the table.)

Mr. SCHWEIKER submitted an amendment intended to be proposed by him to S. 2570, a bill to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes.

AMENDMENT NO. 3527

(Ordered to be printed and to lie on the table.)

Mr. BELLMON (for himself, Mr. NELSON, Mr. JAVITS, Mr. MUSKIE, Mr. RIBICOFF, Mr. BAKER, Mr. CHILES, Mr. BARTLETT, Mr. DECONCINI, Mr. DOMENICI, Mr. HATCH, and Mr. DANFORTH) submitted an amendment intended to be proposed by them, jointly, to S. 2570, supra.

● Mr. BELLMON. Mr. President, I submit an amendment to S. 2570 and ask that it be printed. I ask unanimous consent the amendment and a section-by-section description of the amendment be printed in the RECORD.

There being no objection, the amendment and description were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3527

On page 182, line 14, after "rehabilitation" insert a comma and the following: "public assistance".

On page 185, line 9, insert after "shall" a comma and the following: "in coordination with units of general local government,"

On page 189, line 7, after "agencies" insert a comma and the following: "public assistance agencies".

On page 190, line 23, strike out the word "or".

On page 190, line 23, before the period insert a comma and the following: "or are public assistance recipients".

On page 195, lines 3 and 4, after "education" insert a comma and the following: "State and local public assistance agencies".

On page 204, line 5, after "agencies" insert a comma and the following: "public assistance agencies".

On page 206, between lines 14 and 15, insert the following:

"(iii) one representative of the State public assistance agency;

On page 206, line 15, strike out "(iii)" and insert in lieu thereof "(iv)".

On page 206, line 19, strike out "(iv)" and insert in lieu thereof "(v)".

On page 206, line 21, strike out "(v)" and insert in lieu thereof "(vi)".

On page 207, line 18, after "rehabilitation" insert a coma and the following: "public assistance".

On page 218, line 21, before the period insert a comma and the following: "and to eligible persons who are public assistance recipients or who are eligible for public assistance but not receiving such assistance".

On page 243, line 20, strike out "and" the first time it appears.

On page 243, line 21, insert before the semicolon a comma and the following: "and public assistance recipient status".

On page 244, between lines 11 and 12, insert the following: "(6) an estimate of the savings realized in public assistance, food stamps, housing assistance, medical assistance and other programs due to the increased employment of recipients of benefits under those programs as a result of the employment and training services provided under this Act."

On page 260, between lines 19 and 20, insert the following:

"SERVICES FOR PUBLIC ASSISTANCE RECIPIENTS

"SEC. 216. (a) Services for public assistance recipients under this part shall be designed to assist eligible participants in overcoming the particular barriers to employment experienced by such recipients, including lack of basic educational or vocational skills, insufficient preparation for the personal adaptations necessary for labor force participation, inability to find or successfully apply for employment, inability to obtain transportation to employment opportunities, medical problems, inability to obtain satisfactory child care, and lack of appropriate job opportunities.

"(b) The Secretary shall insure that each prime sponsor's plan for serving eligible public assistance recipients under this part includes provisions for—

"(1) coordinating services assisted under this part with other programs assisted under this Act;

"(2) coordinating services assisted under this Act with services provided by State and local public assistance agencies;

"(3) assisting public assistance recipients to develop skills necessary for taking advantage of opportunities to enter or re-enter the labor force, including, but not limited to—

"(A) outreach, assessment and orientation to the local labor market and to occupational and training opportunities available in the community;

"(B) counseling, placement assistance, and job placement;

"(C) technical assistance to employers for establishing flexi-time, child-care, job sharing, and other innovative arrangements suited to public assistance recipients;

"(D) activities to overcome sex and welfare status stereotyping in job placement and development; and

"(E) other activities designed to increase labor force participation rates among eligible participants who are able and willing to work but have been unable to secure employment.

On page 263, delete lines 19 through 23.

On page 263, line 15, strike out "(a)".

On page 388, between lines 12 and 13, insert the following:

"(c) The Secretary shall develop information relating to the number of individuals who have attained 16 years of age and who are members of a family with an income which is equal to or less than 70 percent, 85 percent, and 100 percent of the lower living standard income level for the jurisdiction of each prime sponsor. The Secretary shall prepare and submit, not later than one year after the date of enactment of the Comprehensive Employment and Training Act Amendments of 1978, to the President and to the Congress a report on the information required by this subsection.

On page 267, line 3, insert "(1)" after "person".

On page 267, line 4, strike out "twelve" and insert in lieu thereof "fifteen".

On page 267, line 5, before the period insert a comma and the following: "(2) or who is, or whose family is receiving aid to families with dependent children provided under a State plan approved under part A of title IV of the Social Security Act, or who is receiving supplemental security income benefits under title XVI of the Social Security Act".

On page 268, line 5, after "older workers" insert a comma and the following: "public assistance recipients,".

On page 292, line 7, after "agencies" insert a semicolon and the following: "State and local public assistance agencies".

On page 294, line 2, strike out "and".

On page 294, between lines 2 and 3, insert the following:

"(L) assurances that special efforts will be made to recruit youth from families receiving public assistance, including parents of dependent children who meet the age requirement of this subpart; and

On page 294, line 3, strike out "(L)" and insert in lieu thereof "(M)".

On page 301, line 20, before the comma insert a comma and the following: "a description of arrangements with public assistance agencies on the employment of youth from families receiving public assistance, including parents of dependent children".

On page 314, line 10, after "organizations" insert a comma and the following: "public assistance agencies".

On page 353, line 25, after "service" insert a comma and the following: "public assistance agencies".

On page 374, line 25, beginning with the word "a", strike out through line 5 on page 375 and insert in lieu thereof a hyphen and the following:

"(A) an individual—

"(i) who has been unemployed for at least 10 out of the 12 weeks immediately prior to a determination under this section,

"(ii) who is unemployed at the time the determination is made, and

"(iii) whose family income does not exceed 85 per centum of the lower living standard income level based on the three-month period prior to the individual's application for participation; or

"(B) an individual—

"(i) who is, or whose family is, receiving aid to families with dependent children provided under a State plan approved under part A of title IV of the Social Security Act, or who is receiving supplemental security income benefits under title XVI of the Social Security Act,

"(ii) who has been unemployed for at least 10 out of 12 weeks immediately prior to the determination under this section, and

"(iii) who is unemployed at the time the determination is made.".

On page 178, in the Table of Contents, after item "Sec. 215" insert the following new item:

"Sec. 216. Services for Public Assistance Recipients.".

SECTION-BY-SECTION DESCRIPTION OF AMENDMENT TO S. 2570

The following are brief descriptions of the content and purposes of the various changes the Amendment would make to S. 2570, the Comprehensive Employment and Training Amendments of 1978:

1. Sec. 2 This would add "public assistance" to the list of programs in the statement of purpose with which there is to be maximum feasible coordination of plans, programs, and activities.

The Statement of Purpose in the bill already provides for CETA activities to be coordinated with "economic development, community development and related activities such as vocational education, vocational rehabilitation and social service programs." Adding public assistance to the list of program with which CETA activities are to be coordinated will recognize that public assistance recipients are among the groups most in need of CETA services, and that coordination between CETA and public assistance agencies will help assure more effective responses to the employment-related needs of these recipients.

2. Sec. 101(d): This would require State prime sponsors, in making arrangements for area planning bodies to serve subareas within the State prime sponsor's area, to coordinate such arrangements with units of general local government.

This change will help assure that local governments will have some voice regarding groupings of local jurisdictions for purposes of sub-area planning. This provision would apply whenever balance-of-state prime sponsors organize new sub-area planning councils or change arrangements that now exist.

3. Sec. 103(a)(7): This would require a prime sponsor in its employment and training agreement to provide for utilizing (with or without reimbursement) services and facilities available from public assistance agencies.

The bill already specifies that employment and training agreements shall provide for utilization in CETA programs, to the extent appropriate, of the services and facilities of state employment services, vocational rehabilitation agencies, local education agencies, and a number of other types of agencies. Adding state and local public assistance agencies to the listing of agencies whose facilities and services are to be considered in developing the agreements will emphasize the high priority Congress intends the CETA planning and delivery system to give to the employment needs of public assistance recipients. This change will help assure that prime sponsors consider public assistance agencies as a potential resource for referral of candidates for training and public service employment, and as potential deliverers of various services needed by such recipients who participate in CETA programs.

4. Sec. 103(b)(3): This would add public assistance recipients to the list of groups which are experiencing severe handicaps in obtaining employment; prime sponsors would have to specify intended services for such persons in their annual plans.

Although many prime sponsors have treated the employment and training of public assistance recipients as a high priority, this has not been the case in all parts of the country. This provision will give a very clear signal to prime sponsors that they are to address specifically in their annual plan the steps they will take to help public assistance recipients overcome handicaps which prevent them from being employed. These handicaps include educational deficiencies, lack of skills, lack of work experience, race and sex discrimination, family responsibilities, and many other problems.

It is not expected that CETA prime sponsors can solve all these problems by themselves, but by working imaginatively with public assistance recipients and other agencies serving these recipients, prime sponsors can contribute much to helping many of the recipients to become self-sufficient.

5. Sec. 105(b)(1): This would add state and local public assistance agencies to the list of agencies whose services are to be addressed by the Governor's Coordination and Special Services Plan.

This change will help assure that state-level CETA planning takes into account the work registration, counseling, training and other activities provided to employable recipients of public assistance by the agencies which provide cash assistance, food stamps, medical services and related services to these recipients. The specific inclusion of these agencies in the Governor's CETA coordination responsibilities will help provide more effective linkages of the various services needed by these recipients.

6. Sec. 109(b): This would add public assistance agencies to the list of persons and organizations which are to be represented on the local planning council.

It will help assure that the provision of employment and training opportunities to public assistance recipients is given an appropriate priority in the CETA prime sponsor's planning and operational activities.

7. Sec. 110(a)(3)(D)(iii): This would add a "representative of the State public assistance agency" to the membership of the State Employment and Training Council.

Again, the purposes are to assure that state-level CETA planning places appropriate priority on responding to the employment and training needs of public assistance recipients, and to promote effective coordination of CETA services and other services and benefits delivered by public assistance agencies.

8. Sec. 110(b)(3)(A): This would add public assistance programs to the listing of programs which the State Employment and Training Council is to assess in determining the extent to which a consistent, integrated, and coordinated approach is being used in meeting the employment needs of the State.

This change recognizes the important relationships which exist between the objectives of public assistance programs and CETA and other programs. It will help assure that state employment and training councils take an active role in integrating public assistance and other programs, together with CETA, into an effective, comprehensive approach to employment problems, as opposed to fragmented, uncoordinated and inefficient approaches.

9. Sec. 122(c)(I): This would provide special consideration in filling public service employment jobs to public assistance recipients and persons eligible for public assistance.

This change will emphasize that public assistance recipients and persons eligible for public assistance are a high priority group for CETA public service jobs, and that persons in this group shall receive special consideration in filling such jobs. The Department of Labor's implementing procedures will specify the precise ways in which this provision is to be implemented. Implementing actions can include:

Establishing PSE positions which are especially well-suited for public assistance recipients and eligibles.

Developing working arrangements with state and local social service agencies to help public assistance recipients and eligibles solve transportation, child care and other problems.

Considering public assistance recipients and eligibles for PSE vacancies before such vacancies are advertised more widely.

It is expected that this and other changes included in this amendment will result in a substantial increase in the hiring in PSE positions of public assistance recipients and eligibles. The Department of Labor will be expected to monitor carefully the implementation of these provisions and to take appropriate actions to improve the performance of any prime sponsors which fail to respond to this priority.

10. Sec. 128(d)(2): This would require the Secretary in his annual report to Congress to include in the cross-tabulation of participant characteristics "public assistance recipient status".

This requirement will help enable the Congress to assess how well the CETA system carries out the directions being given in this legislation regarding increased services to public assistance recipients.

11. Sec. 128(d)(6): This would add a requirement that the Secretary include in his annual report to Congress an estimate of the savings in public assistance, Food stamps, medical assistance and other programs resulting from participation in CETA of recipients of such benefits.

This information will be especially useful in helping Congress assess the overall costs of CETA and the efficiency of possible future changes in eligibility standards.

It is expected that the Labor Department's estimates will address savings related both to persons currently participating in CETA employment and training, and to those who were former participants who have now obtained continuing employment.

12. Sec. 216—Services for Public Assistance Recipients: This would add a provision describing services for public assistance recipients; it would parallel those sections in title II which describe services for youth and older workers.

Addition of this section will emphasize the priority attention public assistance recipients are to receive in the planning and delivery of services under Title II. This section cites a number of the particular barriers to employment experienced by public assistance recipients. It then directs the Secretary of Labor to insure that each prime sponsor's plan includes appropriate provisions for assisting public assistance recipients to enter or reenter the labor force, and for coordinating CETA services with services provided by state and local public assistance agencies.

13. Sec. 232: This would delete a provision which directs the Secretary of Labor to first make available from those funds appropriated for public service employment under titles II and VI, $3,000,000 for title II–D.

Deletion of the provision in question will permit Congress to appropriate funds under Title VI, without having first to provide a minimum amount under Part D of Title II. The sponsors of this amendment strongly support the Human Resources Committee's efforts to reorient CETA public service employment from the objective of reducing counter-cyclical unemployment to the employment of persons unemployed for structural reasons. This change is not intended to impede that reorientation; rather it is in-

tended to reserve to the appropriations process the Congressional decisions on the levels and mix of funding for public service jobs.

14. Sec. 237: This would make recipients of public assistance under titles VI–A and XVI of the Social Security Act (AFDC & SSI) categorically eligible for services under title II–D, notwithstanding the required weeks of unemployment.

Additionally it would increase the number of weeks which a person must be unemployed, for purposes of determining eligibility, from 12 weeks to 15 weeks.

These changes will tighten the eligibility standards for the public service jobs provided under Title II, D, so that persons who qualify for these jobs will either be recipients of Federal welfare benefits or unemployed for more than 15 weeks, whose family incomes are below 70% of the BLS lower standard. These changes are appropriate given the focus of Title II D on persons who are unemployed for structural reasons.

15. Sec. 301(a)(1): This would add "public assistance recipients" to the list of target groups who the Secretary must serve in title III.

This will help assure that the employment and training needs of public assistance recipients are addressed by the Department of Labor in the special national programs and the research, training and evaluation activities conducted under Title III. It is particularly appropriate that Congress express to the Department of Labor its intent that employment and training needs of public assistance recipients be dealt with in all relevant activities under Title III, given the new authorization in Section 311(f) for demonstration projects related to employment of public assistance recipients and potential recipients.

These new special demonstration projects should be additions to, rather than replacements of, other activities under Title III addressing the employment needs of public assistance recipients.

16. Sec. 413(a)(1)(D): This would direct the Secretary, in selecting prime sponsors to administer Youth Incentive Entitlement projects, to assure that the prime sponsors have consulted with state or local public assistance agencies, among others, prior to submitting their proposals.

This change recognizes that unemployment of youth in public assistance families is one of the serious problems those families face. Increased contact between prime sponsors delivering youth incentive programs and public assistance agencies can help assure that youth from welfare families have maximum opportunity to compete for available work and training.

17. Sec. 413(a)(4)(L): This would direct the Secretary, for purposes of the Youth Incentive Entitlement Projects, to select only those prime sponsors who provide assurances that special efforts will be made to recruit youth from families receiving public assistance, including parents of dependent children who meet the age requirements of this subpart.

This change, along with the preceding one, will convey clearly the intent of Congress that special efforts be made to recruit youth from public assistance families for available Youth Incentive Program opportunities. The specific reference to parents who meet the age definition of the Youth Incentive Program appropriately recognizes that many teenage parents receive public assistance as heads of households, and that provision of employment opportunities to such parents can help them avoid long-term dependence on public assistance.

18. Sec. 426(b)(1): This would require eligible applicants, in submitting proposals for the Youth Community Conservation and Improvement Projects to describe the methods they intend to use to coordinate with public assistance agencies concerning the employment of youth from public assistance families.

As with the changes relating to the Youth Incentive Program, this change is intended to increase contacts between public assistance agencies and Youth Community Conservation and Improvement Projects, so that a greater number of the YCCIP slots are filled by youth from public assistance families than would otherwise be the case.

19. Sec. 436(a)(3): This requires prime sponsors as a condition of financial assistance to provide assurances that there is coordination with public assistance agencies in the implementation of Youth Employment and Training programs.

This change complements those already discussed and emphasizes the need for close coordination between prime sponsors and public assistance agencies on the employment-related needs of youth from public assistance families.

20. Sec. 492: This would direct the Secretary of Labor to make arrangements for obtaining the referral of candidates, for purposes of the Young Adult Conservation Corps, from public assistance agencies in addition to public service employment agencies, prime sponsors, and the sponsor of Native American entities.

This change recognizes that referrals by public assistance agencies of candidates for the Young Adult Conservation Corps can help assure that an appropriate portion of the Corps resources are focused on youth from families experiencing the most serious economic difficulties.

21. Sec. 607: This would make recipients of public assistance under titles IV–A and XVI of the Social Security Act (AFDC & SSI) categorically eligible for title VI jobs, not withstanding the required weeks of unemployment.

Additionally it would modify the number of required weeks of unemployment, for purposes of determining eligibility, from 45 days to 10 out of 12 weeks. No change would be made in the income eligibility standard included in the reported bill of 85 percent of the BLS lower living standard.

The lengthening of the required period of unemployment recognizes that the public service jobs made available under Title VI should be reserved for people who have tried and been unable to obtain unsubsidized jobs for an extended period. The ten out of twelve weeks standard proposed for Title VI, rather than the standard of 15 weeks unemployment proposed for Title II D, recognizes the counter-cyclical purposes of Title VI.

Retaining categorical eligibility for recipients of Federal public assistance benefits (as under current law) recognizes that families in this group have almost no resources to live on, and that they have generally been unemployed for much more than ten weeks before they began receiving public assistance.

22. S. 2570 Sec. (5)(c): This would direct the Secretary of Labor to develop within one year after enactment of this legislation, information as to the number of individuals 16 years of age and older whose families' incomes are at or below 70 percent, 85 percent, and 100 percent of the lower living standard, in each CETA prime sponsor's jurisdiction.

Availability of this information would enable the Congress to direct more precisely the distribution of CETA and other resources intended to alleviate unemployment and poverty.●

AMENDMENTS NOS. 3528 THROUGH 3531

(Ordered to be printed and to lie on the table.)

Mr. PERCY submitted four amendments intended to be proposed by him to S. 2570, supra.

● Mr. PERCY. Mr. President, I am today submitting four amendments to S. 2570, the bill to amend and extend the Comprehensive Employment and Training Act of 1973. I ask unanimous consent that the text of these amendments be printed in the RECORD.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3528

On page 204, insert immediately before the period at the end of line 23 the following: ", including efforts to reduce and eliminate artificial barriers to employment.".

AMENDMENT NO. 3529

On page 230 at line 15, insert the following new paragraph and redesignate the succeeding paragraphs and references thereto accordingly:

"(1) the term 'artificial barriers to employment' refers to limitations in the terms and conditions of employment which are not directly related to the individual's qualifications to perform the duties required by the employment position."

AMENDMENT NO. 3530

On page 278, at line 17, after the word "processes," insert the following: ", including programs designed to eliminate artificial barriers to employment;".

AMENDMENT NO. 3531

On page 313, at line 18, after the words, "public employment service" and before "other youth programs" insert the following: "the courts of jurisdiction for status and youthful offenders,".

On page 314, at line 14, after "public employment service system;" add the following: "and the courts of jurisdiction for status and youthful offenders.".

CIVIL SERVICE REFORM—S. 2640

AMENDMENT NO. 3532

(Ordered to be printed and to lie on the table.)

Mr. LEAHY submitted an amendment intended to be proposed by him to S. 2640, a bill to reform the civil service laws.

NOTICES OF HEARINGS

SPECIAL COMMITTEE ON AGING

● Mr. CHURCH. Mr. President, the Special Committee on Aging will continue its hearings on "Retirement, Work, and Lifelong Learning" on September 8 at 10 a.m. in room 5110, Dirksen Senate Office Building. Representatives of national organizations on aging will testify at that time.●

SUBCOMMITTEE ON TAXATION AND DEBT MANAGEMENT

● Mr. HARRY F. BYRD, JR. Mr. President, the Subcommittee on Taxation and Debt Management of the Finance Committee, will hold a hearing on August 28, 1978, on miscellaneous tax bills.

The hearing will be held on Monday, August 28, 1978, at 9:30 a.m. in room 2221, Dirksen Senate Office Building.

The following legislation of general application will be considered in addition to legislation previously announced in the CONGRESSIONAL RECORD of August 18, 1978.

S. 3441, sponsored by Senators MORGAN, BAKER, SASSER, MAGNUSON, HODGES, INOUYE, PERCY, and MATHIAS, a bill to

assist independent, local newspapers (nonchain newspapers) and in-State newspaper chains in existence before October 31, 1977, to pay their estate taxes by providing the option of creating an estate tax trust. It is estimated that the bill will involve a revenue loss of $10 million annually.

Requests to testify.—Persons who desire to testify at the hearing should submit a written request to Michael Stern, staff director, Committee on Finance; room 2227, Dirksen Senate Office Building, Washington, D.C. 20510, by no later than the close of business on Thursday, August 24, 1978.

Written testimony.—Senator BYRD stated that the subcommittee would be pleased to receive written testimony from those persons or organizations who wish to submit statements for the RECORD. Statements submitted for inclusion in the RECORD should be typewritten, not more than 25 double-spaced pages in length and mailed with five copies by September 8, 1978, to Michael Stern, staff director, Committee on Finance, room 2227, Dirksen Senate Office Building, Washington, D.C. 20510.●

H.R. 11445 CONFERENCE

● Mr. NELSON. Mr. President, I wish to announce that the Senate Select Committee on Small Business and the Committee on Small Business of the House of Representatives will hold a conference on H.R. 11445 (the SBA authorization legislation) on Thursday, September 7, at 1 p.m. in room EF-100 in the Capitol.

In case of unfinished business, Tuesday, September 12 (9:30 a.m. in the same room) has been held open for continuation purposes.●

ADDITIONAL STATEMENTS

"SING A SIGN": A MUSICAL IN SIGN LANGUAGE, CARRIED BY PUBLIC BROADCASTING

● Mr. RANDOLPH. Mr. President, many of my colleagues will recall the recent premiere of "Sing a Sign," a musical in sign language, sponsored by the American Speech and Hearing Association. It was cosponsored by Gallaudet College and by the Bureau of Education for the Handicapped in conjunction with the American Telephone and Telegraph Corp.

This musical entertainment, the first nationally televised musical in sign language, expresses the often overlooked capability of deaf people to communicate effectively in the hearing world. The production will help to promote the building of a bridge of understanding and respect between the world of the hearing and the world of the deaf.

I ask that an article in the current issue of the magazine of the American Speech and Hearing Association concerning this program be printed in the RECORD.

The article follows:

PUBLIC BROADCASTING'S "SING A SIGN"

The American Speech and Hearing Association served as host at a gala Congressional premiere of Sing a Sign, the first nationaly televised musical in sign language. The program, aired over most Public Broadcasting Stations (PBS) May 20, received accolades from reception attendees, including Senators Jennings Randolph of West Virginia and Robert Dole of Kansas.

THE PROGRAM

Sing a Sign was written and produced by Susan Smith, who, previous to developing Sing a Sign, had produced a series of Emmy-nominated public service announcements at a Washington, D.C. television station.

Upon the suggestion of a principal at a school for the deaf, Smith developed the program, which features young deaf and hearing singers, dancers, and actors. Her husband Rip agreed to direct the special program.

The Smiths, who both hear, prepared for Sing a Sign by attending classes for hard-of-hearing students at Gallaudet College in Washington. The couple learned sign language and taped 14 public service announcements featuring deaf children. The series of announcements won an Emmy nomination resulting in I Hear Your Hand, a full-scale experimetal musical with deaf and hearing people. I Hear Your Hand served as the pilot for Sing a Sign, which PBS ordered as a result of the first program.

YOUNG CAST SPARKLES

Presented by PBS affiliate WETA-TV in Washington, the musical's talented group of performers includes Susan Davidoff, who holds the title of Miss Deaf America; Rita Corey, star of the National Theatre of the Deaf; and Bernard Bragg, renowned deaf mime.

Other performers are Vince DiZebba, Donna Gadling, Ogden Whitehead, Roney Johnson, Martie Stephens, Tracy Tuttle, and David MacFarlane. Musical numbers included "Fantasy," "All Kinds of People," "Just the Way You Are," "Little Arrows," "Candle on the Water," and "Welcome to My World."

Sing a Sign is "a dream come true for me," said Smith, who has long wanted to do a program as a showcase for the talents of deaf performers, to promote better understanding between deaf and hearing people, and to call attention to sign language, which she views as "an effective form of creative expression."

ASHA INVOLVEMENT

The premiere of *Sing a Sign*, held at the Dirksen Senate Office Building on May 16, was sponsored by ASHA and cosponsored by Gallaudet College and the Department of Health, Education, and Welfare's Bureau of Education for the Handicapped in conjunction with the American Telephone and Telegraph Corporation, the financial sponsor of *Sing a Sign*.

Guest of honor at the reception was West Virginia Senator Jennings Randolph, who was hailed by ASHA President Katharine G. Butler as "a good friend to handicapped Americans and to those of us who devote our professional energies to the rehabilitation and education of the handicapped."

Butler cited the 1973 Rehabilitation Act and the Education of All Handicapped Children Act of 1975 as "two of the landmarks of the Senator's distinguished legislative career." The former statute, she pointed out, assures equal treatment under federal law for all handicapped Americans, while the 1975 enactment guarantees a free and appropriate public education for all handicapped children.

"In each instance," Butler said, "Senator Randolph has helped to see to it that those of us who devote our professional energies to the rehabilitation and education of the handicapped have the research, training, and service-delivery support we need to do our job well."

In his speech, Randolph credited ASHA as being "extremely supportive of our efforts over the years to enact legislation that promotes full and productive involvement by handicapped citizens in the life of this nation."

Remarks were also presented by Senator Dole, ASHA Executive Secretary Kenneth O. Johnson, Susan Smith, and members of the *Sign a Sign* cast.●

DEATH OF JOMO KENYATTA

● Mr. ROTH. Mr. President, it was with great regret that I learned this morning of the death of Jomo Kenyatta, the President of Kenya.

Mr. Kenyatta will be long revered not only as the father of his country, but also as one of the greatest black African leaders of this century.

Rising from a humble background, he became the leader of anticolonialist forces in Kenya and ultimately that nation's first President in 1963.

Under his leadership, Kenya has been characterized by stable rule, racial harmony, and economic growth sparked by a healthy and prosperous private sector. The contrast between Kenya and such neighboring countries as Ethiopia and Uganda is stark.

Mr. Kenyatta has made Kenya one of the most influential nations in the Third World and an important site for international organizations.

A leader like Jomo Kenyatta will be hard to replace. I am hopeful, however, Kenya will find an heir who will maintain the successful economic and social policies of Mr. Kenyatta.●

REPORT OF STUDY MISSION TO VIETNAM

● Mr. KENNEDY. Mr. President, the Judiciary Committee met this morning to receive the report of its special study mission which recently returned from Vietnam. The study mission—composed of Archbishop Philip Hannan of New Orleans; Dr. Jean Mayer, president of Tufts University, Medford, Mass.; Dr. LaSalle Leffall, president-elect of the American Cancer Society, Washington, D.C.; Ms. Mildred Kaufman, chairman of the food-nutrition section of the American Public Health Association; and Mr. Jerry Tinker of my staff—visited Vietnam for 1 week beginning on July 31.

Their immediate objective was to facilitate the family reunion of several children and their mothers separated from their families in the United States. However, like the study mission that the committee sent to Southeast Asia last year, the team this year also reviewed for the committee the many urgent humanitarian problems that remain in the aftermath of the Indochina war.

For the record, I would like to take this opportunity to introduce their findings and recommendations offered at this morning's hearing. For their report tells us that "people problems" continue to fester in Southeast Asia. Refugees are still on the move from Indochina, even as millions displaced by years of war struggle to return to their war-scarred homes and lands. Relief and rehabilitation needs have grown among orphans, refugees and malnourished men, women, and children.

There are the urgent problems of family reunion among thousands of families separated by the chaos of Vietnam in 1975—wives and husbands, and children and parents who remain apart after more than 3 years. There are the problems of tracing the missing, especially accounting for those members of our armed services still listed as missing-in-action in Indochina.

These humanitarian issues were the focus of the study mission that traveled to Southeast Asia at my request 2 weeks ago. Their mission serves to remind us that the international community, and especially the United States, faces many humanitarian problems in Southeast Asia—caused by the dislocations of war, the mounting pressure of refugee movement, and the ravages of drought and natural disaster which, together, have produced serious food shortages and critical health needs in many areas.

Mr. President, the United States cannot stand aloof from these humanitarian problems, not only because of our long involvement in the region, but also because these issues impinge deeply upon the concerns and lives of many in America, as well as involve our Nation's interest in peace and stability in Southeast Asia.

Over the past 2 years, the United States has joined with other countries in pledging help to the displaced persons in Southeast Asia—and we must continue to keep our door open to thousands of homeless refugees who need and who seek our help. But at the same time we cannot neglect the vast human needs that continue within Indochina, especially the growing food shortages that threaten the lives of so many.

One of the finest traditions of the American people is to respond to humanitarian needs wherever they exist, and wherever we can be of help. The following report of the study mission to Vietnam will help us better understand how we, as a nation, can today fulfill our humanitarian traditions in Indochina.

Having contributed so heavily to the years of war, we must not now fail to pursue policies and programs that will contribute to peace and relief in Southeast Asia, and respond to new opportunities for a reconciliation and normalization of relations between the American people and the people of Vietnam.

Mr. President, I ask that the prepared statements of the study mission submitted to the Judiciary Committee this morning, as well as the summary of their recommendations, be printed in the RECORD.

The statements follow:

SUMMARY OF RECOMMENDATIONS BY THE STUDY MISSION SENT TO VIETNAM BY SENATOR EDWARD M. KENNEDY, AUGUST 1978

The United States has both a profound humanitarian and foreign policy interest in developments in Southeast Asia, not only because of our long involvement and concern with the people of the area, but also because of our Nation's interests in the peace and stability of the region. Given this historic and long-term involvement, and the many immediate humanitarian issues that touch the lives of both the Vietnamese and American people, the Study Mission offers the following recommendations to the Committee:

1. United States Involvement in Southeast Asia: It would be a tragic lost opportunity if our Nation today failed to respond to the recent overtures of the government of Vietnam to normalize our relations and to renew our involvement, in a constructive and positive way, with the people and government of Vietnam. Indeed, we have arrived at an historic decision point in our foreign policy towards Southeast Asia—where we now have an opportunity to do through peaceful means what we sought to do for so long through war: to protect United States national interests in Southeast Asia by assuring Vietnam's independence from the domination of any outside power

Peace and stability in Southeast Asia has been the objective of our Nation's foreign policy for nearly three decades, and it is today the urgent desire of the Vietnamese—as stated directly to the Study Mission by Prime Minister Pham Van Dong. The normalization of our relations with Vietnam, and the involvement of our diplomacy in that country, will help assure that Vietnam remains independent of either Russia or China. And it will help assure that Vietnam will continue it policy of peaceful relations with the five countries of the Association of Southeast Asian Nations (ASEAN).

2. Reconciliation and Normalization of Relations with Vietnam: The President should be commended for his Administration's early efforts to pursue a policy of reconciliation and normalization of relations with Vietnam. These efforts deserve the full support of Congress and the American people, for such a policy is clearly in the interests of both the United States and Vietnam, and of all parties concerned with the future of Southeast Asia.

The Vietnamese have now given every indication that they are prepared to immediately establish diplomatic relations with the United States, and to resolve all outstanding issues between our two countries through that diplomatic process—with no preconditions mentioned. Vietnamese officials at the highest levels expressed the view that they understood that normalization was a process, and that steps towards reconciliation would assist the normalization process. In their turn, they have responded in good faith to a number of humanitarian issues of concern to the American people—new initiatives on the MIA issue, and the beginning of a policy to promote family reunification. In our turn, the United States should contribute to the process of reconciliation by being mindful of the humanitarian issues of immediate concern to the Vietnamese people—humanitarian food assistance, relief and rehabilitation needs, and medical problems.

3. Food and Related Humanitarian Assistance to Vietnam: Serious humanitarian problems persist in Vietnam. Families dislocated by the recent war are still returning to their villages or resettling in other areas of their country in an effort to normalize their lives. Some crippled and maimed, some orphans and widows, and many thousands of other war victims still need help and concern. Farm land and battered villages are still being renewed. And housing, schools, medical facilities, markets and whole villages are still being rebuilt in the war-ravaged countryside. In short, recovery is still underway.

Adding heavily to the humanitarian problems resulting from the recent war, are the current food shortages in Vietnam. These documented shortages—brought on by the dislocations of the war and by devastating drought and other natural disasters—threaten the health and nutrition of thousands of people in many areas.

The United States can no longer stand aside and ignore the humanitarian problems of the Indochina Peninsula and the international appeals in behalf of suffering and needy people in Vietnam. This is contrary to the humanitarian traditions of our country and to the active support the American people have always given to the provision of humanitarian assistance to people in need throughout the world.

At an early date, the United States should respond to the serious food and related humanitarian assistance needs of the Vietnamese people. This matter should be pursued apart from any ongoing bilateral discussions with either country over future diplomatic consular, and economic relations.

A number of steps should be taken:

(a) In response to international programs by several United Nations agencies, the International Red Cross, and others, the United States should immediately make available, to the Vietnamese people, food and related assistance under international auspices.

(b) The United States should also provide such assistance under the international disaster relief provisions of present law, as we previously have done in the case of many other disasters including those in the Sahel. Romania, Italy, and elsewhere.

(c) The United States should immediately provide ocean freight reimbursement to American voluntary agencies, which purchase food and other supplies or receive donations in kind from the American people for shipment to Vietnam.

4. Cambodian Refugees in Vietnam: The United States should immediately respond to the urgent relief needs among refugees have for Cambodia refugees in Thailand. The United Nations High Commissioner for Refugees has already made an emergency contribution of $500,000, and has under active consideration a special appeal for Cambodia refugees in Vietnam—who now number over 200,000 with an additional 100,000 ethnic Vietnamese displaced by the recent border conflict. There is also an outstanding appeal of the International Committee of the Red Cross, to which the United States has yet to respond.

Preliminary estimates indicate that the UNHCR program will run at least $20 million or more for one year. A comparable program in Thailand and Southeast Asia for refugees from Indochina—for care and maintenance of some 150,000 Indochinese refugees, plus transportation costs—has risen from an appeal of $18.3 million early this year, to a $25 million appeal this past June. The United States has contributed over half the funding for the Southeast Asian program of UNHCR, and we should be equally forthcoming in support of its program for Cambodians in Vietnam. The needs are just as real, and the refugees are similar. A pledge of $10 million now from the United States would greatly assist the UNHCR's efforts to respond to the problem of Cambodian refugees in Vietnam.

5. Trade Embargo against Vietnam: To facilitate the ability of the United States to respond to the many humanitarian needs in Vietnam, and to promote the process of reconciliation and normalization of relations between our two countries, the President should allow the trade embargo against Vietnam to lapse. Whatever the merits of the previous Department of State position that the trade embargo will be lifted as a consequence of normalized relations, the Vietnamese today view the embargo as a punitive act carried over from a previous Administration, and a stumbling block to the process of reconciliation. From both the standpoint of America's international trade, as well as our diplomatic posture, the imposition of a trade embargo against Vietnam today is harmful to our national interests, and costly to our balance of payments overseas.

6. Family Reunion Problems: Vietnamese authorities have clearly stated their intention to begin the process of facilitating on humanitarian grounds, outstanding family reunion cases to the United States—even prior to the establishment of formal diplo-

matic and consular relations. The resolution of these family reunion problems between the United States and Vietnam will inevitably be a long-term process, involving time-consuming details and the activities of individual case workers. However, the Study Mission was assured that in the context of the process of reconciliation with the United States, the government of Vietnam would act in good faith on all humanitarian family reunion cases brought to its attention.

Although this question is clearly a long-term, consular problem, which would be greatly facilitated by consular relations between the United States and Vietnam, the Vietnamese have nonetheless indicated a sincere willingness to start the process now.

7. Promoting People-to-People Contact with Vietnam: Since 1975 there have been no real contacts between the United States and Vietnam—culturally, educationally, or scientifically. As part of the reconciliation process, the United States should promote people-to-people contacts, and facilitate communications between our two countries. After three decades of intensive contact with the Vietnamese people, and contributing substantial sums to the development of southern Vietnam's social, medical, educational, and economic systems, we should not today ignore these strong ties. They are ties which will help both our peoples look to the future rather than to the tragedies of the past.

The Study Mission will submit to the Committee a series of specific recommendations which will serve to facilitate closer contacts between the people of the United States and Vietnam, and between private voluntary agencies, foundations, and public and private institutions in our country and similar groups in Vietnam. It is time to build bridges to the people of Vietnam, after too many years of conflict and war.

8. Responding to the Needs of Refugees in Southeast Asia: While visiting Thailand, the Study Mission received up-dated information for the Committee on the continuing problem of Indochinese refugees in Southeast Asia. Clearly, the United States has a continuing responsibility to offer resettlement opportunities to a reasonable number of Indochinese refugees. Given the demonstrated need over the past several years to maintain some flexibility in this regard, the Attorney General should exercise his parole authority on a continuing basis and without a specified number of entries into the United States.

As the Committee's Study Mission report noted last year, the number of entries for Indochinese refugees should respond to the ebb and flow of their movement and demonstrated resettlement needs, and not to some arbitrary quota which, inevitably and sometimes needlessly, is always immediately filled. Especially for refugees in Thailand, the principal, but not exclusive, criteria for parole eligibility should be the traditional American concern for family reunion. Given the special nature of the "boat people" problem, however, a more general humanitarian criteria should apply to these refugees. The current criteria, left-over from the evacuation in 1975, are no longer appropriate or useful.

A formula for this purpose should be worked out in consultation with this Committee and in the context of the number of refugee entries from other areas of the world, where people also have legitimate claims upon the attention and concern of the United States.

Since 1975, public debate in the United States and our ad hoc national response to the refugee problems in Thailand and Southeast Asia have stressed parole programs and the resettlement of refugees in the United States. As a nation, we do have continuing responsibilities in this regard. But we must not focus on resettlement in the United States to the exclusion of other important alternatives for the refugees. We must finally be more balanced in our policy and approach.

As the Committee's report noted last year: "The time is past due for the United States to encourage and promote more actively the local settlement of refugees in the host countries, especially Thailand. Thailand is prepared to move in this direction, in the context of general rural development which would also benefit its own citizens. The United States must be prepared, diplomatically and financially, to join others in the international community in lending strong support to such local resettlement efforts.

"American policy must also acknowledge the possibility of voluntary repatriation among certain refugees, especially among Lao nationals in Thailand. Voluntary repatriation will only become a viable and humane option for certain numbers of refugees if there is a general agreement among all parties concerned and if real assurances are given for their care and protection when they return. Should voluntary repatriation occur at some future time, it should be carried out under international auspices."

Finally, the Study Mission concurs in the view that the United States should more fully support the United Nations High Commissioner for Refugees in all of his efforts to find durable solutions for the mounting refugee problem in Southeast Asia. We should also lend our full diplomatic support to his stated objective of involving a "wide number of countries" in meeting the on-going problem of the refugees. In this connection, the United States should continue its support of the Intergovernmental Committee for European Migration, the private voluntary agencies, and others directly involved in meeting the humanitarian needs of the refugees.

OPENING STATEMENT OF ARCHBISHOP PHILIP M. HANNAN, ARCHDIOCESE OF NEW ORLEANS, LOUISIANA, AND MEMBER OF STUDY MISSION TO VIETNAM

Mr. Chairman, I wish to preface my brief opening remarks with an expression of my deep gratitude for the opportunity provided by you and the Committee to serve on a Mission that secured a notable humanitarian result and which gives promise of producing other significant results in the future. I personally applaud your efforts, and appreciate the opportunity to serve on your Study Mission.

As you know, we traveled to Vietnam for one full week, arriving in Hanoi on July 31st, departing Saigon, now called Ho Chi Minh City, on August 7th. We spent two and a half days in Hanoi, principally meeting with officials of the Government of the Socialist Republic of Vietnam, including Prime Minister Pham Van Dong, Vice Foreign Minister Phan Hien, who was our host, and other senior ministers in the Ministries of Agriculture, Health, and State Planning.

In addition, we traveled freely for four days in southern Vietnam, staying in Ho Chi Minh City. Without hindrance, and with complete freedom, we walked the streets of Saigon, and we traveled to Tay Ninh and Long An provinces, and to Vung Tau district. We visited a broad range of institutions, both public and private, involved in relief and rehabilitation problems which persist in the aftermath of the war, and which understandably occupy the concern of the Vietnamese government and several international and United Nations agencies. We traveled to within a mile of the Cambodian border—close enough to hear repeated artillery shelling—in order to view firsthand the plight of Cambodian refugees now in Vietnam—who are under the mandate of the United Nations High Commissioner for Refugees.

Altogether, we had a brief, but intensive, tour of the contemporary scene in Vietnam, and we were received warmly and openly by all levels of society and government. We were treated with candor and honesty. For example, on a trip to one of the "new economic zones" on the outskirts of Ho Chi Minh City we were shown what was admittedly a "model" new agricultural zone. But what was refreshing was their ready admission that it took them over three years of hard and difficult work to achieve their good results—and that the first year was an absolute "disaster." They were candid in their assessment of the many problems involved in even the best of intentioned programs sponsored by the new government—especially in implementing the functionally sound, but obviously difficult, concept of creating new economic zones.

Within this framework, Mr. Chairman, of friendly discourse—where we reviewed the many issues that remain between our two countries—we were given nearly all the information that we asked for and we saw everything that time would allow.

As you know, Mr. Chairman, the immediate objective of our Mission was accomplished—namely the agreement by Vietnamese authorities to recognize and facilitate the reunion of families between the United States and Vietnam, who have been separated since 1975. Prime Minister Pham Van Dong gave solid evidence of his good faith and adherence to this statement by the release of 29 persons with American family ties, who accompanied us on our return to the United States, where they were reunited with the other members of their families. We were assured that preparations for the reunion of other families were being made by the same authorities who were responsible for the arrangements for the release of this original group. The United Nations High Commissioner for Refugees, his representative in Vietnam, Mr. Andres Johnson, and representatives of the International Red Cross, stand ready to help, and are continuing their efforts in behalf of family reunion cases.

The Prime Minister was very cordial in receiving the Study Mission and spent nearly an hour discussing with us the matters of mutual concern. During the discussion he frequently stated the desire of the government of Vietnam for better relations with private, humanitarian groups in the United States and for a normalization of relations between our two countries. He also took the opportunity to speak of the humanitarian needs of Vietnam and their appreciation for the interest and help offered by various groups and nations. We assured the Prime Minister of our interest, and the interest of the American people, in the welfare of the people of Vietnam. I expressed my personal view that all mankind is a family of nations and that we must be of mutual benefit to each other, respecting the rights and dignity of individuals and nations. The Prime Minister said that he fully agreed with this statement.

The Study Mission was afforded an opportunity to see the needs of Vietnam which are evident and notable Humanitarian needs include food and many urgently needed supplies, for hospitals and other institutions. There is no doubt of the severe need in Vietnam for food and other materials basic for the welfare of the people and the development of the country.

With renewed gratitude for inviting me to participate in this Study Mission and with the hope that this report may be of some service, we appreciate the opportunity to appear before the Committee this morning.

TESTIMONY BY DR. JEAN MAYER

Inasmuch as my colleagues will testify concerning the refugees and the medical and hospital situation in Vietnam, I will con-

fine my remarks to two other areas: the state of Vietnamese agriculture and their food supply, and the situation of their academic institutions.

In the course of the mission and at the request of Ambassador Sol M. Linowitz, Chairman of the President's Commission on World Hunger, of which I have the honor to be Vice Chairman, I took the opportunity to examine with members of the government the food and agriculture situation in Vietnam. In addition to prolonged discussions with all relevant high officials, from the Prime Minister on down, I spent considerable time at the Ministry of Agriculture and at the State Planning Committee, as well as at the main agricultural academic institutions. I may say that all the officials with whom I talked exhibited a pragmatic and completely candid attitude in their desire for improved relations with the United States. This was true both in larger meetings conducted through interpreters in English and Vietnamese, and in one-to-one private conversations conducted in French.

It appears to me that their food and agriculture problems are severe, particularly in view of their exploding population, which increases 3 percent a year—one of the highest rates in the world. It is further complicated by the presence of some 300,000 refugees from Cambodia. It is noteworthy that this was freely brought up by every official as a matter of the gravest concern. They told me that instruction in birth control is lagging, and that the situation is further aggravated by an acute shortage of birth control devices. The Minister of Health and several other ministers expressed the hope that with outside assistance they could undertake the manufacture of inexpensive, reliable materials for condoms, which are the preferred form of contraception in Vietnam.

As to agriculture, the targets of the five-year plan are not being met. Government ministers and officials readily conceded that unless considerable foreign aid becomes available the gap between actual and planned production figures will increase. The Chinese have suspended all aid. Aid from the Soviet Union and Eastern Europe is seriously inadequate to meet Vietnamese needs. The World Bank has approved a 60-million dollar loan to Vietnam for an irrigation project to be administered through the International Development Association, and FAO is also giving some aid. The Vietnamese feel that much more is urgently needed—and that only the United States can give food and agriculture assistance on the scale required.

The 1977 rice crop fell far short of meeting their needs. This year's winter and spring crop, the first and smaller of the two yearly harvests, is already in. It represents an increase of between 400,000 and 500,000 tons over the 1977 crop. The main, summer and fall, crop was planted over 3.4 million hectares. The weather has been favorable, and this crop, too, is expected to be better than last year's. However, the Minister of Agriculture told me that extremely heavy insect infestation over the southern MeKong Delta has all but ruined crops over some 200,000 hectares because of an acute shortage of insecticides. At best, the 1978 rice crop will probably total about 16 million tons. While this does not mean starvation, it does mean the Vietnamese will be short by about 1.5 million tons of the basic requirements for their population.

Herbicides and fungicides, as well as insecticides, are urgently needed. In fact, Vietnam appears to be very short of every agricultural need—with the exception of good soils and a hard-working peasantry. In some areas, they told me, there is even a shortage of hand tools and buffaloes! They badly need tractors, for areas now under cultivation and to open areas in the New Economic Zones. They are, the Minister told me, acutely short of fertilizers. Nitrogen fertilizers (they are used to urea) are unavailable. The minimum need is placed at one million tons, but they could use even more. They need potash, a minimum of 200,000 tons. They need phosphate. While in some areas of the country raw material for the manufacture of some phosphate fertilizer is available (apatite), they need both the technology and the machinery to exploit it.

Ironically, the fertilizer problem is particularly urgent because of assistance programs the U.S. conducted during the war in South Vietnam. We introduced and vigorously pushed the replacement of native varieties of rice by IR8, a "miracle" crop which provides high yields if vigorously fertilized but otherwise produces mediocre crops. Over 600,000 hectares were planted with IR8. This particular turn of events is one of the contributing factors in the overall shortage.

The Vietnamese officials told me that they badly—and immediately—need food assistance. While at this point there is no famine, rations are skimpy. Any serious deterioration of the weather would bring about a tragic situation. The Vietnamese government would very much appreciate food assistance from the United States. They would prefer rice, because it is their staple food, but they would gladly also receive corn (maize), wheat, potatoes, and even manioc (which is low in protein and nutritionally far less desirable).

If we decided to send food to Vietnam, the method and timing of shipments would be crucial. Because of the destruction and shortages caused by the war, their transportation system is extremely limited. Trucks and railroad equipment are in very short supply, and there are fewer every day because spare parts are unavailable, both for American and Chinese equipment. It was emphasized to me that by dividing deliveries among the various harbors of South, Central and North Vietnam commodities would be easier to deliver. Spreading shipments over the course of the year would facilitate distribution. It would be important to the handling of wheat, if much of the assistance were in that form, as milling facilities in Vietnam are extremely limited. (Conversely, aid could be delivered in the form of flour, though, again, storage facilities would not be adequate for the amounts required if deliveries were made all at once.)

Beyond food assistance, the Vietnamese would welcome assistance in agricultural machinery, agricultural implements, and, above all, as I said, agricultural chemicals. All the officials I saw, including the Prime Minister, also emphasized that they would welcome the installation in Vietnam of U.S. machinery and chemical plants, "provided it is done with full respect for the sovereignty of Vietnam and with advantage for both parties." That formula was ritualistically recited by all those officials—the Prime Minister, Minister of Agriculture, Chairman of the State Planning Committee, members of the Foreign Trade Commission, and the Deputy Foreign Affairs Minister—who discussed this area with me. The same welcome and the same qualifications were expressed in repeated statements of interest in resuming collaboration with U.S. multinational oil companies for the exploration and exploitation of offshore oil resources. Indeed, they stated that they would welcome immediate discussion with representatives of American industry for the development of joint ventures (though examination of their actual present capabilities would suggest that third-party financing is necessary for any sizable matching of capital investment by Vietnam).

I also had the opportunity to talk with government officials, including the Prime Minister and the Minister of Education, Health and Agriculture about the situation of Vietnamese universities and technical schools, and to visit the Universities of Hanoi (including the Polytechnic Institute) and the University of Ho Chi Minh City (including its medical school).

From these conversations and my own observations I can report that the universities are isolated and destitute. In the libraries, the collections of scholarly and technical journals stop in 1975, except for some Russian journals, useless in a country where French, and, in the Southern area, English, are the only foreign languages widely known. Chemical reagents, which came from China and the United States, are unavailable. Russian help is negligible, not to say farcical. In the Polytechnic Institute it has consisted of a limited number of secondhand pieces of electrical equipment, most of them not in working order. The unavailability of foreign exchange precludes using UNESCO as an intermediary to buy books and equipment abroad. The professors, North and South, feel completely cut off from outside civilization and anxiously asked me what discoveries had been made in the past three years "in all fields." The beginning of the coming academic year is looked at with dread by the medical schools, which feel unable to properly prepare for the teaching of basic sciences in the face of a shortage of textbooks, journals, reagents, instruments and animal feeds.

Whatever decisions we make in other matters, I believe—as an academician and a scientist—that we should act to lift the isolation of Vietnamese universities, at the very least by sending them journals, reprints and books. The free flow of ideas and current information can only be in the interest of the free world.

After the bitter conflict between our two countries, the question can be asked—and is by many Americans—why should the United States provide direct food and agriculture assistance, particularly at a time of inflation and retrenchment here at home? The Vietnamese have their own answer. As a high official of the Foreign Ministry said to me, "Two of the countries we feel closest to, both of which have helped us, are France and Japan, both of which we have fought during my lifetime. We would hope that we could work even more closely with you. You have been so generous to Japan after World War II. We hope that you would assist us, too." And then he added, after a pause, "Of course, the Japanese had the good taste to lose the war."

This is a complex foreign policy issue to which I would not attempt to offer a definitive answer—even if I had one. But let me argue that there does seem to be merit, from the point of view of our own national interest, in giving such aid. One objective in the Vietnamese war was to keep South Vietnam from Communist domination. Our other major concern was to prevent the monolithic spread of communism throughout Asia. Communist Vietnam is now a fact of international life. The question is to what extent it acts as an independent power with whom we can initiate useful relationships? I think we have an opportunity at this point to bolster the independence of Vietnam by giving another source of help besides the Soviet Union. They very much desire it. The Vietnamese have a very strong sense of historical continuity. The Prime Minister said to us, "Whenever in our 4,000-year history Vietnam has been dependent on one large friend it has been a disaster for us." With help from European-community nations very small, with the disagreement with China severe and growing, with a war-like situation on the Cambodian border, the Vietnamese regard normalization of relations with the United States as a prime national need.

It is admittedly difficult for our government and for our citizens to approach this

matter so soon after the conclusion of the war. Yet the national interest may dictate that we do so in a pragmatic manner, as a matter of our own desire to maintain maximum influence over political developments in Asia. In the longer run, doing what is morally the right thing in feeding hungry people anywhere in the world has generally proven to be politically advantageous and a source of added influence and respect for our country.

If I may digress for a moment, I would like to mention something I learned, almost accidentally, in my conversations with Vietnamese scientists and health officials. There is some epidemiologic evidence—which at this point is reasonably good—that the chemicals used during the war in defoliation and crop destruction campaigns may have caused an increase in congenital malformations which is being seen in areas where these agents were used. On the other hand, the Vietnamese feel that the evidence is not conclusive. I have been struck by the fact that while they mentioned it as a strong possibility they certainly did not want to emphasize it until absolutely certain of their facts—an attitude which is both interesting and commendable. Reflection on the use of herbicides for both crop destruction and crop interdiction leads me to the following idea which I would like to place before this body. Whatever the final evidence shows, we do know that attempts to starve the Vietcong into surrender proved to be futile, as have similar attempts throughout history. As a weapon of war, starvation acts preferentially against noncombatants, and against the weakest of these. Young adult men are the most resistant to starvation. It is the elderly, pregnant and nursing women, and most especially the children, who suffer and die. Soldiers can, and do, requisition whatever supplies they need to fight on—and they can always justify their action by the nobility of their cause. Wars are won on the battlefield.

The French lost the Franco-Prussian War at Sedan and Metz, in the Loire Valley and on the Swiss border, while children died by the hundreds in the Siege of Paris. In our own Civil War, the South did not surrender because of Sherman's devastating March to the Sea, but because Lee was defeated at Gettysburg and Vicksburg. Malnutrition killed scores of noncombatants in Berlin and Vienna during the Allied blockade in the First World War, but the German armies never lacked for food. Russian children died by the thousands during the siege of Leningrad in World War II, but the Red Army kept enough food and strength to eventually break out and join the advancing Allied relief force. The Nigerians put down the Biafran rebellion by the weight of their arms and numbers, not through starvation. Hunger was used as an instrument of terror by one side, of propaganda by the other, while children, mothers, and old people died.

The use of hunger as a weapon of terror or coercion is not only morally indefensible—if this were not reason enough—it is militarily ineffective. I would like to propose that the United States take the lead in introducing and supporting before the nations of the world an international convention which would outlaw the use of starvation as a weapon of war and as a means of pressure or punishment against individuals in small or large population groups. It is a fundamental violation of the Rights of Man.

As for the immediate situation, I believe that it is very much in our interest, ethically as well as politically, to normalize our relations with Vietnam and to give them aid in the area of food and agriculture as well as in the areas of health and education. This will not only reestablish our moral authority in Asia, but also give us an opportunity to succeed in one of the objectives for which we fought the war, namely to insure the independence of Vietnam from China and from Russia, and give us some means of influencing events in Southeast Asia. It may also give us a chance to engage in mutually profitable ventures, particularly in the agriculture and chemical areas, but possibly in the oil area as well. Meditation on the war in Vietnam and its aftermath suggests that we ought to do it.

REPORT OF VISIT TO VIET NAM—AS A MEMBER OF A SPECIAL DELEGATION TO STUDY NEEDS FOR HUMANITARIAN ASSISTANCE

On behalf of the American Cancer Society and the medical profession, I would like to express my sincere thanks to Senator Edward M. Kennedy for the opportunity to be a member of the delegation to study humanitarian needs in Viet Nam. The visit was most stimulating and informative. Having had the opportunity to speak with several public health officials and physicians and to visit hospitals and clinics, I believe that my observations and recommendations are founded on reliable information. Further, I hope that this report will be helpful in proving that humanitarian assistance in the area of health care is urgently needed.

HEALTH CARE

These impressions were gained by visits to hospitals, clinics and social rehabilitation centers, and interviews with public health officials, professors, surgeons and physicians in Viet Nam, a country of 50 million people that is now 3 years into post war reconstruction. Health care delivery is organized on 4 levels: 1) the communal level; 2) the district level; 3) the provincial level and 4) the central level. There are about 8 physicians per 10,000 population. The Ministry of Health plans to increase the number of clinics, hospital beds and physicians in order to provide better health care for the people. At the communal health level, 4 types of care are given: 1) first aid; 2) family planning; 3) preventive services and 4) health education. These are staffed in 90% of cases by auxiliary doctors—persons who have received 2–3 years of training after secondary school in contrast to the M.D. who has received a minimum of 7 years education beyond secondary school. At the district level, health care is provided primarily in hospitals of 100–200 beds. The care delivered there is primarily medical with only minor surgery being performed. At the provincial level, practically all medical, surgical and obstetrical care is rendered in hospitals of 500–1000 beds. Central level hospitals, as those in Hanoi and Ho Chi Minh City, provide advanced level care for their areas in addition to managing difficult cases from the provinces and performing major cancer and heart surgery. All university hospitals, medical research departments and the faculty of medicine are under control of the Ministry of Health. There are 6 medical schools with about 10,000 students. Students are chosen for university study after rigorous examinations. Some dental care is provided at the district and provincial levels. There are 2 dental schools and 2 pharmacy schools. There is no formal school of nursing. Medical, surgical and obstetrical units train their own nurses to meet their particular needs. A better system of nursing education is urgently needed. Vietnamese officials responded favorably to the suggestion that facility exchange programs could be of definite value to them and wanted to pursue this idea further. Public health officials spoke fervently for the need of well organized programs in family planning. With a birth rate of approximately 3% per year, the population increase continues to exceed food production, thus making worse the current problem of inadequate food production. More detailed information concerning medical care is available in the Scrimshaw Commission Report of 1973.

The 2 major health problems are: 1) epidemic diseases as diarrhea, tuberculosis, skin infections, venereal diseases (cholera and plague have almost disappeared) and 2) Malaria—which is present in approximately 40 percent of the population. These medical problems are worse in the South. The average life expectancy is 58 years. Although epidemic diseases and malaria are the most common illnesses in Viet Nam, the public health authorities are noting an increase in cardiovascular diseases and cancer. The most common cancers in men are: 1) lymphoma; 2) hepatoma and 3) gastric cancer, and in women: 1) breast and 2) uterine cervix. The cancers are usually diagnosed late and thus patients present with advanced disease. Screening for liver cancer has not been cost effective. In one study, only 2 cases were found in 1000 patients examined. Treatment for cancer consists of surgery, chemotherapy and immunotherapy. There is no radiotherapy available.

Professor Ton That Tung, the leading surgeon in Viet Nam, has had great experience with liver tumors. He has called to our attention the increased incidence of hepatomas in Viet Nam and believes that this may be related to the use of defoliants during the war. Dioxin, 2,3,7,8-TCDD, a chemical impurity of the 2,4,5 T herbicide which was repeatedly and massively used in Viet Nam during the war, is a very toxic agent that may be disseminated by avian or aquatic fauna. It has been shown experimentally to be teratogenic, mutagenic and carcinogenic. Its carcinogenicity appears to be much greater than known carcinogens as benzopyrene and methylcholanthrene. Professor James R. Allen, Chief of the Department of Pathology at the University of Wisconsin, stated in a letter to Professor Tung that the Wisconsin researchers had observed that there was a significant increase in hepatocellular carcinomas in rats who received a diet containing 5 parts per billion to 5 parts per trillion of Dioxin over a period of 18 months. The Vietnamese researchers ascribe an important, but as of yet undetermined, role to Dioxin for the increased incidence of hepatomas. Further studies are being conducted to clarify the role of this agent. The average life expectancy for patients with hepatomas who receive conventional treatment is 6 months. Professor Tung and his associates have studied the use of immunotherapy in patients with hepatomas. To be most efficacious, the immunotherapy (BCG or LH1), should be combined with hepatic artery ligation or partial hepatectomy to reduce the tumor burden. The immunotherapy must be prolonged (1 to 2 years) and improved survival rates have been noted with such combination therapy. Because of economic factors, diagnosis and treatment must be rendered as cheaply as possible. For example, the diagnosis of hepatoma is made primarily by physical examination and not by serum levels of alpha fetoprotein. During our visit with Professor Tung, we saw several patients who had been treated for hepatomas, two of whom were alive and well more than 6 years after therapy. Professor Tung has achieved some fairly impressive results in liver tumors with surgery and the immunostimulant LH1—a drug developed from traditional medicine. A tour of the Viet Duc Hospital (where Professor Tung works) revealed that patients are receiving good medical care though many of the refinements seen in American hospitals were missing.

There is a Department of Social Rehabilitation that is concerned with: 1) prostitutes; 2) drug addicts; 3) juvenile delinquents; 4) amputees; 5) beggars and 6) orphans. It was estimated that there were 300,000 prostitutes, ages 14–30, in South Viet Nam at the end of the war 3 years ago. Today there are thought to be about 25,000 prostitutes. This Department seeks to rehabilitate these young

women and return them to society capable of performing productive work. They are examined; treated for any venereal disease (64% have syphilis); reeducated (especially informing them that they should not feel ostracized from society by their previous bad experiences); taught a new profession and then returned to their families as better members of society. The physicians often lack antibiotics to treat the venereal diseases. An active program has been developed for the treatment of drug addicts by 3 modalities: 1) acupuncture; 2) traditional medicine and 3) exercises. Addicts remain at the drug treatment center for 10–14 days. They then undergo reeducation and training for a vocation. At the end of the war there were 1,100,000 people unemployed in Ho Chi Minh City. In the last 3 years, work has been found for 700,00 persons leaving almost 400,000 still unemployed. However, the rate of unemployment is still much too high. There are several orphanages with many children. They are given total care here including food, clothing, shelter, medical care and education. As they become older, they learn different trades as barbering and carpentry. Great attempts are made to place them in foster homes but much needs to be done in this area.

We visited a medical clinic in a new economic zone (NEZ) in the South which served 800 families (about 4,000 persons) and was staffed by a physician, an auxiliary physician and 12 nurses—2 of whom were midwives. The population is primarily young and the 2 most common health disorders were: 1) respiratory infections and 2) skin diseases—especially eczema. A dentist comes once a week to provide dental care. Because of the predominant young age of the population the physician sees little cardiovascular disease or cancer. Assignment of physicians for varying periods of time is made to the various clinics by the Ministry of Health. A hospital is being constructed to provide district level care for the people of this NEZ and some surrounding communities. However, construction has been delayed because of a shortage of building materials. The clinic physician usually has adequate medicines for the types of diseases he commonly treats but related to us the overall shortages of medicines and equipment in the clinics and hospitals of Viet Nam.

A visit to Saigon Hospital, a 250 bed hospital specializing in trauma care, revealed a dedicated staff but again a marked shortage of supplies and equipment. There was an acute shortage of X-ray film, and some medicines as metronidazole (Flagyl—used in the treatment of amebiasis) and antibiotics. Much of the equipment and surgical instruments is outmoded.

For example, the instruments esp. the lenses used in eye surgery are more than 25 years old. All members of the staff requested aid for the hospital especially X-ray film, operating room lights, medicines and equipment.

We visited 2 refugee camps—one in Tay Ninh province with 5,000 persons and the other with 9,000 persons. Most refugees were Cambodians (Kampucheans) but there were a few Chinese, Chums and Vietnamese. Each refugee—man, woman and child—received a 13 Kg ration per month—the same as the native Vietnamese people receive. In our interviews with various refuges, they recounted numerous tales of terror and barbarism committed by the present Cambodian government. Many people have been killed, tortured and maimed. There are no schools, no churches (many were burned) and no freedom. The work is very hard and arduous. They must get up at 3:00 a.m. and work until 8:00 p.m. with only a small break for lunch. Among the refugees are all levels of Cambodian society—peasants and intellectuals. The refugees applauded the efforts of the Vietnamese government in providing them food, clothing, shelter and medical care. We saw no obvious cases of malnutrition. All refugees appeared to be adequately fed and all had been in the camp for at least 7 months. Each camp has an auxiliary doctor and several nurses to deliver health care. A certified physician visits the camps once per week to examine seriously ill patients. Those patients requiring additional care are transferred to district or provincial hospitals. The refugees seemed overjoyed to see us and were happy when speaking about the American and Vietnamese people. They showed their anger and bitterness only when speaking about the atrocities in Kampuchea.

Having spoken with several persons—government officials, physicians, nurses, patients, I was convinced that much is needed to provide better health care for the people of Viet Nam. Among the more urgent needs are: 1) medicines—especially medicines for specific diseases, as venereal diseases, malaria, tuberculosis, amebiasis; 2) medical equipment and supplies of all types—especially X-ray film, operating room lights and modern diagnostic and surgical equipment; 3) teaching materials and scientific journals for hospitals and materials; 4) effective family planning programs and materials; 5) faculty exchange programs between medical schools of both countries; 6) a well organized nursing school program. It seems that some of these recommendations could be implemented fairly soon and easily. Such implementation would do much to show the people of Viet Nam in a most tangible way the concern and interest of the United States. In this category for early disposition are: 1) scientific journals and books to the 6 medical schools and the hospital of Professor Ton That Tung; 2) X-ray film and operating room lights to Saigon Hospital in Ho Chi Minh City; 3) medicines, as antibiotics, antimalarial drugs, antituberculous drugs, and amoebicidal drugs. The other recommendations would take longer to implement.

REPORT OF MS. MILDRED KAUFMAN

An adequate supply of nutritious foods available and accessible to all of the people at reasonable cost is essential for a healthy, productive and stable society, and for the physical and mental growth and development of their children. Recent reports from Vietnam have indicated serious food shortages with associated problems of hunger and malnutrition. This was a major focus for the study mission during our visit from July 31 to August 7, 1978. On this fast paced trip, using information from briefings and limited personal observations, I summarize impressions of the food and nutritional needs of the people of Vietnam. No anthropometric biochemical or dietary study data were available to validate these observations. You should also be aware that my frame of reference is my professional experiences with urban and rural public health nutrition programs in the United States.

FOOD RATIONS

Briefings by Vietnamese government officials cited natural disasters (floods and drought) during recent growing seasons which have reversed Vietnam's previously favorable food production to current food shortage estimated at from 1,000,000 to 2,000,000 tons per year. Basic staple foods are being rationed. The minimum ration for adults and children made up of rice, maize, manioc and wheat (used in noodles and bread) is currently 13 kilograms per month providing about 1500 calories per day largely as carbohydrate. Increases to 17 kilograms per month (2,000 calories per day) and 21 kilograms per month (2400 calories per day) were quoted for those doing physically active work. All these calorie allowances would generally be considered marginal for high labor intensive activity levels, even estimating that some additional foods are purchased on the open market.

Meat, fish and eggs are also rationed but repeated probing did not elicit the amounts of the ration for these animal protein rich foods. Public health authorities stated that supplemental foods were provided in the ration allowances for invalids and for pregnant and lactating women. These supplemental rations include meat, fish sauce (a dietary staple in Vietnam) and sugar. For babies who cannot be breastfed (orphans, etc.) condensed milk is provided for artificial formula. It was stated that some milk is produced in Vietnam but not nearly enough for the needs of their children. Despite requests made by Mr. Tinker and me for a visit to a government food ration store, especially in Ho Chi Minh City, this visit was not arranged. Questions persist regarding the quality, variety and prices of foods at the government food stores, their continuing availability as well as the equity of their distribution to the population. Also of concern is the rationale for food and nutrition policy decisions related to the ration system.

Additional foods are available for purchasing on the open market. No food markets were visited in Hanoi and little food vending was observed on the streets. In Ho Chi Minh City, and Vung Tau we briefly visited the central market and observed many small food vendors along the streets. They were selling a myriad of tropical fruits, green vegetables, dried beans, seafood and fish, pork and poultry. No milk or dairy products were seen in these markets. Prices of foods in the open market were difficult to determine but appeared exorbitant in relation to the income quoted for the average worker of 60 dong per month. In the Vung Tau Market 10 eggs were being sold for 7 dong.

At the model New Economic Zone visited at Ten Dong, where pineapple was being grown for export, families had their own garden plots planted with banana trees, tropical fruits, tomatoes and vegetables. At a home we visited, there we saw the small fish pond. Chickens and ducks were foraging in the area. We were told that families grew these food items for their own use and could sell them in the free market. Along the roads in rural areas, we saw some pigs.

Vietnam is a lush tropical country with tremendous potential for food production. Travelling through the countryside, the visitor is impressed with the intensive cultivation of all available land with rice, maize, manioc and sweet potatoes along with tropical fruits and many green vegetables. The long seacoast and fresh water ponds provide sources for fish and seafood. The fermented fish sauce is a basic component of the diet.

Food in the markets, being sold by street vendors and in cultivation, would appear to be excellent sources of all of the major nutrients except calcium from dairy products. However, the observer questions the availability and accessibility of these foods in the diet of the city people because of their cost in relation to income. Rural families able to grow some of their own food can be better fed than city people. Stated government policy is to decrease the population in Ho Chi Minh City, and officials are pressuring families to move from cities to new economic zones, particularly those people who fled from the country to cities during the war.

Food, farm equipment, seeds fertilizer and insecticides were cited by officials as urgent needs with the goal of self sufficiency in food supply by 1980. In the Departments of Agriculture and Public Health, persons who spoke with us indicated concern for the insufficient supplies of milk. A new program mentioned by Vice Minister of Foreign Affairs, Mr. Han Mien and confirmed in Mr. Tinker's conversation with the Indian Ambassador is the importation of milking water buffaloes from India to supply milk as well as animals for traction.

EVIDENCES OF MALNUTRITION

In the July 31, 1973 report based on March 10, 1973 visit to North Vietnam, Dr. Nevin Scrimshaw stated, "As a consequence of their very strong emphasis on preventive medicine, on immunization and on maternal and child health care at the level of the family, we found essentially no evidence of malnutrition and were impressed by the general health of the population." It would appear that the nutritional status of the population has deteriorated since 1973. The "Report of Public Health Work in the Socialist Republic of Vietnam in 1977" published by the Ministry of Public Health states on page 24, "Nutrition has for many years been the focus of our attention in child health care work. There are clear cases of undernourishment due to economic under-development and aggravated by the sequels of war in protein and calorie deficiencies, and even numerous cases of marasmus. We have studied the constituents of different kinds and of complete food powders made of cereal flour and fish as substitutes, as the raising of milch cows in our country is still limited." In the absence of any nutritional assessment or anthropometric data, I tried to carefully observe the men, women, and children in the streets, in the institutions and working in the fields. I was impressed that obesity, the major nutritional problem in the U.S. does not exist in Vietnam. Everyone appeared physically active.

In rural areas, people were observed working in the fields from early morning to dark, including during the midday when we were told that it was too hot for farm work. Almost no mechanical farm equipment was seen. Human labor was aided by water buffalo and oxen. In the cities there were few cars, with transportation chiefly on foot or bicycle. Bicycles dominate the streets of Hanoi and Ho Chi Minh City, sometimes with families of two parents plus two or three children on one bicycle. In response to questions regarding the price of a bicycle, we calculated the cost to be comparable in the same proportion to family income, as is a car for working people in the U.S.

The people appear extremely lean and wiry with not very well developed musculature, reaffirming the low calorie level of the available rations for a population performing hard physical work. At the hospitals and outpatient clinics, many we saw appeared emaciated. Most children and adults were short in statute, suggesting growth retardation. The best nourished group seen were the children of government workers in a day care center in Hanoi, which serves three meals daily.

At the briefing at the Department of Public Health in Hanoi, officials stated that malnutrition was more of a problem in the south than in the north. They attributed this to food shortage and the high birth rate. Several clues indicate that severe malnutrition exists particularly in high risk groups such as pregnant women and children. Dr. Ton That Tang, Professor of Surgery, Vietnam East German Friendship Hospital in Hanoi, discussed his concerns about the nutritional interrelationships with susceptibility to infection, citing infectious diseases as the major public health problem in Vietnam. In Ho Chi Minh City, we visited the Hospital for the Rehabilitation of Malnourished Children where 250 orphans from age one month to three years receive care. There we were shown a scrapbook of "before and after" pictures of children successfully treated for kwashiorkor and marasmus. We saw some of these rehabilitated children as well as several recently admitted infants with kwashiorkor. There were also children at this center who were profoundly mentally retarded. At the hospital visited in Ho Chi Minh City, a young woman ophthalmologist who had post graduate medical training in Australia and spoke excellent English, asked me as we walked through the hospital, "What are the nutritional treatments for eye diseases?" I replied that xeropthalmia was a severe vitamin A deficiency disease leading ultimately to blindness, but that I had never seen it. She shook her head vigorously saying, "yes, I see it." There was no opportunity to probe further, as we were hurried off to our next appointment. From friends in Chapel Hill who had worked in Vietnam previously, I understand that xeropthalmia had not previously been a problem in Saigon.

At the Cambodian refugee camps in Tay Ninh Province, we were informed that the refugees under the care of the Vietnamese government received the same 13 kilograms per month ration. As a group the refugees appeared to look better than many of the people observed on the streets and in the institutions. The stories of the refugees, about the hardships endured in walking long distances to reach Vietnam, would suggest that they had arrived eight to twelve months before we saw them in seriously depleted nutritional status. This speculation was confirmed in conversation with Mr. Anders Johnson, on the staff of the U.N. High Commission for Refugees who had visited these camps shortly after the refugees had arrived. Therefore, the nutritional rehabilitation observed with the limited ration appears remarkable. Refugees with whom we conversed in French said that they were "getting enough to eat." These refugees are sharing and straining the limited supplies of food available in Vietnam.

PUBLIC HEALTH PROGRAMS AND SERVICES

The public health program described by officials at the state planning commission and at the Ministry of Public Health in Hanoi, is essentially described in detail in the report of Dr. Nevin Scrimshaw's study mission to North Vietnam in 1973. The 1977 Annual Report of the Ministry of Health provided to us at the conclusion of our visit, clarified details. The well organized health system integrates free preventive and curative medical care in a plan to serve all workers; it now is said to cover 90% of population. Organization is at four levels: (1) communal village or "grassroots" with a health station for primary care, normal deliveries and preventive health education, staffed with auxiliary doctors, nurses, midwives and family health workers and serving 4,000 to 6,000 people; (2) district level serving 100,000 to 200,000 population provides a 100 to 200 bed hospital and medical doctors along with a public health office, pharmacy and other senior staff who provide in-service training for communal level health workers and leadership in sanitation and epidemiology; (3) provincial level provides 500 to 1,000 bed general and specialized hospital care and public health service for hygiene, epidemiology, maternal and child health and rehabilitation. At this level are the schools for training mid-level health workers including vocational level nurses and midwives who provide family planning services and prenatal care. Some mental health services are provided but mental health is said not to be a serious problem; (4) at the central or governmental level is the Ministry of Health, University Hospital with faculty of medicines, pharmacy and public health for training personnel and research. A system of triage is used to direct patients into the appropriate level of care according to their needs. There is limited dental care at the district level. Dentistry was stated to be not too well developed and there was an obvious need for more dental care.

Priority health programs discussed were eradication of the infectious diseases which are the major causes of death and include cholera, plague, malaria, dengue fever, tuberculosis, leprosy and venereal diseases; family planning to reduce population growth, the highest in the world, from 3% to 2% per year: maternal and child health (in 1976 maternal mortality rate was 0.9, infant mortality rate 34.2); environmental sanitation; and health education. Rehabilitation centers for drug addicts and prostitutes and homes providing care for orphans are important related programs conducted by the Department of Social Welfare.

Health programs at all levels from the rural clinic visited in the New Economic Zone to the hospitals in Hanoi and Ho Chi Minh City, are providing dedicated health care attempting to combine modern medical practice with traditional medicine, but are seriously handicapped by shortages of drugs, vaccines, x-ray film and medical equipment. Training is jeopardized because the new medical textbooks and journals are not available. Both Dr. Tong in Hanoi and the physicians at the hospital in Ho Chi Minh City expressed the need for medical journals from the USA. The physicians also stated needs for more advanced education for professional nurses for the hospitals and public health. Dr. Tong recommended a national school for nurses. The woman ophthalmologist in Ho Chi Minh City said that the best prepared nurses are now being trained in Japan.

In questioning of several of the health officials regarding who taught mothers how to feed their children, it was stated that the nurses handled it. Persistent questioning did not identify any specific efforts to educate and guide the people in nutrition or wise use of scarce food supplies. As a Public Health Nutritionist, I was unable to identify any counterparts in public health work or dietitians in the large hospitals. Dr. Scrimshaw states in a report prepared for Nutrition Today published in July/August, 1973 from his 1973 visit to Hanoi, "There is no profession of dietetics or nutrition, however the assistant doctors often are given some training in this field." Dr. Tong expressed the need for a nutritionist in Hanoi. I was told that in Ho Chi Minh City, Dr. Duong Thi Guynh Hoa was a woman physician in the Public Health Service who was concerned with nutrition and maternal and child health. A conference was requested with her but she was unavailable. Later in Bangkok, I asked Ms. Margaret Crowley, Regional Home Economics and Family Development Officer, FAO of UN about her knowledge of current professional training in nutrition or of efforts in nutrition education for the public in Vietnam. Ms. Crowley knew of no organized national nutrition program. Ms. Crowley stated her strong conviction that food aid without public education on how to use foods provided is ineffective and wasteful, especially when foods provided are unfamiliar or unpopular.

RECOMMENDATIONS

1. Clearly there is an overall food shortage which requires short-term and long-term assistance in response to the obvious food needs and evidence of malnutrition among the population of Vietnam. The United States should live up to its humanitarian tradition and immediately move to assist in overcoming the one to two million ton food deficit this year. Food shortages threaten the health and productivity of a people industriously struggling to overcome the ravages of war on their society and coping with an influx of refugees coming to Vietnam from Cambodia. Long term assistance aimed to help Vietnam move toward self sufficiency in food supply would be provision of fertilizer, insecticides and farm equipment. Agricultural assistance should be appropriate to the needs, capabilities and practices of the Vietnamese farmers.

2. Special attention in a food aid program should be given to providing milk powder and other special protein-rich products such as CSM (corn-soya-milk) for the infants and young children, particularly for feeding programs for the many orphaned chil-

dren. Milk powder was stated to be in very scarce supply by both the representative of UNICEF with whom we spoke and the staff of the Hospital for Rehabilitation of Malnourished Infants. Contributing to an adequate supply of milk could tremendously improve the nutritional quality of infant and child feeding programs to prevent and treat malnutrition and be an investment in the physical and mental development of the children.

3. In cooperation with the UN agencies—UNICEF, FAO and WHO and private relief agencies a tracking system to monitor food aid would seem desirable to assure that foods are transported and stored to maintain their quality and that foods are targeted to reach those with the greatest nutritional needs, particularly children in the urban areas. It would also be important to determine that foods provided are acceptable to those receiving them and that they use the foods advantageously.

4. Technical assistance in nutrition and food science is needed to train public health workers and teachers in basic nutrition and appropriate use of food provided in the aid programs. During briefings, government officials stated that "the people prefer rice but could eat wheat and maize." Nutrition education initiatives would be essential to introduce changes in the staple foods in the diet as well as milk powder and milk from the milk producing water buffalo. The public health network with its emphasis on health education offers an excellent channel for nutrition education to all of the population.

5. Support needs to be provided to the family planning initiatives with supplies and technical assistance in order to reduce population growth from 3 percent to 2 percent or less per year. Control of population growth is important in reducing the increasing demand on limited food supplies. It is also desirable to reduce the stress of repeated pregnancies on women who are nutritionally depleted and are at high risk of producing more malnourished infants.

6. With malnutrition as an acute problem and deployment of food supplies as a critical issue, consideration should be given with the Vietnamese government to leadership training in nutrition and food sciences as basis for rational food and nutrition policy development. Academic training in nutrition and dietetics needs should be considered in Vietnam on a long range basis. More immediately, offering opportunities for training applied nutritionists, dietitians and nutrition educators in universities in the United States might be useful.

GENERAL OBSERVATIONS AND IMPRESSIONS

The officials with whom we spoke largely addressed the basic human needs of their people for food, medical supplies and equipment to help them achieve their goals of independence of self-sufficiency. Visitors must be impressed with how diligently the people of Vietnam are working and their generally stark standard of living. Officials cited Japan to be their model for future development. During a brief stopover in Japan en route home, I was amazed at the achievements in Japan in terms of nutritional status and child growth and development; health, sanitation; industrial development and prosperity; a dramatic contrast with what we observed in Vietnam.

I hope that we have been able to adequately convey a picture of the real human needs for immediate help of food, medical supplies and educational resources to people who are valiantly trying to help themselves. Major disruptions in the society in Vietnam are being addressed by the government including the care for large numbers of racially mixed children observed in the orphanage in Ho Chi Minh City, rehabilitation of the many drug addicts and prostitutes, as well as providing a haven for refugees from neighboring Cambodia.

I wish to thank Senator Kennedy and the Senate Judiciary Committee for the opportunity to participate in this study mission and Mr. Jerry Tinker for facilitating our travel. For me it has been a tremendous learning experience and hopefully an opportunity to contribute to an important humanitarian effort. Great appreciation must also be expressed to the government of the Socialist Republic of Vietnam for their warm welcome and gracious hospitality.

THE FINAL HOURS OF THE KOREAN WAR

● Mr. GOLDWATER. Mr. President, what were the battlefield conditions like during the final hours of the Korean war? We are indebted to Mr. Charles A. Wahlheim, publisher of the Mesa, Ariz., Tribune, for a grisly picture of those conditions in one sector of the combat zone. On July 27, 1953, he was serving as chief of a 155-millimeter howitzer section in our forces and remembers vividly the events that transpired. In a recent editorial, he recounted that experience and used it as the basis of some observations on this country's current problems with the military situation that confronts us around the world.

I ask that this editorial be printed in the RECORD.

The editorial follows:

JULY 27, 1953

Twenty-five years ago today is more than a little memorable to me. I had spent over a year in Korea first as a forward observer for an artillery battery, later as a chief-of-section on a 155mm Howitzer. The last few months of the war had been intense, with both sides realizing an armistice was pending and, as a consequence, trying to position themselves on the most strategic locations.

At 10 a.m. on the morning of July 27, 1953, our firing battery was at the bottom of a ridge, firing nearly point blank. The battery commander called six of us together and told us to inform our troops a cease fire has been signed and that all firing would stop in 12 hours.

The day was grisly beyond belief, both sides unleashing everything they had at one another. Many young Americans died that day on that hill in front of me.

At 10 p.m. all guns were silent. The next morning we pulled back and a few days later I was headed for Pusan—and home—left with the thought of all who died those last 12 hours after the cease fire had been signed.

Besides personal nostalgia, Korea has a significant meaning for all of us. It was the first limited war for limited objectives, and I guess if you put aside the loss of 40,000 American boys, one could say it was successful as South Korea is still free. This new concept in warfare led us into the morass of Vietnam, and 50,000 American lives later we learned it is really impossible for this nation to fight a limited war for limited objectives.

If that is true, it leaves us with a few alternatives. Certainly atomic warfare is something none of us wishes to contemplate. So what do we do as a nation to stay the constant communist encroachment going on all over the globe?

It seems to me there is no simple solution short of this nation really waking up to the need to turn back to God and ask for His divine assistance, which probably we won't do. Aside from that we need to carefully identify who our friends are and assist them in being militarily strong.

I would particularly cite our position vis-a-vis Turkey, which sits right on the Russian border and has been a long-time adversary of Russia. Germany, although it sits in a precarious position with its Berlin dilemma, has to be the backbone of NATO.

Israel, South Korea and Japan, to name just a few others, need to have the capability of protecting not only themselves but acting as a deterrent in their general global areas.

Strategically I think that the neutron bomb should be developed as a deterrent against the massive tank forces of Russia and the cruise missile should be developed and its range not restricted as a solution to the problem of our aging and somewhat obsolete ballistic missile system.

More importantly, I think great care should be taken that our president doesn't negotiate a SALT agreement just for the sake of a SALT agreement. That could put us at the mercy of the Russians who, I am sure, have no intention of honoring whatever agreement they sign.

I think programs such as Radio Free Europe should be beefed up and expanded. They not only get the truth behind the iron curtain but keep the Eastern bloc nations stirred up enough that they require a lot of attention from the Russians.

A similar type of radio network probably should be set up in Africa in hopes of informing them and, hopefully, educating African nations as to the seriousness of the Russian and Cuban threat.

We can't fight limited wars. We can't fight all-out atomic wars, but assuredly we can't bury our heads in the sand and hope the threat of communism goes away.

It is unbelievable to me how quickly that 25 years went by, and I am not sure we will have a free country 25 years from now if all of us don't get active and let the people who run this country know how we feel and express our concern.

Not everyone can have the privilege of writing an editorial in the newspaper. But everyone can write his congressman or senator.

CHARLES A. WAHLHEIM,
Publisher.●

BILL HATHAWAY'S LEADERSHIP HELPS RESTORE MONEY FOR KEY AGRICULTURE PROGRAMS

● Mr. MUSKIE. Mr. President, my friend and colleague, BILL HATHAWAY, took the lead in the Senate last week in restoring money cut from this year's agriculture budget for the agricultural conservation program, the only major farm program in our region. I was happy to support his effort. His success in restoring $105 million for the program was responsible in terms of the congressional budget and in terms of sound farm policy. The careful, low key way he built support for his amendment is only the most recent example of why his legislative ability is so valued in the Senate.

I congratulate him for his leadership, and ask that an article on the subject from the Bangor Daily News of August 21 be printed in the RECORD.

The article follows:

MAINE AGRICULTURE—HATHAWAY SUCCEEDS IN RESTORING FULL FUNDING FOR AGRICULTURE PROGRAM

(By David Bright)

On Friday, July 28, Missouri Senator Thomas Eagleton came to Portland to boost the campaign efforts of Bill Hathaway. Eagleton was one of many in a long line of political types who've been to Maine for

Hathaway. The list is topped by President Jimmy Carter. It includes, among others, Secretary of Agriculture Bob Bergland and Ohio Senator John Glenn.

But less than two weeks after Eagleton was in Maine he and Hathaway were locked in strong debate on the Senate floor. On Eagleton's side were Carter, Bergland and Glenn, Rooting for Hathaway were many of the nation's farmers and a number of farm and conservation groups.

The issue was $105 million for conservation cost-sharing funds which Hathaway wanted restored to the Senate agriculture budget.

In the end Hathaway prevailed. How he did it is a story conservation and farm groups are still wondering about.

The money is for the Agricultural Conservation Program (ACP) of the USDA's Agricultural Stabilization and Conservation Service (ASCS). ASCS handles many of the cost-sharing, subsidy, emergency loan and similar farm programs. In the Northeast the ACP program is the only major farm program. It provides cost sharing from 50 to 90 percent for a number of conservation practices on farms. The program will give a farmer a maximum of $2,500 a year for such things as waterways, manure storage facilities, establishment of cover crops, assistance in strip-cropping and contour plowing.

Despite its popularity with farmers, the program has never been very popular among bureaucrats, presumably, says Hathaway staffer Charles Peck, because it's run by locally-elected farmers and not by the government.

Last year Carter recommended funding at $190 million for ACP and he became the first president since Truman to place ACP money in his budget. Every year since then Congress has been adding funds on its own.

The budget passed at the $190 million figure last year but this year Carter cut ACP to $100 million.

The House of Representatives rejected the Carter plan, however, and restored the full $190 million. But when the bill got to the Senate Appropriations Committee the ACP funds were cut back further to $85 million. Eagleton is the chairman of the subcommittee on agriculture.

The bill was still bottled up in the subcommittee when Hathaway's office began to hear concerns about it while making routine monthly calls to Maine farmers.

Private attempts to move the subcommittee failed and the Hathaway staff then began working with the staff of South Dakota Senator George McGovern, the Democrats' 1972 presidential nominee who had picked Eagleton as his running mate.

McGovern's office was also hearing complaints from farmers but decided not to go out front with the issue because McGovern had some other business he wanted to bring before the Senate and didn't want to get into a fight over ACP.

On July 27, the day before Eagleton was to come to Maine, Hathaway wrote to Senate Appropriations Committee Chairman Warren Magnuson, urging that the committee restore the $190 million.

The next step was meetings with the staff of Vermont Senator Patrick Leahy, a dairy farmer who serves on both the Senate Appropriations and Agriculture committees. When the Eagleton cut got to the full appropriations committee, Leahy tried several times to restore the $190 million. But the only other vote he could muster was that of Massachusetts Sen. Edward Brooke.

At that point Hathaway decided a gamble was in order. The bill was obviously going to a conference committee. If he left the issue alone the Senate conferees would be able to give ground and perhaps the funding could be raised. A halfway split would have funded ACP at $137 million. If Hathaway brought up his amendment and it failed, there would be a record of Senate disfavor and it would be a hard point to negotiate in conference. On the other hand, if Hathaway won, the budget would be secure as it could not be changed in conference.

In the balance was an extra $1.1 million for Maine.

It was determined that the gamble was worthwhile. With the assistance of Senate Majority Leader Robert Byrd, another who has campaigned for Hathaway in Maine, the amendment was scheduled for first thing in the morning, a time, aides say, when senators are more prone to be agreeable.

By the time the voting day arrived, most of the senators had been made aware of the controversy. The National Association of Conservation Districts had been lobbying hard on behalf of the program, as were other farm groups.

During the debate, Eagleton threatened that passage of the Hathaway amendment would result in a sure veto of the entire agriculture appropriations bill by President Carter. But Hathaway, using information he had requested from USDA as well as backup from Maine Senator Edmund Muskie's budget committee, showed that the budget could handle the increase and managed to ward off the arguments.

As the debate progressed, more and more senators added their names to the Hathaway-sponsored bill. By the time of the vote, Hathaway had been joined by McGovern, the only original co-sponsor, as well as Mississippi conservative John Stennis, Republican leader Robert Dole, a former vice presidential candidate, and eight others.

The final vote was 55 to 26 in favor of Hathaway's amendment. His staff, as well as lobbyists for some conservation groups, doesn't expect any presidential veto, especially since other cuts in the agriculture budget have made up the difference.●

THE CHALLENGE OF PRODUCTIVITY

● Mr. LUGAR. Mr. President, as Congress struggles with the issue of how best to stimulate growth in productivity in our Nation's economy, Eli Lilly & Co. provides a refreshing example of an enterprise that is meeting the challenge of productivity. This pharmaceutical firm headquartered in Indianapolis posted annual productivity gains averaging 9.2 percent per year over the past 10 years, compared with 2.3 percent for all U.S. manufacturers.

Lilly's remarkable record was detailed in column by John Felter, which appeared in the Indianapolis News on August 15, 1978. I ask that the article be printed in the RECORD:

PRODUCTIVITY: MAGIC IS IN MANAGEMENT

(By John Felter)

Productivity, the quarterly report on a business's output, is issued by U.S. Bureau of Labor Statistics and has an enormous effect on American lives.

In the Eli Lilly and Co. six-month report, corporate staff economist, Dr. John R. Virts, tries to bring some understanding to the complex term—productivity.

A simple definition, according to his "Viewpoint" article, is what a company gets from what it puts into a product.

For instance, output per employe for 1967 and 1977 are calculated in the following manner with the term "Index (1967=100)" as an arbitrary base (starting point).

Using the following figures as an example:

On sales of 100 in 1967 and 500 in 1977, divide a price index of 100 into the 100 for 1967.

Since prices have doubled from 1967, divide 200 into the 500 for 1977.

Dropping the zeros, this will leave 100 and 25.

If there are 10 employes in 1967 and 20 employes in 1977, divide the 100 by 10 and the 25 by 20.

The results will be the output per employe for 1967 (the base year) and the output per employe for 1977 (the given year).

Divide the output per employe for 1977 by the output per employe for 1967.

Presto, the index of comparison.

During the decade 1967–1977. Lilly's labor productivity was four times as great as that for the average of other manufacturers, according to Dr. Virts. He said, "Our estimates show that this trend of increasing Lilly productivity is continuing in 1978, and we believe that it will continue in the future."

When asked why the big difference in Lilly's and other manufacturing productivity, Dr. Virts said management, people, technology and capital are all represented in productivity.

Management must motivate employes, have the awareness of cost, and be able to use resources properly. He added, "It does not mean that anyone is working harder or longer, it means that it is efficient use. There must be a willingness to work and a sense of accomplishment, but no resentment."

The attitude of people is very important because a "rigid" environment might be created. If there are rules that establish the amount of output, like government regulations, union contracts, or unreasonable management, output can be hampered, according to Dr. Virts.

"The more educated the work force, the more possibility there is to get the people to work, but a company must have the technology along with the people," says Dr. Virts.

Another spokesman for Lilly said 36 percent of Lilly's 12,241 employes employed in the U.S. are college graduates: 2,760 with bachelor's; 915 with master's; and 588 with doctorates. An interesting fact is that Lilly has no union.

Dr. Virts said in "Viewpoint," "It (high productivity) has enabled the company to pay good wages to its employes."

The recent productivity report also agrees with Dr. Virts' statements. Second quarter output per employe costs jumped at an annual adjusted rate of 7.8 percent, slower than the first quarter's 17.4 percent increase. The first quarter's revised-productivity figure declined 4.6 percent and the second quarter reported a gain of .1 percent.

This means productivity declined because labor costs were high. Management, people, research or capital were not working as a total combination, as explained by Dr. Virts.

Research is important to productivity because new technology makes better use of time, according to Dr. Virts. As Dr. Virts watched his secretary, he said that the typewriter-recorder cartridge has increased efficiency enormously. "I can't even tell if she made any mistakes." He did say that Lilly spent $124.6 million on research in 1977.

And finally where does a company get capital?—Sales.

Lilly has supplied products to the public the prices of which have increased at a very modest rate compared with the Consumer Price Index as the second graph shows over the 1967-1977 period. The index of Lilly prices increased about one-fifth as much as consumer prices.

As an example, the stable Lilly prices and high productivity secure the type of capital that any company needs.

In conclusion, Dr. Virts said, "There is no single cause or simple explanation of productivity. Clearly, it is not just how hard people work or how fast machinery runs. It is these things plus the combination of technology, people, and their motivations."

The blending of employes; the use of effective management skills; and research and development play a vital role in productivity. This is the important challenge of business, according to Dr. Virts.●

PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the two notifications I have just received.

The notifications follow:

DEFENSE SECURITY,
ASSISTANCE AGENCY,
Washington, D.C., August 18, 1978.

In reply refer to: I-6890/78ct
Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78-91, concerning the Department of the Navy's proposed Letter of Offer to Iran for other than major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $350 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERICH F. VON MARBOD,
Acting Director,

TRANSMITTAL No. 78-91

[Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act]

(i) Prospective Purchaser: Iran.
(ii) Total Estimated Value:

[In millions]

Major defense equipment [1]	$0
Other	350
Total	350

[1] As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: U.S. Armament Suite to equip twelve (12) frigates to be built in the Netherlands and FRG shipyards. The US suite for each ship consists of the following: MK 13 Mod 4 Guided Missile Launching System, HARPOON Cannister Launching System, VULCAN-PHELANX Close-In Weapon System MK 15 Mod O, MK 32 Above Water Torpedo Tubes.[2]

(iv) Military Department: Navy.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: August 21, 1978.

[2] Continuous Wave Illuminators (CWIs), Link 11 Modulator/Demodulator, and Super Rapid Blooming Off-Board Chaff Launching Systems.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., Aug. 21, 1978.

In reply refer to: I-5803/78ct
Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78-94, concerning the Department of the Navy's proposed Letter of Offer to Saudi Arabia for other than major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $800 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

TRANSMITTAL No. 78-94

U.S. NAVY—A FLEET OF THE FUTURE OR OF THE PAST?

● Mr. GOLDWATER. Mr. President, is the U.S. Navy to be a fleet of the future or of the past? I believe this question is central to the debate going on concerning President Carter's veto of congressional plans to build a new nuclear-powered aircraft carrier. As the Members know, I plan to support the Executive veto because I feel the money that it would cost to build the new carrier could be better utilized for other phases of naval construction.

There are many facets to this problem and a recent article by Herschel Kanter, a senior fellow on a defense analysis staff of the Brookings Institution, illustrates many points that need clarification. I ask that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE U.S. NAVY: FLEET OF THE FUTURE OR THE PAST?

(By Herschel Kanter)

This year, President Carter, in the first defense budget prepared by his Administration, greatly reduced the Ford Administration's shipbuilding program. Carter proposed to build seventy ships in the years 1979–1983 at a cost of $32 billion. The President included a new medium size 60,000 ton "midi" aircraft carrier in his five-year program but did not request any new carrier funds for 1979. Moreover, the President failed to submit his shipbuilding plan until mid-March instead of in January as Congress requires. President Ford, in his last defense budget before leaving office, had proposed a much larger five-year shipbuilding program providing for the construction of 158 ships in the years of 1978–1982, at a cost of $48 billion. Included in this total were funds for two midi carriers.

Not surprisingly, the Carter budget has been greeted with dismay and anger from top Navy officials, and from the Armed Services Committees in Congress. The result has been a bitter budget fight which has received a great deal of media attention. While a number of issues are involved in this dispute, the central one is the place of the aircraft carrier in the Navy of the future.

The House and Senate Armed Services Committees each have their own views on what role the carrier should play. (In particular, both committees have approved a large 90,000 ton Nimitz-class aircraft carrier not included in the program of either Ford or Carter.) The Carter Administration seems to have several views. It has regularly given conflicting signals about its position on aircraft carriers and their expensive escorts. As long as confusion about the aircraft carrier's role prevails, billions of dollars for unnecessary carriers, escorts, and aircraft may be requested and approved in the next few years. At the same time, other ships and aircraft needed to modernize the Navy will not be procured. A chance to save money and take advantage of new technology, and of Soviet weakness, will be lost.

BACKGROUND—THE AIRCRAFT CARRIER IN THE NUCLEAR AGE

Since the end of World War II, the Navy has been committed to the aircraft carrier as the most important component of its strength. This commitment has remained firm despite changes in Naval missions and conditions of combat which seem to mandate a shift away from carriers.

The first large aircraft carriers—the six 80,000 ton Forrestal ships—were built in the early 1950's to attack the Soviet Union with nuclear weapons as part of the strategic war plan. For this purpose it was necessary for the carriers to sail into Soviet home fleet waters, though they needed only to survive long enough for their planes to take off. They could perform this mission because of the Soviets low anticarrier capability.

In the mid-1960's, during the Vietnam war, the carrier was withdrawn from the strategic retaliatory mission, because the carrier's contributions to that mission were small compared to the TRIAD of bombers, ICBMs, and Submarine Launched Ballistic Missiles. But the role of the carrier, instead of being deemphasized, was changed to the projection of power ashore in limited wars. The carrier would be used, as Secretary of Defense McNamara described it, for the 90% of the world outside the Soviet Union which lies within 500 miles of sea coasts.

As the Vietnam War decreased in popularity it became necessary, in order to justify not only the large nuclear carrier but its sophisticated protective systems, for the Navy to stress again operations in Soviet home fleet waters and strikes against the Soviet homeland, at least against naval (and naval air) facilities. In testimony supporting the 1979 budget, the Chief of Naval Operations discussed the "important war plans option of Navy battle groups." These would be groups, he said, "consisting of carriers, surface combatants, and submarines operating together in mutual support with the objective of destroying Soviet air, surface, and submarine forces, [which] could by a concentration of force gain local maritime superiority in the eastern Mediterranean, Norwegian Sea, or Northwest Pacific, to the degree necessary to conduct strike operations into the Kola Pe-

ninsula, Black Sea, Vladivostok, or Petropovlosk areas."

This role, launching attacks against Soviet territory from the home waters of the Soviet fleet on the flanks of NATO is an expensive one. There are now thirteen carriers, three of which are to be retired in the next few years. Delivery of two ships now under construction, and modernization of six more built in the 1950's, will give the Navy twelve carriers until the turn of the century, if the Carter shipbuilding plan is carried out. The two new ships are the Nimitz-class carriers that are nuclear powered, carry 90–95 aircraft, and displace 90,000 tons. Each costs more than $2 billion. They are expensive because of their nuclear propulsion, and because the large modern aircraft they carry require special take-off and landing equipment, as well as expensive maintenance and supply systems aboard the carrier. Moreover, the carrier requires costly built-in protection to survive hits by cruise missiles, and special construction which allows for partial flooding of the ship in case of torpedo damage.

To survive in areas where Soviet air and submarine power can be brought to bear, the twelve carriers will be protected by large fast escorts—a total of about 100 cruisers and destroyers. New ones cost between $250 million and $1 billion, the most expensive carrying the new Aegis air defense system. Aegis will have the capability of tracking and shooting down large numbers of incoming missiles simultaneously. In addition, one or two of the new $500 million Los Angeles-class attack submarines may be attached to each carrier force to provide protection against submarine attack. Further, each carrier is protected against air attack by twenty-four F–14 aircraft, the most sophisticated air defense fighter in the U.S. inventory. The F–14 carries the Phoenix missile system that can intercept up to six incoming aircraft or missiles simultaneously. Each carrier may also carry a squadron of ten advanced antisubmarine fixed-wing aircraft and about twenty other support aircraft.

The total investment cost of each such carrier "task force" or "battle group" can run from $5 to over $7 billion, with fifteen year operating costs running about the same level. (See chart for sample task force.)

THE BATTLE OF THE 1979 BUDGET

The Navy's view of the proper role of the aircraft carrier, however, is not shared by some top civilian officials in the Defense Department. This was indicated by a draft internal Defense Department document, the Consolidated Guidance, which was leaked to the press. The early draft of the Guidance, prepared by the staff of the Secretary of Defense, concluded that the aircraft carrier had no role on the flanks of NATO in support of a land war in Western Europe.

Interestingly enough, despite its larger shipbuilding program, the Ford Administration had reached a similar conclusion in a National Security Council study. It then deleted the large Nimitz class carriers from its program opting instead for midi-carriers.

The leaked Guidance and the cuts from the Ford shipbuilding program set the stage for a funding battle. The Armed Services Committees have traditionally shared the Navy's commitment to the aircraft carrier. In fact, they had previously objected to the Ford Administration's plan to buy the midi-carriers, advocating larger 90,000 ton Nimitz class carriers. Not surprisingly, this year the Committees rejected the Carter program and its rationale. The Committees instead came up with a series of conflicting, costly proposals.

The House Armed Services Committee approved, and the House authorized, a $2 billion, 90,000-ton Nimitz nuclear aircraft carrier and a $1 billion nuclear cruiser, neither of which were requested by the administration. Funds were added for almost $500 million worth of additional F–14, F–18, and A–7 carrier-based aircraft. At the same time, funds for development of the vertical or short-take-off and landing (V/STOL) aircraft were deleted to eliminate a competitor of the large carrier.

The Senate Armed Services Committee, on the other hand, while it approved the Nimitz-sized carrier (though not the nuclear cruiser) also approved $115 million to convert a large amphibious helicopter ship to a V/STOL aircraft carrier and to provide initial funds for construction of a large new amphibious ship (costing eventually $400 million) to replace the converted ship. At the same time, it cut the research funds for V/STOL aircraft from $72.4 million to $50 million, which would slow down the V/STOL development program.

The Administration response to these increases has been somewhat contradictory. After it was leaked, the draft Guidance was modified to take into account the view of the Navy on the carrier's role. Further, to head off the large nuclear carrier mandated by the Armed Services Committees, the Administration has now said it would accept FY 1979 funds for a small midi carrier costing about $1.4 billion.

THE AIRCRAFT CARRIER AND ITS MISSION

The central question remains whether the mission of the aircraft carrier is important enough to justify spending billions of dollars for new carriers and their support ships and planes. It has been claimed that the aircraft carrier would play an important role in a non-nuclear NATO–Warsaw Pact war by delivering strikes against Soviet facilities on NATO's flanks. However, in recent years, the Soviet Union has built a formidable force to sink or disable the carrier in an initial attack. The force includes a fleet of surface ships and aircraft that fire cruise missiles, and submarines that fire cruise missiles and torpedoes. Moreover, any time the carrier moves near the Soviet Union an anti-carrier task force of submarines and surface ships is dispatched to shadow and target the carrier. Where this is impractical the cruise missile attacks are supported by satellite reconnaissance that can locate the carrier. Even if the carrier survives, its limited numbers of attack aircraft are unlikely to do much damage in a non-nuclear conflict, given the extensive Soviet air defenses in the key areas.

Perhaps the carrier would be more effective delivering nuclear strikes in a NATO-Warsaw Pact conflict. But there are two problems with such a mission. First, it seems dubious strategy to respond to an attack in Western Europe with "tactical" nuclear strikes against the Soviet Union proper unless one intends to escalate the war to a general nuclear exchange. Second, even if the U.S intends such a mission, there are less expensive weapons available.

The mission described above, land attacks against the Soviet Union or other parts of the world, is called "power projection" or "projection of power ashore." Other power-projection missions cited by the Navy as requiring carriers are raids against airfields and other military targets in Eastern Europe in defense of NATO's central front, support of amphibious landings in Norway, Turkey or Greece to regain captured territory, peacetime and crisis deployments in the Mediterrannean, Indian Ocean and Western Pacific, and air strikes against countries other than the Soviet Union.

Some of these other tasks should be considered in choosing naval forces, as the Navy has suggested. But defense against every possible contingency is not only unnecessary but impossible. Some territory, such as Northern Norway, is like Berlin in that it cannot be directly protected by U.S. military power, but is instead protected by the threat of U.S. retaliation elsewhere. In other cases, such as attacks on Greece or Turkey, it seems reasonable to plan on the use of land-based aircraft for defense. Finally, raids in support of the central front in Europe can be performed more efficiently by Air Force tactical aircraft.

The other major mission of the Navy's general purpose forces is "sea control." This entails controlling the use of the sea for various purposes: attacking land targets to assure the flow of military or economic shipping to U.S. allies, and the prevention of others from using the sea to our detriment. While most of the Navy's arguments in favor of aircraft carriers have been arguments in favor of power projection, the Navy also claims a sea control mission for carriers. The Navy has argued that if the carrier does not challenge the Soviets in their home fleet waters, then the Soviet Navy will be able to come out and disrupt the military and commercial sea lines of communication between the U.S. and its allies. Although not discussed by the Navy, one might also consider the possibility that the Soviet Navy would be able to search for U.S. ballistic missile submarines or to deliver nuclear-armed cruise missiles against U.S. or allied land targets.

Yet three of the four Soviet Navy fleets—the Northern, Baltic and Black Sea—must pass through narrow seas and straights to reach the open ocean. Even the fourth, the Pacific, has only part of its fleet in a base that has direct access to the open ocean, the rest also being in constricted waters. The U.S. has powerful ASW forces including nuclear submarines, patrol planes and mines to blockade those forces. Large allied naval forces have also been built up for the purpose of helping with this mission. Worse for the Soviet Navy, the U.S. has developed—according to recent newspaper reports quoting defense officials—listening devices and digital processing equipment which allow the Navy to identify and locate almost every Soviet submarine from the time it leaves port.

Investment cost of sample carrier task force for operations in or near Soviet home fleet waters

[In billions of dollars]

1 Nimitz-class nuclear aircraft carrier (CVN)	$2.0
1 Nuclear cruiser with Aegis air defense system (CGN)	1.0
1 Destroyer with Aegis air defense system (DDG–47)	0.5
4 Destroyers (DD–963)	1.0
1 Nuclear submarine (SSN–688)	0.5
90 Aircraft	1.5
Total	6.5

Note: Additions might include one nuclear submarine, deletions might include either one of the Aegis ships or two of the other destroyers.

Moreover, it seems unlikely that the Soviets would place high priority on attacking U.S.-European sea lines of communication if they thought the U.S. could threaten the Soviet strategic submarine force, since submarine launched missiles are the strategic reserve of Soviet intercontinental forces. Indeed, sea control is not the primary mission of the Soviet Navy. Their Navy has been structured for an anticarrier role and to contend with the American threat to the strategic reserve, whether or not exaggerated.

ALTERNATIVES TO NEW CARRIERS

For the tasks which the Navy should perform there are lower cost, more effective Naval alternatives to buying new large, or even midi-sized carriers. Existing aircraft carriers can be modernized and overhauled to extend the useful service life from thirty to forty-five years. Ford and Carter have both included such plans in their five-year ship building programs at a cost of $500 million per carrier. The functions of aircraft carriers with conventional aircraft could

also be taken over by new systems, less vulnerable to Soviet anticarrier defenses. These include vertical or short take-off and landing (V/STOL) aircraft on large number of platforms, cruise missiles on aircraft, surface ships and submarines, and greater use of land-based maritime aircraft.

One of the central problems faced by new carriers and their protecting task forces, for example, is that their huge cost has meant that only a limited number could be procured. The Soviets are able to devote large military resources to the destruction of each carrier. The risks of concentrating so much of the Navy's air power in such a small number of ships could be overcome by using V/STOL aircraft. This would allow the Navy to preserve its air superiority over the seas without risking one-sixth to one-third of its force in a single confrontation. It would also enable the Navy to continue peacetime and crises deployments of aircraft capable of attacking land targets, should this still be necessary. The development of V/STOL aircraft would allow the Navy to fly fixed-wing aircraft from the twelve 20,000 to 40,000 ton amphibious assault helicopter ships. These plus the existing carriers would give the Navy twenty-four flat decked aircraft carriers. Moreover, V/STOL aircraft would give as many as 100 additional ships the capability to support high performance aircraft. In time of emergency V/STOL planes, supported by containerized support systems could even be flown off merchant ships. Unfortunately, the new administration has expressed doubt about the technology and value of V/STOL aircraft, slowing down both the second generation Marine Corps V/STOL aircraft—the AV–8B—which would be available in the early 1980's, and the first generation of the Navy's conversion to V/STOL, which would not in any case be available until the 1990's.

This slow down is another confusing signal. Many of those in Congress who favored the Administration's planned change in the aircraft carrier's role, supported V/STOL as a way to increase the number of aircraft platforms. Their position has been weakened. On the other hand, the advocates of more large carriers have found their position strengthened by the Administration's coolness to V/STOL development.

Another substitute for the carrier, in some missions, is the cruise missile which has only recently received wholehearted support by the Navy. The land attack Tomahawk, fired from surface ships and submarines, would be a cheaper and more effective vehicle for limited nuclear strikes against Soviet naval facilities, should this mission prove necessary. Moreover, two other cruise missiles, the Harpoon with a range of 60 miles and a second version of the Tomahawk, with a range of over 300 miles, will be available to be fired against surface ships—another mission the Navy claims for the aircraft carrier.

Finally, land-based aircraft could provide defense for land bases and military shipping against raids by Soviet naval aviation using Backfire bombers. Proposals have been advanced for (1) new high performance interceptors flying at speeds of 2000 miles per hour which would be combined with advanced early warning radar aircraft or (2) transport type aircraft, equipped with advanced radars and weapons to shoot down aircraft and cruise missiles, that could fly out and remain on-station with multiple crews for as much as 24 hours. Aircraft of this type may be particularly attractive since they could also have ASW and anti-surface ship capability, and could therefore participate in the blockading of Soviet submarines and surface ships. They could also provide the air defense capability. In any case both of these approaches appear to be much less costly than buying carriers.

CONCLUSION

The large, or even the "midi" aircraft carrier, and its protection are no longer worth the cost as a weapon against land targets in the Soviet Union. Updating and operating the existing carrier force may be worthwhile for other missions, but promising alternatives to the carrier are also available. Despite strong evidence that a new carrier is not needed, the Congress seems likely to agree to spending up to $2 billion for one in 1979 as well as additional funds for escorts and other protection.

The large carrier, built originally for the strategic nuclear mission to which it made only a minor contribution, has caused the Soviets to react by building up its Navy, particularly its submarine and air arms. These forces have, in turn, become a potential threat to U.S. sea lines of communication with its allies.

To break this arms race, the administration might consider a clearer public statement on the missions of the carrier and removal of the tactical nuclear weapons they now carry. Deemphasis of the carrier in its role against land targets in the Soviet Union will probably not, in the short run, break the momentum of Soviet building programs. In the longer run, however, such a move would influence the Soviet Union to slow the build-up of its Navy as it sees the threat of the carrier diminish.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million, or in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that three such notifications were received on August 21, 1978.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room S–116 in the Capitol.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY
Washington, D.C., August 21, 1978.

In reply refer to: I–6943/78ct.

DR. HANS BINNENDIJK,
Professional Staff Member, Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Near Eastern Country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

DEFENSE SECURITY ASSISTANCE, AGENCY,
Washington, D.C., August 21, 1978.

In reply refer to: I–4564/78ct.

Dr. HANS BINNENDIJK,
Professional Staff Member, Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Near Eastern country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.

DEFENSE SECURITY ASSISTANCE, AGENCY,
Washington, D.C., August 21, 1978.

In reply refer to: I–6124/78ct.

Dr. HANS BINNENDIJK,
Professional Staff Member, Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a NATO country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
Acting Director.●

INTEGRATED PEST MANAGEMENT

● Mr. LUGAR. Mr. President, integrated pest management is a promising technique for controlling weeds and insects, a critical element in producing food and fiber for our Nation and the world, without excessive use of chemical pesticides. Despite the significant economic and environmental benefits of IPM, it is not yet in use on a wide scale, and information on IPM is not yet available to many farmers who might be interested in this idea.

Mr. Phil Norman, the farm editor of the Louisville Courier-Journal, has written an excellent column focusing on a successful IPM experiment in Kentucky. Mr. Norman notes that similar programs are in operation on 55,000 acres in 20 Indiana counties. He points out that the key to integrated pest management is the employment of trained "scouts" to monitor crops and make accurate counts of pests present.

I have sponsored legislation which would include IPM jobs in CETA employment programs, and my proposal has been approved in the Human Resources Committee. I am confident that this provision will not only provide productive jobs for rural youth, but will promote the implementation of IPM techniques.

Bob Abrams, a pest-management supervisor at Purdue University, sums

up the IPM story in a quote from the Courier-Journal article:

Economically and environmentally, it's the only way to go.

I ask that the entire article be printed in the RECORD:

The article follows:

[From the Louisville Courier-Journal]

THE SCOUTS ARE THE STARS IN NEW PEST-MANAGEMENT PROGRAM

(By Phil Norman)

ELKTON, KY.—Eston Glover, a Todd County farmer, can't seem to say enough good things about Kevin Perry, a sophomore at Murray State University.

If it hadn't been for Perry, the struggling grain farmer said last week, he would have spent hundreds of dollars to spray his corn fields with unneeded insecticides.

A lot of his neighbors were spraying for corn bores, "and I was itchy," Glover said. But he said he got detailed reports from young Perry. And he was pleased to learn that his own fields didn't have enough insects to force him into a costly spraying program.

Perry is working this summer as a "pest-management scout"—a new kind of seasonal job that some farm leaders think will become an increasingly important part of American farm life.

He works for Glover and about 10 other farmers, visiting each of their fields once a week to count weeds, bugs and diseased or damaged plants in selected rows of corn, soybeans and other crops.

Perry and seven other young farm scouts are working with University of Kentucky scientists in a pilot project involving 50 farms in Todd County. The project is part of what some experts see as a promising new drive in the battle against a multitude of pest that each year seem to be destroying more of the nation's food before it ever leaves the fields.

The costs amount to more than $75 million in Kentucky corn fields alone, according to UK estimates. Weed damage to corn is estimated at $60 million, with damage from major insects placed at $12 million and pest-control costs at $4 million. Kentucky soybean yields are reduced by about $63 million a year as a result of weeds, UK pest-control spokesmen said.

The new approach is aimed mainly at letting farmers know when and where they should apply chemicals to kill the most weeds and insects at the least cost. And, by encouraging some farmers to spray less, or at least more judiciously, the program could also reduce environmental damage from toxic insecticides, according to some agricultural leaders.

The idea is simple, the leaders say. In an era of mechanized food production, many farmers don't have time to climb down from their tractors to make detailed inspections of their fields. But relatively inexpensive summer workers—the Todd County scouts get $3 an hour—might be able to do it for them.

And, they add, it really isn't such a new system, having been originated years ago in the cotton fields of the South. It is new, however, to many grain farmers who have been rapidly expanding their acreage and running into a succession of new weed and insect problems in recent years.

The U.S. Department of Agriculture (USDA) this year offered some money—a total of about $2.9 million—and services for "integrated pest management" programs in 33 states, including Kentucky and Indiana. The ground rules were that public funds would be used to train and supervise scouts but that the farmers themselves would have to pay the summer workers.

UK got about $30,000, which has been devoted largely to the project in Todd County, where a non-profit pest-management group has been organized by farmers. To meet the scout payroll, the farmers pay a one-time fee of $1.50 for each of the nearly 15,000 acres they have put in the program.

The program was showed off last week in a "press tour" of some Todd County farms, where several farmers expressed enthusiasm over the new system of spotting weeds, insects and plant diseases.

None was more enthusiastic than Glover, who said he has been farming only about three years and needs advice on raising his 600 acres of corn and soybeans.

Joining the program "has been a bigger help to me than anything I've done," Glover said. He added that "I can't say enough" for Young Perry. "He's an awful quiet boy, but he got out there and dug around, and if there was something wrong, he wrote it on the sheet."

Some larger farmers, including Laurence Teetes, who raises about 2,600 acres of corn and soybeans, also had praise for the student helpers.

"My operation is so large and intensive that you get in trouble before you know it," Teeter said. With the scouting reports, he added, "we see our problems as they develop and don't find all of a sudden we're in a crisis. . . . I kind of rely on my scout to plan (chemical) applications. We use low rates, and get the weeds when they're small."

It was noted that some of the scouts are agriculture students. Most underwent three days of special training at UK. And all work under the supervision of Marvin Davidson, the Todd County farm agent, and others from UK. The supervisors use the scouts' information to help farmers deal with pest and plant-disease problems.

Such experiments have been under way, in more limited ways, for the past few years. UK, for instance, has been involved in some alfalfa programs in which all costs were covered by public funds.

But Harley Raney, pest management coordinator at UK, said the Todd County program could inspire a major expansion of pest-management efforts in Kentucky. The program already is operating in a small way in Washington County, he said, and he hopes to see more counties become involved next year.

Expansion could mean programs run by private consultants as well as nonprofit corporations, Raney said. He said farmers probably would have to start paying the wages of supervisors in addition to those of the scouts. But the costs still shouldn't be more than $3.00 an acre, he said, and farmers in most years would gain more than that in increased yields or lower insecticide costs.

In some circumstances, Raney noted, scouting reports actually could lead farmers to use more pesticides. But he said the system should bring a reduction in the use of chemicals merely as "insurance" against possible problems.

A USDA spokesman, B. D. Blair, said scouting programs should mean more profits for farmers and should also be helpful in pest and plant-disease research across the country. He added that "most of us are convinced there also will be environmental gains."

Bob Abrams, a pest-management supervisor at Purdue University, said experimental scouting programs are being conducted on 55,000 acres in 20 counties in Indiana. No Southern Indiana counties are involved in the current effort, he said, but some are expected to be included next year.

A lot of farmers have been spending $6 to $8 an acre every year for soil insecticides, Abrams said. With scouting reports and advance planning, most farmers might have to make such applications only once every three years, he said.

"Economically and environmentally, it's the only way to go," Abrams said of the new pest-management approach.●

THE SITUATION IN CAMBODIA

● Mr. McGOVERN. Mr. President, in the last day or so a great deal of attention has been focused on my efforts to call attention to the ugly events which have been taking place in Cambodia, and to explore steps which might be taken to end these atrocities. In a few cases, ideas raised in the form of questions to State Department witnesses have been interpreted not as possibilities but as my recommendations. Therefore, I thought it might be useful to address the matter more fully.

Article 42 of the United Nations Charter authorizes the United Nations Security Council, in which the United States sits as a permanent member, to "take such action by air, sea, or land forces as may be necessary to maintain or restore international peace and security." That is the authority which I believe the Council should consider using with respect to Cambodia.

I have not recommended, nor would I support, any unilateral American intervention in Cambodia. Indeed, if the Security Council were to decide that a peacekeeping force could be useful, it would probably exclude forces from any of the major powers as it has done, for example, in the Middle East. Considering our own long and painful involvement in Indochina, as well as the risk of great power confrontation, I think that would be a prudent decision.

We cannot, however, claim leadership on the human rights issue without making a persistent effort to curb the monstrous activities of the Cambodian regime. We have recently had a widespread outcry in this country over the unjust prison terms that two Soviet dissidents will have to suffer. I have agreed with that protest and have taken part in it. But how much greater is the crime when an estimated 2 million innocent Cambodians are systematically slaughtered or starved by their own rulers. Certainly this genocidal conduct requires the attention of the world community. And certainly the United States, as a leading proponent of human rights, has an obligation to place it on the international agenda.

My thoughts on these matters are amplified in several documents which I will submit for the RECORD at the conclusion of my remarks. The first is a newsletter released on May 29 of this year in which I suggested that—

We must, at a minimum, speak out against these tragic events to demonstrate that our commitment to human rights is genuine. Beyond that, we should prevail upon international organizations such as the United Nations to exert themselves against Cambodia's conduct.

Subsequently, as an amendment to the State Department authorization bill, S. 3076, the Senate adopted language which I proposed—and which has been approved by the House-Senate conference, declaring in part that—

Congress urges the President to move aggressively to support multilateral action by the United Nations and other international

organizations, and to encourage bilateral action by countries having more extensive relations with Cambodia and Uganda, to bring about a lessening of such brutal and inhumane practices.

Finally, I have the transcript of an interview with Susan Spencer and Richard Threlkeld on the CBS Morning News program this morning, which amplifies my views on the concepts I raised in the Foreign Relations Committee meeting yesterday. In that interview I indicated:

What I am proposing is the same thing I proposed 15 years ago—that when there's a threat to the peace and security of an area, whether it's Southeast Asia or wherever, our obligation as a member of the United Nations is to bring that matter before the Security Council and call for appropriate action.

Mr. President, I ask that the materials I have described be printed in the RECORD.

The material follows:

THE NEW BARBARIANS: A CHALLENGE TO HUMAN RIGHTS

(By Senator GEORGE MCGOVERN)

Officials of the Carter Administration have frequently declared that human rights is the "centerpiece" of current American foreign policy. That is a commendable objective. It cannot be credible, however, unless special attention is paid to two regimes whose records on human rights are the most appalling in the world.

In human terms, it is clear that the costliest human rights violator is the present government of Cambodia under Pol Pot. Cambodia is a small country of only seven million people. Yet on the basis of refugee accounts it is reliably estimated that a minimum of 500,000 people—one in fourteen Cambodians—have died since Pol Pot came to power a little more than three years ago. The numbers lost to execution, starvation, and disease could range as high as two million.

Much of the slaughter of Cambodian innocents came during the forced evacuation of the capital city of Phnom Penh, which has shrunk from two million people down to about 20,000. People of every age, and regardless of health or capacity, were ordered to leave their belongings and migrate to the countryside in what has become known as a massive "death march." Those who refused, or who could not keep pace, were routinely killed—often beaten to death with hoes or shovels, presumably to avoid the "waste" of ammunition.

Pol Pot and his henchmen have attempted to hide these grisly events from the outside world. Only nine countries have been allowed to maintain embassies in Phnom Penh, and even those diplomats are literally kept prisoner in their missions. And while it declares itself "Marxist", the Cambodian government carries out a brutality which knows no ideology. While wiping out its own citizens, it has also launched a war against neighboring Vietnam.

The United States has no direct influence over Cambodia. There is no American aid or trade or diplomacy to cut off. But obviously we must, at a minimum, speak out against these tragic events to demonstrate that our commitment to human rights is genuine. Beyond that, we should prevail upon international organizations such as the United Nations to exert themselves against Cambodia's conduct. And we should also urge appropriate action by countries, such as the People's Republic of China, which could bring direct pressure to bear by virtue of their aid to Cambodia.

The other most blatant human rights offender—Uganda's Idi Amin—does not share the shyness about publicity practiced by Cambodia's rulers. Last year he actually boasted before the Organization of African Unity that "I have eaten my enemies before they could eat me." He was not speaking figuratively. While claiming to be a Moslem, Amin carries out animistic beliefs which include a practice of eating the organs or flesh of their victims in the conviction that they thereby acquire the power of those they kill. That is the basic, twisted religious philosophy of cannibalism.

Since Amin took over, an estimated 300,000 of Uganda's ten million people have been murdered. Many of those have suffered mutilation or ritual killings. Executions have been ordered on such grounds as that the victims wore glasses or had tin roofs on their houses—signs, in Amin's diseased mind, that they were agents of Western imperialism. It is beyond any doubt that Uganda is ruled by a genocidal madman.

In this case there is direct action which might well have an effect. American purchases of Ugandan coffee amount to over a third of Uganda's export earnings. Ordinarily we have to think twice about using economic boycotts as a weapon for enforcing human rights because it can have the effect of compounding the plight of the victims—adding an economic penalty to the physical danger they must already endure. But in this case a trade boycott is entirely appropriate. The poor Ugandan farmers do not see the returns from the coffee we buy; rather, Idi Amin uses the money to pay his hired killers. I have, therefore, joined with Senators Hatfield, Weicker and others in sponsoring a complete ban on American purchases of Ugandan coffee.

Beyond this, the Foreign Relations Committee has approved my amendment noting in both Uganda and Cambodia—

". . . governmental practices of such systematic and extensive brutality as to require special notice and continuing condemnation by outside observers."

The amendment also calls upon the President to "move aggressively" to support multilateral action against Cambodia and Uganda and to encourage bilateral action by countries that have more extensive relations with these gross violators of human rights. I am confident that the full Senate and the House will agree to these provisions.

Albert Einstein once observed that it is a dangerous world we live in, not so much because of those who would do evil, but because of those who would do nothing about them. In the 1930s and 1940s that was true about Hitler. I am convinced that it is also true of the monstrous governments in Cambodia and Uganda today.

FOREIGN RELATIONS AUTHORIZATION ACT, FISCAL YEAR 1979 (S. 3076)

ATROCITIES IN CAMBODIA AND UGANDA

SEC. 417. (a) Congress finds that reliable reports of events in Cambodia and Uganda attest to the existence of governmental practices in those countries of such systematic and extensive brutality as to require special notice and continuing condemnation by outside observers.

(b) Recognizing the limited direct influence of the United States in each such country, Congress urges the President to move aggressively to support multilateral action by the United Nations and other international organizations, and to encourage bilateral action by countries having more extensive relations with Cambodia and Uganda, to bring about a lessening of such brutal and inhumane practices.

(c) Not later than January 20, 1979, the Secretary of State shall transmit to the Speaker of the House of Representatives and the chairman of the Senate Committee on Foreign Relations a report describing fully and completely actions taken pursuant to subsection (b).

(d) It is the sense of the Senate that the President should—

(1) prohibit the export of military, paramilitary, and police equipment to Uganda;

(2) declare that the appropriate consular officer may not approve any visa application of any official or employee of the Government of Uganda for the purpose of military, paramilitary, and police training within the United States without the review of the appropriate official of the Department of State in Washington to determine that the Government of Uganda has demonstrated a proper respect for the ruel of law and for internationally recognized human rights; and

(3) instruct the permanent representative of the United States to the United Nations to submit to the United Nations General Assembly for its consideration a resolution imposing a mandatory arms embargo on Uganda by all members of the United Nations.

CBS MORNING NEWS (EXCERPT), AUGUST 22, 1978

SUSAN SPENCER. It's estimated that during the three years of Communist rule in Cambodia as many as two-and-a-half million people have starved to death or been executed. To the surprise of many, Senator George McGovern, a long-time dove, yesterday suggested that the only way to deal with the Cambodian sit—situation may be through military intervention. Senator McGovern is with us this morning, and I suppose the first thing that we need to find out is a little bit more of what you mean by that.

Senator GEORGE MCGOVERN [D-South Dakota]. Well, first of all, let me say I was opposed to sending in American troops to Southeast Asia in the 1960's. I'm still opposed to any kind of a repetition of that operation. It was a disastrous mistake in the '60's; it would be a disastrous mistake again. What I am proposing is the same thing I proposed 15 years ago—that when there's a threat to the peace and security of an area, whether it's Southeast Asia or wherever, our obligation as a member of the United Nations is to bring that matter before the Security Council and call for appropriate action. Here you have a situation where in a country of seven million people, possibly as many as a third of them have been systematically slaughtered by their own government. This wasn't done by the Vietnamese, by Ho Chi Minh or by anybody else; it was done by a band of murderers that's taken over that government. What I'm suggesting is that the United Nations has an obligation to respond in some way. We at least ought to raise the issue. Maybe nothing can be done, but even raising the query, forcing a debate before the Security Council, would indicate to the government in Cambodia, and others so inclined, that the international community has an interest in these matters.

SPENCER. You said, in the middle of your answer, maybe nothing can be done. What would make you think that any kind of international military operation would be successful?

Senator MCGOVERN. Well, there are various things that we ought to consider. I introduced a resolution earlier this year, which was passed into law, that calls on our government to explore, both through multilateral channels (that's shorthand for the United Nations) or through other nations that have influence in Cambodia, meaning China and other countries——

SPENCER. There aren't too many that have much influence——

Senator McGOVERN. We don't know to what extent any nation can influence events in Cambodia, but we're not going to know until we try. We've seen, over the last few months, an enormous hue and cry about the mistrial given to two citizens in the Soviet Union. I think it was proper that we spoke out against that. But we did that in the name of human rights. Now, if we're going to be consistent about our concern over human rights, how does one explain the fact that there has been an enormous outcry against two men's being sentenced, we think wrongly, for criticizing their government in the Soviet Union, and then we stand by idly with very little comment when two million people are slaughtered by their government in Cambodia?

SPENCER. How do you explain it?

Senator McGOVERN. I think we've tried to put that part of the world out of our minds. We had such a disastrous experience in Vietnam, I think it's very painful for Americans to think about this part of the world. I'm very encouraged that Congressman Montgomery's mission which is now in Vietnam is exploring with them the possibility of opening up trade and diplomatic and cultural exchange. I think that's all to the good. But meanwhile, in Cambodia, a few miles away, you have this horrible slaughter going on, and the tendency is just to close our eyes to it. It's that double standard that concerns me.

SPENCER. I know we have——[crosstalk]

THRELKELD. Senator, this is Dick Threlkeld in New York. The wires and the newspapers tended to pounce on your at least suggestion or inquiry yesterday about some kind of military intervention, I suppose because they—they saw some inconsistency with—with your being remembered as a peace candidate. Do you see an inconsistency there?

Senator McGOVERN. No, I don't see any inconsistency at all. First of all, let me say I have never been a pacifist. When Hitler was on the rampage, thirty or forty years ago, I was one of the first ones to volunteer. But I'm not suggesting that we send in American troops to Cambodia, any more than I favored that action in Vietnam fifteen years ago. Under Article 42 of the United Nations Charter, however, that body does have an obligation to deal with threats to the security, the peace of the world.

And here's a case where it seems to me the United Nations, at a time when Third World countries are in the majority, has an obligation to deal with one of their own members, one of their own states. I'm talking about a small underdeveloped country that has gotten out of control and is systematically slaughtering its own citizens. That's quite a different situation than we faced in Vietnam in the 1960's.

SPENCER. You mentioned that we should apply pressure. It seems, though, that the Vietnamese, who periodically are at war with Cambodia, have found that the Cambodian citizens, at least the villagers, seem to support the government. What lever do we have to break in—to break that?

Senator McGOVERN. I find it hard to believe that there's mass support for the Cambodian government.

SPENCER. I was—I was kind of going by Mr. Pike's testimony yesterday.

Senator McGOVERN. We really don't know an awful lot about it. Our intelligence sources aren't very good there. We've been cut off from contact. We're pretty much dependent on reports of foreign journalists and other dipjlomats in the area. But the evidence is that about nine men are controlling that government in Cambodia; that they don't have the loyal infrastructure out across the country that was true of Ho Chi Minh in Vietnam, where the late President Eisenhower said eighty percent of the people would have voted for him. Even in a free election, I can't believe that a government that has systematically killed off a third of its citizens is a government with strong support out in the countryside. In any event, let me stress that what I'm calling for here is an evaluation of this matter by the United Nations. Let's look into it, collect the intelligence that's available and then make a judgment whether it's feasible to send in an international peacekeeping force.

SPENCER. I'm sorry, we're out of time. Thank you very much for coming in this morning.

Senator McGOVERN. Thank you.●

LOW VISION NEED NOT MEAN DEPENDENCE

● Mr. CHURCH. Mr. President, the Senate Committee on Aging recently conducted a hearing on vision impairment among older Americans.

As I indicated in my opening statement, there is evidence of startling increases in vision loss among older Americans, who already account for more than the majority of such cases today. Witnesses testified that from four of the five leading causes of blindness—diabetic retinopathy, cataracts, senile mecular degenerations, and glaucoma—the chances of becoming blind increase dramatically with age.

This, coupled with the timing of the increase in our population of older citizens, means that in just about 20 years the population of severely vision-impaired older persons will be larger than the National Center for Health Statistics current count of severely vision-impaired persons of all age categories.

This means that we must start now to take a close look at existing and potential programs which serve our vision-impaired population. It also means that we must come to understand that low vision and even total loss of vision do not necessarily mean dependence.

In fact, one of the most heartening aspects of this hearing was the testimony given on just that point: Dr. Gerald Friedman, associate director of the Low Vision Rehabilitation Center in Boston, said:

One particular case is worth mentioning. It is an 87-year-old gentleman from rural Vermont. He has lived on his farm for 87 years. This man was referred to me for a low vision problem. He has about 20/200 vision.

When I was talking with this man he said, "Doctor, I want you to save my life." I was taken back slightly by this remark because in reviewing the medical history there was no life threatening disease present.

He said, I have lost my functional vision. I can't maintain my farm any more and I can't take care of my wife. His wife has severe arthritis and also has a visual problem.

By the way, the alternative they had for this man was to move them to a major city and place them in a nursing home.

With the low vision aid this man now can walk into town and do the shopping, pick up the mail, walk back to his little farm. He can do the cooking chores, he can read to his wife. He even drives around in a small tractor taking care of the farm. So the financial implications of this are also driven home. This aid was under $100. I don't think we have to think too much about what the cost would have been to maintain him and his wife in a nursing home for the rest of their lives.

Donald Wedewer, director of the Division of Blind Services in Florida, described a group from the retired senior volunteer program which works hand in hand with the State rehabilitation agency in providing group training in a community too small to have its own rehabilitation office.

It is clear that we must closely examine the priorities of present programs, because it is a fact that less than 10 percent of the total resources for help to vision-impaired persons is directed to the elderly. It is also clear that we should not repeat the previous errors of the "blindness system"—so well outlined in the classic "The Making of Blind Men"—that is, the creation of a new bureaucracy, more responsive to its own needs than to its clients.

The examples I relate, to my way of thinking, tell us that what we do need to create are innovative ways of helping people maintain their independence, and that whatever new programs we undertake should be keynoted not just by the program budget but by the ways in which their clients can make the program responsive to their needs and accountable for its performance.

Traditional patterns of service delivery are not marked by these characteristics. Perhaps this is why we have a maze rather than a service delivery system. Our witnesses gave us many examples of what happens to an older vision-impaired person lost in this maze. The director of the Center for Independent Living in New York, told us, for example, that there is usualy a 5-year span between the onset of vision impairment and referral to a rehabilitation system.

The committee was also told that much must be accomplished in the professional education of rehabilitation specialists, ophthalmologists, and optometrists. Many doctors feel that their duty is done when the case is diagnosed and treated. Fortunately, many others in this field know that this is not the case, and many low-vision clinics now have their own rehabilitation units.

It is also clear that we must, ourselves, be better informed about low vision and blindness. Chances are that, after age 40, we wear glasses. If we approach anything near our expected lifespan, we can expect some deterioration and, as an ever-increasing number of us move into our seventies and eighties, we may encounter a loss sufficient enough to need some training and low-vision aids to permit us to continue our independence.

The Senate Committee on Aging will soon publish a special health care status report which will comprehensively treat the issues I have outlined. Mr. President, I ask that my opening statement be printed in the RECORD.

The statement follows:

OPENING STATEMENT BY FRANK CHURCH, CHAIRMAN, U.S. SENATE SPECIAL COMMITTEE ON AGING, AT A HEARING ON VISION IMPAIRMENT AMONG OLDER AMERICANS

Today, the Senate Committee on Aging will take testimony on many issues related to vision problems and care for older Americans.

Our immediate goal is to examine issues related in one way or another to legislation intended to help visually impaired persons

to cope better with everyday life or to receive desperately needed care or devices.

But our additional goal is to draw from today's hearing and from other sources the information needed to put this one need of older persons into proper perspective, now and in the future.

We will, in the next few months, issue a "Health Care Status Report" on the subjects before us today.

We believe that this document will have direct relevance to all forthcoming discussions of a national health care plan for all age groups.

We also believe that it will be valuable in preparations for the 1981 White House Conference on Aging authorized in the 1978 Older Americans Act Amendments which the House and Senate have approved.

One of the issues which will certainly receive our careful attention is the limited role that Medicare has in helping older persons with vision problems.

Medicare is often called a leaky umbrella, providing important protection in many respects, but leaving big holes where other protection may be desperately needed.

I have gone further. I have called Medicare a program better designed to meet the needs of the young than the old, since it does a good job in providing protection against costly institutional charges and medical bills for short-term illness.

But when it comes to the widespread and sustained need of older persons for dentures, eyeglasses, hearing aids, and in-home services, Medicare falls short.

And so, we will ask questions about Medicare and vision loss.

But our purposes is much broader.

We will hear, during this morning's session, predictions about the startling increases which will soon occur in blindness and vision loss among older persons in this Nation, particularly among the very old.

A soon-to-be-released study by the Division of Social and Demographic Research of the American Foundation for the Blind states that there will be about 1.5 million older Americans with severe vision impairment by the year 2000, 80 percent of whom will be 75 years of age and older.

This means that in just about 20 years the population of severely visually impaired older persons will be larger than the National Center for Health Statistics 1971 count of severely vision impaired persons of all age categories.

Within recent months, we have seen much written about the "graying" of our population.

We talk about its impact on retirement income systems, work force projections, and even our educational system.

This hearing may help us make the additional point, rather emphatically, that we must also gear up to meet—far better than we are now doing—the special needs of those whose sight becomes less dependable with passing years, even to the extent of total loss.

And it will also help us make or explore other points:

Whether the many special programs to help the visually impaired fall into categorical traps, often producing despair or frustration, rather than assistance.

If the goal is to prevent dependency, what use is being made of models already provided, including the stimulating and heartening work to be described by one of our witnesses today, the Director of the New York Infirmary's Center for Independent Living?

Why has there been, as reported to this Committee, a 5-year gap between the onset of disability and the linking with any rehabilitation services?

What linkages should there be between existing therapy and rehabilitation opportunities and area agencies on aging under the Older Americans Act?

Whether, as in so many other "age-ist" attitudes toward older persons, there may be a tendency to "write-off" the older victim of vision problems as beyond help or concern.

Whether institutionalized patients are receiving adequate vision care. There is good reason to believe that many are not, and we want to know why.

I will close this brief statement by thanking the American Foundation for the Blind, the National Federation of the Blind, and the American Optometric Association for agreeing to provide this Committee, not only with additional background material, but with specific recommendations for legislative action.

I would also like to thank Senator Harrison Williams, Chairman of the Senate Committee on Human Resources, for expressing his personal interest in these proceedings and for taking such effective action. Senator Williams has introduced a bill to provide Medicare coverage for low vision services. The same is true of Senator Jennings Randolph, Chairman of the Subcommittee on the Handicapped and—like Senator Williams—a former member of the Senate Committee on Aging. The Senate today is scheduled to act on Senator Randolph's amendments to the Rehabilitation Act, which would provide rehabilitation services for older persons.

Our witnesses today are: Mr. August Colenbrander, Professor of Ophthalmology and Medical Director of the Pacific Medical Center's Low Vision Clinic; Dr. Gerald Friedman, Optometrist and Director of Retina Associates Low Vision Clinic in Boston; Dr. Douglas Inkster, Director of the New York Infirmary's Center for Independent Living; and Donald Wedewer, Director of the State of Florida's Division of Blind Services.

Before we begin, I want to take note of the special arrangement of the room. As you can see, this is not the usual formal hearing setting. I have asked for this arrangement because the problems of vision impairment are so linked that I want to encourage as much informal exchange among our witnesses as possible.

We are going to begin with Dr. Colenbrander who will help us set the scene by describing the leading causes of vision impairment. Then I would like to ask Dr. Friedman to let us use his low vision simulators so that we can more fully understand what these vision impairments mean on a very personal level.●

COMPLETION OF ESSENTIAL INTERSTATE HIGHWAYS

● Mr. DOLE. Mr. President, the directive of S. 3073 is to expedite the completion of the Interstate Highway System by placing a time limitation on construction and providing funds for replacement and maintenance of existing highway. The Senator from Kansas agrees with the need to complete this remaining highway system due to spiraling inflation costs and public demand for safer transportation roadway. But there exists in this proposal, Mr. President, a section that deals unfairly with 16 States, including the District of Columbia. This section is aimed at the so-called essential gap.

DESIGNATION AS "ESSENTIAL GAP"

An "essential gap," according to the Department of Transportation, is that section of highway that must be completed to provide a connected intercity system and therefore under this proposal will receive priority funding and the highest priority in the bill for completion. However, this bill makes a change in the present apportionment formula as to provide that 50 percent of the apportionment to be distributed to States based upon the cost to complete the "essential gaps" in each State. With this formula, 34 States will gain moneys to complete these sections of roadway with 16 States, including the District of Columbia, suffering losses. Kansas is one of those States that will suffer a loss and also one of those States with an "essential gap," although not designated as such by the Department of Transportation, located in its largest metropolitan area—Kansas City.

I–435 was projected by the Kansas Department of Transportation many years ago to serve as a major artery for the Kansas City Metropolitan Area. Kansas City International Airport was built accordingly. However, because Kansas, like many other States, has exhausted its funds for the fiscal year of 1978, this needed roadway cannot be finished.

In addition to lack of funding, the Department of Transportation have refused to designate the roadway as an "essential gap" because they believe that it does not constitute a vital connection to an intercity system.

RESULT IS ECONOMIC LOSSES

Mr. President, Kansas City has experienced a high growth rate in the past decade. As a consequence in all developing metropolitan areas, not only does physical radius of the area increase, but economic and social aspects of the city expand. This growth naturally allows growth of its services, therein transportational means in delivering those services must also grow. At this time, however, the transportation system of I–435 is incapable of accommodating the thousands that have not only decided to make Kansas City their home, but also those who occasionally visit and serve the city.

Mr. President, with delay in completion of this roadway, undoubtedly, delay will occur in delivery of these services to the metropolitan area. And the longer we wait to complete these spans of highway the more inflationary their costs will become. Economic loss will occur not only to those providing services to the citizens of the area but economic loss will be inflicted upon the taxpayer due to higher and higher construction costs for each year the project is delayed.

DEFINITION IRRELEVANT

In actuality, Mr. President, the definition of such an area is irrelevant. What is of importance here, as in many other metropolitan areas across the Nation, is the completion of such roadway that has been planned for so long, as in the case of Kansas City. For many areas, future building, such as airports, has been based on transportation ability, and as in the case of Kansas City, there is no alternative. The present apportionment formula would expedite completion of these vital links rather than subject them to inflation's constant rise.

The Senator from Kansas realizes that this may be a particular case in point. Nevertheless, there still remains many areas across the United States like that of Kansas City. I urge the Senate and

House conferees to reconsider the apportionment formula in this section of the proposal and to retain the present formula.●

GENOCIDE IN PARAGUAY

● Mr. ABOUREZK. Mr. President, the genocide of the Ache Indians of Paraguay is continuing, although recently we have heard little in the press about this tragic situation. Now Prof. Richard Arens and Survival International, a London-based organization concerned with the survival of tribal peoples, have issued a report on the untimely death of a Paraguayan priest who worked closely with the Ache Indians, Rev. Nicholaus d'Acunha. The manner of his death has raised some questions in light of his concern for the Ache Indians and the perseverance and zeal with which the Paraguayan authorities have been carrying out their program against these Indians. The Senate has already demonstrated its displeasure at Paraguay's human rights situation by cutting military aid, but we should note with care these firsthand reports about the continuing genocide practices against the Ache Indians who live in the forests of Paraguay. I ask that the report be printed in the RECORD.

The report follows:

REPORT

Survival International, which is a registered charity and based at 36 Craven Street, London WC2, have many people "in the field" who report regularly on the ways in which tribal peoples, particularly in South America, are being treated by various Governments.

One of their associates in Prof. Richard Arens, who is the Professor of Law at Temple University, Philadelphia, Pennsylvania 19122.

Survival International has received the following communication from Richard Arens. We thought you may find it of interest.

Bruce George, Member of Parliament, is actively engaged in raising the problems of the Indians, and wishes to be associated with Professor Arens' comments. He has already approached Mrs. Judith Hart, MP, to stop all British Government Aid to Paraguay.

(Priest who provided sanctuary to escaped Indian slaves and who sought to communicate further information on atrocities in Paraguay dies mysteriously.)

In a terse note, devoid even of a cursory expression of regret, the US State Department replied recently to the inquiry of Congressman Donald Fraser concerning the Rev. Nicholas d'Acunha, Roman Catholic priest in charge of the Mission of St. Augustine near Laurel in Paraguay. There was nothing mysterious about the disappearance of the priest said the State Department. He had died in October of 1977 "of natural causes", specifically a heart attack. A replacement priest, the note continued, had assumed the duties of Father d'Acunda.

Whatever the cause, the death of Father d'Acunha was most convenient to the Paraguayan government. It would seem that it was convenient to the executive branch of the US Government as well. Father d'Acunda was on a list of six witnesses submitted to the Congressional Committee presided over by Congressman Donald Fraser in hearings contemplated this spring but never held—on conditions of human rights in Paraguay.

Father d'Acunda had been called in to conduct burial services for some 30 Indians, shot down in a premeditated ambush in a Paraguan forest in 1974. This he explicitly told Professor Richard Arens in late August, 1977.

This information was essentially confirmed by the State Department in its letter to Congressman Fraser of a week ago although at the time in question (1974) the State Department was vigorously denying the existence of any man-hunts whatever in Paraguay. Father d'Acunha had reported that mass murder to the Paraguayan authorities. But there were no prosecutions although promises were made that man-hunts would be curbed.

Since that time, Father d'Acunda, who ran the only Indian Reservation that Professor Arens saw both with respect for the Indianness of its residents and with unremitting and effective concern for their physical welfare, would traverse the nearby countryside to tell those who would listen that the Church condemned as murderers those who killed Indians and that in fact any wilful mistreatment of an Indian was a mortal sin.

He did more. His enclave was a sanctuary to Indians from far and near who had escaped slavery and it was on his reservation that Professor Arens interviewed a number of former slaves who displayed the scars of their mistreatment.

Little of all this had passed unnoticed. On several occasions Father d'Acunha was threatened if he talked and threatened with his life. He told Professor Arens in late August 1977 that he anticipated the imminent resumption of man-hunts and that there were numerous other matters of flagrant Indian mistreatment that he wished to present in sworn form in a setting in which he was less likely to be overheard. Arens and Father d'Acunha then discussed the ways and means of contacting the US Embassy.

Arens recalls him as he left, a tall, vigorous and dedicated man, apparently in his early forties at the height of both his intellectual and physical powers. Within weeks, Survival International was informed that Father d'Acunha was dying of a heart attack. It was also informed that Father d'Acunha told the members of the Peace Corps who were present that he wished to sign a sworn statement as to atrocities committed against Indians. The ostensible representatives of the Peace Corps strongly counseled him against such action. Nor did they seek removal of the ailing Father d'Acunha to a hospital by helicopter which could easily have been made available through the intercession of the Embassy.

Mere incompetence or foul play?

When asked this question in Philadelphia, Professor Arens replied that of course he could not tell, "but that given the circumstances, one possibility was at least as likely as the other. What is clear," he continued, "is that men and women of good will throughout the world have been diminished by this death. The effort to aid Indians in Paraguay has been discouraged. And those most directly and tragically affected by Father d'Acunha's death are of course the dwindling forest Indians near Laurel, Paraguay, for whom Father d'Acunha literally gave his life."●

EMPLOYEE EDUCATION ASSISTANCE BILL—S. 2388

● Mr. BAYH. Mr. President, I am happy to cosponsor the employee education assistance bill, S. 2388, introduced by the Senator from Oregon (Mr. PACKWOOD) and the Senator from New York (Mr. JAVITS). This bill would amend the IRS Code to permit employees to exclude certain educational assistance programs from their gross incomes.

Mr. President, I am concerned about reports by eminent national organizations, such as the Carnegie Commission, that have pointed to a glaring blindspot in the financing of higher education in America; namely, that no support is being given to students, mostly adults, who participate in recurring or lifelong education. Even though college attendance among people 35 and older increased 50 percent between 1973 and 1975, existing Federal grant and loan programs have not been modified to assist these types of students. The Federal Government has not even made it easier for the private sector to provide assistance. At present, IRS rulings require employees to pay income tax on any educational support received from their employers which advances their careers or prepares them for a new position. Moreover, employers must withhold taxes from the salary of an employee when he or she does provide such continuing education opportunities. As a result, thousands of people are being denied the opportunity to advance—not because they are less able or less motivated, but because they cannot afford to.

Well, Mr. President, we cannot afford to continue our policy of downgrading the efforts of employees who wish to update their knowledge. America is becoming increasingly challenged, intimidated, and even frustrated by the ever-increasing complexity and enormity of the public policy problems that we, as a nation, are called upon to address. We live at a time, as well, where the speed of events and explosion of knowledge, sparked by enormous advances in technology, only additionally compound our domestic difficulties and toughen the competition for technical superiority abroad. These circumstances have created a demand for people with advanced training, and we must help to meet this demand if we are to meet our critical challenges.

Mr. President, continual access to higher education is not only a source of benefit to our society as a whole. It is also a form of personal opportunity and enrichment. The unfinished task of drawing millions of people—many from ethnic minorities—into the prevailing current of our society can only be fulfilled by providing equal access to our institutions. This idea of equal access underlay, in particular, the founding of hundreds of private colleges, the land grant movement, the establishment of public urban institutions, the GI bill, and the community college movement in the United States.

If the American dream of advancement through equality of opportunity is to be nothing but a cruel hoax on humanity, we must expand the tradition of educational opportunity. We should continue to create steppingstones to help those people who have been brought into the mainstream of American life in their efforts to forge ahead.

Finally, Mr. President, I believe it is counterproductive for the Federal Government to provide companies with the incentives it does for the ongoing research and development of technologies and systems while at the same time it restricts incentives for the continuing

education of those who undertake such projects. Encouraging steady capital investment is meaningless if we do not also contribute to the correctly conducted development of human skills.

Though measures such as the tuition tax credit for higher education, which I was pleased to support, will be helpful to some of these "new" students, we have to develop other ways to aid in the finance of lifelong and recurring education. It is our responsibility to insure that the Nation has the best educated citizenry possible; it is essential for our material progress, national security, cultural and intellectual advancement, and for the maintenance of our democratic institutions.

S. 2388 would reverse recent interpretations of IRS regulations that restrict employers from providing education assistance to their employees. It would allow employees to use employer-provided education assistance without the burden of having to pay tax on the tuition aid they receive. Any tax revenue loss would be made up by the additional earnings of those members of our workforce who take advantage of this legislation to enrich themselves. I urge my colleagues to support this important legislation.●

NATIONAL WATER RESOURCES POLICY

● Mr. WALLOP. Mr. President, a sound, comprehensive, and workable national water resources policy is a priority. However, the formulation and implementation of such a policy cannot be unilateral. To do so is a recipe for confrontation. The States, the Executive, and the Congress must all interact if such a policy is to be successful.

Soon I will introduce a Senate joint resolution to provide for State notification and congressional review of regulations which would implement certain new national water resources policies. Through the procedures which we seek to establish here, certain water policies initiated by the Executive will be channeled through Congress and the States to insure the interaction that is absolutely necessary to the successful implementation of any such policy of national scope and importance.

A brief review of the recent history of development of a Federal water resources policy will highlight the need for this procedure. For well over a year now, the Executive has been engaged in a comprehensive review of Federal water resources policy. The first few months of that study, conducted without participation by the public, the States, or Congress, resulted in the publication of July 15 and 25, 1977, of option papers in the Federal Register. The scope of these water policy option papers was well beyond the proper scope of an exclusively Federal policy study. They dramatically pointed to the need for increased State and congressional participation in the development of a national water resources policy.

The controversy which ensued was productive in that it fostered an increased level of necessary participation. However, the forum for policy development was still exclusively Federal, while the possible ramifications of the study would likely be felt most heavily by States and the individual water users.

Concerned with this disparity, the Senate, on October 5, 1977, agreed to Senate Resolution 284, which expressed the sense of the Senate that no new national water policy be implemented without congressional concurrence and review by the States.

The water resources policy study culminated in the President's announcement of a National Water Resources Policy on June 6, 1978. That policy basically contained only broad policy statements. However, it was generally conceded that the policy reflected the increased degree of public, State, and congressional participation in the process. It represented significant improvement over what had appeared to be the policy's initial direction a year before.

The President's general policy statement of June 6, was followed on July 12, 1978, by a series of more specific Executive memoranda to the heads of Federal agencies and departments. In most cases, these Executive memoranda directed agencies and departments to improve internal procedures, prepare legislative proposals for submission to Congress, and to further study particular areas of water policy which had been identified as posing special problems. However, in a few cases, the memoranda directed the immediate implementation of policies which would directly impact upon the American people. In these cases, the directives are directly contrary to the sense of the Senate as expressed in Senate Resolution 284.

The resolution will speak only to this last type of directive. It will not seek to block their implementation en bloc, but only to provide State and congressional review so that their implementation will have the benefit of comprehensive review, or will be quickly identified as a policy for which there is no concensus.

The potential impact of these policies is unknown. On July 10, 1978, the Subcommittee on Water Resources of the Committee on Environment and Public Works held hearings on national water policy. At that hearing, those in the executive branch charged with the implementation of those policies could not explain the meaning of the directives which they were charged with immediately implementing. Yet the implementation process goes forward.

Under the terms of our resolution, two specific types of policies would be subject to rule and regulation review and State notification. First, those which would impose additional burdens on those who contract for municipal, agricultural, and industrial water supply from Federal projects. Second, those which would impose additional burdens on those who receive or seek Federal grant or loan assistance for water supply and treatment works. The resolution would also require congressional and State notification of Federal legal actions which might extinguish or diminish rights to the use of water under the reservation doctrine.

Specifically, Congress would be provided 60 days in which to disapprove any rule or regulation which would implement the policies described above. If either House passed a resolution stating in substance that the House did not approve of the rule or regulation, it would cease to be effective. The provisions of section 1017 of the Impoundment Control Act of 1974, 31 U.S.C. 1407, would apply to the procedural requirements of such a resolution in either House.

The States would be provided with not less than 60 days notification before regulations to implement this limited portion of the policy could be promulgated.

Finally, our resolution would require the heads of Federal agencies or departments to notify Congress before instituting legal action which might extinguish or diminish rights to the use of water which have been perfected under State laws through the use of the doctrines of Federal or Indian reserved water rights. This does not represent a congressional affirmation of either doctrine or reserved rights. It does not seek to limit the powers of the Federal Government to claim or protect any of its property rights. It only seeks at this time to insure that Congress and the affected States will be informed of how the process of "inventory and quantification," which has been ordered, is progressing, and of the conflicts which may be generated by its implementation.

Mr. President, I wish to reemphasize that this resolution is not intended to put us at loggerheads with the executive branch on water policy. On the contrary, it seeks to establish a procedure through which policy on a limited number of issues will be implemented with full review so as to identify conflicts early. In this way we can insure that those policies which are implemented have had the benefit of wide review and consideration, and hopefully of concensus as well.●

SOLAR POWER SATELLITE DEVELOPMENT PREMATURE

● Mr. ABOUREZK. Mr. President, I recently received a letter from the National Taxpayers Union urging all Senators to oppose S. 2860, a bill that would commit the United States to the development and demonstration of solar power satellites. Although the bill only calls for $25 million this year, it is clearly the first step toward a program which could end up costing the taxpayer trillions of dollars. This mind-boggling amount would be spent to develop an energy system controlled by a massive industry-government coalition, which would be prone to all the bureaucratic and monopolistic abuses inherent in such systems. The satellites themselves would be very vulnerable to attack, and would need to be defended at great cost. They would also use dangerous microwaves to beam their energy to the Earth. Finally, and most disturbingly, their development would inevitably freeze money that would otherwise be available to small scale solar applications already available on Earth, and just waiting for a Government push to make them commercially feasible.

I ask that the letter be printed in the RECORD, and urge my colleagues to consider its contents carefully.

The letter follows:

NATIONAL TAXPAYERS UNION,
Washington, D.C., June 30, 1978.

Hon. JAMES ABOUREZK,
Energy and Natural Resources Committee, Senate Office Building, Washington, D.C.

DEAR MR. ABOUREZK: The National Taxpayers Union in behalf of its 60,000 members and affiliated state and local groups with a combined membership in excess of taxpayers, would like to take this opportunity to express our views on the House passed bill H.R. 12505 and the bill pending in the Senate, S. 2860

Passage of this bill would commit the nation's taxpayers to a $25 million tab in fiscal year 1979. Conservative estimates indicate capital investment reaching a staggering price tag of $2.5 trillion! It is unclear exactly what this bill is authorizing. The proponents of this legislation indicate that passage would commit the nation to a program plan to study the feasibility of utilizing solar energy to generate electricity for domestic purposes. This is not the first phase of this study. We respectfully point out that such a program has already been underway for some time by the Department of Energy and NASA. This program has already cost the nation more than $15 million since 1973, while the House voted recently to appropriate another $7.6 million to DOE and NASA for fiscal year 1979.

On the basis of the above figures alone it is obvious that this bill amounts to yet another attempt at allowing the aerospace industry to feed its voracious appetite from the federal trough. It is also obvious that once such a program gets started with taxpayers dollars it is virtually impossible to stop regardless of the results drawn from research studies. This conclusion can easily be drawn since we have already undertaken and funded such a program and are now being asked for another massive transfusion of taxpayer dollars to underwrite yet another program without seeing the results of the first study.

From a purely fiscal point of veiw, perhaps the most alarming facet of H.R. 12505 and S. 2860 is the commitment to the demonstration solar power satellite. This despite the fact, that no results from the previous ongoing study would warrant this gigantic outlay of taxpayer dollars. The green light to proceed with the construction of the satellite has been given in the language of the House bill and this simply cannot be justified without first seeing the results of the R and D studies.

The proponents have also been too quick to reach the conclusion that a solar powered satellite can substantially contribute to our questionable need for electricity before seeing any results from those studies that are already in progress. So it is obvious that some of those House members who favor H.R. 12505 are already committed to the construction of this satellite. The premature decision to build such a satellite would ultimately prove to be a giant boondoogle for the aerospace industry. H.R. 12505 comes at a time of a slow down in space programs and that industry has been desperately seeking new wells to slake its thirst. We will be irretrievably committed to gargantuan federal expeditures in the future. For once we buy the hardware connected with this research and have people working on it we will find the valve to the federal treasury permanently stuck in the "open" position.

The costs connected with this bill are truly mindboggling. Boeing estimates that the cost of a single launch vehicle would be $10 billion alone while the cost per satellite is in the oppulenet $26.5 billion neighborhood. These are just a sampling of the costs in terms of dollars; they do not reflect the potential dangers to the environment that are inherent in this program. While the use of solar energy is always viewed as benign, this bill would spawn a monstrous malignancy on the nation's already fiscally ill taxpayers.

We urge you to take a long hard look at this bill when it comes before you in this Committee.

Sincerely,

JILL GREENBAUM,
Legislative Representative.

SOVIET INVASION OF CZECHOSLOVAKIA IN 1968

Mr. THURMOND. Mr. President, 10 years ago this week Warsaw Pact forces led by the Red Army of the Soviet Union moved into Czechoslovakia to end the process of political independence which was taking place under the leadership of Alexander Dubcek.

Communism, which cannot stand the light of freedom and liberty, had to crush the program offered by Dubcek or see Czechoslovakia return to the days of pre-World War II. Thus, the Soviet Union moved its military forces in and also enginered the removal of Dubcek from power.

Mr. President, today the occupation continues because the Soviets know the Czech people still yearn for the rights they enjoyed many decades ago. The Soviets remain as colonial overlords to make sure Czechoslovakia does not break free from the Moscow style brand of communism.

It is important that we here in the Congress take public note of this situation although it may be ignored by the United Nations and ignored by the Communist states which signed the Helsinki accord. While the pressure of public opinion has never swayed the Communists such warnings may help prevent other states from falling prey to their message. The Czech people have not yielded, and I do not believe they will ever yield.

Mr. President, this is not merely a Czech tragedy, but one for the free world. We must continue to raise our voices until this tyranny ends.

THE COSMETIC WAR ON INFLATION

Mr. THURMOND. Mr. President, I commend to the attention of my colleagues an excellent article which appeared in the August 18, 1978, Wall Street Journal by Paul W. McCracken, titled, "The Cosmetic War on Inflation."

This article details the pressures underlying the critical problem of inflation in our complex society. It provides a perspective that can be tremendously helpful for us here in the Congress as we attempt to understand the act appropriately in dealing with this problem.

Particular concerns are expressed for the lack of needed gains in productivity to offset the impact of wage increases on costs, for profit margins that in real terms are down, and for the higher and higher prices that American consumers are paying each day for goods and services.

If we are to gain any ground against inflation, we must face up to the need to look very hard at excessive wage increases, to exercise some rational control over Government spending, and to enact that kind of legislation that will serve to improve the private sector business climate in order to achieve the required gains in productivity.

Certainly, these and other related economic matters should be in the forefront of our thinking and actions in the days and months ahead.

Mr. President, I ask unanimous consent that the attached article from the Wall Street Journal be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE COSMETIC WAR ON INFLATION

(By Paul W. McCracken)

Barry Bosworth's basic trouble is that he has been right. And the rewards in our Babylon on the Potomac for those who insist on speaking the obvious about such unpleasant matters as inflation are not much different from those in ancient times who were disengaged from their heads for bringing to the King bad news from the wars. In Washington, success in Fighting Inflation apparently consist not in such quaint and straightforward things as reducing inflation but in producing pyrotechnics and cosmetics which will persuade the citizenry that there is progress where none in fact is really occurring. Indeed, the danger is not so much that the citizenry will be confused, having themselves demonstrated a considerable capacity for clear-headedness, as that managers of policy will mislead themselves.

The fact is that we are not gaining ground against inflation. While the monthly figures will bounce one way or the other, and we might have a few good readings now, there are persuasive reasons for expecting the basic rate of inflation to continue rising. For one thing the underlying trend since the beginning of 1976 has been upward. It is, of course, true that speaking about a "trend" during a 2½-year period will make the careful statistician wince, and food prices have given the CPI a bad upward push. But a 2½-year period contains 30 monthly observations, and some subgroup of prices (about half of them, in fact) will always be rising more rapidly than the average.

UPWARD, EVER UPWARD

Moreover, the underlying "trend" in labor costs per unit of output during the last two years has also been upward. Apart from erratic quarter-to-quarter wobbles, the underlying rate of increase in unit labor costs has itself been rising about a half a percent per quarter—a track which would bring us to double digit rates by 1979.

And it is not easy to make a persuasive case that labor costs will be rising less rapidly. For one thing we are not getting anything like the gains in productivity, to offset the impact of wage increases on costs, that the economy has historically delivered. Quarterly gains in output per man hour (annualized) have averaged a 1.6 percent annual rate in 1976, 1977, and thus far in 1978, and even with the strong second-quarter gain in real output, productivity in the nonfarm private sector rose at the rate of only 0.6 percent per year. In fact, these sluggish gains in productivity now extend back for a decade, strongly indicating that a fundamentally unfavorable structural problem has emerged in the economy.

If there were reason to expect a moderating

trend in the rate of wage increases during the year ahead, that would provide some reason for optimism about the price level. This trend is more apt also to be perverse. Next year will give us a heavy schedule of collective bargaining, and this means a disproportionate share of wage increases will be the large first-year, front-loaded adjustments. And the probability that the average size of the overall packages negotiated will be enlarged further is also uncomfortably high.

All of this might, of course, be consistent with a declining rate of inflation. Some major items that consumers buy might experience a sharp decline in their prices—though if this were food, while one part of government tried to take credit for progress against inflation another part would be busy viewing with alarm the low level of farm prices.

Rising labor costs also might not fully express themselves in the price level if profit margins were to be squeezed further. Reported profits are now double those of a decade ago, and they have increased almost 50% in the last five years. Here is, however, an illustration of the extent to which inflation itself can confuse facts. With a proper accounting for current costs, which conventional procedures fail to do, true profits after taxes are up only one-third from those of a decade ago, which means that in real terms they are down. While some businessmen prefer the comfort of the misleading conventional figures on profits, they could be expected to keep a short leash on their capital budgets if profit margins were to decline further.

After all of the rhetoric about inflation's being the dominant economic problem, a view which surveys show consumers share emphatically, we are losing ground.

What is the problem?

The problem is that our strategy for reducing the rate of inflation is, to borrow an apt phrase from D. H. Robertson, "a grin without a cat."

While there is plenty for the profession to be humble about when it comes to the economics of inflation, there is one conclusion that is supported both by logic and the facts of historical experience. The rate of inflation will not come down so long as pressures of demand pushing on supplies are strong enough so that higher prices and higher wages have no adverse effect on sales volume and employment. Indeed, holding prices and wages below these market-clearing levels by some sort of brute force or ad hoc process would produce the queue-line economy.

The rate of inflation will embark on a downward trend when the result of posting inflationary price increases or extracting excessive wage increases is a painful loss of sales and employment. Ours is the only major industrial country that has not yet mustered the will to face this basic fact of economic life. And the OECD secretariat now projects the 1978 rise in U.S. labor costs per unit of output in manufacturing to be above the average for the "Big Seven" countries, and significantly lower than the increases projected only for the U.K. and Italy.

That we have not really been willing to bite this bullet is indicated by the demand management (fiscal and monetary) policies that have been deployed. The upward pressure the budget (fiscal policy) exerts on the economy is equal to the rise in expenditures plus the revenue value of any net reduction in tax rates (which indirectly has an expansive effect by increasing after tax incomes). In the period from 1958 to 1965, when the price level was quite stable, this measure of "fiscal pressure" averaged about 1% of GNP. Since 1965 it has been 2% to 3%, and would be close to 3% in 1978–79.

This same fear of facing fundamentals seems to be evident for monetary policy. With the emergence of rates of monetary expansion during the first quarter consistent, if sustained, with more discipline on the price-cost level, nervous protests were heard about the adverse effects on the economy. Those protesting presumably were calling for more rapid rates of monetary expansion (which is the only way the Federal Reserve could relieve pressures on interest rates), which would set the stage for a more rapid and inflationary expansion, which would in the end produce the even higher interest rates that are always the accompaniment of higher rates of inflation.

ANOTHER PART OF THE PROBLEM

A part of our problem is that we have also been reluctant to be realistic about how high the economy's operating rate could be pushed before pressures would begin to build. With the unemployment rate at 6% and the operating rate in manufacturing at only 84% of capacity (according to the Federal Reserve), plenty of slack seemingly remains available to assure that more demand would translate into employment and output rather than higher prices and costs.

This is far too simplistic. After a decade in which the economy's operating rate has been low, the capacity situation and labor markets are uneven, and bottlenecks are bound to develop at lower average operating rates than after a sustained period adjusted to performing closer to overall capacity. This is particularly evident in the labor market, where lack of skilled and experienced labor may impede that expansion of output which provide jobs to those who are unemployed.

There is empirical evidence that the economy is in the pressure zone now. The proportion of companies reporting slower deliveries is now in the range reached in late 1972, or 1969, or 1965–66. And the incidence of help-wanted advertising is now higher relative to the labor force than at all cyclical peaks during the last decade (including, even, 1969).

When we are unwilling to face the fundamental realities of the economy and prefer to deal with symptoms and cosmetics, we should not be surprised that we are losing ground against inflation. Washington should not be confused about this. The citizenry is not.

THE TRAGEDY IN CAMBODIA

Mr. HELMS. Mr. President, I was pleased to read in this morning's Washington Post of the remarks of the distinguished Senator from South Dakota (Mr. McGOVERN), on the tragedy of Cambodia.

According to the Post, our distinguished colleague at hearings yesterday called for an international military force "to knock this regime out of power."

Mr. President, I wish to associate myself with the remarks attributed to Senator McGOVERN, as reported in this morning's paper. As long ago as March 1977, the Reader's Digest reported that 1.2 million men, women, and children in Cambodia were murdered by the new Communist regime in an effort to eliminate from Cambodian society any trace of freedom. Even today, millions of Cambodians are living in so-called new villages, after having been uprooted from cities and towns and even from their ancestral villages.

Perhaps at last a new consensus is developing in Congress that will recognize the outrages against human rights that have resulted from our failures in Vietnam. For even though Communist Vietnam may have avoided the stark horror of the mass genocide which has taken place in Cambodia, the construction of the new Communist society in South Vietnam has snuffed out the daily freedoms of the whole population, and thousands of innocent citizens have been likewise murdered or sent to "reeducation" camps from which they have never returned.

It is perhaps an irony that Cambodia and Vietnam are at war today, the one backed by the Chinese and the other backed by the Soviets. But there is little to choose from between the two societies. The mental anguish and suffering, the deliberate deprivation of basic human rights and family rights, the loss of freedom of religion, the confiscation of private property, the totalitarian control of thinking and ideology—all of these differ only in degree, not in kind.

If the United Nations is going to consider the problem of Cambodia, the U.N. should also consider the problem of Vietnam. I would hope, too, that the distinguished Senator from South Dakota would also turn his attention in that direction. Certainly everything that he said about Cambodia, would also apply to Vietnam. The Senator's deep concern for human rights in that part of the world has been evident for some time, and I know that his concern for freedom will compel him to express his concerns broadly.

Mr. President, once again I commend Senator McGOVERN for his remarks, and I ask unanimous consent that the article from the Washington Post be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STATE DEPARTMENT AGAINST INTERVENTION—McGOVERN BACKS ANTI-CAMBODIA ACTION

(By Don Oberdorfer)

Sen. George McGovern (D-S.D.) tangled with the State Department once again yesterday over military intervention in Indochina. But in a startling reversal of their roles from the past, this time McGovern advocated intervention and the State Department argued against it.

The topic was Cambodia rather than Vietnam, and McGovern made clear that he wasn't proposing that the United States send in the Marines. Nonetheless, he said, the reported "genocide" of Cambodians at the hands of their government justifies consideration of an international military force to "knock this regime out of power."

Deputy Assistant Secretary of State Robert B. Oakley, testifying for the Carter administration, quickly told McGovern that the option of military intervention is not being considered anywhere, except possibly in Hanoi, whose armed forces have engaged in recent waves of warfare with Cambodia.

The United States ability to influence events in Indochina is very limited, Oakley said at another point. From the experience of the 1960s "we've learned a lot about the level of appropriate U.S. involvement" and now the government is being very cautious.

Douglas Pike, a Foreign Service officer who

was a prominent government analyst of Indochinese communism during the 1960s, cautioned McGovern that a "quick, surgical takeout" of the Cambodian regime is probably impossible. Pike said the Vietnamese tried a "quick judo chop" against the Cambodian regime with 60,000 troops a year ago, but this "failed abysmally."

The government of Cambodia, which now calls itself Democratic Kampuchea, consists of nine people at the top, no regional organization that is discernible, and a communal structure "in the style of the 14th century" in villages throughout the land, Pike said. An invading force would have to take control of every village, he added, and such an enterprise of uncertain prospects would be "stepping deeper into the swamp."

In the exchange of views before a Senate Foreign Relations subcommittee, McGovern said there is a "a vast difference" between the current situation in Cambodia, where extreme oppression is taking place, and the situation in which the United States intervened in Vietnam. He said military intervention is justified only in the most extreme circumstances but that Cambodia "is the most extreme I've ever heard of. . . . Based on the percentage of the population that appears to have died, this makes Hitler's operations look tame."

Oakley declined to give an official estimate of the death toll in Cambodia because of a lack of precise information and the likelihood that an "official" figure would become a source of controversy and debate. "The U.S. government is confident that scores, probably hundreds of thousands of people, have been killed" since the communist takeover in 1975, he said.

McGovern, according to aides, has been deeply concerned for many months about the Cambodian situation, believing that it is in part a legacy of the Vietnam war. Earlier this year he sponsored an amendment to the State Department authorization bill calling for unspecified "multilateral action" by the United Nations and bilateral action by those nations with influence to end "brutal and inhumane practices" in that Asian nation. Aides said yesterday's hearing was the first time he suggested military intervention.

Oakley said U.S. intelligence agencies report that "scores of thousands" of troops on each side are engaged in the current battles between Vietnam and Cambodia, with aircraft, artillery and other modern weapons being used, especially on the Vietnamese side. Calling it "a major conflict," he said that Cambodia continues to fight very fiercely.

THE NOMINATION OF GEN. HANS H. DRIESSNACK AND HIS ROLE IN THE FITZGERALD CASE

Mr. PROXMIRE. Mr. President, the nomination of Maj. Gen. Hans H. Driessnack to be lieutenant general and Comptroller of the Air Force has raised a number of questions about his role in the firing of A. Ernest Fitzgerald. Since Mr. Fitzgerald was fired after appearing before my Subcommittee on Priorities and Economy in Government of the Joint Economic Committee, I have followed these questions with great interest.

As summarized in a Federal Times article of July 10, 1978, there appears to have been a number of contradictory statements made by General Driessnack and other Fitzgerald case participants. Specifically, the Federal Times article suggests conflict of testimony between Driessnack and Eugene Kirschbaum; Driessnack and General Crow; Driessnack and Gen. Joseph Cappucci; Driessnack and Vincent Sullivan (the Office of Special Investigations Agent); and Driessnack and Mr. Badin. Mr. President, I ask unanimous consent that the Federal Times article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DID HE SMEAR FITZGERALD—GENERAL'S THIRD STAR HANGS ON WHISTLEBLOWER CASE

(By Sheila Hershow)

Before Maj. Gen. Hans H. Driessnack wins his third star and a promotion to Air Force comptroller, unresolved questions about his role in the 1970 firing of whistleblower A. Ernest Fitzgerald must be answered, two senators have said.

Sen. William Proxmire, D-Wis., has asked Sen. John C. Stennis, D.-Miss., chairman of the Senate Armed Services Committee, and Senate majority leader Robert C. Byrd, D-W. Va., to delay Driessnack's confirmation as lieutenant general until an "open" FBI investigation has been completed, a Proxmire aide said.

And Sen. Patrick J. Leahy, D-Vt., has said she will "request a roll-call vote on Driessnack's nomination and call for extended debate to precede such a vote." In a June 27 letter to Stennis, Leahy, sponsor of a bill to protect whistleblowers, wrote that it is important for federal employees to "know that anyone involved in a reprisal effort taken against a whistleblower will be punished and not promoted."

Proxmire, Leahy and the FBI have seen documents indicating that in 1969 Driessnack may have deliberately leveled false and defamatory charges against Fitzgerald in an attempt to discredit and ruin the GS–17 cost analyst who months earlier had told Congress about the $2 billion cost overrun on the Lockheed C5A.

According to a May 17, 1969 report of an interview with Driessnack by Air Force Office of Special Investigations agent Vincent Sullivan, Driessnack accused Fitzgerald of "untrustworthiness" because of his "many peculiar ways of operating." He suggested that Fitzgerald had helped his former company, Performance Technology Corporation, win an Air Force Systems Command contract. Driessnack's allegation that Fitzgerald might still hold stock in PTC and his remark that PTC may have "paid (Fitzgerald) off" sparked an extensive coast-to-coast OSI investigation.

Driessnack's conflict of interest charges were found to be groundless. But the OSI file on Fitzgerald was later shown to Proxmire's Joint Economic Committee—after that file had been stripped of information clearing Fitzgerald.

In a 1974 affidavit, Driessnack said that Sullivan's report on the interview quoted him "out of context" and distorted the "actual tone" of his comments. Driessnack also swore that OSI agent Sullivan initiated the interview, coming to Driessnack's home with "no notice of the visit."

"Beyond my role as an OSI interviewee, I played no part in any OSI or other investigation of Fitzgerald. I had no knowledge of any events in this connection beyond my own interview," Driessnack said in his affidavit.

This sworn statement, however, directly conflicts with the versions of events given—in some cases under oath—by at least five other Air Force officials.

These discrepancies are revealed in documents that have come to light in connection with Fitzgerald's nine-year legal battle to regain his former Air Force duties. The legal fees for Fitzgerald's marathon lawsuit have soared above $400,000.

While the Fitzgerald case dragged through the Civil Service Commission and the courts, Driessnack has advanced rapidly from the rank of colonel to two-star general and Air Force budget director. At no time during the past nine years have the questions about his part in the Fitzgerald matter been laid to rest.

It took Fitzgerald's lawyers three years to discover that Driessnack was actually the OSI informant, identified by the Air Force only as "T–1." Fitzgerald then attempted to include Driessnack in a lawsuit he brought against Air Force and other Nixon administration officials for conspiring to deprive him of his job in retaliation for his congressional testimony on the C5A.

But in 1974 U.S. District Court Judge Gerhard A. Gesell ruled that it was no longer "timely" for Fitzgerald to sue Driessnack. "It would be anomalous and unjust to allow [Fitzgerald] to begin an action against lesser fry merely because their identity and participation were earlier unknown," Gesell wrote.

The Senate Armed Services Committee also received a 1974 request to examine Driessnack's role in the Fitzgerald firing. On February 6, 1974, then-Sen. Harold E. Hughes, D-Iowa, asked that Driessnack's nomination to brigadier general be deferred until the matter had been probed.

In response to the panel's request, Driessnack prepared an affidavit that is in conflict with the recollections of other Air Force officials. There is no other on-the-record evidence that the committee looked further into Driessnack's 1968 actions. John C. Roberts, the committee's current general counsel, refused a *Federal Times* request for a list of witnesses questioned by the committee staff in 1974.

Driessnack's affidavit was entered into the Congressional Record May 7, 1974 and Driessnack was awarded his first star. But questions about the veracity of that sworn statement set off the current FBI investigation of Driessnack.

Using Air Force documents first made available to them last fall, Fitzgerald's lawyers argued that Driessnack's affidavit was doctored to play down his role in the OSI investigation of Fitzgerald. A draft of that sworn statement found in the files of the Air Force general counsel contains a subsequently deleted paragraph in which Driessnack acknowledged naming two other Air Force officials—Eugene L. Kirschbaum and Lt. Col. John Badin—as possible informants.

Driessnack further said that he drove Badin to Badin's OSI interview, "briefly relating the story of my own interview as we went, and, once there, I introduced Sullivan to Badin, thereby identifying Sullivan as the man who had interviewed me." This information does not appear in the signed affidavit.

Federal Times contacted Driessnack to discuss apparent contradictions between the signed and unsigned affidavits. "That's so old. Why are you looking into that?" Driessnack said. He asked for time to refresh his memory, and then refused all further interviews.

Brig. Gen. Harry J. Dalton, director of information for the Air Force, told this newspaper that the deleted paragraph contained accurate information. He said it had been removed from the final affidavit "on the advice of counsel" because it was irrelevant."

Walter A. Wilson, a lawyer in the Air Force's general counsel's office who worked on the Air Force's defense in the Fitzgerald suit, described the missing paragraph as a "sort of innocuous little bit of material" and

"not inconsistent" with Driessnack's sworn statement that his role in the OSI investigation was limited to that of an "interviewee."

In an interview last week, Donald E. Campbell, assistant U.S. attorney in charge of the Justice Department's major crimes division, said that the FBI had conducted "cursory interviews with a number of people" on the Driessnack matter and had found "no basis for a full-fledged perjury investigation." "I have to admit I know zilch about it," Campbell added.

But Campbell decided there may be grounds for further FBI investigation after Peter D. H. Stockton, a congressional investigtor, called his attention to discrepancies between Driessnack's 1974 affidavit and the statements of other Air Force officials who were involved in the Fitzgerald affair. In 1969 Stockton, who was then on the staff of the Joint Economic Committee, looked into the circumstances surrounding the controversial OSI investigation.

Among the inconsistencies are:

Contradictory statements by Driessnack and Kirschbaum. Kirschbaum, the OSI informant who became known as "T-2" Fitzgerald's former company PTC and the Air Force System Command. In a June 6, 1974 deposition, Kirschbaum swore that months before the OSI investigation Driessnack raised the possibility of a conflict of interest by Fitzgerald and Kirschbaum told Driessnack there "would be no conflict."

Driessnack's affidavit, however, contains a description of a meeting with Brig. Gen. Harold Teubner that occurred between Driessnack's session with Kirschbaum and his intreview with OSI. "I told General Teubner that I had never personally connected Mr. Fitzgerald's frequent contact with PTC to a conflict of interest." Driessnack swore, in apparent conflict with the Kirschbaum deposition.

Contradictory statements by Driessnack and Lt. Gen. Duward L. Crow. In a March 8, 1974 "litigation report" on the Fitzgerald case. Col. Jack C. Dixon in the office of the Judge Advocate General pointed to a discrepancy between draft affidavits by Driessnack and Crow:

"According to General Crow, Driessnack came [to a meeting with Crow that preceded the OSI interview] to report a conflict of interest [by Fitzgerald]."

"According to Driessnack, he was acting to correct a faulty news item concerning a matter under his direction."

In Driessnack's final affidavit, he swore the meeting with Crow was arranged by Teubner after Teubner raised the conflict of interest charge against Fitzgerald.

Contradictory statements by Driessnack and Brig. Gen. Joseph J. Cappucci. During the CSC hearings on the Fitzgerald case, Cappucci, who was director of OSI during the 1969 Fitzgerald investigation, said that Driessnack volunteered derogatory information on Fitzgerald.

In a 1969 affidavit, then-Joint Economic Committee investigator Stockton said that Cappucci told him that allegations by informant T-1 [Driessnack] had triggered the OSI probe.

But in his affidavit, Driessnack said that he played only a passive role in the OSI investigation of Fitzgerald.

Contradictory statements by Driessnack and OSI agent Sullivan. Sullivan's and Driessnack's versions of the OSI interviews are in stark contrast. Sullivan is dead.

In interviews with Federal Times, Cappucci, Sullivan's former boss, and Michael Ross, an OSI agent who worked with Sullivan on the Fitzgerald probe but who was not present at the Driessnack interview, described Sullivan as an experienced and careful investigator.

Interview reports prepared by Sullivan after his sessions with Kirschbaum (T-2) and Badin (T-3) do not contain personal attacks against Fitzgerald's character. But Sullivan quotes Driessnack who is "arrogant, untrustworthy and . . . does not respect the Air Force."

Contradictory statements by Driessnack and Badin. In a recent interview with Stockton, Badin said that Driessnack, at that time his boss, drove him to his OSI interview and briefed him about Driessnack's own interview with OSI, Stockton told Federal Times. This version of events exactly coincides with the paragraph deleted from Driessnack's 1974 affidavit.

Federal Times left telephone messages for Badin but he was unavailable for comment.

Air Force lawyer Walter A. Willson told this newspaper that the contradictions listed above and others revealed in the court documents are "minor." He pointed out that Sullivan "is dead and certainly there is no way to get any additional information about that conversation."

Asked to explain why so many officials claimed that Driessnack started the conflict of interest allegation against Fitzgerald—an allegation Kirschbaum has sworn Driessnack knew was untrue—Willson said that although Driessnack "knew about the PTC contract, knew about Fitzgerald's job and what it entailed, he did not know about Mr. Fitzgerald's private financial matters."

"What Driessnack was doing was raising that issue through the proper channels," Willson said.

According to a Proxmire aide, Proxmire will keep the hold on the Driessnack nomination until "all factual question are resolved" and the U.S. Attorney's office has determined there is no need for further FBI investigation.

Fitzgerald declined to comment on the Driessnack controversy. "Because of threats from the Justice Department to put me under a gag order. I don't want to say anything," he told Federal Times.

Mr. PROXMIRE. Mr. President, due to the seriousness of these allegations, I wrote the Attorney General asking that the Justice Department determine the factual basis of the allegaions, the status of any inerest in General Driessnack as a participant in the Fitzgerald case and for such other information as would be relevant to this matter. Mr. President, I ask unanimous consent that my letter to the Justice Department be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
July 5, 1978.

Hon. GRIFFIN B. BELL,
Attorney General,
Department of Justice,
Washington, D.C.

DEAR MR. BELL: The Senate has pending before it the nomination of Major General Hans H. Driessnack to be Lt. General and Comptroller of the Air Force. This nomination comes at a time when there are press reports and conflicting statements about General Driessnack's role in the controversy surrounding the firing of A. Ernest Fitzgerald.

Therefore, I am writing to you to determine the factual basis of the current allegations, the status of any interest in General Driessnack's prior statements or role in the Fitzgerald case and such other information you may find to be relevant to this general discussion.

I would be interested in having your answers to the following questions:

1. What is the current status of interest by the Justice Department, FBI and U.S. Attorney's Office in any matters relating to General Driessnack? Would you please provide a precise response as to whether or not an investigation or review of any matters relating to General Driessnack is currently underway or otherwise contemplated as well as the timetable for any such official review?

2. According to information contained in the July 10 issue of Federal Times, there is an apparent conflict in testimony and/or statements by General Driessnack and various other individuals associated with the Fitzgerald case. Is this apparent conflict of such interest to cause the Justice Department to undertake a review or investigation of possible perjury or other possible violations of the law?

3. In view of the Justice Department's role in defending individual's involved in the Fitzgerald case, how would you plan to insulate your Department against any internal conflicts in determining the responses to question number 2?

It is my hope that you will review the circumstances of these allegations carefully and respond in as conclusive and timely a fashion as possible. While I do not believe it would be fair to hold up General Driessnack's nomination for any substantial period of time without reason, I also believe that the Congress should be presented with a clear factual analysis of the intentions of the Department of Justice with regard to this matter. Some of the documents relating to the alleged conflicting testimony and alleged perjury are listed on an attachment.

Sincerely,

WILLIAM PROXMIRE,
U.S. Senator.

Mr. PROXMIRE. The Justice Department responded on August 3, 1978, declaring that the discrepancies noted in the Federal Times article were "more apparent than real." Each discrepancy lacked "prosecutive merit," according to Assistant Attorney General of the Criminal Division, Philip B. Heymann.

Mr. President, I ask unanimous consent that the response from the Justice Department be made a part of the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
August 3, 1978.

Hon. WILLIAM PROXMIRE,
U.S. Senate, Committee on Appropriations,
Washington, D.C.

DEAR SENATOR PROXMIRE: The Attorney General has referred your letter of July 5, 1978 to this Division for review and response. Subsequent to our receipt of your correspondence, we have reviewed the documents listed in the attachment to your letter as well as other documents, including reports of interviews prepared by the Federal Bureau of Investigation in connection with its investigation of General Driessnack based upon the complaint of A. Ernest Fitzgerald. As you are probably aware, that investigation was concerned with whether General Driessnack may have committed perjury in the deletion of certain statements in affidavits filed in a civil case and before the Congress. In a letter of July 7, 1978, the United States Attorney for the District of the District of Columbia, Early J. Silbert, informed Senator Stennis that the investigation had disclosed no criminal conduct and was closed. A copy of that correspondence is attached. We find

Mr. Silbert's reasons to be convincing and dispositive of that aspect of this matter.

We have, however, examined the documentary evidence listed above in relation to the article from the Federal Times by Sheila Hershow which accompanied your letter. That article sets out five alleged inconsistencies between the affidavits of General Driessnack and statements of various other Air Force officials. These discrepancies have been examined, and it is our opinion that most are more apparent than real, and that each lacks such substance as to possess any prosecutive merit. The following discussion is offered to explain the lack of prosecutive potential in each of the inconsistencies alleged in the Federal Times:

I. CONTRADICTORY STATEMENTS BY GENERAL DRIESSNACK AND EUGENE KIRSCHBAUM

The article quotes a Kirschbaum deposition of June 6, 1974 as stating that months before the Air Force Office of Special Investigations inquiry, General Driessnack raised the possibility of a conflict of interest by Mr. Fitzgerald to which Mr. Kirschbaum responded that there would be no such conflict.

General Driessnack's affidavit states, however, that after this meeting Driessnack told General Harold Teubner that he had never personally connected Mr. Fitzgerald's frequent contacts with his former employer to a conflict of interest.

These statements are not at all contradictory since Driessnack neither denies the Kirschbaum meeting nor attests, under oath, the accuracy of his statements to General Teubner. Moreover, an examination of the Teubner affidavit leads reasonably to the conclusion that the first discussion between Kirschbaum and Driessnack concerned the initial letting of the Air Force's contract with PTC (Fitzgerald's former corporation) at which time Fitzgerald's former employment with that corporation was discussed with respect to the possibility of a conflict of interest. Driessnack's later conversation with Teubner, however, apparently concerned Fitzgerald's activities after the contractual relationship existed. Thus, a reasonable explanation for the discrepancy would be a separation in Driessnack's mind of the potential conflict of interest before the contract between PTC and the Air Force from the allegation that Fitzgerald acted in a manner consistent with the existence of a conflict of interest after the contract was formed.

II. CONTRADICTORY STATEMENTS BY GENERAL DRIESSNACK AND GENERAL CROW

This contradiction, as noted in the Federal Times, is contained in a March 8, 1974 litigation report prepared by Colonel Jack Dixon, JAGC citing the affidavit of General Crow as stating that General Driessnack came to a meeting with General Crow to report a conflict of interest by Mr. Fitzgerald. The report then says that Driessnack states that he was acting to correct a faulty news item concerning a matter under his direction. The article also points to Driessnack's final affidavit which states that the meeting was arranged by Teubner after Teubner raised the conflict of interest charge against Fitzgerald.

An examination of these three documents disclosed no discrepancy between the Driessnack affidavit and any other information. The confusion seems to lie in the cursory characterization of Driessnack's version of events contained in Colonel Dixon's litigation report.

That portion of the memo which discusses the meetings between Driessnack and Teubner and Driessnack and Crow appears to be an analysis of Driessnack's civil liability under alternative theories of Driessnack's purpose. That is, the discussion considers whether Driessnack would be acting within the scope of his duties whether he was reporting a conflict of interest or reporting an erroneous news item.

In fact, Driessnack's version is consistent with Crow's on this point. Both agree that Driessnack and Teubner did meet with Crow to report a possible conflict of interest. Driessnack's affidavit characterizes his initial meeting with Teubner as being for the purpose of correcting the news item. Perhaps the confusion may also be attributed to one version of Driessnack's draft affidavit, paragraph 4, which states: "I did not consider myself to be reporting a conflict of interest when I went to General Crow." This statement was changed to substitute "General Teubner" for "General Crow" in a subsequent draft and in the final signed affidavit. Moreover, the context of the entire affidavit makes it clear that the reference to General Crow in the first draft was simply a mistake, since Paragraph 9 of Dreissnack's affidavit clearly characterizes the purpose of the meeting with General Crow as being to report a possible conflict of interest.

III. CONTRADICTORY STATEMENTS BY GENERAL DRIESSNACK AND GENERAL JOSEPH CAPPUCCI

This alleged disagreement appears simply to consist of a difference in interpretation as to the meaning of "passive". General Cappucci is and was of the opinion, based entirely on the remarks of Agent Vincent Sullivan, who is now deceased, that the inquiry of Fitzgerald was begun based upon some information obtained from Driessnack. Nothing in Driessnack's affidavit contradicts this. In fact, his recitation of meetings with Generals Teubner and Crow appears to be consistent with General Cappucci's impressions. Nor does Driessnack deny volunteering derogatory information concerning Fitzgerald in his affidavit. It should also be noted that Cappucci's characterization of Driessnack's "volunteering" of derogatory information is solely his conclusion based upon agent Sullivan's report. Finally, the Federal Times conclusion that Driessnack "said that he played only a passive role in the OSI investigation of Fitzgerald," appears to be without basis. An examination of the affidavit revealed no such statement.

IV. CONTRADICTORY STATEMENTS BY DRIESSNACK AND OSI AGENT VINCENT SULLIVAN

Agent Sullivan's death, of course, would make it impossible to verify any alleged inconsistency and would necessarily preclude the possibility of proof of perjury. However, the Federal Times article points to no inconsistency. That item merely quotes Sullivan's report as containing certain derogatory statements by Driessnack about Fitzgerald. No denial of these remarks was made by Driessnack.

V. CONTRADICTORY STATEMENTS BY DRIESSNACK AND BADIN

Again, the article points to a non-existent contradiction. This allegation, concerning the deletion of the paragraph in Driessnack's affidavit, is the same as that considered and disposed of by the United States Attorney's office.

Additionally, the Federal Times article alleges that "Kirschbaum has sworn that Driessnack knew (the allegation of conflict of interest) was untrue." This appears to be a mischaracterization of the Kirschbaum deposition which states only that before the Air Force contracted with PTC, Kirschbaum advised Driessnack that in his opinion no conflict of interest would exist on the part of Fitzgerald.

Based upon the above, this Division has determined that there is insufficient basis upon which to investigate General Driessnack for possible violations of perjury or other federal statutes. We therefore consider this matter to be closed.

With respect to the specific inquiries contained in your letter of July 5, 1978, the following is submitted:

1. The investigation and subsequent review of General Driessnack's activities is closed.

2. A review of the information contained in the *Federal Times* which was attached to your letter has led to the conclusion that there is insufficient reason to conduct any further investigation into General Driessnack's activities or statements in connection with the Fitzgerald matter.

3. In light of the closed status of this matter no insulation against internal conflicts within this Department seems necessary. Please be assured however, that the criminal aspects of this matter were handled by the Criminal Division without consultation with the Civil Division.

Thank you for your interest in this matter. I hope this response sufficiently answers your inquiries.

Sincerely,

PHILIP B. HEYMANN,
Assistant Attorney General,
Criminal Division.

WASHINGTON, D.C., *July 7, 1978.*

Hon. JOHN C. STENNIS,
Chairman, Armed Services Committee, U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: This letter is in response to your request for the results of an investigation of an allegation of perjury against Major General Hans H. Driessnack, United States Air Force, conducted by the Federal Bureau of Investigation and this Office.

In April of this year, a complaint was made by a Mr. A. Ernest Fitzgerald to the FBI that General Driessnack had perjured himself in an affidavit of April 18, 1974, submitted in the civil matter of *A. Ernest Fitzgerald versus Robert C. Seamans, Jr., et al.** Mr. Fitzgerald provided the FBI with a copy of the April 18, 1974 affidavit signed by General Driessnack as well as an undated, unsigned draft affidavit by General Driessnack, obtained by Mr. Fitzgerald probably in September of 1977.** In particular, Mr. Fitzgerald complained that a statement in the signed affidavit amounted to perjury because it was contrary to facts set forth in the earlier unsigned affidavit. Specifically, Mr. Fitzgerald identified the false statement by General Driessnack in the signed affidavit as follows: "Beyond my role as an OSI interviewee, I played no part in any OSI or other investigation of Fitzgerald. *I had no knowledge of any events in this connection beyond my own interviews.*" (Emphasis added).

Paragraphs 14, 15, and 16 of the unsigned affidavit read as follows:

14. I did not discuss these matters again with General Crow, nor did I ever discuss them with the other defendants in this case. I was aware that two other sources, not defendants in this action, were also interviewed by the OSI. They were John Badin and Eugene Kirschbaum, the men I had named during my OSI interview as the persons most knowledgeable about the PTC/AFSC contract. In fact, about a month after my own interview, John Badin came to me and told me that an OSI agent named Sullivan was

---

*Prior to April 1978, there had been no referral of this matter to this Office or the FBI even though the allegation was known by Fitzgerald's attorney and was brought to the attention of a federal district court judge as part of a motion for reconsideration which was denied.

**The affidavits dealt with matters occurring in 1968 and 1969.

waiting to interview him in the OSI office at Andrews Air Force Base. He said that Sullivan had indicated to him that I had given his name as a possible source in an inquiry into the PTC/AFSC contract. He asked me what this was about and whether I knew Sullivan and could confirm that he was from OSI. I drove Badin over to the OSI office, briefly relating the story of my own interview as we went, and, once there, I introduced Sullivan to Badin, thereby identifying Sullivan as the man who had interviewed me, and left. I never did discuss these interviews with Badin or Kirschbaum again until very recently. When the stories about the OSI broke in the newspapers in late 1969, I realized that OSI might have interviewed other people as well. I must add, however, that I did not connect the reports on T–1's information with my own interview until recently, because the memorandum distorted much of what I said.

15. I did not at any time fabricate or concoct reports concerning Fitzgerald and possible security violations or conflicts of interest. I never communicated any of my information to members of the Congress or of the White House staff, nor am I aware that any such communication was ever made.

16. Beyond my role as an OSI interviewee, I played no part in any OSI or other investigation of Fitzgerald. I had no knowledge of any events in this connection beyond my own interview. I was not and am not aware of any inquiry into Fitzgerald's personal life, nor did I ever knowingly misrepresent his character or background at any time. I had absolutely no connection with any effort to terminate Fitzgerald's position.

Paragraphs 14, 15 and 16 of the signed affidavit read as follows:

14. I did not discuss these matters again with General Crow, nor did I ever discuss them with the other defendants in this case after the OSI interview.

15. I did not at any time fabricate or concoct reports concerning Fitzgerald and possible security violations or conflicts of interest. I never communicated any of my information to members of the Congress or of the White House staff, nor am I aware that any such communication was ever made.

16. Beyond my role as an OSI interviewee, I played no part in any OSI or other investigation of Fitzgerald. I had no knowledge of any events in this connection beyond my own interview. I was not and am not aware of any inquiry into Fitzgerald's personal life, nor did I ever knowingly misrepresent his character or background at any time.

As can be seen from comparing the two documents, the information in the unsigned affidavit that General Driessnack was aware that John Badin was interviewed by an OSI agent approximately a month after his own interview and in fact drove Badin to the OSI office and introduced him to the OSI agent, was deleted from the final signed affidavit.*** It should also be noted that the statement in the second sentence of paragraph 16 complained about by Mr. Fitzgerald was contained in both the unsigned and signed affidavits.

Our investigation was limited to this specific complaint by Mr. Fitzgerald and we focused our investigation on determining whether General Driessnack was responsible for the deletion of the Badin information from the signed affidavit, and whether the second sentence of paragraph 16 was a false statement, and if so, whether General Driessnack made it consciously and willfully.

Our investigation revealed that General Driessnack was interviewed and debriefed by an attorney in the Air Force JAG Office who, based on this information, prepared the draft unsigned affidavit. A copy of this draft affidavit along with a litigation report was forwarded to the Department of Justice, Civil Division, on March 8, 1974. Subsequently, the JAG attorney, after consulting with an attorney at the Department of Justice and the General Counsel's Office of the Air Force, shortened the affidavit by deleting, among other items, the information about General Driessnack driving Badin to the OSI office for Badin's interview. Since the affidavit was drafted over four years ago, it was difficult for the attorneys involved to recall with certainty why the Badin information was deleted, although it was clear that the deletion was not made at the request of General Driessnack.

It appears from our investigation that no one, the attorneys or General Driessnack, focused on the alleged inconsistency of the second sentence of paragraph 16. Moreover, one of the attorneys interpreted the second sentence of paragraph 16 to mean that General Driessnack had no knowledge of the substance of any subsequent events, rather than no knowledge of subsequent procedural events such as other persons being interviewed by OSI. This interpretation appears consistent with the fact that included in the unsigned affidavit were the statements by General Driessnack that (1) he was aware that Badin and Kirschbaum were subsequently interviewed and (2) "I had no knowledge of any events in this connection beyond my own interview." In order to read these two statements consistently in the unsigned affidavit, it would seem that the second sentence of paragraph 16 was referring to something other than knowledge of subsequent OSI interviews.

In any event, our investigation has revealed no evidence to suggest that paragraph 16 of the signed affidavit represented a conscious or willful attempt on the part of General Driessnack to mislead or make a false statement. This is corroborated by the fact that the unsigned affidavit containing the Badin information was forwarded to the Department of Justice in March of 1974, thus making it quite clear that General Driessnack was not trying to hide the information.

Based on the above investigation, this matter has been closed by this Office.

Sincerely,

EARL J. SILBERT,
U.S. Attorney.

Mr. PROXMIRE. I might point out, Mr. President, that the Justice Department lawyers did not interview General Driessnack on any of these allegations. I find this procedure to be most unusual, particularly in light of some of the analysis from the Justice Department suggesting what General Driessnack's reasoning might be or what he might have argued under the circumstances. It would seem that the clearest and most direct way of obtaining such information would have been to interview General Driessnack. That the Justice Department did not, that they found it unnecessary, casts a good deal of doubt on the conclusions they reached.

When questioned by my staff on this matter, a Justice Department lawyer indicated that the Department does not seek testimony from principals in a case like this one and that it is not the purpose of the Justice Department to investigate to make a case—but only to review the record for evidence of perjury.

I find this attitude unresponsive to my letter request and not a valid technique to determine the truth.

Nonetheless, the Justice Department has closed this case, and I cannot in good conscience continue to oppose the nomination of General Driessnack in lieu of evidence of perjury or other wrongdoing.

Mr. President, President Carter twice has spoken of the Fitzgerald matter as a situation that "must never be repeated." But the Fitzgerald case remains to be settled. There have been four appeals court decisions, four district court decisions, and three Civil Service decisions involving the Fitzgerald matter. Mr. President, for those unfamiliar with the Fitzgerald controversy, I ask unanimous consent that a chronology be printed in the RECORD at this point.

There being no objection, the chronology was ordered to be printed in the RECORD, as follows:

PARTIAL CHRONOLOGY OF FITZGERALD LITIGATION

The following partial chronology highlights the key events in the eight years of litigation spawned by Mr. Fitzgerald's termination.

1. January 5, 1970.—Fitzgerald was terminated pursuant to an alleged "reduction in force."

2. January 20, 1970.—Fitzgerald submitted an appeal to the Civil Service Commission ("CSC").

3. May 4, 1971.—The CSC began closed hearings on the appeal and rejected Fitzgerald's request for open hearings. He sought and obtained an injunction againts the closed hearings, which was affirmed on appeal. *Fitzgerald* v. *Hampton*, 467 F.2d 755 (D.C. Cir. 1972).

4. September 18, 1973.—The CSC Chief Appeals Examiner issued a decision reinstating Fitzgerald with back pay, but denying him interest, costs, attorneys' fees and other damages.

5. December 10, 1973.—Fitzgerald was reinstated to the Air Force and simultaneously reassigned, over his protest, to a newly created position as Deputy for Productivity Management, which does not involve his area of specialty in cost analysis of major weapons systems acquisitions.

6. December 26, 1973.—Fitzgerald appealed his reassignment on the grounds that it was not in compliance with the CSC recommendation. The CSC denied the appeal without a hearing, and Fitzgerald appealed to the District Court, which remanded for hearings. *See Fitzgerald* v. *Hampton*. 383 F. Supp. 823 (D.D.C. 1974). The hearings were held in June, 1975.

7. January 25, 1974.—Fitzgerald filed suit for compensatory and punitive damages from various Air Force and Department of Defense officials and Alexander Butterfield.

8. October 9, 1974.—Judge Gesell granted summary judgment to defendants in Fitzgerald's damages action on the grounds that the statute of limitations had run. *Fitzgerald* v. *Seamans*, 384 F. Supp 688 (D.D.C. 1974). Fitzgerald appealed this decision in November, 1974.

9. June 18, 1976.—The CSC Chief Appeals Examiner found that Fitzgerald's 1973 reassignment was in compliance with the CSC recommendation.

10. August 10, 1976.—The June 18, 1976, decision was again appealed to the District Court (J. Bryant) and the appeal is currently awaiting disposition on cross-motions for summary judgment.

11. October 23, 1976.—Candidate Jimmy Carter pledged in Alexandria, Virginia, that "[t]he Fitzgerald case, where a dedicated civil servant was fired from the Defense Department for reporting cost overruns,

*** The unsigned affidavit also stated that General Driessnack was aware that Eugene Kirschbaum was subsequently interviewed by OSI.

must never be repeated." Quoted in Rushford, "The Perils of Bing A Whistle Blower," Washington Post at C 1 (November 27, 1977).

12. February 1, 1977.—Secretary of Defense Harold Brown advised Senator Proxmire during DOD appropriations hearings that he would consider Fitzgerald's case and then talk with Fitzgerald. Fitzgerald has received no communication from Secretary Brown to date.

13. February 23, 1977.—The Court of Appeals affirmed the summary judgment for Air Force and Department of Defense defendants, but remanded for further proceedings with respect to Butterfield and various unnamed White House ("John Doe") defendants on the grounds that Fitzgerald could not have known of White House involvement prior to the Watergate hearings in 1973. *Fitzgerald* v. *Seamans*, 553 F. 2d 220 (D.C. Cir. 1977). Mr. Fitzgerald promptly filed an amended complaint adding Haldeman as a defendant.

14. April 13, 1977.—Court of Appeals reversed District Court's award of attorneys' fees to Fitzgerald because of the absence of authorization. Court noted that District Court might be "correct" when it found that denial of fees "would make a mockery and a sham" of federal employee appeal rights, but nevertheless emphasized that "appellee's redress must come from the Congress, not the courts." *Fitzgerald* v. *U.S.C.S.C.*, 554 F. 2d 1186, 1190 (D.C. Cir. 1977).

15. September 14, 1977.—Department of Justice attorneys representing Butterfield and Haldeman in the damages action advised Judge Gesell of their intent to seek substantial costs and possibly attorneys' fees from Fitzgerald, if the action is eventually dismissed.

16. June 2, 1978.—Court of Appeals affirmed denial of Fitzgerald's request for $13,812.94 in interest on his back pay. Court noted its "sympathy" for Fitzgerald's position, but stated that, "[t]hough Fitzgerald undoubtedly deserves to be 'made whole' by his government, he may not recover interest in the absence of an explicit authorization. 'Additional remedies of this kind are for the Congress to provide and not for the courts to construct.'" *Fitzgerald* v. *Staats*, (D.C. Civil 76–2112, June 2, 1978), slip op. at 10 (citation omitted).

17. July 5, 1978.—After many months of discovery of White House documents, Fitzgerald filed a proposed second amended complaint adding Richard Nixon, Bryce Harlow and former Deputy Secretary of Defense David Packard as defendants to his damages action and noting that some injurious actions against him continue to the present date. Judge Gesell has not yet ruled on the motion for leave to amend the complaint.

Mr. PROXMIRE. Now, Mr. President, just what do we do about this unsolved problem? Are we going to let a fine civil servant continue to waste his talents by being shut up in a corner of the Pentagon with marginal responsibilities? If ever there was a situation that cried out for correction, this is it. And the current administration has no ax to grind. They should be able to look at the facts dispassionately and objectively.

I think it is time that Mr. Fitzgerald was offered another job more fitting to his talents. It appears clear that the Pentagon hierarchy is not going to restore him to his old level of responsibility. Therefore, I call on the President to find a post within the administration where Mr. Fitzgerald can once again serve the American taxpayer.

Mr. President, I ask unanimous consent that a recent newspaper article in the Washington Post pointing out the continuing difficulties of Mr. Fitzgerald be printed in the RECORD at this point.

(See exhibit 5.)

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EXHIBIT No. 5

[From the Washington Post, November 27, 1977]

THE PERILS OF BEING A WHISTLEBLOWER

(By Greg Rushford)

Despite the lofty rhetoric, the syndrome of punishing those who expose waste and abuse is being repeated under the Carter administration—and against the same A. Ernest Fitzgerald who was fired in 1969 after revealing $2 billion in cost overruns associated with the Lockheed C5–A cargo plane.

Fitzgerald, who sued successfully to get back his job as civilian cost-cutting expert for the Air Force, certainly has not been encouraged to "save the government money." Working under many of the same people—including Defense Secretary Harold Brown—who were embarrassed by the C5–A affair, Fitzgerald has been shunted aside, given a $47,500 salary to do trivial work, kept away from big spending programs. The one new example of scandalous behavior he has helped bring to light—mismanagement of part of an $800 million logistics project that the Air Force pursued in defiance of Congress—has only resulted in making him more of a Pentagon pariah. He has been taken off even that project—which is still continuing, under a new name, not only in disregard of Congress order to end it, but also in the face of an Air Force recommendation that it be stopped.

So Fitzgerald now is suing the Civil Service Commission to make it enforce its 1973 directive that the Air Force restore him to his old job or one of equal responsibility; he currently is deputy for productivity, which he says "is my old deputy's job." And, faced with $400,000 in legal bills, he also is suing present and past government officials for $3.5 million for allegedly conspiring to ruin his career.

WORKING UNDER A CLOUD

If the Fitzgerald case proves anything, it is that Adm. Hyman Rickover was only too right when he said, "If you must sin, sin against God, not against the bureaucracy. God may forgive you, but the bureaucracy never will."

After the Civil Service Commission ruling, Fitzgerald reported back to work in October, 1973, to Assistant Air Force Secretary William Woodruff—and immediately learned that the old guard had not forgotten him, let alone forgiven him. Woodruff had worked on the Defense Appropriations subcommittee for Sen. Richard B. Russell of Georgia, the state where the C5-A was built. It was a phone call from Russell that originally prompted Brown—then Secretary of the Air Force—to chastize Fitzgerald for his November, 1968, testimony on the C5-A before Democratic Sen. William Proxmire's Joint Economic Committee.

According to Woodruff's notes on the 1973 meeting, subpoenaed in Fitzgerald's $3.5 million suit, Woodruff told Fitzgerald he could not "erase the clouds" hanging over the cost-cutter, adding: "You have to be aware that there are people who do not feel you were a good employee." Woodruff told Fitzgerald he would not be allowed near major weapons systems until he had demonstrated he intended to be a "good" employee. If Fitzgerald joined the team, Woodruff's notes continue, they could have a "new relationship" and Fitzgerald would receive "fair treatment." While he wa: proving himself, Fitzgerald would report to Woodruff through his deputy, Thomas Moran.

Moran; Fitzgerald pointed out, had worked for Robert Moot, the Defense comptroller who had attempted to prevent Fitzgerald from testifying before Sen. Proxmire ("Moot told me if I testified there would be 'blood on the floor,'" Fitzgerald states. "I didn't realize it would be mine.") But this did not change Woodruff's mind.

In an interview, Woodruff said that he would "stand by anything that is in my notes," but added that the note don't mention that when Fitzgerald returned another person "was doing his old work and doing it perfectly well."

Instead of mending his ways, Fitzgerald filed his Civil Service Commission suit and meanwhile went off to bureaucratic Siberia. Even from there, however, he managed to discover strange doings.

PROJECT MAX

In early 1974, Fitzgerald began to analyze a contract for a new computerized accounting system called "Project Max," which cost $41 million, a modest sum by Pentagon standards. Project Max was part of the $800 million Advanced Logistics System (ALS) the Air Force wanted to install to keep track of its aircraft repair program.

Fitzgerald found that Project Max discouraged high productivity. As he put it, it was a program for "justifying costs rather than controlling them," similar to the one used in the Lockheed case.

Meanwhile, although $200 million already had been spent on the overall logistics system, it became apparent in 1975 that the system would not work, and in December Congress ordered it stopped.

The appropriations committees told the Air Force to prepare plans for a new system and to keep them apprised of developments. No spending was authorized in the meantime unless "essential" to Air Force depots' missions.

Just as Fitzgerald had fought against C5–A overruns for several years inside the Air Force, so he also kept his case against Project Max within the system for more than two years, making recommendations to his superiors.

Then, last April, public revelations about Project Max created a storm. A Washington Post story, based on Air Force documents obtained by Reps. John Moss (D-Calif.) and Charles Rose (D-N.C.), disclosed that the Air Force had continued to spend funds to develop the $800 million logistics system which Congress had "terminated." Development of Project Max, the most visible part of the system, had continued without approval for nearly a year.

Among the documents that most angered Moss and Rose were notes written by Maj. Gen. Robert I. Edge, who had told other Air Force officials, "I'm not overly concerned about 'unapproved' work on Max." Edge, who was responsible for Air Force computer policies, warned instead about misleading explanations being prepared for Congerss to suggest that what the service was working on was really a new system.

His concern was not with the chairmen of the Senate and House appropriations committees, John McClellan and George Mahon. "Unlikely that either chairman will read lengthy attachments or understand them if they do," he wrote. But if the committee staffs took time to pour over the material, Edge warned, "stand by for further questions." He pointed out that the new system

sounded much like the old discredited one, and concluded with a question: "How much egg can we stand on our faces?"

History suggests the Pentagon has a remarkable capacity to attract egg to its face, and the Max affair splattered its share. Edge had to apologize publicly to the appropriations committees. He also said his quotation marks around the word "unapproved" meant that approval—albeit, questionable and belated—really had been given. It turned out that Project Max spending had continued without authorization until three days after the November, 1976, elections, when lame duck Air Force Secretary Thomas Reed finally had approved the outlays as "essential" to the Air Force depots mission.

But, using what a Pentagon study team called a "disturbing anomaly, the service considered "all system originally planned under the old ALS as now 'mission-essential.'" In other words, with Orwellian illogic the service merely defied Congress' decision to stop the old system.

The Air Force ultimately accepted Fitzgerald's criticisms of Max, but it did not send him any bouquets. He had not been a "good" employee. After struggling to persuade his superiors about Max, Fitzgerald acknowledges, he "cooperated" with congressional investigators by giving them the access to his files which they had requested. He also had been quoted publicly as saying the service's continued work on Max was "apparently illegal," that it was "pretty dark" to spend taxpayers'money in defiance of Congress.

Nor, astoundingly, has the service's own acceptance of Fitzgerald's criticisms—atop Congress' determination to stop the old system—prevented the Air Force from doing as it wishes. Although the Senate cut out funds for Max last summer, Gen. Charles Buckingham, Air Force comptroller, who was heading another group studying the Max issue, persuaded House conferees to insist on leaving in the money until his team completed its work. The Buckingham team did this last August—also recommending that Max be ended.

But, as Fitzgerald remarks, it has not been ended. Rather it has been given another name—the Actual Hour Accounting System—and spending is proceeding apace, Fitzgerald says. Fitzgerald refers to the Actual Hour Accounting System as "Son of Max," explaining that it "looks like Max, talks like Max, quacks like Max." It is based on the same idea of paying for whatever "actual" time is spent on a job, rather than setting reasonable standards for completing work. As Fitzgerald puts it, the Air Force is "sucking the bullet" rather than biting it.

WINNERS AND LOSERS

The lessons of all this, whether under the Nixon administration or a Carter administration that prides itself on management ability, seem evident. The cost-cutter is ostracized rather than rewarded, while those embarrassed by his efforts prosper.

Harold Brown, put on the spot in 1968 by Fitzgerald's C5–A disclosures, has become head of a Pentagon that is still defying Congress on "Son of Max" spending. Former Air Force Secretary Reed, who, after a year of unauthorized spending on Max, approved the outlays right before leaving office, was called into the Carter White House by energy chief James Schlesinger to help fashion Carter's energy policies.

Gen. Hans Driessnack, who sent Congress the logistic system information which Gen. Edge warned was misleading—and who had started a secret 1969 investigation of Fitzgerald on conflict-of-interest grounds which both the Air Force and the Civil Service Commission deemed to be unfounded—has been promoted to Air Force budget director.

Arnold Bueter, who was deputy Air Force comptroller in 1968, sharing responsibility for, among other things, payment records to Lockheed on the C5–A, has been promoted to principal deputy assistant secretary of the Air Force for financial management. He is now Fitzgerald's immediate boss. That doesn't make for a comfortable relationship. In the book he wrote before his reinstatement, Fitzgerald accused Bueter of castigating him for trying to document suspicions about overpayments to Lockheed.

Today, according to Fitzgerald, Bueter not only has rejected Fitzgerald's recommendations to stop "unapproved" spending on Max, but has used a variety of ways, like "disinviting me to meetings, cutting me off from memo distributions, to isolate me from Max." Bueter, he says, still has refused to stop equipment purchases for "Son of Max" despite the Buckingham report recommendation that Max be terminated, regardless of what it is called.

In a telephone interview, Bueter said, "I have no disagreement with Fitzgerald, but, as Fitzgerald perfectly well knows, the office of the Secretary of Defense has published a handbook which has directed the purchase" of the computer equipment. "A team is being assembled to review this necessity," he added. Asked if he plans to reassign Fitzgerald to his old job of overseeing major weapons systems, Bueter said he knows of "no initiatives in that direction."

Fitzgerald says that he is not only blocked these days from projects like Max or from major weapons systems, but that he is the target of "an organized bad-mouthing campaign to keep me discredited and isolated."

As one modest example, he cites the experience of a CBS-TV crew that filmed Fitzgerald in his Pentagon attic office after the Max story broke. CBS producer Charles Thompson recalls with irritation "a lieutenant colonel from the Air Force information office who barged into Fitzgerald's office during the filming, although I had asked him not to when making arrangements the day before We even filmed this fellow taking notes of our interview."

What was in the notes became clearer later. In the course of his lawsuit for damages, Fitzgerald discovered a memorandum on his CBS interview written to Gen. Harry J. Dalton Jr., the Air Force information chief. The memo reported Fitzgerald had told CBS that "both administrations (Ford and Carter) hope that I am an example that you can't get away with telling the truth."

Not true, says producer Thompson. "Fitzgerald said he had great hopes for the Carter administration, despite the fact the last two administrations—and he clearly meant Ford's and Nixon's, not Carters and Ford's—had tried to make an example of him. Don't you think [CBS reporter] Bruce Morton and I are competent enough reporters to pick up on a Fitzgerald attack on Carter?"

When asked about this, the lieutenant colonel, Terry Hemeyer, said he had entered Fitzgerald's office with the CBS crew "to be helpful" and said the film crew "did not ask me to leave, and I would have left the room had I been asked. I couldn't have taken notes because I didn't even have a piece of paper and a pencil with me." When informed the CBS crew had filmed him taking notes, Hemeyer said, "Oh." Then he added, "I don't recall, but regret any inaccuracies" that may have appeared in the memorandum.

VIEW FROM THE WHITE HOUSE

Fitzgerald's hopes for the Carter administration so far appear to be unfounded. The Carter White House has either been unwilling or incapable of doing anything about what is happening in the Pentagon, regardless of rhetoric about rewarding cost-cutters and improving federal management.

A written request to the White House for documents relating to any consideration given to Fitzgerald has gone unanswered since Sept 1.

Last February, Sen. James Abourezk (D-S.D.) wrote to President Carter to complain about the Air Force handling of testimony he requested from Fitzgerald on productivity in the Military Airlift Command. When Abourezk asked the Air Force to make Fitzgerald available as a witness, Gen. Charles C. Blanton, Air Force congressional liaison director, responded that Fitzgerald could represent himself—but not the Air Force. When Abourezk complained to the White House, Frank Moore, Carter's liaison with Congress, replied with a non-response. "In addition to the President knowing of your views, I am taking the liberty of forwarding a copy of your letter to Harold Brown so he will know of the particular problem your subcommittee encountered."

White House speechwriter James Fallows would say only that, after learning of Fitzgerald's current predicament, "I sent a memo with some recommendations to some people on the personnel side here." He added that he has received no response.

White House press official James Purks, after checking on how the White House planned to handle the Fitzgerald situation, reported what he termed "moderate success" in his quest: "I can tell you we are awaiting anxiously for the Civil Service Commission to come back to us with a program to protect whistle blowers." Asked for the current White House attitude toward Carter's campaign statement on Fitzgerald, Purks replied, "But in that statement we didn't say we'd intervene."

FREE ENTERPRISE, TAXES AND INVESTMENT

Mr. PERCY. Mr. President, back in April the Senate approved Senate Joint Resolution 128, calling on the President to proclaim July 1, 1978, as "Free Enterprise Day." The House of Representatives subsequently approved the same resolution and the President signed it, but the special day was unfortunately largely ignored throughout the country.

California voters, however, unwittingly put real meaning into that day when they passed proposition 13, for the effective date of the tax-cutting measure was also July 1. And the message California taxpayers were sending to their government representatives was that they preferred economic growth to the government's reallocation of income in a stagnant economy.

It was accidental that these 2 days coincided as they did but it is fortunate that this point has been reemphasized in this way. The message of proposition 13 needs to be understood by public officials not only in California but throughout the country. Tax cuts that encourage growth—free enterprise if you will—are seen as essential to our own national economic health. Lying at the base of this sentiment is the commitment that individuals and businesses can better determine economic priorities than can the Government.

The California "tax revolt" is a departure from many of the actions of government over the past decade. On the Federal level, one of the most economically detrimental tax code changes occurred in 1969 when the Tax Reform Act increased the maximum tax on capital gains to nearly 50 percent. The effect of this tax increase has been to dry up capital needed for the creation of new firms. It has also meant that established firms have had to turn increasingly to the cap-

ital markets to finance expansions that, before 1969, could have been financed through sales of stock.

It is regrettable that the President has not acknowledged this shortage of capital and the direct relationship between the capital gains tax, economic growth, and job creation. On June 26 at his press conference, President Carter said:

The American people want tax relief from the heavy burden of taxation on their shoulders. But neither they nor I will tolerate a plan that provides huge tax windfalls for millionaires and two bits for the average American.

Following this press conference, I wrote President Carter urging him to reconsider his implied veto threat. I view the capital gains tax cut as essential to our long term recovery. A partial cut will not do. We should reduce the tax to a maximum rate of 25 percent, beyond what the House of Representatives has already accepted, and as the original Steiger and Hansen bills proposed. I ask unanimous consent to print the text of my letter at the close of these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PERCY. Mr. President, since the President made his June 26 statement, there has been evidence that the White House is willing to accept a cut in the taxation of capital gains. For example, on July 20, President Carter stated:

I will have to wait until the final tax package is placed on my desk after it has been considered and complete action from both Houses of Congress is concluded. At that time, I will decide whether or not that tax bill is in the best interests of our country. If it is not, I will veto it.

Mr. President, this last statement is a far cry from the rigid position President Carter took in June and I commend him for his apparent recognition that there is a great deal of merit in enacting a capital gains tax cut. Such a tax cut will benefit all Americans in the long run because it will give us a sounder economy and will lower the rate of inflation. If enacted in conjunction with other investment tax incentives—like a reduction in the maximum corporate tax rate, a permanent investment tax credit, a full investment credit for pollution control facilities and a tax reduction for middle income taxpayers—it will invigorate the economy and strengthen the hand of free enterprise. In short, Mr. President, these cuts will, like proposition 13 before it, give meaning to the oft-used phrase "free enterprise."

EXHIBIT 1

U.S. SENATE,
Washington, D.C., June 30, 1978.

The PRESIDENT,
The White House,
Washington, D.C. 20522

DEAR MR. PRESIDENT: I want to share my thoughts with you about the vital domestic issues of inflation, taxation and legislation to stimulate investment through lowering the taxation of capital gains and other measures. The proposals, introduced by Rep. William Steiger in the House and Senator Clifford Hansen in the Senate, would set the taxation of capital gains at the same level as in 1969.

I strongly support passage of this measure and urge you to reconsider your position and lend your offices to help move the bill through Congress.

I think that as former businessmen, we both appreciate the importance of capital formation in starting new companies and in employing workers in the private sector. When I joined Bell & Howell in 1938, it was a small company of less than a thousand workers and it would probably still be one today if we had not had access to venture capital markets. There was always a great deal of competition for that capital, but there was a plentiful supply of it then. Before I left the company, our U.S. employment increased to more than 10,000. Now, there is a serious scarcity of the type of money that helped us get off the ground.

Perhaps it would be helpful if I used just one specific case. A company in Chicago today has encountered a great deal of trouble in raising capital for new firms. Heizer Corp. is a business development company that helps get new businesses on their feet and then stays with them until they are stable. They have found that the 1969 tax change has virtually dried up investor interest in financing new companies. A small computer firm which they were helping actually had to go to Japanese and West German investors recently because no American investors would participate. The new firm, an IBM competitor, has highly capable executives but investors preferred other approaches to heavily-taxed capital investment.

This case does not appear to be unique. The Securities Industry Association certifies that in 1969, companies with net worth under $5 million made 548 stock offerings totaling $1.5 billion. Six years later, though, only four such offerings were made and they raised a total of only $16 million. Clearly something is seriously wrong.

The Small Business Administration is alarmed about this and, in a January, 1977 report, expressed that concern:

"In the face of clearly emerging needs and the documented benefits to the United States economy, a set of impediments have developed that are preventing smaller businesses from attracting the capital without which they cannot perform their traditional function of infusing innovation and new competition into the economy . . . A public policy that discourages the public from investing $1 billion a year of its savings in economic innovation, growth and the creation of jobs while it encourages the public to risk $17 billion a year in Government-sponsored lotteries, requires close and serious reexamination."

Larger businesses have also felt this capital pinch and many—especially those with low profits to earnings ratios—have been forced to go into debt to finance their own expansions. The consequence has been additional pressure on interest rates, bidding them up out of the reach of some small businesses and making government financing far more expensive than ever before.

Most of our major trading partners—and especially our two greatest competitors, Germany and Japan—do not even tax capital gains on portfolio investment. The individual savings rate is also higher in these two countries. Japanese save at triple the rate of Americans and the West Germans save at more than twice our pace. Of all the major industrial countries, the U.S. put the smallest percentage of GNP back into manufacturing capacity between 1965 and 1976. The country next in line was England, hardly a model for investment strategy.

During the time that our venture and investment capital has been drying up, the Federal Government entered into a new phase of regulation of the economy. These effects have been most evident in the environmental and safety areas and, according to the Council on Environmental Quality, private capital outlays for pollution abatement were $3.8 billion higher in 1975 than they would have been in the absence of the Federal requirements. Similar estimates of annual costs to business have been made for safety and health regulations, non-productive capital investment requirements exceeding 28% in many industries.

Many of these regulations protect and safeguard the consumer and worker and I have supported these when they were before Congress. The Federal Government must recognize the economic costs of these vast investments, however, and act to make sure that we do not lose our ability to generate a growing economy.

The effect of a capital shortage is also seen in our productivity rate, which, according to your 1978 Economic Report, has dropped from annual increases of about 2½% between 1950–1968 to about 1½% over the past decade. As you know so well, productivity and investment are closely related and when our productivity begins to sag, inflationary pressures are increased.

Government estimates of the costs of the Steiger-Hansen proposal have failed to take into account the economic changes that would spin off from the tax change. A model prepared by Data Resources, Inc. and based on the passage of the proposal, forecasts a startling increase of $100 billion in GNP between 1979 and 1983 (The firm's predictions show increases over the Treasury's own estimates). Investment itself would of course rise—by an estimated $46 billion—because the proposal encourages the realization of capital gains. The subsequent rise in the stock market will lower the cost of obtaining funds through equity financing, thus leaving more for actual investment. DRI found the employment effects of this invigorated economic activity to be particularly encouraging: in 1982, 520,000 new jobs would be created over what the Treasury predicts for that year. Finally, and from our standpoint an important consideration, Federal revenues would actually increase. By 1983, revenues would have jumped by $12.3 billion.

This would undoubtedly be made up in part by increased revenues from the capital gains tax. As you know, these revenues fell precipitously in 1970, after the present tax was enacted, and have only just recovered their 1969 level, albeit in inflation dollars.

The experience of the company previously mentioned proves that this model is on the right track. Since 1969, they have helped 24 companies get started, with an initial investment of $80 million. The results of this investment are truly impressive. The 1978 sales of these 24 firms exceed $1 billion and their pre-tax profits stand at $152 million. These businesses contribute annually $75 million in taxes to the Federal Government alone. As of March, they employed 20,000 workers. All of this has been costly, however, as the investment required to create a new, permanent job is over $13,000. It was fortunate that Heizer obtained its initial capital prior to 1969. It would be virtually impossible to accumulate that type of investment capital today, due in large part to the confiscatory nature of our tax laws.

Those tax laws have turned many Americans away from investing and have penalized middle income families who sell their homes. According to the Treasury Department, the two largest items accounting for capital gains are stocks and bonds and the sale of residences. What is more, in 1976, 62 percent of total net capital gains were realized by taxpayers with less than $50,000 income. A revitalization of the stock market will benefit all investors, regardless of income.

Since the 1969 change in the treatment of capital gains, the number of stockholders has dropped steadily so that today many Americans do not hold the types of investments that will ultimately yield capital

gains. In fact, the number of stockholders has dropped from 31 million in 1969 to 25 million today. Despite this decline, the overwhelming majority of stockholders are not what we would ordinarily consider wealthy.

In 1975, nearly three-quarters of individual stockholders earned less than $25,000 a year. In the past decade, the number of institutional investors has increased dramatically to the point that they now account for over one-third of all stock investors. Although these are big investors, they often represent moderate income Americans in the form of pension and profit-sharing plans and stock option programs. These are the people who ultimately benefit from increased investments and we should be aware than Federal tax policy discriminates against them in the long-run.

The Council on Wage and Price Stability reported this spring that "inflation in the housing sector has been a persistent problem over the past few years and is unlikely to dissipate wholly in the near future." Rising housing prices and interest rates have put a strain on would-be homebuyers, but the present capital gains tax has put the bite on existing homeowners who may want to sell their home and move into a smaller house or apartment. The average price of an existing home has skyrocketed from just over $22,000 in 1968 to nearly $54,000 today. A family that bought ten years ago and sells their home today could realize tens of thousands in one-time capital gains, even if they were low or middle income. A simple change in tax policy will help these homeowners immensely.

You have properly focused the nation's attention in recent months on the problems of inflation. I support your efforts in this direction but feel that one of the strongest weapons we have against spiraling wages and prices is investment which leads to increases in our productivity. It lies at the heart of solving inflation and I feel the passage of this provision, together with other investment tax incentives like a reduction in the maximum corporate tax rate, a permanent investment tax credit, a full investment credit for pollution control facilities and a tax reduction for middle income taxpayers, is essential to the nation's economic health.

I would like to urge you again to give full consideration to supporting these important economic steps toward a sound economy. I look forward to working with you and your economic advisors in this program that can improve the economic well-being of every American in a relatively short time.

Sincerely,

CHARLES H. PERCY,
United States Senator.

CIVIL SERVICE REFORM

Mr. STEVENS. Mr. President, Senator MATHIAS and I have recommended changes to the President's civil service reform proposal during the last several months. Although some of these proposals were accepted by the Senate Governmental Affairs Committee, there are significant improvements which should be made on the Senate floor. Senator MATHIAS mentioned some ideas in a recent speech at the annual convention of the American Federation of Government Employees in Chicago. I believe his comments are important to all personnel in the civil service and I ask that his complete speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

THE DANGERS OF PROPOSITION 13 FEVER

(By Senator CHARLES McC. MATHIAS, Jr.)

I'm delighted to be here for the Annual Convention of the American Federation of Government Employees. As many of you know, I have a special place in my heart for federal workers. And for good reason. I think I have probably represented more federal employees for a longer time than any other member of the Congress.

Naturally then, I am concerned when the capabilities and the dedication of federal workers come under attack. And regrettably today there is a tendency to transform legitimate complaints about government regulation and waste into an indictment of the federal worker. This is as unfair as it is unsound.

But resounding through the corridors of the Capitol and across the land is the insistent chant of "Proposition 13." And a lot of people are swaying to its beat.

As you all know, Proposition 13 is a product of California's referendum system that gives voters a chance to express their views on various policy issues. Proposition 13 itself provides for a rollback of the real estate tax rate in California that will put pressure on government, at the state, county and local levels, to reduce costs. Its repercussions, however, go far beyond California.

When the voters of California opted for Proposition 13, they fired a modern day "shot heard round the world." Embattled taxpayers pricked up their ears and so did their representatives in the Congress.

Proposition 13 dramatizes a fact that has been apparent for some time now: taxpayers, faced by mounting inflation, are less and less willing to surrender their tax dollars. Last year Louis Harris and Assocites asked a group of taxpayers this question:

As far as you (and your family) are concerned do you feel you have reached the breaking point on the amount of taxes you pay?

The response was an overwhelming "Yes."

Seventy-two percent of those polled said they'd reached the end of their rope on taxes. Since then inflation has gotten worse and so has the situation. Proposition 13 may not actually herald a nationwide taxpayer revolt, but it's a clear danger signal. And members of Congress aren't going to ignore its implications.

As former Senator Norris Cotton used to say: "The boys are in such a mood that if someone introduced the Ten Commandments, they'd cut them down to eight."

I am as economy-minded as any of my colleagues, I think. Being careful with money is an inescapable state of mind for almost anyone who grew up during the Depression as I did. But I think we have to use some judgment about where and how we economize. If Proposition 13 fever leads to curtailing federal waste and upgrading federal efficiency, then I'm all for it. But if its brunt falls on the shoulders of government workers, if it means pay cuts and job cuts, if it translates into "last on, first off", then I think we'd better take another look at it.

It is simply unfair to use the argument of government inefficiency as an excuse to run roughshod over the basic rights of federal employees. But I'm afraid the trend is in that direction. Anti-government sentiment has been exploited to justify civil service reforms that jeopardize federal workers' rights and to put an unjust pay cap on federal workers' salaries. I am very concerned about both of these developments.

I don't quibble with the fact that the federal government is ripe for a major overhaul. But there's a right way and a wrong way to go about it. We had a great Marylander named H. L. Mencken who said that "for every problem there is a solution that is simple, easy and wrong." That is the kind of solution we want to avoid in responding to pressure for government economy.

Back in 1949, the first Hoover Commission found that:

. . . (t)he United States is paying heavily for a lack of order, a lack of clear lines of authority and responsibility, and a lack of effective organization in the executive branch. . . . We must reorganize the executive branch to give it the simplicity of structure, the unity of purpose and the clear line of executive authority that was originally intended under the Constitution.

To his credit, President Carter has recognized the need. But, in my opinion, many of the changes he proposes to make would endanger the impartiality of the civil service and hang a sword of Damocles over the head of every civil servant in the executive branch.

When the President announced his civil service reforms, he talked a lot about how difficult it is, under present law, to fire inadequate civil servants. In the name of reform, he went out of his way to create the most negative possible image of the civil servant.

In the process, President Carter's fancies outdistanced his facts. For example, he complained that in 1976 only 226 out of more than two million federal employees had been fired for incompetence and inefficiency. He said his plan would make it easier to prune the dead wood in the bureaucracy.

A couple of weeks later, thanks to some good investigative reporting by the *Washington Star*, Presidential Press Secretary Jody Powell had to recant for his boss. Powell acknowledged that the President's figure on firings had been way off the mark. In fact, there had been upwards of 17,000 dismissals for cause in 1976, said Powell, not just 226.

The President, it seems, "mis-spoke" a mouthful. And I can only wonder why, and worry about what motivated him to be so reckless with the image of the federal worker.

With all of this criticism of the Civil Service System, the pressure on the Congress to acquiesce in all the President's proposals has grown. To the extent that this campaign forces us to see and correct the flaws in our Civil Service System, it is healthy and I welcome it. But, to the extent that it stampedes us into hasty judgments that would prejudice basic job protections and legitimate employee rights, it is unhealthy and dangerous.

I've made no secret of my misgivings about the President's reform proposals and I'm not going to go into that in any detail. But I would like to say a few words about how this wave of anti-federal government feeling has made its way into the Senate.

When the Governmental Affairs Committee was considering the President's Civil Service Reform legislation, I asked the Committee to consider several changes in the bill—changes very like those recommended by AFGE. These included: the right of federal employees to have a hearing on the record before being taken off the payroll; placing the burden of proof on agencies in adverse action cases; applying basic elements of due process to the handling of career civil servants; awarding attorneys' fees to the prevailing party in adverse action cases; and the retention of grade and pay in reclassification and reduction in force cases.

Of all these proposed changes, only one—shifting the burden of proof on agencies—was incorporated into the legislation in Committee. None of my suggestions was radical or even new. But the temper of the Senate seems to be that anyone advocating even

these basic protections is simply soft on bureaucrats.

This attitude is dangerous. No one disputes that reform is necessary. But reform that smacks of a witch-hunt is worse than no reform at all. As a friend of mine remarked, "When Dr. Samuel Johnson said that 'patriotism was the last refuge of a scoundrel', he hadn't heard of reform."

Something that astounded me during the Committee's consideration of the "whistleblower" provisions of the bill was the Administration's apparent disregard of the employee's First Amendment rights. You may recall that this section provides protections to employees who expose illegalities or gross waste or mismanagement. Well, the Administration actually proposed that no protection be provided if an employee goes public within six months of his initial disclosure to a Specal Counsel. This provision would effectively silence the employee for the six-month period. Fortunately, Senator Muriel Humphrey and I did succeed in persuading the Committee to delete this section that was designed to place a "chilling effect" upon the employee's right of free speech.

The Civil Service Reform bill will be considered by the full Senate within the next several weeks. I have introduced amendments to the bill designed to protect the basic rights of federal employees which are inadequately safeguarded as the legislation now stands. I hope that I will be able to persuade my colleagues in the Senate that the protections I seek for federal workers will not infringe management's prerogatives, but rather will enhance the civil service by insuring that it can attract and keep the best talent available. I hope I will have your support in this.

I am equally disturbed by the pay cap and I voted against its extension to blue-collar workers. It seems to me the President and the Congress are guilty of forcing federal employees to bear the burden of the country's inflation problem unassisted.

In April when President Carter announced his plan to take the lead in breaking the wage-price spiral by holding federal pay increases to 5.5 percent, he simply turned his back on the comparability process. Instead, he decided to make federal workers the shock troops in the battle against inflaton. That might be all right if there were any reinforcements in sight. But I've scanned the horizon and as far as I can see the President's voluntary program of restraint in private sector wage adjustments hasn't even got any recruits.

Most principal settlements in the private sector have exceeded the 5.5 percent cap. The second quarter inflation rate, according to the Consumer Price Index, now stands at 11.4 percent. The short-term federal interest rate just climbed from 6.8 to 7.3. Before the end of the year it is expected to rise an additional percentage point. Home mortgage rates are at a whopping 9.4 percent and going up. Most private concerns are reporting record profits this year, but so far they've only given a polite nod to the voluntary program. Mr. Carter's example is just not working out.

To add insult to injury, in June the Senate extended the 5.5 percent pay cap to the federal blue-collar work force as well—which brings us back to the unfortunate side effects of Proposition 13.

Only 21 Senators voted against the pay cap. As I said, I was one of them and I don't regret my vote a single bit. What I do regret is that people either can't understand, or don't want to understand, that by holding the federal pay increase to 5.5 percent the President and the Congress are actually forcing federal workers to take a cut in pay. With inflation topping 11 percent, there's just no other way to read the situation.

One thing is certain: if we continue to take advantage of Federal workers; if we continue to expect them to make sacrifices for the public good; if we continue to heap abuse on their heads and if we persist in shortchanging them in relationship to the private sector, then pretty soon we simply won't be able to attract firstrate talent into government service as we have in the past.

And, when that day comes, all the reforms in the world won't amount to a hill of beans because there won't be anyone left in government with enough sense to carry them out.

In 1955, in the final days of the second Hoover Commission on Civil Service Reform, the late Herbert Hoover gave an interview in which he summed up his feelings about government. This is what he said:

Government cannot be any better than the men and women who make it function. Our greatest problem is to get the kind of men and women the government needs and to keep them in government . . .

We must make civil service so attractive, so secure, so free from frustrations, so dignified, that the right kind of men and women will make it a career. Then we can have the kind of government that the United States needs and should have.

To that I say, Amen.

We need efficient effective government. But we aren't going to get it by shortchanging the men and women who have devoted their lives to federal service. I vow to do all I can to reverse the trend of making a scapegoat of the Federal employee. I look forward to working with you in this effort.

AUTHORIZATION FOR TECHNICAL AND CLERICAL CORRECTIONS—S. 3375

Mr. STEVENS. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 3375.

The PRESIDING OFFICER. Without objection, it is so ordered.

CIVIL SERVICE REFORM ACT

Mr. PERCY. Mr. President, while the majority leader is on the floor and so is the distinguished acting minority leader, because the Senator from Illinois wishes to protect every right of the distinguished Senator from Alaska, who has been extremely cooperative in moving us forward so that we could bring the Civil Service Reform Act to the floor, I should like to ask the majority leader what the proposed schedule might now be for civil service reform so a number of Senators involved in it can plan on being present. It is the understanding of the Senator from Illinois that the Senator from Alaska would prefer to have this legislation taken up around the 11th of September. Is that correct?

Mr. STEVENS. Yes. I have sent a letter to the distinguished majority leader and minority leader, pointing out that the days of the 7th, 8th, and 9th are involved in my State convention. I intend to be absent and I have a series of amendments, some of which have been agreed to and some of which have not. Though I am perfectly willing to enter into a time agreement, I hope the matter will not be completely disposed of on the days of my absence. I shall return on the 11th.

Mr. PERCY. For the information of the majority leader, the Senator from Illinois has a problem with the 11th in that he is addressing the State convention of the AFL–CIO and will not be returning until late that afternoon, on the 11th. The Senator from Illinois will be prepared to go ahead on the 12th, or will work it out with the chairman of the committee or the floor manager of the bill (Mr. RIBICOFF) to do it earlier if possible. I should like general advice from the majority leader as to when the majority leader feels we might aim for this. I know that he is anxious to move this forward expeditiously, taking into account that there are a number of Senators who have indicated an interest in the legislation and that it is a high priority item.

Mr. ROBERT C. BYRD. I am glad to have the information that both the Senator from Alaska and the Senator from Illinois have entered into the RECORD as to their own personal situations. I cannot give the Senators any statement at this time as to when the legislation will be taken up before the Senate. The dates which he has mentioned—to wit, 11th, 12th, 13th, and so on—are dates when I anticipate the Senate will have before it the natural gas conference report, which is a highly privileged matter and on which there will be some extended debate. I want that out so that the Senate will know it will not be an easy matter to schedule civil service reform at that particular point.

I am very eager to schedule the measure and want to dispose of it, but I have to point to the problem involved in the gas bill.

Mr. PERCY. I thank the distingushed majority leader.

ORDER TO RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL ORDER FOR TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow morning, after the two leaders have been recognized under the standing order, Senator PROXMIRE be recognized for not to exceed 15 minutes, after which the Senate will resume its consideration of the Elementary and Secondary Education Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD, Mr. President, under the order previously entered, Mr. DOMENICI is to be recognized in the morning after opening statements to call up his amendments. On disposition of his amendments and other amendments, the Senate, no later than 2 p.m., will proceed to the consideration of certain bills that have been reported from the Committee on Finance.

Mr. President, I ask unanimous consent that I may be authorized at any time on tomorrow to proceed to the consideration of either the Elementary and Secondary Education Act or the CETA bill, or, at any time prior to the final disposition of any of the bills that have been reported out of the Finance Committee.

Mr. STEVENS. Reserving the right to object, it is my understanding that S. 1753 is the pending business. Is that not correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Is the distinguished majority leader asking for consent to set that aside for any other finance bill on the Calendar?

Mr. ROBERT C. BYRD. It will be set aside at 2 p.m. tomorrow for any of those finance bills. I can perceive a possible situation in which action could be completed on that bill, say, at 2:30 p.m.; or I can conceive of the possibility that once the Senate gets on one of those finance bills, it could get stalled. In that event, if the matter would be impossible of resolution in a reasonably short time, I should like the authority to go back to the Elementary and Secondary Education Act and/or CETA before the week is out so the Senate can complete action on those two bills this week.

Mr. STEVENS. Reserving the right to object again, I certainly do not object to those two matters. I wonder if the majority leader can tell us which of the Finance Committee bills on the calendar he refers to in connection with this consent agreement?

Mr. ROBERT C. BYRD. Yes; the consent order has already been entered for the following Calendar Orders Nos. 721, 728, 849, 1024, 1025, 1032, and 1034, to be called up tomorrow.

Mr. STEVENS. Mr. President, the distinguished majority leader does not seek to expand that list with reference to the Finance Committee bills on the calendar?

Mr. ROBERT C. BYRD. Not at all.

Mr. STEVENS. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished acting Republican leader. I do not anticipate having to use this authority. It is just to be used in the event the Senate should get stalled on one of those Finance Committee bills. I hope that, in that event, the Senate could complete action on the Elementary and Secondary Education Act and the CETA bill this week.

RECESS UNTIL TOMORROW AT 9:30 A.M.

Mr. ROBERT C. BYRD. Mr. President, I should like to have the Chair, which is presently being honored by the distinguished Senator from Arkansas, recess the Senate.

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until 9:30 a.m. tomorrow morning.

Whereupon, at 7:39 p.m. the Senate recessed until tomorrow, August 23, 1978, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate August 22, 1978:

DEPARTMENT OF STATE

William H. Luers, of Illinois, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Venezuela.

CONFIRMATIONS

Executive nominations confirmed by the Senate August 22, 1978:

DEPARTMENT OF JUSTICE

William E. Pitt, of Utah, to be U.S. marshal for the district of Utah for the term of 4 years.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility, designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Hans Helmuth Driessnack, [redacted], U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Lloyd Richardson Leavitt, Jr., [redacted], U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Winfield Wayne Scott, Jr., [redacted], U.S. Air Force.

Lt. Gen. John P. Flynn, U.S. Air Force (age 55), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

Lt. Gen. Lee M. Paschall, U.S. Air Force (age 56), for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

Gen. William J. Evans, U.S. Air Force (age 54), for appointment to the grade of general on the retired list pursuant to the provisions of title 10, United States Code, section 8962.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designed by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Eugene Priest Forrester, [redacted], U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be general

Lt. Gen. Robert Morin Shoemaker, [redacted], Army of the United States (major general, U.S. Army).

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. John Adams Wickham, Jr., [redacted], Army of the United States (brigadier general, U.S. Army).

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designed by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Robert George Yerks, [redacted], Army of the United States (brigadier general, U.S. Army).

Maj. Gen. La Vern E. Weber, [redacted], Army National Guard of the United States, to be reappointed as Chief, National Guard Bureau, for a period of 4 years beginning August 16, 1978, under the provisions of section 3015, title 10 United States Code.

The following-named officers for appointment in the Regular Army of the United States to the grade indicated, under the provisions of title 10, United States Code, sections 3284 and 3306:

To be brigadier general

Brig. Gen. James M. Thompson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Clyde W. Spence, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Grayson D. Tate, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Mary E. Clarke, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. James C. Pennington, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Edward B. Atkeson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert W. Sennewald, [redacted], Army of the United States (colonel, U.S. Army).

Maj. Gen. Thomas P. Lynch, [redacted], Army of the United States (colonel, U.S. Army).

Maj. Gen. Harold F. Hardin, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Maj. Gen. James F. Cochran III, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Thomas D. Ayers, [redacted], Army of the United States (colonel, U.S Army).

Brig. Gen. Walter F. Ulmer, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Richard X. Larkin, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert L. Wetzel, [redacted], Army of the United States (colonel, U.S. Army).

Maj. Gen. Joseph N. Jaggers, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Edmund R. Thompson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Frank P. Ragano, [redacted], Army of the United States (colonel, U.S. Army).

Maj. Gen. William J. Livsey, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Maj. Gen. Alan A. Nord, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert C. Gaskill, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Elton J. Delaune, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert L. Moore, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert B. Solomon, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. David K. Doyle, [redacted], Army of the United States (colonel, U.S. Army).

The following-named officers for temporary appointment in the Army of the United States to the grade indicated under the provisions of title 10, United States Code, sections 3442 and 3447:

To be major general

Brig. Gen. Thomas D. Ayers, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Walter F. Ulmer, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert L. Wetzel, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Jerry R. Curry, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Elton J. Delaune, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Fred K. Mahaffey, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. Robert B. Solomon, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John D. Bruen, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert W. Sennewald, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Richard X Larkin, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Joseph T. Palastra, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Mary E. Clarke, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Edward B. Atkeson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Elvin R. Heiberg III, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Richard D. Lawrence, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Grayson D. Tate, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Clyde W. Spence, Jr., [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. James C. Pennington, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert L. Moore, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Howard F. Stone, [redacted], Army of the United States (lieutenant colonel, U.S. Army).

Brig. Gen. James J. Lindsay, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. John C. Bard, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Richard D. Boyle, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Robert C. Gaskill, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. David K. Doyle, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. James M. Thompson, [redacted], Army of the United States (colonel, U.S. Army).

Brig. Gen. Frank P. Ragano, [redacted], Army of the United States (colonel, U.S. Army).

The following-named Army National Guard of the United States officer for appointment to the grade of major general as a Reserve commissioned officer of the Army and to the grade of major general, Army of the United States, under the provision of title 10, United States Code, sections 593a, 3385, 3442, and 3447:

To be major general

Brig. Gen. Emmett Hudson Walker, Jr., [redacted]

The U.S. Army Reserve officers named herein for appointment as Reserve commissioned officers of the Army, under the provisions of title 10, United States Code, sections 593(a), 3371, and 3384:

To be major general

Brig. Gen. Forrest Anderson Abbott, [redacted]

Brig. Gen. Wilbur James Bunting, [redacted]

Brig. Gen. John Quill Taylor King, [redacted]

Brig. Gen. Robert Lorenzo Lane, [redacted]

Brig. Gen. Frederick Hebel Lawson, [redacted]

Brig. Gen. Thomas Lee Merrill, [redacted]

Brig. Gen. Harry Hart Treadaway, [redacted]

To be brigadier general

Col. Louis Holmes Ginn III, [redacted].
Col. James Paul Harley, [redacted].
Col. Daniel Bruce Johnson, [redacted].
Col. Angelo David Juarez, [redacted].
Col. Donald Edward Lehman, [redacted].
Col. William Barton Merryman, [redacted].
Col. Harley Lester Pickens, [redacted].
Col. Theodore R. Sadler, Jr., [redacted].
Col. Manila Grant Shaver, [redacted].
Col. Charles Morris Sirhal, [redacted].

The Army National Guard of the United States officers named herein for appointment as Reserve commissioned officers of the Army, under the provisions of title 10, United States Code, sections 503(a) and 3385:

To be major general

Brig. Gen. Robert Darrell Weliver, [redacted]

To be brigadier general

Col. Raymond Davis Atkins, [redacted].
Col. Colin Charles Campbell, [redacted].
Col. Richard Francis Corcoran, [redacted].
Col. Robert Stuart Davis, [redacted].
Col. Richard Daniel Dean, [redacted].
Col. George Henry Gray, [redacted].
Col. Theodore Ernest Herman, [redacted].
Col. Curtis Arthur Jennings, [redacted].
Col. Vincent William Lanna, [redacted].
Col. James Bracken Lee, [redacted].
Col. Charles Rodney Painter, [redacted].
Col. Anthony Louis Palumbo, [redacted].
Col. Donald Harry Remick, [redacted].
Col. Patrick Martin Roach, [redacted].
Col. Elmer Lewis Stephens, [redacted].
Col. Ansel Martin Stroud, Jr., [redacted].
Col. Herbert Thomas Taylor, Jr., [redacted].
Col. Edward William Waldon, [redacted].
Col. John Burl Webb, Jr., [redacted].

The Army National Guard of the United States officers named herein for appointment as Reserve commissioned officers of the Army, under the provisions of title 10, United States Code, sections 593(a) and 3392:

To be brigadier general

Col. Joaquin Balaguer-Rivera, [redacted].
Col. Joe Edmund Burke, [redacted].
Col. Charles Edward Hupe, [redacted].
Col. William John Jefferds, [redacted].

IN THE NAVY

The following-named officer, having been designated for commands and other duties of great importance and responsibility in the grade of vice admiral within the contemplation of title 10, United States Code, section 5231, for appointment while so serving as follows:

To be vice admiral

Rear Adm. Ronald J. Hays, U.S. Navy.

Rear Adm. Edward P. Travers, U.S. Navy, to be Director of Budget and Reports in the Department of the Navy for a term of 3 years pursuant to title 10, United States Code, section 5064.

Rear Adm. Carlisle A. H. Trost, having been designated for commands and other duties of great importance and responsibility in the grade of vice admiral within the contemplation of title 10, United States Code, section 5231, for appointment as vice admiral while so serving.

SENATE—*Wednesday, August 23, 1978*

(Legislative day of Wednesday, August 16, 1978)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. DENNIS DECONCINI, a Senator from the State of Arizona.

PRAYER

The Reverend Dr. Robert B. Harriman, director, the Presbyterian Council for Chaplains and Military Personnel, Washington, D.C., offered the following prayer:

Let us pray: Eternal God, Thou knowest how busy we become, the constant pressures of our concerns, and the burdens which must be borne. If, in the business of this day we forget Thee, please do not forget us. These who serve within this place are as busy as any and busier than most. Election to high and honorable position has brought an enormity of responsibility and countless pressures on body, mind, and spirit. They are asked to do the seemingly impossible, immediately. They are the target of opportunity for some who seek only personal gain, favored position, or unwarranted generosity.

The world gives ample evidence of injustice, poverty, weakness, repression, war, and hatred. And these have been asked to bring justice, wealth, strength, freedom, peace, and love. How great their task.

Our Father, we thank Thee for their dedication to achievement of high goals. May they neither delay in approaching difficult matters nor yield to the temptation of expediency.

So we also pray for our Armed Forces. In their readiness to protect, may they understand that peace is their profession.

These prayers for the welfare and harmony of this Nation are offered with expectation of Thy hearing, and our willingness to be a part of Thine answer. In Jesus' name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 23, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DENNIS DECONCINI, a Senator from the State of Arizona, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. DECONCINI thereupon assumed the chair as Acting President pro tempore.

THE REVEREND DR. ROBERT B. HARRIMAN

The ACTING PRESIDENT pro tempore. The Chair notes that Dr. Harriman is the director of the Presbyterian Council for Chaplains and Military Personnel, and would like the RECORD to so show.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE SENATE SCHEDULE

Mr. ROBERT C. BYRD. Mr. President, the Senate is progressing well with its schedule. I believe that it is entirely possible to achieve sine die adjournment by some time in mid-October, depending on the future progress that is made, and especially in connection with energy legislation, the tax cut legislation, the appropriation bills, and various expiring authorizations.

Today the Senate will be acting on CETA and the elementary and secondary education bill, and several small bills that have come out of the Finance Committee.

I would hope that upon the completion of these measures the Senate could go to the HEW appropriation bill, which is one of the three remaining appropriation bills tc be disposed of. It is a big bill and usually takes a couple of days, and has taken more than 2 days in time, but the chairman of the committee (Mr. MAGNUSON) wants very much to bring it up. He feels that it can be disposed of in a couple of days.

So I would hope that following the bills that have been laid out for today the Senate can proceed to the consideration of the HEW appropriation bill, finish it, lay down the civil service reform bill before we go out and not be in next week and have that bill as the underlying measure upon the return of the Senate after the holiday.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, I thank the majority leader for his recitation.

I agree with him; the Senate has made good progress, and I share with him the hope we can adjourn as early in October as possible.

I am mindful of the fact that those of us running for reelection consider ourselves perishable commodities. We are anxious to provide against that uncertainty.

Mr. President, as I understand the suggestion made by the majority leader, it was that we finish with the matters now before us, or to be before us, that is to say, CETA and ESEA, then turn, I gather yet this week, to the HEW appropriation bill.

Mr. ROBERT C. BYRD. Yes, and we would also include the seven or eight small bills that would come out of the Finance Committee which have been scheduled already. Then we could turn to the HEW appropriation which has been on the Calendar for several days and, hopefully, complete action on them by the close of business Saturday, or before. Once we complete that action, lay down civil service reform, but with no action, we would then go out for the holiday.

Mr. BAKER. Mr. President, I thank the majority leader.

I will inquire on this side to see what sort of problems that would cause our Members. I would say, however, that based on earlier conversations with other Members, I had the impression that the HEW appropriation bill would not be up this week. So it may be difficult to do this.

I also gather the impression that there is a growing likelihood of a Saturday session. Would the majority leader give me further information in that regard?

Mr. ROBERT C. BYRD. Yes. There would be, and for this reason. I think it is necessary that we complete action on the HEW appropriation bill before we go out, because when we return, we are going to have the second concurrent budget resolution. We are then going to have the conference report on natural gas and that will require some several days, I assume. Then, when we complete that, we would want to take up the other two conference reports on energy, energy conservation, and the so-called utility rate reform, the conference report. We must complete action on those energy conference reports and if we do not do the HEW appropriation before we go out, it means that big bill on which there will probably have to be an extended conference, will be held up behind all this other energy legislation.

So I think it is very important that the Senate go to work on the HEW appropriation bill before we go out, which could very well necessitate a Saturday session this week.

Mr. BAKER. Mr. President, if the Senator will yield further, could the Senator give me any views on how long he thinks the eight so-called tax bills might take? There are no time limits on them, I understand.

Mr. ROBERT C. BYRD. No, there are not.

Mr. BAKER. There are amendments to at least some of them.

Statements or insertions which are not spoken by the Member on the floor will be identified by the use of a "bullet" symbol, i.e., ●

Mr. ROBERT C. BYRD. Yes.

In talking to Senator LONG and Senator CURTIS—I believe the distinguished minority leader and I were in discussion with those two Senators some time ago—it was indicated that it was not felt that it would take long to complete action on those eight bills. There would be an amendment or two anticipated to each, or some of the several, and so it would be hoped we could clean up those bills maybe today.

Mr. BAKER. Mr. President, I thank the majority leader.

This morning I will talk with those Senators on my side who I know will be interested in the HEW appropriation bill.

Of course, they are all interested, but I am referring to those who may be particularly interested in it, or may have amendments to offer, and I will try to communicate that information to the majority leader as soon as possible.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I fully understand the exigencies of time and pressure on him to try to move this as soon as possible. I will be in touch with him.

Mr. ROBERT C. BYRD. I thank the minority leader.

I hope to get started on that bill tomorrow, and I believe we can do it. It might require a late session today, but if we can get started tomorrow—I see heads shaking in a negative fashion, but I am very, very optimistic and very, very determined, may I say, to proceed with the HEW appropriation bill this week and complete action on it; and if not, to complete it next week.

I yield the floor.

Mr. BAKER. Before the Senator yields the floor, I should like one more word, if the Senator will yield, and I will do it on my time if he wishes.

The suggested agenda would be to try to complete CETA and ESEA today, as well as the eight tax bills today.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. And then either to lay down tonight or to proceed in the morning, as the first order of business, with two of the HEW appropriation bills.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. And to work on that Thursday and Friday, and if necessary, on Saturday.

Mr. ROBERT C. BYRD. And if necessary, next Monday and Tuesday; because I am absolutely determined, despite negative nods of the head, to finish action on this HEW appropriation bill before we go out, even if we have to be in next Monday and Tuesday. We just cannot have that bill hanging around here after we come back from the holidays, with the energy conference reports, and hope to adjourn in mid-October.

Mr. BAKER. I am sure that the negative shakes of the head were in resignation, not in disagreement.

Mr. ROBERT C. BYRD. May I say that the minority leader was not shaking his head.

Mr. BAKER. At least, not visibly.

Mr. ROBERT C. BYRD. No. I thank the minority leader.

Mr. BAKER. I thank the Senator.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Wisconsin (Mr. PROXMIRE) is recognized for 15 minutes.

THE ELEMENTARY AND SECONDARY EDUCATION ACT: IT IS TIME TO CUT A SACRED COW DOWN TO SIZE

Mr. PROXMIRE. Mr. President, the Senate will today debate S. 1753, legislation to revise and extend the Elementary and Secondary Education Act.

As we all know, this legislation has long been considered a sacred cow. No single piece of legislation enjoys such immunity from criticism.

After all, who can vote against education for our youth?

Who can oppose legislation that brings Federal dollars to all our States, all 435 congressional districts, and nearly every city and town we represent?

Well, Mr. President, I rise today to tell the Senate that this bill, as presently written, is bad legislation.

It is bad national policy.

And it is fiscally irresponsible.

Here is why.

AUTHORIZATION LEVELS: A GRAND SLAM FOR BUDGET BUSTING

First, the authorization levels bear no resemblance to reality.

Mr. President, I am no babe in the woods. I fully expect the proponents of these programs to attempt to put as much pressure on the Appropriations Committee as they can muster to get their pet programs the highest appropriations possible. That is to be expected.

But these recommendations are not even in the ball park. In fact, when one gets to bat, it is a guaranteed grand slam for budget busting.

For this bill, the numbers tell the story.

For the next 5 fiscal years, 1979 through 1983, this legislation proposes a total authorization level of over $55 billion.

You heard it right—$55 billion!

And that figure does not include the numerous programs with indefinite authorizations, which could push that total even higher.

To get a clearer picture of how out of line these recommendations are, just look at the authorizations for fiscal 1979.

For the programs covered by this bill, President Carter requested approximately $5 billion in his budget.

The Senate and House Appropriations Committees, after careful review, approved—with some rearrangement—spending levels very near the Presidential request of $5 billion.

That figure represented all the expansion that we felt could prudently be undertaken.

If we had followed the recommendations in this legislation, we would have approved over $11 billion—an increase of well over 100 percent.

We have been faced with a consistent pattern of authorizing bills for education that bear no resemblance to reality. They merely make the tough decisions faced by the Appropriations Committee members all the harder.

Enough is enough.

It is time to cut this sacred cow down to size and reduce these authorization levels drastically during debate.

TRIGGER ON A LOADED GUN

Second, this authorization is a monument to the clever budgetary device of a trigger mechanism. A what? A trigger mechanism. You pull the trigger and all hell breaks loose.

Never heard on one? Well, in this bill they come in all shapes and sizes—a regular department store full.

Here is the simplest form.

First, combine a number of small programs into one title.

Then, require that none of the programs can be funded until all of them are funded at some specified minimum level.

You have now forced the Appropriations Committee to fund a whole host of programs that may be good, bad, or worthless, before we can even reach a particularly meritorious one.

This is not merely an attempt to usurp the powers of the Appropriations Committee to give these programs careful year-by-year review.

It is a trigger mechanism connected to a loaded gun. And where is that gun pointed? Right at the American taxpayers.

It is a blatant attempt to force us to fund every pet project of the educational establishment.

Whatever happened to the concept of judging each and every project or program on its merit, letting the chips fall where they may?

Whatever happened to the concept of Government responsible to the taxpayers?

And what of the Budget Act, and our high words about making the budget more controllable?

Trigger mechanisms push us in exactly the opposite direction.

They are an abdication of our responsibility to the taxpayers and to the budget process we have established.

They are wrong. Dead wrong.

Let us stop them now before we straitjacket ourselves for the next 5 years.

IMPACT AID

Mr. President, the third problem with this bill is impact aid.

Here is a classic example of a good program run amok.

Begun in 1950 as a modest relief program of $30 million, this program has literally exploded. And this bill recommends a whopping $1.4 billion in 1979 and nearly $2 billion in 1983.

The premise upon which this program is based remains sound. Federal installations, employing hundreds or thousands of men and women, flood local school systems with their dependents. If the parents live and work on tax-exempt Federal property, the school district faces a serious financial crunch in attempting to meet the expense of educating these children.

But over the years, the program has

been altered beyond recognition in two important ways.

First, the once narrow eligibility criteria have been broadened like an 8-lane expressway. We now have two classes of students: The (A) students we originally meant to help, whose parents live and work on Federal property; and now we have (B) students, whose parents work on Federal property or live on Federal property. And over the years, we even have subdivided these categories further, as more groups jumped on the Federal gravy train.

Second, the committee developed an elaborate trigger mechanism known as the tier system. If impact aid is not fully funded, the tier system forces the Appropriations Committee to split up funds for the different categories and subgroupings according to a mandatory percentage formula.

Not only does this tier system attempt to prevent the Appropriations Committee from exercising its review authority—which it does—but it also creates a Rube Goldberg bureaucratic device for determining each district's eligibility.

The committee report itself notes on page 91 that up to 32 different computations are necessary to determine a school district's entitlement and an additional 32 calculations may be necessary to determine the district's payment.

The implications of these changes are frightening.

Expanding eligibility has caused this program to grow like topsy.

Between 1951 and 1976, the number of (A) students has grown from 50,000 to over 360,000, while the number of (B) students has increased from 386,000 to over 2.1 million.

(B) students are the ones who, in most cases, work on Government property—work for the Senate, for example—and live where they pay taxes.

In addition, grave inequities have resulted. Because of the (B) student provisions, the suburbs of Washington, D.C., have been treated to a windfall bonanza. Fairfax County, Va.—the richest county in the country—had a 1970 median family income of $28,000, and very few tax-exempt Federal buildings but the county is the home of a large number of Federal employees. Despite the fact that these parents already pay property taxes, supporting the school systems their children attend, the county was eligible for $11 million in Federal support.

Eleven million dollars.

To put that in perspective, the entire State of Wisconsin receives only $3 million, and we have a median income of only $10,000—a far cry from the income of wealthy Fairfax.

So how does this bill deal with this morass?

In two ways—equally bad.

Not only did the committee reject the administration's proposal to eliminate eligibility for districts where Federal employees lived but did not work.

No, they were not satisfied to stop there, Mr. President.

The committee decided to continue the old politics of increasing eligibility. They now want to add the children of employees at federal owned postal facilities, property owned by foreign governments, and international organizations.

Where will it all end?

PROLIFERATING PROGRAMS

Finally, this bill significantly broadens the scope of existing programs and creates a whole new host of categorical programs so that everyone can get a piece of the action. In addition, the bill continues and even expands programs that simply are not working or do not belong in the Office of Education.

Let me cite just a few examples.

Bilingual education. Here is a program that has a fine purpose, to help assure equal educational opportunity to students with limited English-speaking ability.

But is it working? Not according to a $1.5 million evaluation conducted by the Office of Education itself.

The study of 1975 and 1976 bilingual education projects found that youngsters in the programs did not fare any better than students from similar backgrounds who were taught in traditional classes.

In fact, in some grades the students in traditional classes did slightly better in English than the students in the bilingual classes.

What is the committee's recommendation? Add $20 million for more evaluation and keep the authorizations increasing. From the current level of $160 million for 1978, the committee proposes $200 million for 1979 and increases reaching $400 million by fiscal 1983.

What is the logic here? Apparently, the worse the evaluation a program receives, the more money it receives.

A cut may well be in order here. But, at minimum, would it not make more sense to at least hold the line until we can be sure that this program can even be salvaged?

Special projects authority. The special projects authority of title III of the bill is fast becoming a grab bag for everyone's pet program. This bill reauthorizes three special programs: consumer education, metric education, and arts in education.

In addition, it creates six entirely new special programs: law-related education, correction education, youth employment, population education, health education, and biomedical sciences education.

These new authorities continue the proliferation of small Federal programs that burden local educators and the taxpayers.

And who do these programs benefit? Those school districts that can afford the art of "grantsmanship."

Ethnic heritage studies. Here is one of the smallest special interest programs in the Office of Education.

The administration has requested no funds for this program. It is being replaced by a new social history initiative under the Endowment for the Humanities. So why continue it here?

With the 20-percent increase in appropriations for the arts and humanities in this year's budget—continuing a long, long string of major increases—we can safely eliminate the authorization in this budget.

And the list goes on and on.

Mr. President, of all the great responsibilities facing this country there is none where the old adage that you cannot solve problems by throwing money at them has been more emphatically established than in education.

In the past few years we have vastly increased our Federal, State, and local spending for education. We now have more teachers, better paid teachers, more facilities and far better facilities, far more loans and grants and scholarships than ever before. We have had a whizbang Fourth of July explosion of billions of dollars for education and what has been the result?

Last night CBS in the first of three hour-long documentaries on the tragedy of American education told part of the story. The series is labeled: "Is Anyone Out There Learning?" The answer seems to be an emphatic no. One critic contended that HEW's motto should be changed to "Every day in every way we are getting dumber and dumber."

As the same critic points out at a time when precollege education costs a record $83 billion a year, 13 percent of all American 17-year-olds are functionally illiterate, and every year students are doing worse—not better, worse—on scholastic aptitude scores.

Mr. President, we have tried spending more money on education—oceans of money. The result is a nightmare of failure. The answer is not to pour even more down the rathole. It is time to stop and this bill is a good bill to stop on.

THE PROXMIRE PROPOSAL

Mr. President, there is still time for us to salvage this bill. Here are a few suggestions for starters:

First, we can cut the total authorization levels by 40 percent. This is not a Simon Legree suggestion. Just look at the disparity between authorization and appropriations levels.

This would also provide the committee with leeway for adjusting individual programs where further increases may actually be warranted.

Second, we must eliminate the complicated, budget-busting, trigger mechanisms.

Senator MAGNUSON, as chairman of the Appropriations Committee, and Senator MUSKIE, as chairman of the Budget Committee, have worked against incredible odds to make this budget process work. They have committed themselves to staying within the congressional budget and eliminating just these types of appropriations-forcing mechanisms. My hat is off to them.

But they cannot be expected to shoulder this burden alone. The Senate must give them its full support.

Third, while I have no illusions that we can eliminate coverage of the so-called (B) students under impact aid,

we can take several meaningful steps this year.

We must eliminate the proposal to extend impact aid to include Government-owned postal facilities.

We must accept the President's proposal to eliminate eligibility of school districts where Federal employees live but do not work. By accepting this provision, we would eliminate the most inequitable provisions of impact aid.

Finally, we need to hold the line on new categorical programs. Many of the new proposals under the title III special projects section are already covered by existing authorities.

The massive expansion of this section needs to be deleted.

CONCLUSION

Mr. President, my maiden speech before the Senate in 1957 was on the need for a strong policy of Federal support for education.

I am convinced today of that need, as I was 21 years ago.

The United States was the first country in the world to provide universal education for our children.

And that commitment to education has spearheaded our drive for equal opportunity.

But that concern—that commitment—cannot serve as a vehicle for special interest groups run rampant.

We can have a fiscally responsible bill. One that's good policy, too.

But only if we are willing to bite the bullet.

Mr. President, I ask unanimons consent that an article in yesterday's Wall Street Journal entitled "A Serious Look at the Education Slag Heap" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A SERIOUS LOOK AT THE EDUCATIONAL SLAG HEAP

(By Aram Bakshian, Jr.)

A great deal of ink and air time has been devoted to debunking the so-called myth of the melting pot. Ethnic Americans were never really assimilated, we are told—often by self-appointed ethnic spokesmen in search of new government and foundation grants.

Yet for all of the major immigrant groups that flooded into the United States in the second half of the 19th and the first half of the 20th centuries, there were two great melting pots—the American private sector, which provided an expanding job market for cheap labor, and our public elementary and secondary schools, which managed to impart a common language, a shared sense of citizenship, and the beginnings of an American ethos for immigrant groups as varied as Irish, Italians, Jews, Slavs, Greeks, Chinese, Germans, Japanese and even the occasional Armenian.

The achievement of America's public education system has been unique. No other society, in any era, has successfully turned millions of disparate, poor and often illiterate immigrants—few of whom had experienced the full rights and responsibilities of citizenship in their countries of origin—into full partners in a new society, sometimes in a single generation.

Yet there are increasingly disturbing signs that, for the two largest and least assimilated of America's ethnic minorities—blacks and Chicanos—the educational melting pot is turning into a slag heap. For these two minorities, who now compose a growing proportion of students in urban public schools, and for the shrinking percentage of white, middle class children whose parents have not yet fled to insulated suburbs or enrolled them in private schools, what H. G. Wells once called the "race between education and catastrophe" is being lost.

If CBS News is right—and the evidence marshalled in its impressive, three-part documentary on public education beginning tonight at 8 p.m. EDT is pretty overpowering—then HEW's motto should be changed to "Every day, in every way, we are getting dumber and dumber." At a time when pre-college public education costs a record $83 billion a year, 13% of all American 17-year-olds are functionally illiterate, and the decade-long plunge in scholastic aptitude scores continues. Clearly, the taxpayers aren't getting their money's worth and many young Americans are being short-changed in a way that may stunt them intellectually, emotionally and economically for life.

To CBS's credit, it has treated this potentionally sensational subject in extended detail rather than as a single, slick "60 Minutes" segment. CBS gives us a genuinely thoughtful if occasionally slow-moving three-hour presentation that makes for frequently depressing but invariably informative viewing. "Is Anyone Out There Learning?" is one of those all too rare reminders of the useful service network news can perform when it commits top dollars, talent and time slots to responsible in-depth reportage on important public issues.

Anchored by Walter Cronkite and backed by six correspondents in the field and a production force of 50, the report begins by focusing on a fairly representative urban school system, that of Denver. Denver's schools are neither the best nor the worst in the country. In medical terms they would probably qualify for a serious rather than critical listing, but they suffer from most of the current forms of educational malaise that have already ruined some larger, older city school systems: racial resistance to "White Anglo-Saxon cultural values" (such as reading, writing and arithmetic), busing, drugs, increasing absenteeism, lowered test scores, permissiveness (before the current superintendent took over, not a single student had been expelled in Denver for two years), and the crowning folly of "school promotion" (automatic passing of students at the end of each year, whether they have learned anything or not).

At the same time, and perhaps partially in reaction to all this, the curriculum has ballooned. Denver schools now offer 700 different courses. The result of more basket-weaving and less basic learning has been growing numbers of high school students with elementary school brains.

Why have so many parents ignored these trends and their children's obvious deficiencies until it is too late? In its second hour, tomorrow evening, CBS examines the problem of parent, student and teacher apathy along with other underlying causes of educational decline. Particularly to CBS's credit is its straightforward recognition of television itself as a major negative factor, both as a "time thief" eroding home reading and study patterns, and as a passive communication form that offers its viewers, especially undereducated youngsters, little active intellectual sitimulation.

Educational authorities and administrators of all stripes are heard from, ranging from HEW Secretary Joseph Califano, who lamely defends the status quo and advocates more of the same, to several local educators who have restored learning and civilized values to deteriorating schools. In its closing Thursday evening installment, CBS examines some of the latter's proposals for improving public education, cautiously and without any special pleading. The key to solving the problem, as perceived by both CBS and a national sampling of parent opinion commissioned for the program, is a return to fundamental learning skills—a greater effort to instill the necessary but unglamorous abc's that give youngsters the basic means of absorbing and communicating more complex learning. Specifics are examined.

What CBS fails to ask—much less to answer—is an even more basic question about the changed nature of both American education and American life. In an increasingly permissive welfare state, is it reasonable to expect backward groups to take much interest in education when, literate or not, they can look forward to a lifetime of state support and when, through debased grading practices, the high school diplomas they will receive are virtually worthless in the job marketplace?

We are now a country in which most middle class children routinely enjoy a level of unearned affluence and a range of temptations which only the children of the wealthy few were exposed to in the past, and in which disadvantaged children are born into ghettos where the state now guarantees a subsistence that only study and work used to provide. The result is both a more democratic society in the narrowly egalitarian sense, and one that carries within it the seeds of educational and moral decay. To the extent that our public schools reflect this greater social dilemma even three hours of excellent CBS News coverage can do little more than scratch the surface of the problem.

THE OPPOSITION TO THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, in spite of an ever-broadening base of support, in spite of frequent violations of fundamental human rights, and in spite of its embodying a deeply and obviously just principle—in spite of all these things, Mr. President, the Genocide Convention has not received the ratification of the U.S. Senate. For 30 years now the Senate has held back its approval.

Why has the ratification been denied for so long? What compelling objections have persuaded the Senate not to accede to the treaty on any of the four occasions when it was reported?

To be fair, the opposition has offered several substantial objections over the years. Until recently, in fact, the American Bar Association opposed the treaty. Fortunately, so many years of discussion have brought out very clearly the nature of every objection, the arguments pro and con, and the facts. One by one, those who oppose the treaty have been won over. The American Bar Association is one of the more recent converts, and as the voice of the American legal profession they are a formidable and welcome ally.

But what about those objections? What led the opposition to hold out so long?

Some opponents objected to a clause defining genocide as "acts committed with intent to destroy, in whole or in

part, a national, ethnic, racial, or religious group, as such." They questioned whether the destruction of some very small part of a group, say, two or three individuals, would be construed as genocide under the treaty. Mr. Dean Rusk laid that objection to rest almost three decades ago when, as Deputy Under Secretary of State, he recommended that the United States sign the treaty with the reservation that an act is not genocide unless it involves a substantial part of the group. The reason is clear: To allow the wholesale destruction of a people to occur before taking action would be the grossest sort of folly.

Others objected to the treaty's definition of an action, "causing serious bodily or mental harm to members of the group," as an act of genocide. They thought the inclusion of "mental harm" left open the door to absurd claims. When President Nixon submitted the treaty for ratification in 1970, he recommended it with the understanding that "mental harm" meant "permanent impairment of mental faculties." Even then, some went so far as to ask whether a segregated school system providing unequal services to two racial groups might then qualify as genocide. Legal experts have pointed out that such court decisions as Brown against Board of Education proscribed segregation because it denies equal protection under the laws, and not because segregation may cause impairment of mental faculties.

Some even asked why any act other than outright killing of persons should be considered genocide. Mr. President, we need look no further than the example of Nazi Germany to see that genocide is a thing that gathers momentum slowly. This is a convention for the prevention as well as the punishment of genocide.

The Genocide Convention makes both states and individuals liable for the crime of genocide, and one of the most complex objections for a long time swirled around the question of whether U.S. citizens could be extradited for genocidal offenses, regardless of the protections of the Constitution or of U.S. law. It is now clear that our extradition treaties would still be in force and would prevent this kind of invasion of a U.S. citizen's rights. While he was Assistant Attorney General, Supreme Court Justice William Rehnquist presented a very able, lucid defense of the treaty against this objection.

Mr. President, I ask unanimous consent that a copy of his letter to Senator CHURCH during the 1970 hearings on the Genocide Convention be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MAY 8, 1970.

HON. FRANK CHURCH,
Chairman, Ad Hoc Subcommittee on the Genocide Convention, Committee on Foreign Relations, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to requests for information made by members of your subcommittee on the Genocide Convention during the hearings held on April 27, 1970.

POWER OF SECRETARY OF STATE TO REFUSE EXTRADITION

We were asked whether the Secretary of State could refuse to extradite a citizen of the United States if he thought the national interest was served by so refusing. It was assumed that genocide was an extraditable offense and that a legally adequate case had been demonstrated before a judicial officer.

The statutes of the United States are not directed to this issue but instead leave the answer to the text of the extradition treaty involved. 18 U.S.C. 3184. Some treaties do not distinguish between citizens and aliens and there is no provision for Executive discretion in such treaties concerning extradition of citizens.

On the other hand, under the laws of many countries the extradition of nationals of the requested state is prohibited or is non-obligatory. U.S. extradition treaties with such countries reciprocally provide either for discretion in the rendition of United States citizens or prohibit it. *E.g.*, Extradition Convention with Mexico. ("Neither of the contracting parties shall be bound to deliver up its own citizens under the stipulations of this convention, but the executive authority of each shall have the power to deliver them up. If, in its discretion, it be deemed proper to do so.") See 6 Whiteman, *Digest of International Law*, 865, 873–876.

SENATOR JAVITS' PROPOSAL ON ART. VI

Our view was solicited as to whether the following declaration would be considered as an understanding or as a reservation:

"That article VI shall not be understood to deprive the United States or any state thereof from, by law, declaring that acts similar to those described in this convention are crimes against the United States or of any State wherever committed."

From the discussion surrounding this proposal, we understand that its purpose is to ensure that nothing in Article VI shall affect the right of the United States to bring American citizens to trial for genocide before its own tribunals for acts committed outside this country.[1]

A reservation is a unilateral statement, however phrased or named, made by a state when signing or ratifying a treaty whereby it purports to exclude or modify the legal effect of certain provisions of the treaty. Vienna Convention on the Law of Treaties, Art. 2(1)(b). An understanding is designed to indicate the meaning that a party attaches to a treaty provision without changing its legal effect. Restatement (Second), *Foreign Relations Law of the U.S.* § 124 (1965). The question therefore is whether the proposed declaration would change the legal effect of Article VI.

Art. VI is the only provision in the Convention dealing with the place of trial. It provides that "Persons charged with genocide * * * shall be tried by a competent tribunal of the State in the territory of which the act was committed." This language could be read as permitting trials for genocide only in the state where the alleged genocide took place.

On the other hand, the negotiating history of the Convention indicates that Sen. Javits' proposal merely reflects the meaning of Article VI. The Report of the Legal Committee to the General Assembly is directly in point. It notes that Article VI was not meant to limit the right of a state to try its own nationals:

"The first part of article VI contemplates the obligation of the State in whose territory acts of genocide have been committed. Thus, in particular, it does not affect the right of any State to bring to trial before its own tribunals any of its nationals for acts committed outside the State."

This text was adopted by a vote of 20–8–6. (UN Doc. A/760 & Corr. 2 (Dec. 3, 1948)). On the basis of this negotiating record, the proposed declaration might be termed an understanding.

As in the case of a reservation, another state may object to an understanding. Each party has the option of deciding whether the statement, however designated, alters the legal effect of the Convention, whether it is compatible with the object and purpose of the Convention and whether it will be in treaty relations with the state making the declaration. *Reservations to the Genocide Convention* [1951] ICJ Rep. 15. Therefore, as a practical matter, the description that either the Senate or the Executive gives to a declaration is not conclusive.

EXTRADITION FOR INCITEMENT TO GENOCIDE

Question was raised by Senator Javits as to whether the United States would have to extradite a U.S. citizen to another country for trial on charges of incitement to genocide if the acts constituting the alleged incitement would be lawful under the First Amendment had they been committed in this country.

Generally speaking, the United States could refuse extradition in such a case. The acts charged, which form the basis for the extradition request, must constitute a crime under the laws of both the requesting and the requested state. We are informed by the Department of State that our extradition treaties specifically cover this. They provide typically that—

"surrender shall take place only upon such evidence of criminality as, according to the laws of the place where the fugitive or person so charged shall be found, would justify his commitment for trial if the crime or offense had been there committed."

This means that even if both parties to an extradition treaty agreed that a listed crime, such as genocide, were an extraditable offense, it would be necessary to show that the specific acts charged were considered criminal in the requested state. See 6 Whiteman, *Digest of International Law* 733–779 (1968). If the evidence presented by another country only showed acts which would be legal in the United States, surrender would not be required.

DEVELOPMENTS SINCE 1950 CONCERNING THE TREATYMAKING POWER AND THE FIRST AMENDMENT

Senator Javits asked that we list developments since 1950, when hearings were first held on the Convention, as they affect the treatymaking power and the First Amendment.

a. The treatymaking power

(1) On a general level, a vast increase has taken place since 1950 in the number of treaties being negotiated and ratified. Approximately two-thirds of the total number of treaties and agreements entered into by the United States since 1776 have been concluded since 1949.[2] Treaties have become an

[1] If a statement on this subject is thought necessary, the following might be considered as an alternative:

"The United States understands and construes Article VI of the Convention in accordance with the agreed language of the Report of the Legal Committee of the United Nations General Assembly that nothing in Article VI shall affect the right of any State to bring to trial before its own tribunals any of its nationals for acts committed outside the State."

[2] 1 Bevans, *Treaties and Other International Agreements of the U.S.* iii (1968).

accepted way of dealing with a wide variety of international problems.

(2) In the last few years the Senate has unanimously approved several treaties which, like the Genocide Convention, are considered human rights treaties. They are the Supplementary Convention on the Abolition of Slavery, the Slave Trade, and Institutions and Practices Similar to Slavery; and the Protocol Relating to the Status of Refugees. In 1968 the United States ratified amendments to the Charter of the Organization of American States which include extensive provisions concerning the economic, social, educational, scientific and cultural standards to be applied within each state. See Arts. 29–31, 43, 45, 47.

(3) The list of states ratifying the Genocide Convention has grown from 7 in 1950 to 75 today, thus emphasizing the view of the world community that genocide is both a matter of international concern and a proper subject for treaty negotiations.

The 1950 position of the Department of Justice—that under the treatymaking power the United States has complete authority to enter into the Genocide Convention—is therefore as valid today as it was then.

b. The First Amendment and "Direct and public incitement."

Art. III(c) of the Convention makes punishable "Direct and public incitment to commit genocide." In 1950 the Department of Justice expressed the view that such a provision would be consistent with the First Amendment. Developments since that time have not changed our position.

Drawing a line between speech which is permissible and that which is reprehensible is, in the Supreme Court's own words—a "thorny problem." *Carroll* v. *Princess Anne*, 393 U.S. 175, 180 (1968). Since 1950 Supreme Court decisions have increasingly emphasized the proposition that "advocacy of abstract doctrine" was constitutionally protected. *E.g., Yates* v. *United States*, 354 U.S. 298, 318, (1957). However, no court has questioned the proposition that incitement to crime can be punished. In *Brandenberg* v. *Ohio*, 395 U.S. 444 (1969), which has been cited by a number of witnesses at these hearings, the Supreme Court restated the principle underlying the decisions of the last twenty years—that the First Amendment protects advocacy of law violation except "where such advocacy is directed to *inciting or producing imminent lawless action and is likely to incite or produce such action.*" The carefully drawn words of the Convention requiring "direct and public incitement" are thus consistent with the views of the Supreme Court concerning free expression.

JURISDICTION OF U.S. COURTS RELATING TO THE CONVENTION

Senator Cooper posed several questions relating to whether the Federal courts might be able to pass on certain questions relating to the Convention if the United States became a party to it. (Our responses are concerned with possible jurisdiction and not with how the courts would dispose of these matters on the merits.)

(1) Whether the implementing statute was consonant with the Convention: It is possible that this question could be raised in a Federal court. If, for example, the definition of genocide in the implementing legislation were broader than that in the Convention, a court would have jurisdiction to hear a defendant's argument that there is no legal basis for the implementing statute.

(2) Whether reservations of understandings adopted by the Senate are constitutional: As noted during the hearings, the criminal provisions of the Convention are not self-executing. It is therefore improbable that the constitutionality of a reservation of understanding could be tested directly in Federal courts. It is more likely that tests would be made of the implementing legislation or of extradition treaties. (It is to be expected, of course, that any implementing legislation or any changes in extradition treaties will reflect understandings or reservations to this Convention which are adopted by the Senate.)

(3) Whether executive agreements on status of forces providing for jurisdiction over crimes committed by U.S. armed forces or civilians could be questioned if the Genocide Convention were ratified: The Federal courts have taken jurisdiction of the question of where jurisdiction lies to try offenders under status of forces agreements. *E.g., Wilson* v. *Girard*, 354 U.S. 524 (1957). If a person subject to a status of forces agreement alleged that the agreement had somehow been affected by the Genocide Convention the courts might pass on the question.

STATISTICS CONCERNING EXTRADITION

Statistics on the number of citizens and aliens extradited from the United States to other countries are not kept either by this Department, by the State Department or by the Administrative Office of the United States Courts. Moreover, this Department is unfortunately not in a position to compile such statistics for the subcommittee's use. Many extradition proceedings take place every year in this country in which this Department has no involvement at all. Our only role is to represent foreign governments in a limited number of instances where the United States has agreed to do so by treaty or where we undertake to do so on an ad hoc basis. In many cases foreign governments retain their own counsel and proceed under 18 U.S.C. 3184 in either local or Federal courts without going through this Department.

This Department's primary role in the extradition process is the securing of fugitives from abroad for trial for Federal offenses in the United States.

THE ATTORNEY GENERAL'S CONCURRENCE

A copy of the Attorney General's letter to the Secretary of State of January 26, 1970 concurring with the Secretary's judgement that there are no constitutional obstacles to United States ratification of the Genocide Convention is enclosed with this letter.

Sincerely,

WILLIAM H. REHNQUIST,
Assistant Attorney General,
Office of Legal Counsel.

Mr. PROXMIRE. Mr. President, I spoke earlier of formidable allies, and in legal matters there are no opinions more authoritative than those of members of our Supreme Court. But let me emphasize that the support for the Genocide Convention is as broad as it is deep. Over the years of discussion, the list of organizations favoring ratification has grown extremely long. Those who oppose the convention have dwindled in number.

Mr. President, every objection has been answered. There is no further reason to withhold our support. We must ratify the Genocide Convention.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. PROXMIRE. I am happy to yield to the Senator from Virginia.

PRIVILEGE OF THE FLOOR—S. 1753

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that Miss Joan O'Neill, of my staff, be granted the privilege of the floor during the consideration of the education amendments of 1978.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EDUCATION AMENDMENTS OF 1978

The ACTING PRESIDENT pro tempore. Under the previous order the Senate will now resume consideration of S. 1753, which wil be stated by title.

The legislative clerk read as follows:

A bill (S. 1753) to extend the Elementary and Secondary Education Act of 1965, and for other purposes.

The Senate resumed the consideration of the bill.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business of not to exceed 5 minutes with statements therein limited to 2 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

S. 3446—AUTHORIZING GOLD MEDALS FOR AMERICAN BALLOONISTS

Mr. DOMENICI. Mr. President, I send to the desk a bill in behalf of myself, Senator SCHMITT, and Senator GARN, and ask unanimous consent that the bill be considered as having been read twice and the Senate proceed to the immediate consideration of the bill.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 3446) to authorize the President of the United States to present on behalf of the Congress a specially struck gold medal to Ben Abruzzo, Maxie Anderson, and Larry Newman.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator from New Mexico has cleared this measure on this side of the aisle, and I have no objection to proceeding with the second reading and move to third reading and immediate consideration of the bill and final passage.

Mr. DOMENICI. I thank the distinguished leader, and it has been cleared on this side of the aisle.

There being no objection, the Senate proceeded to consider the bill.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Senator HATCH be added as a cosponsor and Senator DECONCINI be added as a cosponsor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, a week after three Albuquerque, N. Mex., men made aviation history by transcending the Atlantic Ocean in a helium-filled balloon, the world still stands in awe of and applauds their feat.

Ben Abruzzo, Maxie Anderson, and Larry Newman will rightfully take their places in history alongside such American pioneers as Charles Lindberg, the Wright brothers, JOHN GLENN, Neil Armstrong and Buzz Aldrin.

A proud United States of America and its representative government can express that pride in a variety of ways.

A fitting way, in my opinion, is for the U.S. Senate to unanimously pass a bill we introduce today, authorizing the President of the United States to present on behalf of the Congress a specially struck gold medal to each of these transatlantic pioneers.

In an age when America's prestige is faltering throughout the world, when problems beset us from every corner of the globe, these three Americans have given our pride a tremendous boost.

Once again we can boast that Americans can do something better and quicker and with more initiative than any other peoples. Our spirit of adventure and quest for challenges—both of which forged a great nation out of a wilderness—are embodied once again in the persons of Abruzzo, Anderson, and Newman.

This gold medal will symbolize much more than just the feat of three adventurers. It will say to free people everywhere that America and Americans still "can do."

The ACTING PRESIDENT pro tempore. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3446

Be it enacted by the Senate and House Representatives of the United States of America in Congress assembled, That (a) The President of the United States is hereby authorized to present, on behalf of the Congress, to Ben Abruzzo, Maxie Anderson, and Larry Newman, transatlantic balloonists, one gold medal each of appropriate design in recognition of their distinguished feat as aviation pioneers. For such purpose, the Secretary of the Treasury is authorized and directed to cause to be struck 3 gold medals with suitable emblems, devices, and inscriptions to be determined by the Administrator of the National Aeronautic and Space Administration with the concurrence of the Commission on Fine Arts, subject to the approval of the Secretary of the Treasury. There are authorized to be appropriated not to exceed $15,000 to carry out the provisions of this subsection.

(b) The Secretary of the Treasury may cause duplicates in bronze of such medal to be struck and sold at not less than the estimated cost of manufacture, including labor, materials, dies, use of machinery, and overhead expenses, plus 25 per centum of such cost of manufacture. The appropriation then current and chargeable for the cost of manufacture of such duplicate medals shall be fully reimbursed from the payment required by this section and received by the Secretary: *Provided,* That any money received in excess of the actual cost of manufacture of such duplicate medals shall from time to time be covered into the Treasury. Security satisfactory to the Director of the Mint shall be furnished to fully indemnify the United States for the payment required by this section.

(c) The medals provided for in this section are national medals for the purpose of section 3551 of the Revised Statutes (31 U.S.C. 368).

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I am very appreciative of the leader and those who have been so helpful in permitting us to accomplish this today. Since they will be arriving in the State of New Mexico soon, it was our intention that we be able to tell them this occurred in the Senate and was sent to the House of Representatives for their consideration.

Mr. ROBERT C. BYRD. Was the Senator referring to the leader or the balloonists who will be arriving in New Mexico?

Mr. DOMENICI. The balloonists. I will, but the majority leader will not, but the balloonists will.

Mr. ROBERT C. BYRD. I thank the Senator.

The ACTING PRESIDENT pro tempore. Is there further morning business?

ORDER FOR RECESS UNTIL 9 A.M. AUGUST 24, 25, 26, 28, AND 29, RESPECTIVELY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, tomorrow, Friday, Saturday, and Monday of next week, it stand in recess until the hour of 9 a.m. on tomorrow, Friday, Saturday, Monday and Tuesday of next week, respectively.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. The order, of course can be changed by unanimous consent, and I hope it will be in due time.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there any further morning business? If not, morning business is closed.

SPECIAL ORDERS FOR TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the two leaders have been recognized under the standing order, Mr. GARN, Mr. MCCLURE, and Mr. DOLE be recognized for not to exceed 15 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EDUCATION AMENDMENTS OF 1978

The Senate continued with the consideration of S. 1753.

Mr. ROBERT C. BYRD. Mr. President, the Senator from New Mexico has some amendments to the elementary and secondary education bill. I am prepared to act on behalf of Mr. PELL. Mr. PELL is conducting a hearing and will be here shortly, but I am prepared to man the ramparts, ready the cannon fire amid dust and fog and smoke and shell until Mr. PELL arrives on the scene.

At the present, using my field glasses, I do not see any cavalry appearing on the horizon. The infantry must be obscured by the foliage of the trees. Birnam Wood may not reach Dunsinane after all.

I have seen some artillery preparing to open up.

Mr. DOMENICI. Mr. President, I have a couple of unanimous-consent requests, if the leader will accommodate me.

Mr. ROBERT C. BYRD. I yield the floor.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Chris Brewster of Senator DANFORTH'S staff; Linda Richardson and Mary Ann Simpson of Senator STEVENS' staff; Letitia Chambers of my staff be granted floor privileges during the debate on this bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOMENICI. I thank the leader.

Mr. ROBERT C. BYRD. We are awaiting the arrival of Blücher and Grouchy, and as I look at my watch I see Blücher or Ney. [Laughter.]

Mr. President, I yield the floor.

Mr. DOMENICI. Mr. President, I ask unanimous consent that Everett Wallace of Senator BAKER'S staff be granted floor privileges during the debate on this bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOMENICI. My staff is on their way with the amendments, but we are also waiting for the managers of the bill.

Mr. ROBERT C. BYRD. The managers of the bill have indicated on this side that I can proceed.

Mr. HATCH. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. ROBERT C. BYRD. Yes.

Mr. HATCH. I ask unanimous consent that Ron Docksai, of my staff, be accorded floor privileges during the debate on this bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the following staff members of the Human Resources Committee be granted the priv-

ileges of the floor during the debate and votes on S. 1753, the Education Amendments of 1978: Jean Frohlicher, Richard Jerue, David Evans, Christine Fruggiero, Alexander Crary, Ann Price, Stephen Paradise, Franklin Zweig, Marcia McCord, John Doyle, Kathy Hoffman, Birdie Kyle, Thomas Altmeyer, Scott Ginsburg, Joan Hunziker, Brad Mims, Peter Parham, and Craig Polhemus.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, in behalf of Senator JAVITS, I ask unanimous consent that the following staff members be granted the privileges of the floor during the debate on this legislation: Gregory Fusco and Kristi Hanson, of Senator JAVITS' staff; Sven Groennings, of Senator STAFFORD'S staff; Polly Gault, of Senator SCHWEIKER'S staff; Nancy Barrow, of Senator CHAFEE'S staff; and John Backer, of Senator HAYAKAWA'S staff.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MCGOVERN). Without objection, it is so ordered.

Mr. DECONCINI. I ask unanimous consent that Romano Romani and John Mulkey of my staff be permitted privileges of the floor during the debate and votes on the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, I am happy to bring before the Senate S. 1753, the Education Amendments of 1978. This bill extends through fiscal year 1983 programs of Federal aid to elementary and secondary education.

In considering this legislation the committee followed the recommendations of the administration and continued the categorical approach to elementary and secondary aid, targeting assistance on those children most in need. It was the committee's belief that, in a time of limited funds, programs should be tightly drawn, so that available aid can have the greatest educational impact.

At the same time, the Subcommittee on Education heard extensive testimony from educators and States that the paperwork which currently accompanies Federal programs is excessive and, in some instances, more costly than the aid applied for. This makes no sense.

Therefore, the committee bill cuts down dramatically on the paperwork and reporting involved in these programs. Where an annual application used to be required, the committee bill provides for one every 3 years. Where annual evaluations were required, again the paper was reduced by a third. Each reporting requirement was carefully scrutinized to make sure that it was not unnecessary.

In order to assure that paperwork will be reduced even further in the future, the education amendments establish a procedure for the publication of an annual plan for data and information collection from schools and institutions. For the first time, the local officials who must fill out endless Federal forms will have notice of all of the requirements of all Federal agencies with which they must comply within the year. They will be given an opportunity to comment, and to demonstrate that many of the requests are redundant or exceedingly burdensome. It is my hope that this procedure will have a significant impact on the reduction of paperwork in the area of education.

Another substantial concern in S. 1753 is the participation of nonpublic school children in their fair share of Federal programs. The administration proposed strengthening the existing rules concerning equitable participation in federally assisted programs, and a speeded-up appeals procedure when such services were not being provided.

While the committee adopted these provisions, there was concern that services to nonpublic school children were still inadequate. For that reason, I proposed a new title XII to the Elementary and Secondary Education Act which would make grants available to nonpublic schools for such things as books, equipment, guidance and counseling, health services, and transportation. The Comissioner of Education's discretion in this program would be minimal. If a nonpublic school submitted assurances that funds would be used according to the law, the Commissioner would make the grant without further regulations or involvement in the affairs of the private school. The bill authorizes $500 million for these services to private schoolchildren, and provides for an expedited test of the title's constitutionality.

I believe that the bill is, on balance, an excellent piece of legislation. In drafting it, the committee sought a middle ground between creating a myriad of new programs of Federal aid for narrow categorical interests and scrapping those programs now on the books which have been shown to work well. Much of S. 1753 is devoted to make them work even better for the next 5 years, and I hope it may be supported.

Mr. President, today the Senate takes up a bill which will be the most important piece of legislation dealing with elementary and secondary education considered by the 95th Congress—S. 1753, the Education Amendments of 1978. This bill is the product of 10 days of hearings by the Subcommittee on Education, Arts, and Humanities of the Committee on Human Resources. It was unanimously reported to the Senate on May 9, 1978.

In general, S. 1753 extends existing programs of Federal assistance to elementary and secondary education for 5 years, through fiscal year 1983. While the committee decided to retain the current categorical approach to education aid, an approach also recommended by the administration, it took numerous steps to simplify the requirements of current programs and to reduce the paperwork necessary for States and schools to participate. Indeed, simplification and paperwork reduction are two of the key features of the bill now before the Senate.

Since the bill is lengthy, I would like to summarize for my colleagues the major provisions of S. 1753.

Title I of the Elementary and Secondary Education Act.—This is the major Federal program of assistance to school districts enrolling children from low income families. It affects almost every school district in the country and this year has an appropriation of approximately $2.7 billion. Title I programs, designed at the local level to meet local needs, provide compensatory education to low-achieving children, to bring them up to the academic level of their peers. In the early days of title I, there was some concern that these programs were not successful in bridging that gap. However, recent studies have shown the successes of title I programs in improving children's reading and mathematics scores.

The committee bill rewrites title I to make it more comprehensible to the layman. Under S. 1753, all program requirements are apparent on the face of the law. They are not hidden in additional regulations or guidelines which local school officials may not be aware of. This change should do much to alleviate any confusion that currently exists over permissible uses of title I funds.

While the committee considered changes to the title I formula, which is based on the 1970 census count of children in poverty-level families, it decided to leave the formula basically unchanged. It decided that the survey of income and education was of sufficiently questionable statistical accuracy that it would be unwise to use it as the basis for distribution of Federal funds. The only formula change made by S. 1753 counts children receiving Aid to Families with Dependent Children above the current poverty level in full, rather than at the two-thirds level of existing law.

S. 1753 adopted two provisions for new title I programs which were proposed by the administration. The first authorizes a new program of incentive grants to States which have their own compensatory education programs. State dollars would be matched by Federal funds at the rate of 2 to 1, encouraging additional State focus on compensatory education.

The second new program proposed by

the administration provides for additional title I grants for counties enrolling a high level of low-income children—in excess of 5,000 or in excess of 20 percent of the children in the county. These funds are to be used for additional title I compensatory education programs, especially those focusing on the basic skills of reading, writing, and computation.

No State will receive less than 0.25 percent of the funds appropriated for the new concentration authority. Of the funds appropriated for title I programs, the first $400 million is to be applied to the concentration grants, the level of funding proposed in the President's budget.

Basic Skills—S. 1753 adopted the administration's proposals for a series of new authorities for the Secretary of Health, Education, and Welfare to provide assistance to States and local school districts for improvement of instruction in basic skills. Parents and private organizations may also participate in these programs, and the use of technology is encouraged.

In addition, the program of inexpensive book distribution, commonly known as Reading Is FUNdamental, is continued; the special mathematics program currently funded under the Emergency School Aid Act is also authorized to be continued under the new Basic Skills authority.

In response to widespread national concern that students are no longer performing adequately in the basic skill areas of reading, writing, and mathematics, the committee bill also authorizes grants to States which wish to implement educational proficiency standards. While the committee decided against proposing any Federal standards of educational competency, it believed that States and localities should be encouraged to develop their own proficiency standards and achievement tests against which to measure the competency of their own students.

Special projects.—S. 1753 provides for categorical assistance to State and local educational agencies for demonstration programs in metric education, arts in education, consumer education, environmental education—all currently authorized programs—plus new authorities for youth employment (proposed by the administration), law-related education, corrections education, health education, and population education. Each of these authorities has a separate authorization of appropriations, unlike existing law, where all the programs are linked together in a single authorization. In addition, there is a separate authorization of appropriations to the Commissioner for experimentation with new educational administrative methods, techniques, and practices, and for emphasis on national priority areas. He may also use up to 10 percent of the special project appropriations, not to exceed 10 percent of any individual program, for such experimentation.

Consolidation.—In 1974, the Congress consolidated categorical programs for books, equipment, guidance and counseling, and innovation. The consolidation has worked reasonably well, and S. 1753 continues the program, with modifications suggested in testimony to make it work more efficiently. Guidance and counseling programs are given a new part D of title IV, separating those activities from the instructional materials and school library resources, which continue to be authorized under part B. A new program of education of gifted and talented children is included as a new part E of the consolidated title, authorizing State-level programs and discretionary grants from the Commissioner.

S. 1753 also proposes the consolidation of State administrative funds for title I (compensatory education) and title IV (consolidation). Under existing law, funds for State administration must be separately accounted for, leading to extensive paperwork and, too often, managerial inefficiency.

If personnel, supplies, and equipment must be kept separate at the State department of education level, a chief State school official is essentially denied the ability to organize his own office in the manner he feels most efficient. S. 1753 seeks to give the States the flexibility to allocate administrative funds between the two programs in a manner that best meets each State's individual needs. The Federal interest is preserved in that States provide assurances that programs will be effectively administered.

Emergency School Aid.—S. 1753 extends the Emergency School Aid Act as part of the Elementary and Secondary Education Act. In general, the committee bill reflects suggestions made by the administration to add flexibility to the implementation of the program. It also adds a new category of school district eligible to participate in the program, a district which is planning for desegregation but which is not yet in the implementation phase of its plan.

Bilingual Education.—The committee heard widely varying testimony concerning the direction bilingual education should take in the future. S. 1753 does not propose substantial changes in the existing bilingual education authority; it adopts many of the recommendations made by the administration for program improvements.

Ethnic Heritage Studies.—S. 1753 continues this program through fiscal year 1982, and specifically extends the authority for the Advisory Council on Ethnic Heritage Studies.

Community Schools.—S. 1753 authorizes a new program for community schools, building upon the demonstration authority initially enacted in 1974. It would allow recipients of community school assistance to use those funds to match funds received under other community-based Federal programs.

Women's Educational Equity.—This title also builds upon the success of a demonstration authority originally enacted in 1974. Once sufficient appropriations levels are reached, funds under this program may be used to assist State and local educational agencies and institutions in meeting the requirements of title IX of the Education Amendments of 1972, relating to discrimination on the basis of sex.

Non-Public Educational Assistance.—The committee bill contains a new title XII of the Elementary and Secondary Education Act authorizing assistance to nonpublic elementary and secondary schools. Since 1965, most Federal programs of aid to elementary and secondary education have required that students in nonpublic schools participate on an equitable basis.

However, the National Institute of Education study on title I of the Elementary and Secondary Education Act shows that less than 4 percent of private school students living in title I districts receive title I services. Only 43 percent of the title I districts that contain nonpublic schools provide title I services to nonpublic school children. In addition, participating private school children receive an average of approximately 1 hour per week of compensatory education, compared with an average of 5½ hours per week for all title I children.

The administration proposed a number of amendments to existing programs to strengthen the requirements for equitable participation of nonpublic school children, including expedited appeals procedures when an inadequate level of services was being provided by a State or local school district. However, I did not believe that such measures were a sufficient response to the needs of students in nonpublic schools. For that reason, I proposed that title XII be added to the Elementary and Secondary Education Act. This suggestion was adopted by the Committee on Human Resources, and is now before the Senate.

Title XII will provide direct grants to nonpublic schools. These grants must be used solely for the benefit of nonpublic school students in the following ways: for the purchase of secular textbooks to be used by such students; for the purchase of standardized tests and scoring services for the use of such students; for the provision, within the nonpublic school, of speech and hearing diagnostic services to such students; for the provision of guidance and counseling services to such students; for the provision of necessary transportation of such students to and from the nonpublic school. In addition, grants may be used to provide secular, neutral, and nonideological instructional materials and instructional equipment for the use of nonpublic school students, so long as such materials and equipment cannot be diverted to religious use, cannot be affixed to the nonpublic school facility, and can be easily taken home by the nonpublic school student.

Applications would be made directly to the Commissioner of Education, who would have little discretion in deciding whether to fund the grant. If the nonpublic school made the proper statutory assurances, the Commissioner would be required to provide the assistance sought. S. 1753 contains an expedited procedure for determining the constitutionality of the title, which is based upon the services which courts, in the past, have upheld for nonpublic school children.

Impact Aid.—In general, S. 1753 continues existing law with respect to Public Law 81–874, commonly known as the impact aid law. The bill retains the current exclusion for eligibility for payments of children who live in one State and whose parents work in another. It also continues the reduced payment rate for children whose parents work in a county other than that in which they live. However, the bill amends this provision to cover school districts which are located in more than one county.

S. 1753 does increase payments for handicapped children of military personnel and Indians. In addition, it repeals the absorption provision contained in existing law, effective upon enactment. With respect to children living in federally assisted public housing, S. 1753 makes them eligible for assistance on the same basis as other federally connected children. It also adds to local entitlements property owned by foreign governments and international organizations and property owned by the U.S. Postal Service which is not subject to State or local taxation on behalf of public education.

S. 1753 also extends the construction program, Public Law 81–815, through fiscal year 1983, with amendments designed to reduce its paperwork.

Adult Education.—The education amendments extend adult education programs through 1983 and add a new program directed at the special educational needs of adult immigrants.

Indian Education.—S. 1753 extends the existing programs under the Indian Education Act unchanged through fiscal year 1983.

Teacher Centers.—The bill increases the authorization for teacher centers. It also provides that when appropriations for the program reach the level of $50 million, each State will receive at least $250,000 for teacher centers.

Paperwork.—S. 1753 provides for a new mechanism, through a Deputy Assistant Secretary for Education, for the reduction of the paperwork presently required in Federal education programs. Witnesses before the committee have repeatedly testified to the staggering amounts of paperwork that must be completed, much of it redundant or unnecessary. While Federal forms are currently cleared by the Office of Management and Budget, it appears that little attention is paid to the cumulative effect on a single State or school of the myriad pieces of paper associated with individual programs or research projects.

Under the committee bill, the Deputy Assistant Secretary of Education would be charged with assessing the necessity, or redundancy, of requests for data or information concerning educational institutions or programs. The Office of Management and Budget would be notified of the request for review of data collection proposals from agencies outside the Department of Health, Education, and Welfare, and would have the right to review the request directly if a significant data acquisition policy is involved. In addition, a Federal Education Data Acquisition Council, made up of public and agency representatives which deal with educational data or information, would advise the Deputy Assistant Secretary on the best means of reducing unnecessary paperwork.

So that States, school districts, and institutions may assess the total data burden which may be required of them in any given year, the bill requires the publication of a plan for data acquisition to be published by February 15 of each year. No other data may be required, unless an urgent need for the information exists. The Deputy Assistant Secretary is authorized to waive this provision in the case on nonburdensome individual studies.

Full implementation of this provision can make substantial inroads on the duplicative and unnecessary paperwork which currently accompanies many education programs.

National Assessment of Educational Progress.—S. 1753 establishes a statutory basis for the National Assessment of Educational Progress, which has been conducting studies of students' learning levels since the mid-1960's. This valuable effort has not only provided a national "snap-shot" of achievement levels in various subject areas, but has also assisted States and localities which are attempting to develop their own assessment measures. In authorizing the assessment program, the bill vests authority for the program in the National Institute of Education, which has mounted other efforts in the testing and assessment field under its basic authority.

I believe that the committee-reported bill is a good one. It represents a continuation of existing policy concerning categorical Federal aid to groups in special need, combining that approach with a constant attention to program simplification and streamlining. Given existing fiscal constraints, the bill does not propose large numbers of expensive new programs. Rather, in most cases, it seeks to assure that available funds for existing programs are used in the most efficient and effective manner, so that their effects are felt in the classroom. If program benefits do not reach students, our efforts are all in vain.

In developing this legislation, the committee worked closely with the educational community and with the administration. I believe I can fairly say that S. 1753 represents a pretty broad consensus of the direction that Federal aid to elementary and secondary education should take in the 5 years to come.

I urge my colleagues to support this most important legislation.

Mr. JAVITS. Mr. President, we inaugurate today action on a bill which I consider to be of very critical importance, and I am very pleased that our colleague from New Mexico (Mr. DOMENICI) has decided, notwithstanding his other engagements, to remain with us in the Senate long enough to express his particular concerns and to propose his particular amendment.

At a time of testing as to what we can and cannot do and what we should and should not do about education and the emphasis on the distinction between public and private schools, these ESEA amendments, which are normally a required renewal of the Federal program, become a matter of high national policy, and it is my deep conviction, Mr. President, that these amendments continue the critical role of the Federal Government in meeting established national educational priorities, and that the bill will strengthen what I believe to be the fundamental purpose of Federal aid to education: To wit, to provide high quality educational opportunity to all children in the United States.

We are targeting in this bill educational services to children who need them most, and we are stimulating State and local educational agencies to improve the quality of their educational programs.

Two overriding objectives guided the committee's review and revision of the elementary and secondary education programs: First, reduction of administrative burdens and paperwork; and second, increased participation of children in nonpublic schools within the framework allowable under the Constitution.

I believe we have made very material reductions in the administrative burden and in the paperwork. The committee bill deletes some application and reporting requirements and minimizes others. It also gives the Education Division of HEW greater powers to coordinate data collection among the various Federal agencies, in order to eliminate the duplicative and nonessential requests for local and State agencies to provide information. These are vital steps that streamline categorical programs without sacrificing categorical purposes.

Mr. President, we are very conscious of the fact that a very well-considered and what to me was a highly satisfactory resolution by the Senate of the problem of whether aid to nonpublic schools should be given under the tuition tax reduction program or whether it should continue to be given according to the Constitution of the United States under this program was decided affirmatively by the Senate for the latter point of view. This bill takes our responsibility into very real account in that regard, and we have, in my judgment, materially increased the participation of children in nonpublic schools in Federal aid within the framework allowable under the Constitution.

Testimony presented during ESEA hearings last year made the committee fully aware that the level of participation of nonpublic school children in the Federal education programs falls far below what is fair and desirable. While present law does call for equitable participation of these children, educational services funded by Federal dollars have not been extended to them to anywhere near the full extent permissible.

To remedy this situation, the committee added 20 new provisions to expand the requirements for involvement of nonpublic school children in the categorical programs. These provisions generally fall into three categories: First, required consultation between nonpublic school officials and public school officials in the

design of local funding proposals, to insure that the needs of nonpublic children are taken into consideration; second, assurance of alternative arrangements for services to nonpublic school children when the local public school system is unwilling to include such children in their federally funded services, or is prohibited from doing so by State law; and third, established procedures for representatives of nonpublic schools to achieve satisfactory resolution of complaints regarding insufficient participation in the Federal programs.

I believe that these additional safeguards can dramatically improve the level and quality of services extended to children in nonpublic schools.

Mr. President, each of the various programs reauthorized or initiated in the education amendments responds to an identified need for Federal leadership and support. I would like to highlight for my colleagues those provisions in the bill which I believe to be of particular importance.

GIFTED AND TALENTED CHILDREN

First, a provision for gifted and talented children, which in my case has been one of the central themes of my efforts here. It has been very gratifying to me and I believe very helpful to the operations of the educational system of our country, that the gifted and talented programs are growing and taking hold.

Mr. President, one of the most critical, and yet, least costly elements of this legislation is the new program authorized for the education of gifted and talented children.

This new gifted and talented program is based on the Gifted and Talented Education Act of 1978, S. 2792, which I introduced on March 15, and which was cosponsored by 8 members of the Human Resources Committee, including the chairman of the Education, Arts and Humanities Subcommittee, Senator PELL, and the chairman of the full committee, Senator WILLIAMS. The provisions of S. 2792 were incorporated into the Education Amendments of 1978 during markup of this legislation by the Human Resources Committee, and I should like to commend Senator STAFFORD, the ranking member of the Education Subcommittee, for his particularly excellent contributions to the development of this most crucial portion of the legislation.

I would be remiss if I did not also express my appreciation to the Council for Exceptional Children, which has rendered exemplary service in advancing education of the gifted, for its assistance in the development of these provisions of the bill. The council worked closely with the committee in the development of the gifted and talented provision, and its recommendations have contributed significantly to the soundness of this bill.

The time has come to give new emphasis to the education of the gifted and talented, who rank among our Nation's most precious and yet most neglected resources. This legislation represents that new step, through a modest expansion and significant refinement of the existing State and Federal role in the education of gifted and talented children. By utilizing the simple and efficient structure of title IV of ESEA, which has proven to be an excellent mechanism for the distribution of Federal education assistance to States and localities, we can provide the proper scope and direction to the education of these children.

The Federal effort to identify and educate gifted and talented children historically has been rather sporadic and inconsistent. The National Defense Education Act of 1958 was the first major legislative initiative to provide special assistance to the gifted and talented, but this assistance was limited to a small, albeit important, segment of the total gifted and talented population—those with outstanding scientific, mathematical, or technical abilities. Subsequent to NDEA, however, the Federal role in the education of gifted and talented children has been characterized by a series of fits and starts. In 1969, I authored a provision of the Education Amendments of 1969, mandating the U.S. Commissioner of Education to escalate the status of education of the gifted and talented, examine the role of Federal, State, and local assistance to these children, and recommend new programs to meet current and future needs. Not until the landmark study and report by the Commissioner of Education Sidney Marland in 1972, "Education of the Gifted and Talented," however, did Congress again take real notice that only a small proportion of these children were receiving services commensurate with their needs.

The Marland report pointed up glaringly that there exists a general opinion which is an illusion: That these children constitute an elite group, and will automatically, by the very nature of their outstanding abilities, attain ultimate success in their chosen fields. This pervasive assumption, however, does not take account of the fact that the talents of the gifted are frequently potential talents, which may only be made actual through a major effort to identify these children and to provide them with the necessary special instructional programs. The Marland report also showed a woeful lack of resources for gifted and talented children at all levels of Government, and a concomitant need for an increased Federal role to promote action to improve the identification and education of these children. The report further showed that if such children remain unidentified, peer pressure and absence of self-discovery could make these children not only forgo their abilities, but even suppress them and perform at lower than normal levels.

To begin to meet the needs of the gifted and talented, I initiated legislation which resulted in the gifted and talented program under the Special Projects Act, part of the Education Amendments of 1974. The concept behind these special demonstration educational projects, of which the gifted and talented was one, was to allow new ideas a period of gestation in which they could develop, prove their programmatic usefulness, and hence, reach fruition.

The Federal gifted and talented program has been successful in doubling the capacity of State education agencies to identify and serve gifted and talented children. Yet its $2.56 million current appropriation and its demonstration project status are insufficient. If the Marland report's "conservative" estimate of 2 million gifted and talented children in this Nation is correct, then Federal expenditures represent little more than $1 per gifted child. The Senate Labor/HEW Appropriations Subcommittee, at the urging of Senator CHILES, has seen fit to increase funding for this program to $5 million, and I hope my colleagues will follow his lead and support this small, but important increase.

The current Federal expenditure in the existing gifted and talented program assists, through competitive grants, nascent programs in slightly more than half the States. In addition, these funds support projects of educator and leadership training and a small though diverse range of demonstration projects sponsored by LEA's. In fiscal year 1977, 422 LEA's applied for such demonstration project funding through the Office of Gifted and Talented. Only 14 projects were funded, and these at minimal levels, less than $20,000 each. This means that more than 30 applications were received for each such project funded. Although some States supplement Federal assistance with their own funds, there nevertheless exists a great unsatisfied demand at both State and local levels for new legislative directions to meet both the present and future requirements of the gifted and talented.

This legislation, Mr. President, will give the education of the gifted and talented necessary impetus nationwide and will provide direction and coherence to a more broadly based program of State and local support. In hearings conducted by the Education Subcommittee on ESEA this spring, I stressed the need to give the ball a new spin, to provide that impetus for a new effort on behalf of the gifted and talented. This bill does precisely that, and does so within an already existing and efficient delivery system—the title IV consolidation framework constructed in the Education Amendments of 1974. By creating a new part E for education of the gifted and talented within the title IV consolidation, S. 1753 establishes the necessary and proper focus for this effort, and does not expressly create another categorical education program. By using the concepts of the title IV State plan and title IV–C allocation formula for the gifted and talented program, this new effort will be relatively simple to administer at all levels of government.

Thus, Mr. President, the issue here is not merely one of increased funding. Rather, the Federal role must be to offer direction and give coherence to a more broadly based program of State and local support for gifted and talented education. This new gifted and talented program will bring us more closely in line with the ideal Federal-State-local partnership which education in this country must be. Through the new part E, gifted and talented education will be strengthened both administratively and programmatically by acting within broad framework of title IV, which contains mechanisms for a flexi-

ble and efficient distribution of funds, without losing the identity of the program within a "catch all" statutory structure.

The details of the program operation and the views of the Human Resources Committee are contained in the committee report on S. 1753, No. 95–856, on pages 55 and 56. I hope that interested Senators will consult this document for a full description of this provision.

Mr. President, the ultimate benefits to our Nation which can accrue from this effort to identify and develop the talents of gifted children are incalculable. Although these benefits may not be immediate, the legislation can form the crux of our future policy. The fruits of this policy will be seen when our gifted children reach positions of leadership in their chosen fields, and perform in these positions to their maximum capacity, with wisdom and sensitivity. This legislation will enable us finally to fulfill our obligation to these children, and through them, to ourselves.

TITLE I—COMPENSATORY EDUCATION

Next, the compensatory education programs, in which we are, in my judgment, making some very material changes. Especially important are the grants for concentration in urban—and I emphasize that—as well as rural—which I equally emphasize—school districts, where low-income children represent an especial concentration.

Title I of the Elementary and Secondary Education Act (ESEA) is the single largest program of Federal education aid. It provides nearly $3 billion for compensatory services to children in low-income areas who show a need for special educational support.

The committee retained the program purpose and the target population for title I—providing compensatory services to children in poverty areas—characterized this program since its inception. The committee did, however, adopt a number of amendments which reorganize and clarify the statute, simplify and reduce the administrative and paperwork requirements, and increase the involvement of parents and parent advisory councils in the local school programs.

The committee bill also includes two new elements in the title I program: Incentive grants to encourage the use of State funds for compensatory education programs, and concentration grants to those school districts with the highest numbers and proportions of low-income students.

The committee was greatly aided in its deliberations on title I by the studies conducted by the National Institute of Education (NIE) pursuant to the 1974 Education Amendments. The NIE took a comprehensive look at the various aspects of title I, and its resulting reports on the distribution, use and effects of the funds provided a valuable resource and the basis for many committee amendments.

The NIE reports, as well as the testimony of numerous witnesses before the Education Subcommittee, confirmed that title I funds have been reaching their intended destination, to wit, children in areas of poverty, and that these children are performing better as a result of their participation in title I services. I was encouraged, as were the other members of the committee, by these reports from evaluators and practitioners. This information provided a solid foundation for the committee's amendments to strengthen and expand this far-reaching and vital program.

Also of great value to the committee were the recommendations for clarifying and simplifying the statute prepared by the Lawyers Committee for Civil Rights Under Law, many of which are incorporated into S. 1753. These recommendations were developed in response to a request by NIE and provided the framework for the committee amendments.

Because of the size and significance of title I in improving the educational progress of children all across the country, there has been considerable debate in past reauthorizations over the means by which the funds are distributed. The funding formula continues to be a central concern, with diverse regional interests competing to achieve a formula which they believe to be equitable for them. The committee sought a formula which would fairly balance the various needs and circumstances, and I believe that the funding proposals contained in the bill do meet this objective.

The committee bill perpetuates those elements of the formula which are currently satisfactory to certain regions. However, in an attempt to redress to some degree the inequities which have accrued over the past several years to other regions, and to major urban areas in particular, the committee expanded one element of the formula—the number of AFDC children counted for entitlement purposes—and added a new authority for "concentration grants."

Present law counts only two-thirds of the students in families whose income is above the poverty line due to AFDC payments. To partially remedy this undercount of poverty children, the committee bill permits all children in AFDC families above the poverty level to be counted in the formula.

The concentration grant provides $400 million in new funds for title I programs to those urban and rural school districts whose low-income children number over 5,000 or exceed 20 percent of the total. As originally proposed by the administration, this provision would narrowly target additional funds by closely matching concentrations of children in poverty with concentrations of title I dollars. The committee bill contains two revisions to this proposal which somewhat dilute the funds to large cities in order to include smaller cities and rural areas.

The first revision is a shift from the local school district to the county as the eligible funding unit; the second is the addition of a small-State minimum, which guarantees that all States receive at least 0.25 percent (equal to $1 million of the $400 million authorized) of the funds available for this provision. The small-State minimum will substantially raise the funding levels for 15 States.

While the committee felt that some broadening of the recipient base was essential, it also concluded that any further dilution of the funds would contradict the very purpose of the concentration grant.

Another new element in title I is the State incentive grant, also proposed by the administration. A matching grant of one Federal dollar for every State dollar expended for compensatory services is established to encourage States to develop their own compensatory education programs. This should result in more extensive State commitments to focusing supportive educational services on children disadvantaged by poverty.

The committee indicated its commitment to the new concentration and incentive grant provisions by assuring adequate funding levels for each. In S. 1753 we require that no less than $400 million be reserved for the concentration grants out of the total annual appropriation for title I, and that the State incentive grants be funded after the first year at levels not lower than the first year's appropriation.

To sum up the funding provisions:

The existing formula is modified to count all AFDC children above the poverty line; new funds are added for high poverty areas; and new State incentive grants are provided. These three elements taken together—and let me emphasize the importance of all three of them fitting together—comprise a funding package designed to reach children in need of compensatory educational services and to balance competing demands for formula equity. These provisions are a vast improvement to title I. I believe that full implementation of the funding amendments will produce a distribution of title I funds that is equitable for all regions of the country and for both urban and rural areas.

Aside from the funding provisions, the committee bill contains a number of amendments intended to facilitate the delivery of title I services. These provisions should simplify program administration at the local level and give added flexibility to program development. I would like to mention two of these amendments in particular.

The committee bill provides that title I money can be combined with State and local supplementary dollars to offer compensatory activities which benefit all children in a school when at least 80 percent of the children are from low-income families. This increases the flexibility of local school districts to provide services in schools with unusually high proportions of children in poverty.

The bill also revises a prohibition in current law which prevents title I teachers from performing certain noninstructional tasks which are carried out by all other teachers in a school. The prohibition is relaxed to permit title I staff to participate in routine responsibilities, such as lunchroom supervision, as long as such duties consume no more than 10 percent of an individual teacher's time.

The committee's amendments to title I are designed to enhance the quality of services to children, and thereby upgrade the quality of the children's learning. They are also the product of careful and thorough consideration of the funding effects throughout the Nation, and represent the committee's best efforts to devise a funding mechanism which fairly

and equitably integrates the interests of all concerned.

SPECIAL PROJECTS ACT

Then we have the special projects act, which is an idea that we have developed—I have the great honor to have been responsible for it originally—where we have a basket of experimental programs. We give the programs 5 years to mature; if they mature satisfactorily they become, like the gifted and talented children's program, regular programs; if not, they are dropped.

This is proving to be an extremely important aspect of our work.

The Special Projects Act is extended by S. 1753 with some major revisions. It contains funds for demonstration projects in special education areas which are not addressed by other Federal programs. Specific funding areas are designated, and the Commissioner is also given authority to fund projects in areas of his own selection which he determines to be of national interest.

Among the programs remaining in the act is the arts in education section. This is of particular interest to me, as it provides the only categorical support for the arts throughout all the Federal education legislation.

The purpose for the Special Projects Act remains valid—to reach into new areas and explore ways of improving or initiating educational programs. The programs for gifted and talented children, discussed earlier in my remarks, and for community education, each originated in this context and are each separately developed in S. 1753. The Career Education Act, which I cosponsored and the Congress enacted in 1977, also began as a small demonstration program in the special projects basket. Each of these programs proved to reach a national need of sufficient scope to deserve expansion of the Federal efforts.

EDUCATIONAL IMPROVEMENT, RESOURCES, AND SUPPORT

S. 1753 extends and revises title IV, the "consolidation" title of ESEA. I have described previously the addition of a new part E, which I sponsored, for programs for gifted and talented children. The committee bill also adds a new part for guidance, counseling, and testing programs. This part extends both the program authority which has been combined with library and learning resource funds under current law, and the provisions for guidance and counseling established in the 1976 Education Amendments. By disentangling the guidance and counseling authority from the library and learning resource authority, the committee has highlighted the importance of each as a separate area meriting Federal support.

EMERGENCY SCHOOL AID ACT

The committee amendments to revise and extend the Emergency School Aid Act primarily increase the flexibility to fund newly desegregating districts with the greatest need for Federal assistance. In this vein, the committee bill permits a single grant, for no more than 2 years' duration, to local school districts for developing desegregation plans.

Also notable is the committee's decision to extend the set-aside for integrated educational television programs for children. This provision has been of special value to children in New York State and elsewhere who have been viewing "Vegetable Soup," a series of highly successful and widely broadcast programs produced with ESAA funds by the New York State Education Department. This and other outstanding television programs supported by ESAA have made a significant contribution to the ESAA objectives of aiding school desegregation.

IMPACT AID

Mr. President, much public attention has been given to the impact aid program, usually focusing on alleged abuses such as aiding wealthy school districts in the suburbs of Washington, D.C. The recent report in a national news magazine showed an aerial photograph of a campus-like high school in Virginia. Such reporting is a great distortion, and ignores the purpose and the reality of this program.

Impact aid pays local school systems a percentage of their education costs to compensate for the presence of federally owned facilities—military and civilian—which do not pay any taxes. The percentages, which vary as to classes of installation, pay an amount far less than the potential assessable property tax on these facilities. Property tax is the primary support for local school systems. Federal property pays no such taxes, but has the impact of locating thousands of children in school districts with no tax base to pay for their education. This is not full compensation by the Federal Government, nor should it be. Federal facilities do bring economic benefits to the localities. But the impact aid program is a partial payment, averaging well below half of the per capita cost of education each Federal impact child, because no taxes are paid. Is it so wrong for the Government to pay for its impact?

Who gets the money? Much of the total, as designed in S. 1753, goes to schools with high numbers of military children and low-rent public housing children. Although military pay has been increased, the vast majority of military personnel with school-age children receive very modest incomes. The families who live in Federal low-rent housing are surely not wealthy. Special provisions are included for handicapped children of military and Indian families. Are these abuses? Are these "fat cats" receiving unwarranted Federal largess? I must say they are not.

Mr. President. Opponents say they want to reform impact aid. I have served in the Congress under seven Presidents; and each one took the position: "We must reform impact aid." In 1974, the law was changed and more carefully targeted on true needs, particularly by guaranteeing that public housing children would receive at least 25 percent of their calculated full entitlement.

I would like to point out that S. 1753, unlike the provisions of the House version (H.R. 15) before House floor action in July, does not restore payments to out-of-State children and does not increase the present reduced rate for out-of-county children. The committee bill preserves these 1974 changes, and this is comparable to H.R. 15 as amended on the House floor.

Objections have been raised to the so-called "tier system" which distributes funds among various classes of impact children. This system was devised to balance spending and pay higher rates to districts which have heavier impact and greater needs. Impact aid is a reimbursement program which supports the general education of children of special Federal impact. Unlike specialized Federal grants for disadvantaged or bilingual or handicapped children, it is not a separately and specially designed program within the general education system. Districts with impact aid children must provide their general education. It is quite unfair to subject them to great uncertainty or annual fluctuations in the support of their general program. Because it balances among various levels of impact and needs, and because it creates some stability in this reimbursement for the general education of Federal interest children, I believe we must maintain the tier system as in current law, as passed by the House and as recommended by the Human Resources Committee.

OPTIONAL CONSOLIDATION

The committee also considered—and this is a tribute to Senator DOMENICI and Senator BELLMON—a proposed experiment in optional consolidation. The committee considered a variety of means for weeding out excessive paperwork and administrative requirements in the existing education programs. The most comprehensive and far-reaching single proposal of this sort offered before the committee was the pilot project for S. 1780, the Optional Education Simplification Act, principally authored by Senators DOMENICI and BELLMON. The sponsors have devoted a great deal of time and effort to creating a new structure for Federal education aid which aims at resolving many of the paperwork and administrative complexities accompanying the programs in their current form.

We were considering very seriously an amendment to permit six States to launch a 5-year experiment in this regard, but the committee as a whole did not think that we were ready for that. So in lieu of the pilot project we have agreed to conduct a study of the effects that such a pilot project would have. The Education Testing Service of Princeton one of the leading education research organizations in the world, has offered its services to conduct this study. We take this very seriously. We believe that it will produce the necessary results to enable us, if valid, and I hope very much that it will be proven valid, to go forward with a pilot project which our colleagues, with great initiative and enterprise, have proposed to us.

Then we have the adult education program, which is showing fantastic results, one of the most creditable which we have before us.

ADULT EDUCATION

Mr. President, S. 1753 also includes amendments, which I offered during Human Resources Committee markup, to

the Adult Education Act of 1966. The Federal adult education program, originally part of the war on poverty, and which I sponsored in 1966, has afforded literally millions of Americans the opportunity to achieve economic and social advancement through its dual emphasis on improving basic literacy and providing high school equivalency.

In developing this reauthorization of the Adult Education Act, I have been assisted greatly by the suggestions of the National Advisory Council on Adult Education, the Department of Health, Education, and Welfare, the New York State Department of Education, and Agudath Israel of New York. While the program basically has been proven to be highly effective, this revision will provide for greater program effectiveness and greater motivation on the part of adults to enter and remain in the program.

Specifically, S. 1753 will improve the adult education program by, first, revising the purpose of the program to include both grade level reference and an emphasis on competence in basic skills; second, expanding the adult education delivery system to include businesses, labor unions, libraries, colleges, and community organizations; third, providing for arrangements to assist and expand participation to flexible course schedules and locations; fourth, adding a research development, dissemination, and evaluation authority at the Federal level; and fifth, providing new authority to implement programs to meet special adult education needs of immigrants.

Mr. President, the expanded purpose will provide Federal Government recognition of a major problem—that many adults cannot read or write sufficiently well to function adequately in our society. Simultaneously, assistance to adults who desire to attain educational credentials such as their high school diploma will continue. Certainly these two aims are complementary, since functional illiteracy and lack of high school diploma are highly related.

Furthermore, expansion of the delivery system at the local level will provide greater flexibility for participants and will make entry into the program more convenient and attractive. Significant numbers of adults not currently being served can be brought into the program by this expansion.

Part of the rationale for this expansion of the delivery system is that basic school-based adult education programs have not attracted high participation from certain segments of our society. Through this legislation, we intend that participation by underserved segments of the population be increased, so that they, too, may be able to fully participate in the fruits of our society.

Included in this reauthorization of the Adult Education Act is a small yet significant provision to meet special education needs of adult immigrants. In its review of the adult education program, the Human Resources Committee was impressed with the unserved needs discovered in its review of programs currently serving adult immigrants. The needs of immigrants differ somewhat from those of other program participants, and these needs often include programs of English as a second language. Immigrants participation and retention rates in programs offered by the existing school based provider system are exceedingly low. These services are not available from ESEA VII bilingual education programs, which serve only children.

To meet these unique needs, S. 1753 provides that not less than 50 percent of appropriations under the adult immigrant section be reserved for private nonprofit organizations. This section also provides that programs for adult immigrants are consistent with the quality criteria established within the State adult education plan. I believe, Mr. President, that this new program for immigrants can be highly successful, and that it will greatly strengthen the overall adult education program.

Finally, we have bilingual education and the national assessment of educational progress.

BILINGUAL EDUCATION

Federal aid for programs of bilingual education continues to be a vital factor in the education of large numbers of students across the country whose native or home language is not English. The committee bill recognizes a clear Federal responsibility to support local school district programs for such students and expands the funding authority to more closely reflect the growing need for assistance. I have long believed that this is a most critical need and strongly support the expansion provided in S. 1753.

NATIONAL ASSESSMENT OF EDUCATIONAL PROGRESS

S. 1753 acknowledges the valuable role of the national assessment of educational progress (NAEP) by providing a new and separate authority for the assessment under the aegis of the National Institute of Education. In recent years NAEP has surveyed the knowledge and skills of young people to develop a national profile of student learning. The new statutory authority for NAEP is drawn to preserve those qualities of the assessment which have earned it the widespread respect and support of the education community, most notably: Sensitivity to the difficulties in developing testing methods and in reporting test data; respect for State and local control; commitment to working cooperatively with educators at all levels; and the capability and commitment to disseminate widely their testing methods and results.

Mr. President, I wish to pay my tribute to Senator PELL and to the staff, to the extraordinary and gifted leadership which Senator PELL is giving in this field. In the Human Resources Committee, he is chairman of the subcommittee dealing with this particular subject. I also pay tribute to Senator STAFFORD, of Vermont, the ranking minority member of this particular subcommittee.

Mr. President, I yield the floor.

Mr. STAFFORD. Mr. President, I wish also to express my support for S. 1753, the Educational Amendments of 1978, which will extend the Elementary and Secondary Education Act and related programs. This bill reauthorizes and in many ways improves the basic legislation which provides assistance to our country's schools.

Most of what is before us is necessarily familiar to all of us, as the programs we propose to renew provide funds to 90 percent of this country's school districts. Yet this also is legislation whose intricacies require a 377-page bill and a 500-page accompanying report. Therefore, and to the certain relief of my colleagues, my comments will be brief and limited to selected highlighting.

The title I compensatory education program is the largest program of aid to elementary and secondary education. Nearly 6 million educationally disadvantaged children from low-income families benefit from title I services, three-quarters of which are instructional. We have strongly favorable evidence of the effectiveness of title I. One can readily imagine how much worse off the children and the schools would be without title I.

In addition to continuing this fundamentally important program, S. 1753 makes two significant changes in title I. One is to provide the incentive of a matching grant program for States which develop or increase their own programs of compensatory education which are similar to title I. The other, dubbed the "concentration funds," would provide $400 million to counties with high concentrations of children from low-income families. I find both of these changes very commendable. The greatest improvements we can make in title I are to encourage greater effort by the States and to reinforce targeting upon the areas of very greatest need, both urban and rural. Another improvement in this bill is new language to assure nonpublic school participation in title I.

In all parts of the country there has been an outcry about declining test scores in our schools. Title II, which is entirely new, addresses this problem. It authorizes grants and contracts which can develop and demonstrate the most effective methods of improving achievement in reading, mathematics, and written and oral communication. Title II also establishes a program of grants to implement educational proficiency standards and of technical assistance to develop achievement tests. In keeping with our constitutional tradition, it should be perfectly clear that the Federal Government is neither to specify the standards nor require the use of any particular test. The purpose of title II is to assist the States and local educational agencies. It is also to help the country by responding constructively to a national problem. It is important that test scores start going up again. Title II offers the potential of generating improvement in basic skills and educational proficiency across the country. It is a significant and constructive initiative.

I would like especially to mention the very promising new provisions for the education of gifted and talented children which have been inspired mainly by Senator JAVITS. For several years there has been a small pilot project for such children administered from Washington. As the program has matured and demonstrated its value under the Special

Projects Act, our Human Resources Committee has approved an expanded program under title IV, with three-fourths of the funds to flow directly to the States. Some provisions which I considered essential are included in the bill; namely, the assurance of a $50,000 minimum fund for each State and discretionary power left to each State to select both the kind of administering agency and the internal funding allocation it finds most suitable in light of its own needs. These provisions should make this program administratively appealing to all States. Our country has been much too slow in developing programs to meet the special needs of gifted and talented children, and I am very pleased by these provisions in title IV.

S. 1753 undoes a mistake made in title IV a few years ago when programs for instructional materials and school library resources were consolidated with programs for guidance, counseling, and testing. A great deal of unfortunate competition resulted between the "things" oriented and "people" oriented elements, yet both elements are of high priority. At the recommendation of all parties concerned, these elements have been separated. We need strong support for instructional materials and school library resources. We also need strong support for guidance, counseling, and testing.

An overarching concern has been the steady proliferation of burdensome paperwork. There has been steady complaint from school administrators about duplication and about repetitive annual applications. The committee has been responsive. For titles I and IV, which are the ones administered through State departments of education, there is provision for a single application. This and other sensible changes will cut down on the paperwork and simplify administration. These are important improvements and will be well-received by administrators.

There are many other fine features of this bill. It is the product of major effort by many members of the Committee on Human Resources, and especially by the chairman of the Subcommittee on Education, Arts and Humanities, Senator PELL. The overall effect will be to increase access to opportunity and to help the States and local educational agencies to improve the quality of our schools. These are effects we need for our young people and for this country's future. I urge my colleagues to support S. 1753.

Mr. DOMENICI. Mr. President——

Mr. JAVITS. First, if the Senator will yield, I ask unanimous consent that Dr. James Dockemy, of Senator THURMOND's staff, be granted the privileges of the floor during the consideration of S. 1753.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I thank Senator PELL, Senator JAVITS, and their staffs for their kindness in working with us on this bill and letting us work with them. Later on we will engage in a little more of a dialoge regarding the consolidation approach that the Senator from New York mentioned in his opening remarks.

First, Mr. President, I want to address a few remarks to bilingual education and then introduce a series of amendments on that subject before I move to a few other matters.

Mr. President, American education should afford to each and every person the essential entrance into the mainstream of American society; our education should provide social mobility, and extended opportunities because of the democratic ideals on which our society is based. The public school system in the United State is and should be an equalizing force in American society. And, adhering to this definition, every child, regardless of his family's background and wealth, should have the opportunity to gain an education. However, our students with limited English-speaking proficiency, usually represented by minorities, are not able to fully benefit from the public school education, because they often cannot perform effectively in the English language.

Bilingual education, a program in which the student is taught in his native language and in English concurrently until he is able to master the English language, greatly enhances the educational opportunities for students with limited English-speaking proficiency. Thus, bilingual education can afford its students entrance into the mainstream of American society.

The U.S. Office of Education estimates that at least 5 million children are in need of some type of assistance. A number of these speak English, but about 1.8 to 2.5 million children actually need bilingual education.

A high percentage of these children will drop out of school, because of their lack of proficiency in the English language. The survey of languages, conducted by the Bureau of the Census for the National Center of Education Statistics in July 1975, indicates that for the total population 19 years of age or older, 9 percent have completed only the eighth grade or less. However, 58 percent of those whose usual language is not English report that they have completed only the eighth grade or less. Furthermore, 68 percent of the total population ages 19 or older have completed the equivalent of high school or better. A mere 30 percent of the population who usually speak other languages had completed high school.

Other studies have concluded that, in certain Hispanic populations, 20 percent of the children never even enrolled in school.

And, surveys have concluded that the average number of years of school attended by Mexican-Americans is merely 7.1 years, while nonminorities complete an average of 12.1 years of schooling.

For those students with limited English-speaking proficiency who do remain in school, a 1971 U.S. Commission on Civil Rights report, "The Unfinished Education," indicates that 50 to 70 percent of Mexican-American students in the 4th, 8th, and 12th grades in the Southwest are reading below expectations for their respective grade levels. In contrast, only 24 to 34 percent of all nonminority students in these grades are reading below grade level. Numerous studies have indicated a relationship between poor reading ability and rate of dropout.

Even worse, as outlined in a 1970 report of the Civil Rights Commission, many minority children are assigned to special education classes for the mentally retarded. In one particular school district, the U.S. Office of Education estimated that 86 percent of the Hispanic students have been assigned to classes for the mentally retarded.

Finally, the survey of languages, previously cited, also indicated that, in addition to having less education, those groups with limited English-speaking proficiency participate in the labor market in relatively lower numbers, and have higher unemployment rates than those from English-speaking backgrounds.

Mr. President, a high percentage of children needing bilingual education are not able to perform at their academic best, because of their lack of proficiency in the English language. Clearly, the schools must build on the strengths, particularly the language strengths, the children possess. With the effective implementation of a bilingual education, these children are able to increase their proficiency in the English language, and therefore fully benefit from the public education system. For these millions of disadvantaged children, the Bilingual Education Act promises a fuller participation in a free society.

The Education Amendments of 1978, which include reauthorization of the Bilingual Education Act, have been reported by the Committee on Human Resources. Mr. President, allow me to briefly review some of the recommended changes that are very important in the continuation of the current program through fiscal year 1983.

Since the Bilingual Education Act presently serves less than 10 percent of the eligible bilingual children, the committee approved the authorization increase from the current $160 million for 1978, to $200 million for 1979; $250 million for 1980; $300 million for 1981; $350 million for 1982; and $400 million for 1983. This increase will not provide service for all eligible children, but will more than double the number of children who can be served.

Since, as reported by the committee, evaluations for bilingual projects have been inadequate for measuring program effect on student achievement, and have also been inadequate for identifying projects worthy of replication, the committee bill authorizes $20 million to carry out a strengthened research and development effort for 1979, and "such sums" for each year thereafter. I believe such a strengthened research effort is necessary.

In order to reach children with limited English proficiency most effectively, the Secretary is directed to prepare and, not later than September 30, 1980, submit to the Congress and the President a report identifying the approximate number of children with limited English-language proficiency in the Nation, by language and by State. Identification of the children in need of bilingual programs is a must if we are to provide

equal educational opportunity for all children.

Mr. Chairman, I am gratified that a number of the provisions in the committee bill are taken from S. 2807, which I introduced along with Senator HART, my able colleague from Colorado. While we are pleased with many of the amendments contained in S. 1753, particularly those which require the collection of data on the target population, we are convinced that additional information should be required in order to prepare the Congress for policy decisions concerning this program at the next reauthorization.

Therefore, we are offering several amendments which I feel are necessary if bilingual education is to be an integral part of the Federal effort to provide equal educational opportunity for all children. The first of these amendments, which I now send to the desk, directs the Department of Health, Education, and Welfare to prepare and submit to Congress a report detailing methods of phasing in and establishing a formula grant program to serve those students with limited English proficiency.

As I stated, a number of us have some concerns about bilingual education. Even with the generous add-on that the committee has provided in this bill, many of us are offering amendments which we feel are very necessary if bilingual education is to be an integral part of the Federal effort to provide equal educational opportunities for all children.

I now send to the desk, Mr. President, five amendments, which I will call up in the number 1 through 5 as stated thereon. I merely send them to the desk at this time.

UP AMENDMENT NO. 1712

(Purpose: To require the submission of a report to the Congress setting forth the methods of establishing a bilingual formula grant program)

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI), for himself, Mr. HART, Mr. HATHAWAY, Mr. TOWER, and Mr. MCGOVERN, proposes an unprinted amendment numbered 1712.

On page 290, between lines 21 and 22, insert the following:

"(f) The Secretary shall prepare and submit to the President and to the Congress not later than December 31, 1981, a report setting forth the methods of converting, not later than July 1, 1984, the bilingual education program from a discretionary grant program to a formula grant program to serve students of limited English language proficiency. The study required by this subsection shall consider the findings of other studies required to be made under this section, and shall include cost estimates for the phasing in of the formula grant program.

On page 290, line 22, strike out "(f)" and insert in lieu thereof "(g)".

On page 291, line 5, strike out "(g)" and insert in lieu thereof "(h)".

Mr. DOMENICI. The first of these amendments directs the Department of Health, Education, and Welfare to prepare and submit to Congress a report detailing methods of phasing in and establishing a formula grant program to serve those students with limited English proficiency. This amendment does not ask HEW to recommend whether a formula grant program should be established; rather, it asks HEW to prepare a report detailing the methods of phasing in and establishing a program should Congress decide to consider that alternative at the next reauthorization. I stress the difference, Mr. President.

There are many who believe that this should become a formula grant program, and it is very difficult for any committee to come up with an approach to this. This amendment would not give HEW the option to weasel around as to whether or not this is a good approach. Rather, the amendment requires HEW to prepare the report detailing how this program might be phased in and established. Then, the policymakers for the people of this country, the Senate and the House, could decide whether or not they want to proceed with the formula grant approach for bilingual education.

I understand that the first of these amendments, which is cosponsored by a number of distinguished Senators, is acceptable to the managers of the bill.

Mr. PELL. The Senator from New Mexico is correct. I think the RECORD should show, as the Senator has already emphasized, that this is calling for a study and not moving into being a formula grant program, because if we moved today, even if we might like to do so, the cost would go into billions of dollars. We want to know where we are first. My own State of Rhode Island has particularly been a beneficiary of the bilingual program and we are strong supporters of it.

Personally, I hope the study shows the value of the program and the need to go into a greater enlargement of it on a formula grant program. Let the RECORD show that we have no objection.

Mr. DOMENICI. I thank the Senator.

Mr. JAVITS. There is one point I would like to have very clear with the Senator in connection with this amendment. That is that we do not presume what the Secretary will find. The language of the amendment would have some implication in that regard: It should not suggest that all the Secretary has to do is to deal with methods. The fact is he has to decide and give us a view. We may not go with him as we may not agree as to whether or not we should go for a discretionary grant or a formula grant.

With that understanding, that HEW has the right to make recommendations on that score as well, I have no objection to the amendment and to its acceptance. Is that agreeable to the Senator from New Mexico?

Mr. DOMENICI. I think we ought to discuss that a little more.

I might say to my good friend from New York, whose assistance I greatly appreciate, and whose expertise in this area I consider to be foremost, that I do not believe I want to leave that last colloquy in its present status. The purpose of this amendment is that the Secretary shall prepare and submit to the President and to the Congress a report setting forth the methods of converting the bilingual education program from a discretionary grant to a formula grant program. It does not let them at HEW decide whether that study is a good idea or not, but merely to make a recommendation as to how that might be carried out. What we do not want them to do is to send up a very flimsy report saying, "We have looked at it and it will not work." What we want them to do under this amendment is to send it to us no matter how difficult and complicated. They do not have the discretion to decide whether or not to do this study, which is to recommend a system for converting this discretionary program into a formula program. Maybe we have said the same things.

Mr. JAVITS. No, we did not say the same thing, because, while I understand that they are to set forth the methods of conversion, they also have the right to say, "We do not believe conversion is desirable, and these are our reasons; however, because you have asked for it, we herewith set forth the methods by which you could convert if you wish to."

The final decision would be ours. The word "decide" as the Senator used it is not appropriate. They do not have the power to decide; we do.

Mr. DOMENICI. That is correct.

Mr. JAVITS. So long as we understand that, and that is very clear, I believe that our mandate to them should include also whether or not they consider the conversion desirable and if so, why; if not, why not, as well as that they have the duty, and we will impose it, to give us the methods by which there would be a conversion if we choose to go that route.

I just do not want to foreclose them from the right to tell us they do not think it is a good idea and why.

Mr. DOMENICI. If this amendment is adopted and becomes law, in no event can they escape giving us their expert advice and study on how to convert it.

Mr. JAVITS. If we choose to go that route.

Mr. DOMENICI. That is right. We understand each other.

Mr. JAVITS. On that basis, it is acceptable.

Mr. DOMENICI. Does the Senator from Rhode Island agree?

Mr. PELL. There is no time limit, so I suggest the question be put.

Mr. JAVITS. We are ready to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. DOMENICI. I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1713

(Purpose: To strengthen the provision with respect to staffing in the Office of Bilingual Education)

Mr. DOMENICI. The second amendment that is already at the desk, but has not been called up is serially marked No. 2 for the clerk. It directs that the Commissioner shall insure that the Office of Bilingual Education be staffed with

sufficient personnel who are trained in or have experience in bilingual education.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI), for himself, Mr. HART, and Mr. TOWER, proposes an unprinted amendment numbered 1713.

On page 291, line 6, beginning with the word "is" strike out through the word "title" on line 7 and insert in lieu thereof the following: "is staffed with sufficient personnel trained, or with experience in, bilingual education to discharge effectively the provisions of this title".

Mr. DOMENICI. Mr. President, the current bill mandates that the Commissioner shall insure that the Office of Bilingual Education is adequately staffed to discharge the provisions of this title. My amendment simply adds to this provision, stating that the Office be staffed with professionals in the bilingual field. While such professionals may not have been available a few years ago, there are now sufficient and sufficiently trained personnel available to enable the Commission to hire trained and/or experienced staff. I do this only by way of clarification. I truly believe this is the intention of the committee in its appropriate section under bilingual education.

Many of my bilingual experts have found that there is a deficiency in the Office in terms of parity of knowledge between those in the field who have been running the bilingual programs, and those up here who have been administering them. I am merely adding to the bill. Staff the programs as indicated by the committee, but do it with peaople who have experience in bilingual education.

Mr. PELL. Mr. President, I have had an opportunity to peruse the amendment of the Senator from New Mexico. I think it is an excellent amendment. We are particularly fortunate in my part of the country; we have nine Federal bilingual programs going on now, mostly centered around the Portuguese language.

We have these experts in Rhode Island; we are particularly blessed that way. I hope they also exist in the rest of the country. I think the legislative history should show that this has been passed on a best-efforts basis, because there are some areas of the country where they will not have the same expert knowledge that they do in the Senator's State or in mine.

Mr. DOMENICI. I believe the Senator makes a good point. I was assuming that, because there are so many experts in the bilingual field in my State, I was assuming many available experts in every State. I accept the Senator's explanation. We are saying experts—if they are available.

Mr. PELL. There is one other thought here in the whole bilingual program. That is that we must be very careful that it does not tend to segregate the groups that are in it longer than would otherwise be the case. I have had experience of seeing a program in which, after the year or two that the students are in it, they know less English than when they started out.

From my viewpoint, the amendment would be acceptable. I do not know how my colleague feels.

Mr. JAVITS. Would the Senator yield?

Mr. DOMENICI. I am delighted to yield to the Senator from New York.

Mr. JAVITS. The Senator has a number of bilingual amendments, and I think the concept is important. The committee generally, and Senator PELL will correct me if I am wrong, has taken the position that the purpose of bilingual education is to end bilingual education; in short, to win children to the proposition that their mother tongue is English and that they should learn and study in the English language.

Mind you, I am very devoted to bilingual education. In short, I wish that we had, in our whole educational system, from the kindergarten up, the requirement that children learn a second language, whatever that might be—probably, in our country, it is most likely that it would be Spanish. But I do believe that the way to come at it is not this way; that is, by perpetuating the language inadequacy which occurs from parentage and the language spoken at home, but by dealing with it, first, by bringing the children into the total English realm, and then, like other children to whom English is the mother tongue, enabling them to learn a second language.

That is my philosophy. If we are on the same wavelength, because I think that really has to be the purpose of the elementary and secondary education Federal aid, then I am entirely with the Senator on this and probably his other amendments. What I am interested in is the fundamental thrust of what we are trying to do.

Mr. DOMENICI. Let me say to my good friend from New York that this amendment would insure that where there are bilingual experts, that kind of expertise should find itself in the Commissioner's office in Washington.

I do not think it is necessary that we conclude that we philosophically agree on bilingual education's future. I think the Senator would agree that if you have experts in bilingual education, even if it is an interim, transitory thing as he describes it, we ought to mandate that they be in this office and not have merely educators who know nothing about bilingual education here.

I do not know at this point whether I would be prepared to say to the Senator, only if I agree with his philosophy will he accept the amendment, therefore I agree with the philosophy. I am not prepared to do that, because that may not be the case. As we see this study that the previous amendment talked about and because my particular State has a cultural relationship to bilingualism, that may be completely different from others. I do not know that the philosophy should be agreed upon by this Senator at this point.

Mr. JAVITS. I think that is a fair statement, but I wish to make it very clear that, by accepting this amendment or raising no objection to it, I am in no way compromising my point of view, but I will fight for it and insist on it. Because whether it is New Mexico, which is contiguous to Mexico and has a very broad Spanish-speaking population, or whether it is in my State, which has an equally broad Spanish-speaking population, though they are mainly from Puerto Rico, I believe this is the right way to go.

People in this country have to recognize that they have to learn and speak English; that is the basic tongue. Our Federal aid, in my judgment, must be directed toward that end and we cannot confuse bilingualism with the fact that children ought to learn and know another language. While asserting that point of view and my own intention in raising no objection to the amendment, I have no objection to it.

Mr. DOMENICI. I thank the Senator from New York.

Mr. President, this is the amendment that we have been discussing since the adoption of the last amendment. I have nothing further to say on it. I believe it is acceptable to the managers of the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

So the amendment (UP No. 1713) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT 1714

(Purpose: To delete an exception relating to the prohibition on the use of funds under title VII and insert clarifying language)

Mr. DOMENICI. Now, the third amendment pending at the desk, Mr. President, is technical in nature. It clarifies the language in the bill which provides that the prohibition to supplant does not preclude a local education agency under court order from using funds under this title for activities directed by the court order or Lau plan. We have stricken, by this amendment, a clause under section 721(b)(2)(G) which we felt suggested that title VII funds could be used as a compliance tool in a Lau plan or in an order by the court. We have replaced it with language that allows districts under court order or implementing a Lau plan to compete for and use title VII funds.

I think this amendment is necessary to assure that title VII remains a competitive process and is not subject to use by the courts or the Office of Civil Rights as a compliance mechanism.

I believe that this has been discussed with the staff and with the managers of the bill. I think we probably start off with the same goal, but without this amendment a misunderstanding could result. These funds could lose some of their competitive nature, and could be used to meet compliance requirements under court order, and I do not believe that was ever the intention.

If that were the case, we could have a court order in one part of the Nation, and funds could conceivably be diverted from surrounding States to meet compliance obligations in one area.

I do hope this will be accepted by the managers.

It is not intended in any way to de-

tract from the court orders, rather it is designed to let these sections of the bill remain competitive even with court orders passing judgment on qualifications, criteria, eligibility, and the like.

Mr. HOLLINGS. Will the Senator yield for a unanimous-consent request?

Mr. PELL. I yield to the Senator.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that during consideration of this bill Mike Copps, Ashley Thrift, Mike Joy, Ralph Everett, and Tom Polgar of Senator MORGAN'S staff, be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, I ask unanimous consent that Tom Dougherty of Senator GLENN'S staff be granted privilege of the floor during the debate and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, in response to the question on the amendment raised by the Senator from New Mexico, I would say that I think it is acceptable. It makes explicit what is already implicit. I believe we should move ahead with it.

Mr. HAYAKAWA addressed the Chair.

Mr. DOMENICI. Did the Senator from California want to speak?

Mr. HAYAKAWA. I would like to make a unanimous-consent request, and would the Senator from New Mexico yield me 12 minutes? I would like to make a few remarks, but not to introduce an amendment.

Mr. DOMENICI. Let me say to my good friend from California, I have a couple more amendments on bilingual education. I would like to finish them so that their sequence remains intact, and then I will be pleased to see how that works out.

Mr. HAYAKAWA. Fine.

Mr. DOMENICI. But I would rather complete them, if the Senator does not mind.

Mr. HAYAKAWA. I thank the Senator.

Mr. President, I ask unanimous consent that Dr. John Backer of my staff be granted privilege of the floor during the debate on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I wonder if I might call up this amendment now and have the clerk read it. It is very short and I want to make sure the Senator from New York and the Senator from Rhode Island have the exact language.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI), for himself, Mr. HART and Mr. MCGOVERN, proposes an unprinted amendment numbered 1714:

On page 279, line 7, beginning with (1), strike out through "with" on line 9 and insert in lieu thereof the following:

"(1) preclude a local education agency from using funds under this title for activities carried out under".

Mr. JAVITS. Mr. President, I will tell the Senator what interests me. What interests me is whether the funds would be used for the purpose of complying with a court order, or whether they would be used for bilingual programs in a program which relates to the responsibilities imposed by the court but would still remain a bilingual program.

Mr. DOMENICI. Indeed.

What I am saying is that they could be used to comply, but I think the committee never intended that this kind of a grant be anything but competitive. Therefore, we do not want to leave the impression that a court can order this money around because they have found that there is a need for bilingual education in a certain part of the country. We know that. But we have always had this money competitive. Some are able to get it, some are not.

We just want to clarify, certainly, a court order may be in some respects met when it says there is a bilingual need here and it ought to be used.

If they succeed in their competition, it may, indeed, fulfill that particular court order.

But we do not want courts substituting for the competitiveness of bilingual programs because this is not that kind of program.

Mr. JAVITS. In other words, the courts cannot run the program, even though the program may result in greater or definitive compliance with all or a part of a court order?

Mr. DOMENICI. Precisely.

Mr. JAVITS. That is acceptable to me.

Mr. DOMENICI. I thank the Senator.

I move the adoption of my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

So the amendment (UP No. 1714) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JAVITS. Will the Senator yield?

Mr. DOMENICI. I am delighted to.

Mr. JAVITS. Mr. President, I ask unanimous consent that Ed King of Senator BARTLETT'S staff, Karen Steidl of Senator YOUNG'S staff, Cindy Root of Senator TOWER'S staff, be granted privilege of the floor during consideration of this bill.

Mr. ROTH. If the Senator will yield, will he add Chris Warner of my staff to that list?

Mr. JAVITS. I make that unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1715

(Purpose: To strengthen the development of bilingual education materials and to assure that the relative needs of various language groups are taken into account in the development of such materials)

Mr. DOMENICI. Now, Mr. President, the fourth amendment I have pending at the desk is an effort to upgrade the bilingual materials and to insure the relative needs of the various language groups are taken into account.

In current law, the NIE and the Commissioner are mandated to develop and disseminate instructional materials and equipment for use in bilingual education programs. However, the current committee bill does not continue that mandate and I believe it should be continued. I urge acceptance of the amendment.

The PRESIDING OFFICER. Does the Senator call up the amendment at this time?

Mr. DOMENICI. I call up the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI), for himself, Mr. TOWER, and Mr. HART, proposes an unprinted amendment numbered 1715:

The amendment is as follows:

On page 287, between lines 16 and 17, insert the following:

"(e) The Commissioner and the Director of the National Institute of Education shall, through competitive contracts with appropriate public agencies and private institutions and organizations, develop and disseminate instructional materials and equipment suitable for bilingual education programs. The quality of materials developed pursuant to this subsection shall be comparable to the quality of materials provided in classrooms for English dominant children. In the development of instructional materials for the purpose of this subsection, the availability of materials already in existence in private and public sources shall be taken into account and special attention shall be given to language groups for whom private organizations are unlikely to develop such materials."

On page 287, line 17, strike out "(e)" and insert in lieu thereof "(f)".

Mr. PELL. Mr. President, I have had an opportunity to go over the amendment. I think it is an excellent amendment, and I suggest to my colleagues that it be accepted.

Mr. JAVITS. Mr. President, I have one question.

The Senator from New Mexico uses in the second line of this amendment the word "competitive"—"through competitive contracts." I just want to be sure that that word does not have any statutory significance. Does the Senator mean an ultimate effect?

Mr. DOMENICI. Indeed.

Mr. JAVITS. I do not know what other procedures they otherwise would have to go through.

Mr. DOMENICI. There is no statutory meaning other than the word itself.

Mr. JAVITS. I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1716

(Purpose: To provide more specific criteria for the approval of initial applications under title VII)

Mr. DOMENICI. Mr. President, I sent to the desk five amendments, and I be-

lieve we are now on the fifth amendment. I do not want to call it up yet. I want to discuss it for a moment. This amendment clarifies the term "historically underserved," which appears in section 721(b) of the committee bill. The phrase "historically underserved" in this section has been used to set a priority for new applicants, and it lacks definition.

We ask the question, who have been historically underserved? What does historically underserved mean?

The purpose of this amendment is to provide specific criteria to be considered in exercising this priority. That language is consistent with the provisions of the bill which direct that consideration be given to relative numbers of children eligible and to the relative need for such program.

I truly believe that the amendment is consistent with the bill, and merely will be more specific to make certain that the intention of the farmers of the bill is not departed from by those who administer it.

I call up the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes an unprinted amendment numbered 1716.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 280, line 5, before the period insert a comma and the following: "taking into consideration the relative numbers of such children in the schools of such local educational agencies and the relative need for such programs".

Mr. PELL. Mr. President, I have had a chance to go over this amendment. I believe that the term "historically underserved" is one that requires definition, and I believe we are correct in moving ahead with the acceptance of this amendment.

Mr. JAVITS. Mr. President, the term "historically underserved" applies not only in the area of which the Senator is speaking but also could apply—and I gather it is the purpose of the amendment—in many other areas.

For example, I believe that New York City, which has a population of almost 8 million, has about a million people who, generally speaking, are in this category of historically underserved.

So, with the understanding that this is a term of quality, nationally applicable wherever it is applicable, I find no objection.

Mr. DOMENICI. I am most appreciative. That is my intention, also.

Mr. President, in connection with this amendment I recognize the assistance of Senator HATHAWAY. He has statements in support of the clarifying amendment with reference to "historically underserved," and he has asked that they be made part of the record. I ask unanimous consent that his statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENTS BY MR. HATHAWAY

I am pleased to be a cosponsor of the pending amendment of the Senator from New Mexico. It is a worthy amendment to the bilingual education provisions and I urge its adoption.

It would require that the Secretary submit to Congress by the end of 1981 a report on procedures necessary to convert this program from a discretionary grant program to a formula grant program.

In this way, Congress would be in a position to carefully consider such a proposal. At this point in time it is clear that there is a great unmet need for bilingual education. Currently 255,000 children are served by Federally funded Bilingual programs. But the estimated need ranges from 800,000 to 3.3 million for a shortfall of up to 10 to 1.

These factors were motivations behind my amendment to give priority in considering initial grants to areas and groups which have been underserved, and to move toward an equitable geographical distribution. As the Committee report notes, there is an unmet need for such programs in New England among Franco-Americans, and this is particularly true in the state of Maine.

I look forward to this amendment providing momentum to meet all of these unmet needs.

As the author of the language which the Senator from New Mexico proposes to amend, I would like to offer a couple of comments.

I believe his amendment is consistent with the language in the bill and in the accompanying report.

The statutory language is as follows:

"(3) In the consideration of initial applications from local educational agencies to carry out programs of bilingual education under paragraph (1) of this subsection, the Commissioner shall give priority to applications from local educational agencies which are located in various geographical regions of the Nation and which propose to assist children of limited English proficiency that have historically been underserved by programs of bilingual education. In approving such applications, the Commissioner shall, to the extent feasible, allocate funds appropriated in proportion to the geographical distribution of children of limited English proficiency throughout the Nation, with due regard for the relative ability of particular local educational agencies to carry out such programs and the relative numbers of persons from low-income families sought to be benefited by such programs.".

The accompanying report states:

"The committee further agreed to amend the Bilingual Education Act with respect to procedures to be utilized in the evaluation of initial grant applications for assistance under that Act.

"The amendment would require the Commissioner, in the consideration of initial applications from local educational agencies for bilingual education grant funds, to give priority to applications from such agencies located in geographical areas and proposing to assist children in need that have historically been underserved by programs of bilingual education. The amendment further requires that in approving such initial applications, the Commissioner shall to the extent feasible allocate funds in proportion to the geographical distribution of such children of limited English proficiency throughout the Nation with due regard for the ability of the local educational agency to carry out such a program, and the relative numbers of low income children sought to be benefitted.

"The committee strongly believes that effective bilingual education programs ought to be implemented to benefit all children in need of such services throughout the Nation. At the same time, it is recognized that budget realities preclude this goal from being immediately realized through Federal programs. Currently 255,000 children are served by federally funded bilingual demonstration grants. This is far short of the need, however, since the Committee has received estimates of children who could benefit which range from 800,000 to 3.6 million. Thus, the shortfall in program resources to program need could be between 1 to 3 and 1 to 10.

"Since it is not presently possible to establish federally assisted programs reaching all children in need of such assistance, the Committee believes that it is important to utilize scarce funds for demonstration programs and projects with a view toward stimulating interest and initiative among State and local educational agencies throughout the Nation which ultimately would lead to successful non-Federal programs.

"The Office of Bilingual Education is urged to continue its efforts to provide technical assistance to local educational agencies interested in applying for such assistance, and is encouraged to engage in active outreach programs to stimulate such interest. The Committee also takes notice of the potential need for bilingual education programs among Franco-Americans and Portuguese-Americans in New England, for Spanish speaking persons of Caribbean origin through the Northeast, and urges the Office of Bilingual Education to give appropriate attention to applications designed to meet this need.

"The committee stresses that this amendment is not intended to be used as a basis for redistributing funds to favor one language group over another exclusive of need. Projects grants should continue to be awarded according to the degree of need for assistance and the quality of the existing projects or future project proposals. It is anticipated that increased funding for title VII in future years will enable the Commissioner to reach regions and groups which have historically been underserved."

This language stresses that the relative numbers of children must be examined, relative need must be considered, and the overall quality of the application must be considered, with attention to the ability of the local educational agency to carry out the program.

The Senator's amendment further underlines these factors and I am pleased to support it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, does the Senator from California wish to speak on bilingual education?

Mr. HAYAKAWA. I do, and I would be grateful if the Senator from New Mexico would yield to me.

Mr. PELL. There is no time limitation.

Mr. JAVITS. The Senator simply can take the floor.

Mr. DOMENICI. I say to the Senator from California that I am delighted to yield at this point.

I have a number of additional amendments, but they are not on bilingual education, and I yield the floor at this moment.

Mr. JAVITS. Mr. President, I ask unanimous consent that Jerry Rosen, of Senator GRIFFIN's staff, may have the

privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from California is recognized.

Mr. HAYAKAWA. Mr. President, I rise today to offer some comments on so-called bilingual education. I have a life-long habit of not accepting words simply on the basis of their colloquial usage. I like to make certain that the meaning of any particular language can be clearly identified.

In this connection, the term "bilingual education" has been giving me some problems. Chances are that when one asks five educators for a definition, five very different answers will be given. According to one interpretation, it simply means the teaching of English to new immigrants. On the opposite side of the scale—and there is really a full scale of interpretations—bilingual education is a more or less permanent two-track educational system—involving the maintenance of a second culture and an emphasis on ethnic heritage. I ask myself, "How did we get into this confused state of affairs?"

The United States has always had minority groups with different languages and cultures, so there has always been the need for special educational assistance. Prior to the 1900's, in Pennsylvania, the Germans had public instruction in German for a brief period in the 1830's. In Cincinnati, Ohio, Indianapolis, Ind., Baltimore, Md., and New Ulm, Minn., there were German-English schools between 1880-87. Cities such as New York, Chicago, and Detroit set up special English classes for language minority immigrants as part of night school programs. Many immigrant organizations provided assistance to members of their groups. The Educational Alliance of New York City had a program in the 1890's to help Jewish immigrants by teaching them English, and later the Society for Italian immigrants and the Polish National Alliance set up similar classes. Although immigrant groups continued to establish native language schools for their children, the great majority of language minority children who were in school received no special consideration.

These schools, set up by immigrant groups, were set up to facilitate teaching them English; but sometimes they were schools set up specifically for the purpose of teaching the language of the immigrant group, the language of the country they came from. One thinks in this connection of the Chinese language schools and Japanese language schools, especially on the west coast, and there were the Hebrew schools in which Jewish children were taught.

Nevertheless, all these children made their way. They succeeded in their respective fields of endeavor, and many of them were later found among America's most prominent citizens.

I believe by about 1960, some important changes began to take place. A great number of Cuban refugees arrived, and this influx was subsequently enlarged by increasing numbers of Mexicans. As a result, prior to 1969, some 56 locally initiated bilingual programs were started, primarily in the Southwest. Congress got into the act in 1968, when it passed the first major Federal legislation concerning bilingual education, the Bilingual Education Act. There have been numerous amendments since that date. The latest one will be found in title VII of the bill which is presently before the Senate. Looking over the record, we find that we started in 1968 with an authorization of $15 million, that it was doubled in 1969, and that we are now considering authorizations in a magnitude of $400 million annually. For a generation which has gotten used to the generosities of the welfare state, this is, of course, a normal and desirable development. An oldtimer like myself, on the other hand, cannot help wondering why it was necessary for the Federal Government to become involved in a problem area which—left alone—had contributed so effectively to the American success story.

As a member of the Budget Committee, I have learned to deal with billions of dollars. So the amounts under discussion for this program will not cause me any sleepless nights. What I am concerned about, however, are the ambivalent aims of bilingual education. Let me quote from a statement of the Office of Education:

> Bilingual education means the use of two languages, one of which is English, as media of instruction. Both languages must be used as media of instructions for the same student population in a well organized program which encompasses part or all of the curriculum. Included in the concept of bilingual education is the study of the history and culture associated with the mother tongues. A complete program develops and maintains the children's self-esteem and a legitimate pride of both cultures.

I quote some more:

> Bilingual education does more than simply teach a child English so that he can then be assimilated into the Anglo school. Rather, it attempts to present and preserve certain aspects of the student's native culture as well as to introduce him to the English language and its culture.

Let me depart from my prepared text to comment on bilingual education as impinged upon my own family.

I have a niece who got much of her education in Japan. She was born there. Then at about high school age she came to this country, learned English without a bilingual school, and got her degree in San Francisco State, so she speaks English very well as well as Japanese.

She and her husband, who is a Nisei American-born Japanese, together were hired to teach in the bilingual program in San Francisco public schools. They are both trying to get out of it—I think one of them succeeded in doing so—because they both felt it was a waste of time after 3 or 4 years of experience in the bilingual program.

The children in the bilingual program are a curious mixture. Some are third-generation Japanese Americans. Many of them come from families in which the second-generation Japanese Americans no longer speak Japanese and therefore some of them are trying to discover cultural roots, and if they do learn some Japanese, they are able to speak to their grandmothers if the grandmothers are still alive. But they are a small portion of the classes.

Another group of the people in bilingual education are the children of officials of Japanese companies with headquarters or branches in San Francisco. To them, the instructor is not necessary. What they are requiring most of all is instruction in English and they do better when thrown into all-English language classes.

The third group are black and white children who have nothing to do with the Japanese culture or the Japanese language. They are just thrown in there because of affirmative action and racial balance requirements require that there be a certain number of blacks and a certain number of whites in the classroom. Why a large number of black children should have to learn Japanese because they go to San Francisco public schools I have never been able to figure out.

But this is what is happening and the results of this are, as I say, to my own niece and to her husband sufficiently unsatisfactory that my niece at least has gone on to get a master's degree in remedial reading in order to be able to get out of the bilingual program altogether.

In other words, to some of the participants in this program there are many, many ambiguities that were mentioned at the very beginning of my remarks when I said that there are no five educators who can agree upon what bilingual education means.

Mr. President, I cited the official position of the Office of Education, and I cannot help wondering how many of my colleagues concur with this approach. The fundamental issue was discussed in the Education Subcommittee, which eventually agreed to a change of language that seems to me symptomatic. The text in the present law stipulates that bilingual instructions are needed for children who "have difficulty speaking and understanding instruction in the English language." The new text eliminates this language, indicating that the instructions are needed for children who "have sufficient difficulty speaking, reading, writing, or understanding the English language to deny such individuals the opportunity to attain levels of proficiency comparable to others at their appropriate age and grade level."

I cannot help wondering what this means. This means, then, that, let us say, if you have fifth-grade arithmetic you have to have fifth-grade arithmetic taught to a part of the school population in English and to another part of the school population in Chinese or Spanish. Is the purpose of bilingual education to have a duplicate school system? There are many ambiguities here.

Mr. President, if there ever was an open-ended definition, in my judgment, here is one. Since the attainment of proficiency comparable to that of native Americans entails debatable value judgments, we are opening the door to a federally sponsored maintenance of a second culture.

That is what we are deliberately doing. And how many second cultures are we going to maintain? Chinese, Japanese, Korean, Spanish-American, Mexican? If the demands are great enough. There are, no doubt, many, many other linguist groups including American Indians and Vietnamese who are going to insist upon second language programs for themselves.

I believe we all grew up with the concept of the American melting pot, that is the merging of a multitude of foreign cultures into one. In this world of national strife, it is a unique concept. I believe everybody in this Chamber will agree that it had a fundamental impact on the Nation's greatness. We in this very Chamber represent simply dozens of ethnic heritages, and the Chamber is richer for this fact.

In the light of these new educational developments, I ask myself what are we trying to do with this bilingual education? Where do we want to go? Demographic research tells us that 10 or 20 years from now in some of our States, there will be a majority of individuals with Spanish background. If Spanish-speaking people become a majority, for example, in the State of California or in the State of Texas, what are we heading into? It seems to me that we are preparing the ground for permanently and officially bilingual States. From here to separatist movements on the order of the Province of Quebec would be the final step.

I ask these questions, Mr. President. I ask us to ask ourselves if this is the kind of development which we want to promote?

I thank the Chair.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. Who seeks recognition? The Senator from New Mexico.

UP AMENDMENT NO. 1717

(Purpose: To delete an exception relating to the prohibition on the use of funds under title VII and to delete a reference to a prohibition on the priority of funding under that title)

Mr. DOMENICI. Mr. President, I send to the desk an unprinted amendment on behalf of myself, Senator BELLMON, and Senator TOWER, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI), for himself, Mr. BELLMON, and Mr. TOWER, proposes an unprinted amendment numbered 1717.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 279, line 6, beginning with the comma, strike out through "title" on line 16.

Mr. DOMENICI. Mr. President, this unprinted amendment clarifies district eligibility under the Emergency School Aid Act.

Fourteen poor school districts have gone through much turmoil as the result of mid-stream changes in ESAA eligibility requirements by the Department of Education.

Since 1972, it was Office of Education policy to provide funds under the Emergency School Aid Act to all eligible school districts including those which are unable, due to geographic location, to carry out a desegregation plan as mandated by the act.

In January 1977 the Office of Education issued a new interpretation of the Emergency School Aid Act which removed all Comprehensive Education Planned districts from consideration for funding.

Several States, including my own, parts of Oklahoma, parts of Texas, and part of California, were adversely affected by this reinterpretation of the ESAA law.

In March of this year a number of my colleagues joined with me in petitioning the Office of Education to protest this interpretation and request that these 14 very poor and isolated school districts be "held harmless."

The new interpretation amounted to a reversal in midstream of the longstanding Office of Education policy. Therefore, our "hold harmless" was granted.

However, the problem has not yet been resolved. The "hold harmless" is nothing more than a 1-year extension.

I am proposing clarifying language so that these 14 isolated and poor school districts will continue to receive the same ESAA assistance to which they were entitled in previous years.

I am reminded that the distinguished Senator from Oklahoma (Mr. BELLMON) is a cosponsor and he wanted to be on the floor.

I ask unanimous consent that a statement which he has be printed immediately following my remarks on this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. BELLMON. Mr. President, Senator DOMENICI's idea of an optional grant program for education represents a sound and positive approach to a very difficult problem. I am pleased to have been one of the original cosponsors of this legislation, which has received so much favorable comment.

The logic of consolidation is compelling. It provides a vehicle for the simplification and decentralization of administration of Federal programs. The bureaucratic burden under which educational programs usually suffer is thereby lessened. State and local educational agencies, rather than remote regional or Washington bureaucracies, are responsible for the basic decisions and program actions with which they must live. Instead of having a multitude of categorical programs, each with its own funding and administrative peculiarities, programs may be grouped logically for administrative ease.

Currently, the mass media are examining the bases for the failure of public education in many situations. It seems worthwhile to point out that we have increasingly given to school administrators, school boards, and teachers specific responsibilities for correcting social ills which cumulatively may exceed the capacity of the institution to deal with. One consequence is that compliance with the many, often overlapping and duplicative, requirements imposed by the Federal Government have crowded out some of the most essential functions of education. It is no wonder that school officials complain they can do little else but satisfy Federal requirements. A step in the direction of redressing this imbalance can be made through the amendment Senator DOMENICI is offering today.

Consolidation represents a potential turning point in the funding of Federal programs in education. For more than two decades, Federal Government initiatives created many programs of educational aid to the States and local education agencies until we now have more than 100 separately authorized program activities in the Office of Education.

Today, there is Federal Government support for about 7 percent of the total cost of elementary and secondary education. Most of that support flows through many narrow categorical programs. It is distributed through the States to local education agencies using formulas that contain such factors as school age population and income level of students' families. As responses to national problems, these remedies have grown into a web of administrative regulations and paperwork, causing school systems to devote more time and manpower to meeting Federal requirements and completing necessary paperwork. School administration has become more a matter of satisfying rigid requirements and shouldering administrative burdens than a creative process for insuring quality education to meet local needs and objectives.

Those who may be concerned that the consolidation approach will serve to reduce the Federal commitment to education need not worry. No State which exercises this option will lose money. Nor should there be any concern that consolidation will be used as an excuse to avoid responsibility for the special educational needs of particular groups, such as the disadvantaged and the handicapped. Special "hold harmless" and maintenance of effort requirements will insure that these obligations will continue to be met. Local educational agencies will be protected by provisions for flow-through of money. It will not be necessary for States to enact special legislation in order to exercise this option.

This approach seeks to group programs into clusters which are logically related in order to create several blocks. Flexibility within each category will allow States and localities to fashion educational programs more nearly in accord with needs than is now possible under categorical programing.

Consolidation will undoubtedly create anxieties among supporters of specific categorical grant programs. If a program is a legitimate priority within a State, it will undoubtedly continue to receive funding commitment under the consolidated approach. The proliferation of small categorical programs has caused local education agencies to expend, in

some cases, more time and effort applying for funds than the funds were worth. Consolidating the programs into a single competitive process at the State level will significantly reduce the cost in manhours.

An important feature of this new legislation will be the requirement of a participatory planning process within each State which chooses to receive its Federal funds in the consolidation grant. The views of interested citizens, constituent groups, local education agencies, units of local government and appropriate State agencies and organizations will be solicited in the process of developing a comprehensive State plan for the expenditure of this Federal money. The resulting proposed comprehensive State plan will have to be made available to all interested parties, and public comment on the plan accepted. The same publishing and comment requirements will apply to regulations issued by the States. These are powerful remedies for the often unthinking and unresponsive actions of distant bureaucracies.

Mr. President, I strongly support the Domenici amendment which would open up, on a limited basis, the educational system to new experimentation which can only have the refreshing effect of revitalizing the educational process. I hope this amendment will be accepted as a part of the elementary and secondary education bill.●

Mr. DOMENICI. It is my understanding that the managers of the bill have had an opportunity to review this and have some questions, but that they are leaning in the direction of accepting it. I do not know exactly where we are. Could we hear from them?

Mr. PELL. We have had a chance to look at it. We are not leaning in any direction; we are not leaning toward it or away from it—maybe a little more away from it because what it really does is to change the purpose of the basic bill, which is for integration in the community. These youngsters are in a totally geographically isolated area. They are isolated because of the geography, where they are, not because of the mores or customs of the community.

It is a unique situation I realize, I say to the Senator from New Mexico. I am not sure that this is the exact vehicle on which to put what is really a special purpose, special interest. There is nothing wrong with it at all, but it is of special interest to New Mexico, almost unique among the other States.

I am wondering if this is the right bill on which to append this legislation.

Mr. DOMENICI. I might say to my good friend that this is a very small fraction of the school districts. My understanding is we are talking about somewhere in the neighborhood of $1 million out of several hundred millions. There is no other way to solve the problem. The definition for all those years coming out of the regional office caused the entitlement, and the reliance. The districts are large in size, but small in number. The isolation makes it impossible for them to meet the new definition.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. DOMENICI. I would be delighted to yield.

Mr. JAVITS. The department is definitely opposed to this amendment, and I am inclined to agree with them. For one, although the Senator says there are few districts compared with all the districts in the United States, which run into the thousands, HEW estimates that 500 additional school districts would qualify under this particular amendment, and they feel that the cost for these additional districts could exceed the whole ESAA budget for 1979, to wit, $290 million.

Hence, if we accept the amendment we are wiping out the program in terms of what we allowed for it under this bill.

I am sympathetic to the problems but, after all, if those districts have disadvantaged children then they would qualify under ESEA title I. I certainly would be perfectly willing to be sure they qualified under that. If they have bilingual problems, they come under the bilingual education. But to throw them in under emergency school aid, which is intended to deal with unconstitutional segregation, I must say I cannot see how we can stretch that, especially in view of the estimates of the Department that it would take up everything you have got under the ESEA program. I have got to go by the estimate of the Department, so I cannot accept the amendment.

Mr. DOMENICI. I do not understand the Department's figure, and I would like to discuss that with the floor managers. It is our understanding that this interpretation has been costing slightly over $1 million in one part of the country.

Mr. JAVITS. Well, Mr. President, I am going to suggest the absence of a quorum. The Department is available. We can discuss it with them and get to the bottom of that or any other question.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, I ask unanimous consent that we proceed to the amendment of Senator McGOVERN, and that we temporarily lay aside the amendment of the Senator from New Mexico, and when action is completed on Mr. McGOVERN's amendment that we revert to the amendment of the Senator from New Mexico.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Reserving the right to object, we will revert back to the pending amendment of the Senator from New Mexico?

The PRESIDING OFFICER. That was part of the unanimous-consent request.

Without objection, it is so ordered.

UP AMENDMENT NO. 1718

(Purpose: To establish a National Commission on the International Year of the Child)

Mr. McGOVERN. Mr. President, I send an amendment to the desk on behalf of myself, Senator CRANSTON, Senator CULVER, and Senator MATHIAS, and ask that it be reported.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. McGOVERN), for himself and others, proposes an unprinted amendment numbered 1718. On page 21—

Mr. McGOVERN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, the table of contents is amended by adding at the end thereof the following new material:

"TITLE V—INTERNATIONAL YEAR OF THE CHILD

"Sec. 501. Declaration of purpose of the International Year of the Child.
"Sec. 502. Establishment of a National Commission.
"Sec. 503. Functions of Commission.
"Sec. 504. Coordination and administration.
"Sec. 505. Waivers of certain other provisions of law.
"Sec. 506. Termination date.
"Sec. 507. Authorization of appropriations.".

At the end of the bill add the following new title:

"TITLE V—INTERNATIONAL YEAR OF THE CHILD

"DECLARATION OF PURPOSE OF THE INTERNATIONAL YEAR OF THE CHILD

"SEC. 501. The United Nations General Assembly, by a resolution approved at its thirty-first session, has designated the year 1979 as the International Year of the Child. This action was designed to focus national and international attention on various aspects of the needs of children and to encourage all nations, individually and in cooperation, to take appropriate and relevant actions to meet them. The General Assembly called upon member states and international organizations to participate fully in the International Year of the Child and to devote the year 1979 to efforts at the international, national and community levels to provide lasting improvements in the well being of children.

"ESTABLISHMENT OF A NATIONAL COMMISSION

"SEC. 502. (a) The President shall establish a National Commission on the International Year of the Child (hereinafter in this Act referred to as the "Commission"), and to appoint to the Commission not more than 25 members chosen from among citizens in private life.

"(b) The President shall designate a Chairperson and two Vice Chairpersons from among the members.

"(c) The President of the Senate and the Speaker of the House of Representatives may each designate two members of the Senate and the House of Representatives, respectively, to serve on the Commission, in addition to the members to be appointed by the President.

"FUNCTIONS OF THE COMMISSION

"SEC. 503. (a) The commission shall promote: (i) effective and significant observance in the United States of 1979 as the International Year of the Child (hereinafter in this Act referred to as the "Year"), with particular reference to the goals stated in Section 2; (ii) cooperation by the United States with UNICEF and other international organizations and with other nations to achieve

the objectives of the Year. To these ends, the Commission shall seek to stimulate within the United States a better understanding of, and actions to meet, the needs of children both in this and in other countries. Such needs would include, but not be limited to the social, health, educational, and developmental needs of children, as well as concern for the general condition and rights of children.

"(b) The commission shall keep informed of activities undertaken or planned by various organizations and groups in the United States and abroad in observance of the Year and shall consult with such groups and stimulate such activities and programs through community, civic, local, State, regional, national, Federal, international, private and professional organizations.

"(c) The Commission may conduct studies, inquiries, and hearings and hold meetings as it deems necessary. It may assemble and disseminate information, and issue reports and other publications. It may also coordinate, sponsor, perform, or oversee projects, studies, events, and other activities that it deems necessary or desirable for the observance of the Year.

"(d) The Commission shall make recommendations to the President on national policies in furtherance of the goals of the Year; and shall make a final report to the President on its work and recommendations, not later than March 31, 1980.

"COORDINATION AND ADMINISTRATION

"SEC. 504. (a) The commission is authorized to establish such subcommittees, the membership of which may include persons not members of the Commission, as it deems necessary to carry out the purpose of this Act.

"(b) Each agency of the executive branch of the Government is authorized: (1) to furnish to the Commission, upon request of the Chairperson of the Commission, such information, advice, and services, and funds as may be useful to the Commission for the fulfillment of its functions under this Act, and (2) to detail personnel to the Commission.

"(c) Each member of the Commission or any of its subcommittees, who is not a member of Congress may, while serving on business of the Commission, be compensated at a rate not to exceed the daily equivalent of GS–15 for each day they are engaged in the actual performance of duties.

"(d) The Commission may appoint such staff personnel as it considers necessary to carry out its duties under this Act without regard to the provisions of Title 5, United States Code, governing appointment in the competitive civil service, and without regard to Chapter 51 of and Subchapter III of Chapter 53 of such Title relating to classification and General Schedule pay rates, except that not more than two individuals so appointed may receive pay in excess of the annual rate of basic pay in effect for grade GS–15 of the General Schedule. Appointments shall be made without regard to political affiliation.

"(e) The Commission is authorized to accept and use services of voluntary and uncompensated personnel. Such personnel shall not be considered Federal employees for any purpose other than for purposes of Chapter 81 of Title 4, United States Code (relating to compensation for injury), and Sections 2671 through 2680 of Title 28, United States Code (relating to tort claims), and shall not perform the work of Federal employees.

"(f) Members or staff of the Commission or of a subcommittee thereof, shall be allowed travel expenses while attending meetings of the Commission or its subcommittees or otherwise engaged in the business of the Commission away from their homes or regular places of business, including per diem in lieu of subsistence, as authorized under Section 5703 of Title 5, United States Code, for persons in Government service employed intermittently.

"(g) The Commission is authorized to procure such temporary and intermittent services of experts and consultants as are necessary to the extent authorized by Section 3109 of Title 5, United States Code.

"(h) The Commission is authorized to accept, use, and dispose of contributions of money or property.

"(i) The Commission is authorized to enter into contracts with Federal and State agencies, private firms, institutions, and individuals for the conduct of research or surveys, the preparation of reports, and other activities necessary to the discharge of its duties.

"(j) The Commission may use the United States mails under the same conditions as other departments and agencies of the United States.

"(k) The powers granted the Commission by this Act shall be in addition to those granted by Executive Order 12053. The powers granted the Commission by Executive Order 12053 may be employed to fulfill the responsibilities of the Commission under this Act.

"(1) The Powers granted the Commission under this Act may be delegated to any member or employee of the Commission by the Commission chairperson.

"(m) Financial and administrative support services (including those related to budget and accounting, financial reporting, personnel, and procurement) shall be provided to the Commission by the General Services Administration, for which payment shall be made in advance, or by reimbursement, from funds of the Commission, in such amounts as may be agreed upon by the Chairperson of the Commission and the Administrator of the General Services Administration.

"WAIVERS OF CERTAIN OTHER PROVISIONS OF LAW

"SEC. 505. In order to expedite matters pertaining to the planning for, and work of, the Commission, the Commission is authorized to make purchases and contracts without regard to Section 252 of Title 41 of the United States Code, pertaining to advertising and competitive bidding, and may arrange for the printing of any material pertaining to the work of the Commission without regard to the Government Printing and Binding Regulations and any related laws or regulations.

"TERMINATION DATE

"SEC. 506. The Commission shall continue in existence until thirty days after submission of its final report to the President pursuant to Section 4(d), at which time it shall terminate, but the life of the Commission shall in no case extend beyond April 30, 1980.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 507. There are authorized to be appropriated, without fiscal year limitation such sums as may be necessary to carry out the provisions of this Act. Such sums shall remain available for obligation until expended.

No funds authorized hereunder may be used for lobbying activities."

Mr. McGOVERN. Mr. President, I have discussed this amendment with the distinguished manager of the bill and with Senator JAVITS, the ranking Member on the minority side. It is simply an authorization to permit the United States to participate as a full partner, along with more than 140 other countries, in the International Year of the Child.

UNICEF, which is charged with focusing the issues of health, education, hunger, drug abuse, child abuse, on children in particular, has wisely, in my opinion decided not to spend a great deal of money and time on a huge international conference for children's issues.

Instead, they have decided to focus on national and local efforts, encouraging each country to organize itself in the way most likely to contribute to one final effort.

The United States should continue its role as a pioneer in concern for children. If we can authorize this Commission today, very important measures will be taken that have never been taken before.

For example, we can, with the help of the over 200 national organizations which have joined in the effort, compile the first inventory of Federal and State programs on child neglect and abuse. We can coordinate our many separate efforts to educate children and parents on the evils of drug abuse. We can work with schools in all our communities to acquaint them with the programs available to help children.

Mr. President, a great deal of good can come from this effort. Our children deserve our best attentions, and this Commission will help focus that attention.

Under date of August 8, Mr. President, I received a letter from Miss Margaret Mead, the distinguished social scientist, strongly urging Congress to authorize the participation of the United States in the International Year of the Child, and to authorize the creation of a commission to make our part meaningful. I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NEW YORK, N.Y.,
August 8, 1978.

HON. GEORGE MCGOVERN,
Chairman, Subcommittee on International Operations, Senate Foreign Relations Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR GEORGE: This is to reinforce the importance of passing an authorization bill immediately so that the United States can begin to participate appropriately in the International Year of the Child. The Year of the Child is a culmination of the series of United Nations Conferences on substantive matters, which began with the Stockholm Conference on the Environment and was continued with the Bucharest Conference on Population, the Rome Conference on Food and Hunger, the Vancouver Conference on Habitat and Human Settlements, the recent Conference in Argentina on pure water, and the series of Conferences of the Law of the Seas.

Each of these conferences have suffered from restrictions on their scope. The Conference on the Year of the Child is designed to focus all of these issues on our children and those unconceived who will be born in the future. The United States has stood before the world as a pioneer in concern for children. The long series of White House Conferences on Children have pioneered in national, state and local concern for children. It is appropriate that the United States should play a major role in focusing the first International Year of the Child.

The UN agency that has been charged with particular responsibility is UNICEF, and it has appropriately refused to spend a large amount of money on a large international conference, so the focus will be more on national and local organizations. It is important to realize that many Americans do not distinguish between UNICEF and UNESCO. The hostilities engendered by UNESCO's treatment of Israel have slopped over into opposition to UNICEF's sponsorship of the International Year of the Child.

We are very late in getting started, but Mrs. Young has assembled a distinguished National Commission which held its inaugural meeting in the Rose Garden on June 28, and a second meeting on August 3–5. It can do nothing further until the Authorization bill is passed. Please exercise your well known concern for the well-being of the world's

children by expediting the passage of S. 3161 at once so that the United States can start to play a role in this world wide endeavor.

Sincerely yours,

MARGARET MEAD.

● Mr. CULVER. Mr. President, I join with the Senator from South Dakota (Mr. McGOVERN) in support of this amendment to S. 1753, the Elementary and Secondary Education Act Amendments of 1978, authorizing funds for the National Commission for the U.S. observance of the International Year of the Child, 1979. As chairman of the Judiciary Subcommittee on Juvenile Delinquency, I firmly believe this is an important amendment which should be adopted by the Senate.

I am privileged to have been named, along with my distinguished colleague from Maryland (Mr. MATHIAS), by the President to represent the U.S. Senate on the National Commission, which was created by Executive order on April 14, 1978. The purpose of the Commission is to promote, support, and evaluate Federal, State, local, and civic programs designed to enhance the education, health, nutrition, and welfare opportunities for children during the 1979 International Year of the Child. The National Commission will complete its work and go out of existence by April 1980.

Mr. President, we have all heard of the deplorable conditions under which a great many of our children are born. There are presently 1.5 billion young people under the age of 15 in the world. An estimated 300 million do not have enough to eat, and two-thirds of them suffer from a severe form of nutritional deficiency. Fully 15 million children under the age of 5 die each year. Those who survive face lives with little educational or employment opportunities and little prospect of existence above the subsistence level.

Conditions for some children are only marginally better in many industrialized nations. In the United States, for instance, it is estimated that 20 million children do not receive adequate health care, including primary care, complete immunization, and early treatment of mental illness. There are 8 million handicapped children, 45 percent of whom receive no services. Over 200,000 suffer from physical abuse. Between 250,000 and 300,000 children are in public and private residential institutions for special care as predelinquent, physically handicapped, dependent, neglected, or mentally ill individuals. These startling statistics demonstrate that in the area of child health, welfare, and justice we in this country have a long way to go.

I believe it is critical that the United States participate in the 1979 International Year of the Child. This vital program does not involve an expensive national or international conference. Rather, the year is to be one of action in each of the 144 participating nations. Already in the United States 180 private and public organizations have pledged to work with the National Commission in the development of effective programs for children. Nine Federal agencies have submitted 99 International Year of the Child projects, and more are planned.

The continuation of this work depends, however, on the congressional endorsement of full U.S. participation in the International Year of the Child through the enactment of this amendment. The Commission has been able to begin its work by using staff support and grants from several Federal agencies. However, under the provisions of current law a Federal commission cannot exist without congressional authorization for more than 1 year, nor, of course, can its work have a meaningful impact on policy without the support of the U.S. Congress.

Mr. President, the 1979 International Year of the Child marks the 20th anniversary of the United Nations Declaration on the Rights of the Child. We should recognize the fundamental importance in both developing and industrialized countries of programs benefiting children, not only for the well-being of the child but also as a part of broader efforts to accelerate economic and social progress.

The most valuable resource of the United States, as well as of other countries, is its youth. It is our obligation, therefore, to assure that children live in environments which will enable them to grow to their fullest potential. The U.S. participation in the Year of the Child would demonstrate our own commitment to effectively meeting the needs of our children.

Mr. President, I commend the dedicated efforts of the Senators from South Dakota (Mr. McGOVERN) and Maryland (Mr. MATHIAS) to authorize the National Commission, and I strongly urge the Senate to adopt this important amendment.●

Mr. PELL. Mr. President, I have had an opportunity to go over this amendment. I think it is an excellent one. It may not be a "motherhood" amendment, but it is a "childhood" amendment, and I recommend that the Senate accept it.

Mr. JAVITS. Mr. President, the ESEA bill has already passed the House, and this amendment is not in the House language. I am sympathetic to the amendment entirely, and have no objection to its adoption, but I wish to make it crystal clear that it will be in conference, and that the authors of the amendment must realize that while we will certainly contend for it—I believe in it myself—we will be taking our chances with the House when we seek to attach it to this bill. I have no objection to it, with that understanding.

Mr. McGOVERN. Mr. President, I appreciate the Senator's caution, but I know how persuasive he is with House conferees. so I am very hopeful he and Senator PELL will prevail. This is a matter that has strong support in the other body as well as here in the Senate.

Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment UP amendment No. 1718.

The amendment was agreed to.

Mr. McGOVERN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1717

The PRESIDING OFFICER. Under the previous order, the Senate now reverts to the consideration of the amendment (UP No. 1717) offered by the Senator from New Mexico.

Mr. DOMENICI. Mr. President, does the Senator from Maine wish me yield to him? I have an amendment pending.

Mr. MUSKIE. Well, I would say to my good friend from New Mexico that since many of the issues in this bill have a budgetary impact, I do want to make an opening statement from the point of view of the Budget Committee early on, and I would like to do that as early as I can. May I inquire of the Senator as to how much longer he will take?

Mr. DOMENICI. I will say to my good friend from Maine that it will not take me over 5 minutes on this amendment. I have others, but on those I will defer to Senator MUSKIE and Senator HART, who has been waiting to offer an amendment.

Mr. HART. Mr. President, will the Senator yield?

Mr. DOMENICI. Yes.

Mr. HART. The amendment I am going to propose does not have budgetary impact. We have discussed it with the committee, and I believe that it will be acceptable. It will take only 2 or 3 minutes.

Mr. MUSKIE. If we can have the understanding that I can be recognized after the present amendment and Senator HART's amendment, I am under no compulsion as to time, and I am certainly willing to yield at this point for the disposition of those amendments.

Mr. BIDEN. Mr. President, may I make an inquiry of the Senator from New Mexico?

Mr. DOMENICI. I yield.

Mr. BIDEN. Assuming we move along the route just suggested, that the Senator from Colorado and the Senator from Maine speak to their issues, and we then go back to the amendments of the Senator from New Mexico, about how long does the Senator from New Mexico anticipate the remainder of his amendments would take? Does he have any idea?

Mr. DOMENICI. No more than 15 minutes, and probably less.

Mr. BIDEN. Fine. I would hope that at the end of that time, Senator ROTH and I would be able to be recognized to offer our amendment.

Mr. JAVITS. Mr. President, will the Senator yield to me on his amendment with Mr. ROTH.

Mr. BIDEN. Yes.

Mr. JAVITS. That will take considerable debate. I would not wish the Senator to assume that that would be dealt with quickly; I will have considerable to say about it, and I hope others do also.

Mr. BIDEN. I would hope so.

Mr. DOMENICI. Then, Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Do I, then, correctly understand that we will proceed with mine, then I will yield 5 minutes to Senator HART for his amendment, and then

Senator MUSKIE will have the floor, after which the floor will revert to me?

Mr. BIDEN. And at that point, so we may have no misunderstanding, I would be recognized to offer my amendments?

The PRESIDING OFFICER. The Chair will state that it is the Chair's perception that a formal unanimous-consent request has not been propounded to the Chair, and at this point there is no agreement on the sequence. The Chair is prepared to entertain such a request if submitted. At the moment, the Senator from New Mexico, under the previous unanimous-consent agreement, has been recognized to deal with his amendment which is pending at the desk.

Mr. BIDEN. Mr. President, I propound that unanimous consent request: That the Senator from Colorado, then the Senator from Maine, then the Senator from New Mexico, and then the Senator from Delaware be recognized in that order.

Mr. HOLLINGS. Then, Mr. President, after the two Senators from Delaware, the Senator from South Carolina on his amendment to strike out title XII.

Mr. JAVITS. Mr. President, reserving the right to object, and I hope I shall not have to object, this bill will only be before us until 2:00, it is my understanding from the leadership.

Mr. HOLLINGS. We will just have to take our chances under the time agreement.

Mr. JAVITS. I wanted to notify my colleagues to that effect. Other Senators may have other time exigencies. Therefore, I believe I would have to object unless the unanimous consent request were modified so that it applies only to the consideration of this bill today—in other words, that it will not carry over tomorrow.

Mr. HOLLINGS. That would be satisfactory.

Mr. BIDEN. That would suit me, also. I have no objection.

Mr. JAVITS. If it is limited to the consideration of the bill today, I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Delaware? The Chair hears none, and it is so ordered.

Mr. DOMENICI. Mr. President, I send to the desk an unprinted amendment and ask——

The PRESIDING OFFICER. The Senator has an amendment pending at the desk.

Mr. DOMENICI. This is a modification.

The PRESIDING OFFICER. If the Senator wishes to modify the pending amendment, the Senator has the right to do so. The amendment will be so modified.

The amendment, as modified, is as follows:

At the appropriate place in the bill insert the following:

There is hereby authorized to be appropriated $1,200,000 for assistance to local educational agencies which are racially isolated as a result of geographic location of the school district of such agency, and which have adopted and are implementing, or will adopt and implement, a plan to aid schoolchildren in overcoming the educational disadvantage of minority group isolation,".

Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment (UP amendment No. 1718).

The amendment was agreed to.

Mr. DOMENICI. Mr. President, I will say quickly that I am appreciative of the suggestions of the floor managers. What we have done is create a free-standing amendment authorizing funding of up to $1.2 million for these isolated school districts using their isolation characteristics as the qualifier for them.

I understand that these changes will make my amendment acceptable to the managers. I am most appreciative of their assistance.

Mr. JAVITS. Mr. President, on the theory that this is another disadvantaged group of children——

Mr. DOMENICI. That is correct.

Mr. JAVITS (continuing). And as a free-standing amendment with a limited authorization, with its being attached to the emergency school idea, I have no objection to the amendment.

Mr. PELL. I agree with my colleague from New York. As I mentioned earlier in my remarks, I did not think that the point where it was originally proposed was the right section of the bill. I think it is attached to the right section now. It pertains to children who will remain isolated, no matter what we do, because of geography. For that reason, I have no objection to this amendment.

Mr. DOMENICI. I thank the Senators. I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, of the Senator from New Mexico.

The amendment, as modified, was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JAVITS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Chair recognizes the Senator from Colorado for the purpose of calling up an amendment.

UP AMENDMENT NO. 1719

(Purpose: To strengthen the provisions relating to applications for bilingual education programs)

Mr. HART. I send two amendments to the desk and ask for their immediate consideration, and ask that it be in order to consider them en bloc.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request that the amendments be considered en bloc?

Mr. JAVITS. I object temporarily.

The PRESIDING OFFICER. The clerk will state the amendments.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. HART) proposes an unprinted amendment numbered 1719.

On page 276, strike out lines 17 and 18, and insert in lieu thereof the following:

"(2) be accompanied by documentation of such consultation and by the comments which the Council makes on the application; and

On page 282, line 8, before the period the first time it appears insert a comma and the following: "including objectives of section 703(a)(4)(E)(iii) and section 703(a)(4)(F)".

The PRESIDING OFFICER. Does the Senator renew his unanimous-consent request?

Mr. HART. Yes, Mr. President, I do.

The PRESIDING OFFICER. Is there objection?

Hearing no objection, the request is granted and the amendments will be considered en bloc. The Chair recognizes the Senator from Colorado.

Mr. HART. Mr. President, this amendment deals with the issue of bilingual education in connection with the series of amendments being offered by the Senator from New Mexico, most of which I cosponsor. Specifically, the amendment at the desk and under consideration now relates to the issue of parental involvement in the bilingual education process.

Mr. President, because of my own personal, longstanding interest in title VII of the Elementary and Secondary Education Act, I have followed the committee's activities and the evolution of this act and its implementation fairly closely. I am personally pleased to see that the proposed changes in title VII offered by the committee take a definite step forward in providing quality and equality of education for all children.

The amendment at the desk is designed to strengthen the language already proposed by the committee, and thereby insure that the intent of the legislative changes in the act are properly observed. Specifically, this amendment would strength the committee language relating to consultation with parental groups by requiring that a project application and annual refunding request be accompanied by some documentation that that kind of consultation with the parental organizations and groups has in fact taken place.

The amendment also contains a provision which will improve student performance by giving parents the opportunity to learn of their child's or children's progress or their lack thereof under this title. The amendment does not require any substantial increase in reporting, which would place an added burden on already-cramped staff, time, and resources.

This is a very important item, Mr. President, because I know of the committee's concern and the distinguished floor manager's concern about additional paperwork.

If there is anything about which we are all aware these days, it is that we do not want to add to the burden of people administering Federal programs forms and reports that already are mounting up almost to an unacceptable degree.

The changes I am proposing are designed to open avenues for parental involvement in areas such as program planning, priority setting, proposal development and submission, program implementation, personnel decisions, curriculum development and overall program design, implementation and

evaluation, and school and community relations.

Title VII of the Elementary and Secondary Education Act has required parent participation from the outset. However, experience in the area indicates that so-called parent involvement, in reality, is often an empty exercise. Parents are often informed of decisions after they have been made, or are not given sufficient information to permit their effective particpation. S. 1753 deals with this shortcoming by requiring local education agencies to consult with parent advisory committees during the preparation of grant applications and during actual project implementation.

It has been over a decade now since Congress recognized the importance of meeting the needs of linguistically different children through title VII. And, during this decade, personnel responsible for the schooling of linguistic minority children have been faced with increasingly complex demands and specifications for quality program design, and at times have heard strong criticism about the program's success. We must recognize the achievements that have already been made in title VII, and continue to work toward an even better program,

For years, educators and social scientists alike have stated that one of the greatest obstacles in the education of linguistic minority children is the lack of parental involvement in the educational process. The local school is the most significant place for the participatory process. Participation should devolve increased responsibility to the citizenry and should increase the quality of services. To have these results, the process must begin—but not end—with parents of children being served.

It is in that spirit, Mr. President, that I offer this amendment. I think it is in keeping with the purpose of the proposals of the committee. It merely makes more explicit the degree to which the parents are to be involved. It would not, as I have already indicated, increase paperwork burdens on those conducting these programs.

Mr. PELL. Mr. President, the objective is obviously good, to increase parental involvement. My question is, what is meant by documentation?

Mr. HART. What I mean is something greater than a mere listing of dates on which parents or parent groups were consulted. However, I do not mean that additional reports, or additional forms be filled out. I think a reasonable standard of documentation in the program application is one that shows that parent advisory groups have actually participated at every step of the preparation of those programs.

Mr. PELL. As the Senator knows, one of the objectives of this bill is to reduce the amount of paperwork which the school administrators and teachers have to fill out each year. The estimate of the President's Commission on Paperwork is $100 million a year that we are now spending on paperwork, et cetera. In this connection, would a new government form need to be printed?

Mr. HART. It is certainly not the intention of the proponent of this amendment to add any forms or additional reports but merely to incorporate in the reports and the proposals already being filed a strong indication, that parental groups have been involved in the process of filling out and developing those proposals.

Mr. PELL. There could be one further box for a checkoff in a form that already exists?

Mr. HART. That would certainly be one way to approach it. I have no specific solution, but I want it clear in the record that what is contemplated here is not additional forms or reports.

Mr. PELL. I thank the Senator.

Mr. JAVITS. Mr. President, I have no objection to taking this amendment, provided that the argument made, that it will involve no material additional paperwork, stands up in conference. We do not know what the Department or the other body may produce on that score. I think the idea of Senator HART is a very good one and I am glad to go with it, but I must take it with that understanding, subject to that reservation.

Mr. HART. I appreciate the position of the minority floor manager. I hope the record made today through the repeated assurances of the sponsors of this amendment will make it clear that we are in no way suggesting increased paperwork. It is my hope that the Department of Health, Education, and Welfare and those writing regulations and implementing this language will be clear on intent of Congress. Ways can be devised in the manner that have been suggested by the Senator from Rhode Island to incorporate this requirement without expanding the paperwork burden.

Mr. JAVITS. I can assure the Senator that, that being part of the Senate bill, I shall make every effort in that regard.

Mr. HART. I thank the Senator from New York.

Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendments, considered en bloc, offered by the Senator from Colorado.

The amendments were agreed to en bloc.

Mr. HART. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

The PRESIDING OFFICER. Under the previous order, the Chair recognizes the Senator from Maine.

Mr. HATCH. Will the Senator from Maine yield for a unanimous-consent request?

Mr. MUSKIE. I am happy to yield.

Mr. HATCH. Mr. President, I ask unanimous consent that the amendments I shall call up be put on the list immediately following Mr. HOLLINGS, who is the last in the order.

Mr. JAVITS. Mr. President, I did not hear the request.

Mr. HATCH. I am asking unanimous consent that my amendment be called up immediately after the last one on the list, so people will be put on notice.

Mr. JAVITS. Mr. President, again, I am compelled to object, unless that is confined to today. In other words, no unanimous consent on the order of recognition goes over after the consideration of this bill today.

Mr. HATCH. That is fine with me. I do not care. That can be part of the unanimous-consent request, that I follow immediately after Senator HOLLINGS.

Mr. JAVITS. If the Hollings amendment is not disposed of, the Senator will not be recognized and there will be no unanimous consent.

Mr. HATCH. No, wait, I expect my amendment to be called up, whether it is today or later. I just want to get on the list and be in order so I know about when my amendment is going to be called up.

Mr. JAVITS. But the order which the unanimous-consent agreement covers will cover only the consideration of the bill today.

Mr. HATCH. That is right.

Mr. JAVITS. The Senator, as I understand it, has several amendments. Could we have an idea as to what he intends to call up?

Mr. HATCH. I intend to call up three amendments at this time. I may not call up all three, but the most I shall probably call up are three amendments and one substitute. And if it is possible to have it on the order today, I shall try to call it up immediately today. If not, then I shall want to follow Senator HOLLINGS tomorrow or whenever——

Mr. JAVITS. No, that I will not agree to. I will not agree to follow anybody tomorrow. It is only effective today.

Mr. HATCH. All right, but I want to be able to call up my amendments whenever, today or after Senator HOLLINGS.

Mr. HOLLINGS. After my amendments?

Mr. HATCH. After the Senator's amendments.

Mr. HOLLINGS. After my amendment is disposed of?

Mr. HATCH. Correct.

The PRESIDING OFFICER. The unanimous-consent request, as the Chair now understands it, extends only to the sequence of recognition for the purpose either of debate, which is the case with the Senator from Maine, or of offering an amendment today.

Mr. JAVITS. That is during the consideration of the bill.

The PRESIDING OFFICER. During the consideration of the bill today, and it does not apply beyond the consideration of the bill on today.

Mr. HATCH. And my unanimous-consent request agrees with that.

The PRESIDING OFFICER. Is the request for an amendment of the Senator from Utah?

Mr. HATCH. I would like to be in sequence following Senator HOLLINGS as of today on any and all amendments and substitute that I have. If it does not come up today, then we shall work on it tomorrow.

Mr. PELL. Mr. President, reserving the right to object, I make the observation

that I think this is a good idea and I hope we can work through these this evening, if necessary, as late as might be required.

The PRESIDING OFFICER. Is there objection? Without objection, the unanimous-consent request is agreed to.

The Chair, under the previous order, has recognized the Senator from Maine for purposes of debate.

Mr. HATCH. I thank the distinguished Senator from Maine for yielding.

THE EDUCATION AMENDMENTS OF 1978

Mr. MUSKIE. Mr. President, the bill before us would modify and extend programs which represent the cornerstone of Federal aid to our Nation's elementary and secondary schools. It presumes, as did the first U.S. Commissioner of Education, that "education prevents being poor."

True to that principle, the Elementary and Secondary Education Act was originally enacted as flagship legislation at the inception of the Nation's war on poverty. Since the administration of Lyndon Johnson, the primary role of these Federal programs has been to improve the educational opportunities and achievements of the disadvantaged, the handicapped, those with limited English-language skills, Native Americans and other minorities.

Federal education resources are not only well matched to those in greatest need but they appear to have a positive impact as well. The Budget Committee has consistently supported the compensatory purposes characteristic of this Federal education policy.

S. 1753 would authorize $11 billion in fiscal year 1979 and would have a cumulative 5-year cost of $55.1 billion. If the authorized levels were fully appropriated, the cost of this bill would exceed the targets adopted by Congress in the first budget resolution and the ceilings as reported in the second resolution for the elementary and secondary education mission for function 500—education, training, employment and social services.

I know that the Labor-HEW Subcommittee of the Appropriations Committee fully intends to stay within its allocation under the first budget resolution. Certainly, the work of that subcommittee to date, under the able leadership of its chairman (Mr. MAGNUSON) is consistent with that allocation.

However, provisions in the bill before us would make it very difficult for the subcommittee to stay within its allocation. I am referring specifically to provisions which would provide unjustified expansion in the impact aid program.

These provisions, when coupled with the so-called tier system of funding for impact aid, would severely limit the discretion of the Congress to determine appropriate funding levels for this program.

The impact aid program was originally designed to provide Federal payments in lieu of taxes in jurisdictions which were highly impacted by the Federal presence. However, this bill would provide an expansion of this program which has no relation to the Federal burdens on local tax bases.

There have been consistent attempts to amend this legislation in the prior two administrations. The current administration proposed reforms that would result in savings of $76 million in fiscal 1979 and a cumulative savings of $1.1 billion through fiscal year 1983.

During full committee consideration of this bill, Senator BELLMON and I sent a letter to members of the Human Resources Committee urging that they adopt as many of the administration's reforms as possible.

Mr. President, I ask unanimous consent that a copy of that letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., August 7, 1978.

Hon. HARRISON A. WILLIAMS, Jr.,
Hon. JACOB K. JAVITS,
U.S. Senate, Washington, D.C.

DEAR SENATOR WILLIAMS AND SENATOR JAVITS: We are writing to express our concern over several of the provisions contained in legislation reported by the Human Resources Committee for consideration this summer. Our concern centers around the proliferation of new and continued funding requirements which impinge upon the responsibilities of both the Appropriations and Budget Committees.

While we do not disagree with the policies implicit in each and every proposed funding requirement, there are many which directly impact upon the appropriations process by mandating certain levels or percentages of funds to be provided for various programs. These provisions will inevitably result in excessive appropriations. We believe that each program should be allowed to stand on its own merit and not have its funding directly or indirectly tied to funding levels for other programs. Congress, through its appropriations and budget processes, needs the flexibility to set funding levels which are consistent with the general economic conditions.

Some of the most troublesome provisions are included in the Education Amendments of 1978 (S. 1753). The House and Senate versions of the Education Amendments of 1978 contain 44 different appropriations-forcing mechanisms—19 of these are new. The bill includes automatic set-asides with mandatory appropriations levels for the new concentration grants and state incentive grants under ESEA Title I.

Of particular concern is the continuation of the tier system for Impact Aid. While we are sympathetic to payments in lieu of taxes in federally-impacted districts, continuation of the tier funding structure usurps the prerogative of the Appropriations Committee in funding proposed program expansion.

There are other provisions in S. 1753 that are also troublesome. Among these are the percentage set-asides for the Special Projects and the program for gifted and talented children, as well as the funding requirements for guidance and counseling.

The College Opportunity Act (S. 2539), the President's and the Human Resources Committee's alternative to the Higher Education tax credit, includes provisions that force the Appropriations Committee to choose between fully funding the $1.4 billion envisioned in the bill or reducing grants to current low-income recipients in order to supply grants for 1.5 million new middle-income recipients. The bill also includes increased mandatory funding provisions for two other programs: College Work Study and Supplemental Grants.

The Comprehensive Employment and Training Amendments of 1978 (S. 2570) as reported by the Human Resources Committee requires that at least $3 billion must be appropriated for public jobs under Title II (the new structural title), before any funds can be made available for public service employment under Title VI (the new countercyclical title). Although we may agree with the spirit of this requirement, there is no question that it would constrain the Appropriations Committee.

In order to insure that the Appropriations Committee retains its funding prerogatives, we are considering a series of amendments to eliminate many of these appropriations-forcing provisions to be offered when the bills reach the Senate floor.

We have been informed that the Administration is also opposed to these appropriations-forcing provisions and supports any efforts to modify or eliminate them.

We hope that you will give careful consideration to this matter and hope that we can reach an accommodation prior to the Senate consideration of these bills.

Sincerely,

MILTON YOUNG,
HENRY BELLMON,
WARREN G MAGNUSON,
EDMUND S. MUSKIE.

Mr. MUSKIE. However, Mr. President, this bill not only does not include any of the administration's proposed reforms, it reverses reforms made in 1974 and expands the eligibility of school districts for payments under this program. I will support amendments to limit eligibility in this program.

It is important to note, Mr. President, that the Human Resources Committee recommended none of these budget-busting changes in impact aid in its March 15 report to the Budget Committee. I know of no change since then in the nature of the Federal burden on local property tax bases which can explain the sudden need for this expansion.

Therefore, Mr. President, I intend to support amendments to delete any or all of these costly impact aid expansions. I intend to support the amendment offered by Senator EAGLETON and others, to reduce this expansion by approximately $222 million. Senator EAGLETON is to be congratulated for working out this compromise package of amendments. This is a step in the right direction, although it does not go far enough.

In addition, I am greatly concerned with the entitlement-like structure of the impact aid program.

The Education Amendments of 1974 greatly increased the complexity of the impact aid program by establishing an intricate payment procedure, the tier system. As a result of the tier system, 64 computations are required before a local school district knows how much money it will receive.

The formula for the distribution of funds to local education agencies contains a payment structure composed of three "tiers" and a requirement that the first and second tiers must be funded on an "all-or-nothing" basis. The Congress has little choice but to fully fund both tiers 1 and 2 and has done so since fiscal year 1976.

Coupled with the impact aid expansions which I have just discussed, this funding mechanism would result in at

least $235 million in additional appropriations being required. The 5-year cumulative cost of these amendments will almost certainly increase funding in the impact aid program by $2.1 billion over current law assumptions.

The President's reform proposal recommended elimination of the tier system for the allocation of funds. The committee rejected this recommendation, as it did all of the administration's recommendations on impact aid.

Senator MAGNUSON will offer amendments, which I have cosponsored, which would enhance congressional discretion over funding increases for the impact aid program.

This amendment would make funding for the most costly expansion—increased entitlements for public housing children at a cost of $117 million—subject to the discretion of the Appropriations Committee.

Senator EAGLETON'S and Senator MAGNUSON'S amendments in combination will halt the runaway growth in this program.

Mr. President, I am a cosponsor of amendments to be offered by Senator MAGNUSON to eliminate other provisions in this bill which have the practical effect of limiting congressional budgetary control.

For example, S. 1753 would authorize $400 million for the so-called concentration grants proposed by the President as part of his urban initiative. Unlike the House bill, which contains a separate authorization for this program, the Senate bill would reserve the first $400 million appropriated for title I for these concentration grants. Thus, unless the Congress wishes to reduce funding for the regular title I program, we will be virtually required to fully fund this new program.

The bill also authorizes a new program beginning in fiscal year 1980 of matching grants that would give States $1 in extra title I funds for every $2 they spend on their own compensatory programs. CBO estimates the cost of the provision to be $200 million annually. Funding for this program, as with the concentration grant provisions, must be provided first before the regular title I program can be funded. Once funded, it must continue to be funded at the preceding year's level.

Provisions such as these make the exercise of congressional discretion in its funding decisions virtually impossible. If we are ever to get control of the Federal budget, we must stop trying to lock in funding for each pet program.

Finally, Mr. President, this bill provides for a major expansion of Federal elementary-secondary education support to nonpublic schools. Funds for this major new program were not recommended in the Human Resources Committee's March 15 report and were therefore not assumed in the first budget resolution for fiscal year 1979.

This program seems unnecessary, given other provisions in the bill that would strengthen the participation of nonpublic schools in the existing elementary and secondary education programs.

For these reasons, Mr. President, I will support Senator HOLLINGS' amendment to delete this new program.

With that, Mr. President, I yield the floor.

Mr. JAVITS. Mr. President, before the Senator yields the floor, will the Senator yield to me?

Mr. MUSKIE. Yes, of course, I yield.

Mr. JAVITS. I have listened to the Senator with great interest. I also have read with great interest the views of the Senator and Senator BELLMON and the Appropriations Committee. They are entitled to the greatest respect.

We have had our staffs working with the staffs of Budget and Appropriations in an effort to resolve these problems. The reason I asked the Senator to let me say a word is that I would not wish for a moment to have it appear that Senator PELL, Senator STAFFORD, Senator WILLIAMS and I, in some cavalier way, disregarded it.

Of course, we did not. We took it seriously, this critical element of this measure.

I pledge myself to Senator MUSKIE, before we are through with the bill, to work it out satisfactorily, because we have the utmost regard for our colleagues and there is no desire whatever to steal a march on appropriations or on budget.

But we do realize the complexity of the problems which the Senator knows as well as I do: Impact aid is of critical importance to many Members of the House and the Senate.

The administrations have generally been against it, not only this one, but previous administrations. They do not like the idea.

We all, including me, think it essential to our communities, so we have to stand our ground.

I cannot expect the administration will cheer it, but I am certainly not going to get into any hostilities with the Appropriations or Budget Committees. We perfectly understand, the Appropriations Committee will decide to appropriate or not to appropriate. We perfectly understand the appropriations must be within the budget parameters.

All we say is that, if appropriated, it is our belief that these preferences are desirable, not unlike the hold harmless provision we have in many bills.

In other words, if the money is available, then the law would say it goes in the following priorities. We have, of course, the perfect power to change those priorities.

So I am glad for what the Senator said. But I did not wish to leave any impression we have just overlooked or disregarded his concern. On the contrary, we have taken it with deep seriousness. It is our purpose to try to achieve a practical solution with the Senator's committee, and with Senator YOUNG'S and Senator MAGNUSON'S committee, in order to deal with the problems which the Senator very properly raised.

Mr. MUSKIE. I appreciate the Senator's comments. They are consistent with his demonstrated respect for the budget process and the procedures which that reform act established.

The reason I spoke today was to make sure that all Members of the Senate were aware of these issues.

I should have indicated and, I am glad the Senator has stated that we are in consultation with the staffs, and eventually, personally, over these matters. I am very hopeful we can resolve our differences. I do appreciate the cooperative attitude that is being displayed.

I repeat that the reason I made these points now is so that the Senators would know what the problems are, and now they will also know that the managers of the bill and other interested Senators are applying themselves to the problem.

Mr. JAVITS. I thank my colleague.

The PRESIDING OFFICER. Does the Senator from Maine yield the floor?

Mr. MUSKIE. I yield the floor.

The PRESIDING OFFICER. Under the previous order, the Senator from New Mexico is now recognized to call up his amendments.

Mr. DOMENICI. Mr. President, might I first say to the distinguished Senator from Maine (Mr. MUSKIE) that I greatly appreciate the fact that the kind of discussion he has had with the Senate should come very early on.

Because my time schedule was not going to permit otherwise, the committee accommodated me in bringing up the bill this morning, so that I could offer my amendments and contribute what I had to contribute. That is why I was reluctant to yield prior to the time I did. But I do understand the responsibility and commend the Senator from Maine (Mr. MUSKIE) for his early-on analysis of this kind of bill, which I think the Senate needs. I could not yield sooner, and for that I apologize.

Mr. MUSKIE. No apology is necessary. I understood fully the Senator's problem. I found it perfectly consistent with what I wanted to do.

UP AMENDMENT NO. 1720

(Purpose: To amend the Elementary and Secondary Education Act of 1965 in order to add a new Title XIII to demonstrate the feasibility of reorganizing, simplifying, and consolidating certain elementary and secondary education programs in order to provide improved State and local administration of the programs, and for other purposes)

Mr. DOMENICI. Mr. President, I send to the desk an unprinted amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposed an unprinted amendment numbered 1720.

Mr. DOMENICI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

TITLE XIII—REORGANIZATION

SHORT TITLE

SEC. 2. This title may be cited as the "Reorganization and Consolidation Demonstration Project."

STATEMENT OF FINDINGS AND POLICY

SEC. 1201. (a) The need for simplification and consolidation of Federal education programs has been detailed by the education community in general, particularly State and local officials and school teachers and administrators. The number and complexity of Federal education laws has seriously undermined State and local ability to implement

Federal purposes. The complexity of Federal law has led therefore to an inefficient and sometimes ineffective Federal role. Educators have called for a public policy which eliminates the unnecessary burden of program fragmentation and excessive administrative requirements which cause program inefficiency and wasted time, effort, and funds that could be used to enhance program effectiveness.

(b) Congress finds that Federal education policy would be served by a five-year demonstration project to test the feasibility and assess the utility of program reorganization and consolidation to—

(1) promote program efficiency;

(2) reduce paperwork;

(3) reduce the amount of time expended by teachers and other educational personnel in administering Federal education programs;

(4) increase State and local flexibility while maintaining certain Federal purposes;

(5) coordinate Federal programs with each other and with State and local programs in order to increase the effectiveness of the education program in meeting the needs of the nation's school children.

STATEMENT OF PURPOSE

SEC. 1202. (a) It is the purpose of this Title to demonstrate the feasibility of consolidating and reorganizing certain programs of assistance to State and local educational agencies for elementary, secondary, vocational, and adult education into three broad categories:

(1) Special educational needs programs including programs authorized on the date of enactment of this Act—

(A) under subpart 1 of part A of title I and part B of title I of the Elementary and Secondary Education Act of 1965, those portions of subpart 2 of part A of the Elementary and Secondary Education Act of 1965 as relates to neglected and delinquent children and migratory children.

(B) under part B of the Education of the Handicapped Act as amended by Public Law 94–142, section 121 of the Elementary and Secondary Education Act of 1965, and under section 403 (a) (8) (B) of the Elementary and Secondary Education Act of 1965;

(C) under title VII of the Elementary and Secondary Education Act of 1965, section 708(c) of the Emergency School Aid Act, and subpart 3 of part B of the Vocational Education Act of 1963.

(2) Vocational education programs including programs authorized on the date of enactment of this Act—

(A) under the Vocational Education Act of 1963 and section 811 of the Elementary and Secondary Education Act of 1965 relating to consumer education;

(B) the Adult Education Act;

(C) a bonus grant for projects jointly sponsored by prime sponsors under the Comprehensive Employment and Training Act of 1973 and agencies conducting elementary and secondary, adult or vocational education.

(3) Special emphasis projects including programs authorized on the date of enactment of this Act under—

(A) parts B and C of title IV of the Elementary and Secondary Education Act of 1965;

(b) section 403 of the Education Amendments of 1974 relating to metric education, section 404 of the Education Amendments of 1974 relating to gifted and talented children, section 406 of the Education Amendments of 1974 relating to arts and education; the Environmental Education Act, the Alcohol and Drug Abuse Education Act, title IX of the Elementary and Secondary Education Act of 1965 relating to ethnic heritage, title V of the Higher Education Act of 1965 relating to the Teacher Corps, title VII of the Education Amendments of 1974 relating to the national reading improvement program (except sections 721 and 722).

(c) It is the further purpose of this Act to demonstrate the desirability of greater flexibility in the use of Federal educational assistance and to bring about a simplification of the categorical requirements contained in the provisions of law authorizing each such program.

STATE SELECTION

SEC. 1203. (a) The Commissioner shall select states for participation in the demonstration authorized by this title according to criteria and procedures set forth in subsection (b) of this section.

(b) For purposes of demonstrating the feasibility of the reorganization and consolidation authorized by this title, the Commissioner shall:

(1) develop procedures under which States may apply for consolidated funding;

(2) assure that States selected will represent various demographic characteristics such as size and educational governance;

(3) develop selection procedures, regulations, and select demonstration States no later than June 30, 1979;

(4) approve the application of not more than six States to provide a waiver of current requirements in order to implement the described demonstration;

(5) States and the associated local education agencies selected for the demonstration shall conduct planning for operation under consolidated funding for a period ending June 30, 1980.

(6) It is the intent of Congress that the demonstration of consolidation and simplification authorized by this title be completed by June 30, 1983.

(7) It is the further intent of Congress that if the consolidation effort initiated by this title is not adopted in whole or in part when Congress reauthorizes this Act beyond the termination date set by this title, that the Commissioner will establish orderly procedures for the termination of the program for States participating in the demonstration and the phase-in of regular administrative procedures.

APPLICABILITY TO EXISTING LAW

SEC. 1204. Except as provided in this title, no other provision of law authorizing a program consolidated under this title shall apply to the provision of financial assistance to a State selected for this demonstration which has a comprehensive State plan in compliance with the provisions of this title, with respect to the programs covered by that plan. All administrative regulations shall be consistent with the provisions of this Act for States participating in the demonstration.

PART A—SPECIAL NEEDS PROGRAMS

Subpart 1—Educationally Deprived Children

CHILDREN FROM LOW-INCOME FAMILIES

SEC. 1211. Each State selected to participate in the consolidation program authorized by this Act shall within the limits of available Federal funds, in the comprehensive State plan required under section 1246, provide for a program designed to—

(1) address the special educational needs of educationally deprived children in local educational agencies having high concentrations of children from low-income families, and through such local education agencies arrange to meet the needs of such children in private non-profit schools on an equitable basis unless prohibited by law;

(2) address the special educational needs of neglected and delinquent children in State operated programs.

EDUCATION PROGRAMS FOR MIGRATORY CHILDREN

SEC. 1212. Each State desiring to participate in the consolidation program authorized by this Act shall, in the comprehensive State plan required under section 1246, set forth within the limits of available Federal funds a program designed to address the special educational needs of migratory children of migratory agricultural workers and of migratory fishermen, including the preschool educational needs of such migratory children.

Subpart 2—Handicapped Children

EDUCATION PROGRAMS FOR HANDICAPPED CHILDREN

SEC. 1213. Each State selected to participate in the consolidation program authorized by this title and eligible for this subpart shall, in the comprehensive State plan required under section 1246, set forth a program designed to—

(1) provide special education and related services for handicapped children;

(2) meet the special educational needs of handicapped children for which the State agency is responsible;

(3) provide for curriculum improvements through special or innovative programs and projects for the education of handicapped children as authorized under part C of title IV of the Elementary and Secondary Education Act of 1965, and

(4) establish standards for educational programs for handicapped students.

APPLICABILITY: STATE ASSURANCES

SEC. 1214. (a) Each State selected to participate in the consolidation program authorized by this title may, in the comprehensive State plan required under section 1246, set forth a program providing for special education and related services for handicapped children aged three to five.

(b) Each State selected to participate in the consolidation programs authorized by this title and eligible for this subpart shall assure that—

(1) the State has in effect a policy that assures all handicapped children the right to a free appropriate education. The State plan shall—

(A) assure that services are provided to all such children;

(B) contain a description of the kind and number of facilities, personnel, and services necessary throughout the State to provide services;

(C) provide for continued efforts to identify, locate, and evaluate all handicapped children who are in need of services in order to maintain full service; and

(D) the State will comply with the provisions of section 615 of the Education of the Handicapped Act, relating to procedural safeguards or shall develop a similar procedure designed to protect the rights of children and their parents and guardians.

Subpart 3—Children with Limited English-Speaking Ability

BILINGUAL EDUCATION PROGRAMS

SEC. 1215. Each State selected to participate in the consolidation program authorized by this Title shall, in the comprehensive State plan required under section 1246, set forth—

(1) a program of instruction designed for children of limited-English language proficiency in elementary and secondary schools;

(2) a program designed to meet the needs of children who are from an environment in which the dominant language is other than English, and who because of language barriers and cultural difference, do not have equality of educational opportunity; and

(3) a program of instruction designed for adults of limited English language proficiency carried out in coordination with Adult Education Programs and Vocational Education programs;

(4) bilingual vocational training programs for persons of limited English language proficiency who—

(A) have completed or left elementary or secondary school and who are available for education by a postsecondary educational institution;

(B) have already entered the labor market and who desire or need training or retraining to achieve year-round employment, adjust to changing employment opportunities, expand their range of skills, or advance in employment; and

(5) a program of training to prepare instructors, aides, or other ancillary personnel for programs designed for persons of limited English proficiency.

Subpart 4—Distribution of Funds to Local Educational Agencies

DISTRIBUTION TO LOCAL EDUCATIONAL AGENCIES

SEC. 1217. (a) From the funds provided to a State attributable to section 1211 of this title for any fiscal year, the State shall allocate to each local educational agency in that State based on the number of students from low-income families at least the amount which each local educational agency would have received had the distribution of such funds been made under the provisions of law authorizing part A of title I of the Elementary and Secondary Education Act of 1965.

(b) From the funds provided to a State under section 1212 of this title for any fiscal year, the State shall allocate to local educational agencies having migrant education programs funds on an equitable basis taking into account the number of students eligible for such programs. A State may serve such students directly.

(c) From funds provided to a State attributable to section 1213 of this title (relating to education programs for handicapped children) for any fiscal year, the State shall allocate to each local educational agency and intermediate educational unit in that State an amount not less than the amount which each such local educational agency and intermediate educational unit would have received had the distribution of such funds been made under the provisions of law authorizing the program consolidated in that section.

(d) From the funds provided to a State attributable to section 1215 of this title (relating to bilingual education programs) for any fiscal year, the State shall distribute such amount on either a formula or a project grant basis taking into consideration the number and needs of students in that State who have limited English language proficiency.

TARGETING OF FUNDS

SEC. 1218 (a). All funds allocated to local education agencies under section 1217(a) shall be used to provide services to educationally deprived children.

(b) All funds allocated to local education agencies under Section 1217(b) shall be used to provide services to migrant children.

(c) All funds allocated to local education agencies under Section 1217(c) shall be used to provide services to handicapped children (and)

(d) All funds allocated to local education agencies under section 1217(d) shall be used to provide services to children with limited English language proficiency.

PART B—VOCATIONAL, ADULT AND CONTINUING EDUCATION AND EMPLOYMENT TRAINING

Subpart 1—Vocational Education

STATEMENT OF PURPOSE

SEC. 1221. It is the purpose of this part to assist States in improving planning in the use of all resources available to them for vocational education and employment training by involving a wide range of agencies and individuals concerned with education and training within the State in the development of the vocational education plans. It is also the purpose of this part to authorize Federal grants to States to assist them—

(1) to extend, improve, and, where necessary, maintain existing programs of vocational, homemaking and consumer education,

(2) to develop new programs of vocational education,

(3) to develop and carry out such programs of vocational education within each State so as to overcome sex discrimination and sex stereotyping in vocational education programs (including programs of homemaking), and thereby furnish equal educational opportunities in vocational education to persons of both sexes, and

(4) to provide part-time employment for youths who need the earnings from such employment to continue their vocational training on a full-time basis.

so that persons of all ages in all communities of the State, those in high school, those who have completed or discontinued their formal education and are preparing to enter the labor market, those who have already entered the labor market, but need to upgrade their skills or learn new ones, those with special educational handicaps, and those in postsecondary schools, will have ready access to vocational training or retraining which is of high quality, which is realistic in the light of actual or anticipated opportunities for gainful employment, and which is suited to their needs, interests, and ability to benefit from such training.

VOCATIONAL EDUCATION

SEC. 1222. (a) Each State selected to participate in the consolidation program authorized under this part shall set forth provisions for programs to carry out the purposes described in section 1221 in the comprehensive State plan required under section 1246, and provisions for consumer education.

(b)(1) Funds attributable to the program consoldiated by this section may be used for—

(A) vocational education programs;

(B) work study programs;

(C) cooperative vocational education programs operated by local education agencies with the participation of public and private employers;

(D) energy education programs for training of personnel in the areas of coal mining and solar energy;

(E) construction of vocational education school facilities if such facilities are not for individuals assigned as the result of delinquent conduct or in which students are segregated by race.

(F) support of full time personnel to perform duties described in section 104(b) of the Vocational Education Act of 1963;

(G) the provision of stipends, which shall not exceed reasonable amounts, as prescribed by the Commissioner pursuant to regulations, for students entering or already enrolled in vocational education programs, if such students have acute economic needs which cannot be met under work-study programs;

(H) placement services for students who have successfully completed vocational education programs;

(I) industrial arts programs where such programs will assist in meeting the purposes of this title;

(J) support services for women who enter programs designed to prepare individuals for employment in jobs which have been traditionally limited to men, including counseling as to the nature of such programs and the special problems which may be encountered by women in such programs, and job development and job follow-up services;

(K) day care services for children of students in secondary and postsecondary vocational education programs;

(L) vocational education for—

(i) persons who had solely been homemakers but who now, because of dissolution of marriage or other reasons, must seek employment;

(ii) persons who are single heads of households and who lack adequate job skills;

(iii) persons who are currently homemakers and part-time workers but who wish to secure a full-time job; and

(iv) women who are now in jobs which have been traditionally considered jobs for females and who wish to seek employment in job areas which have not been traditionally considered job areas for females, and men who are now in jobs which have been traditionally considered jobs for males and who wish to seek employment in job areas which have not been traditionally considered job areas for males;

(M) special programs for disadvantaged students in areas of the State having high concentrations of youth unemployment and school dropouts;

(N) research programs;

(O) exemplary and innovative programs;

(P) curriculum development programs;

(Q) provision of guidance and counseling services;

(R) provision of pre-service and in-service training;

(S) grants to overcome sex bias;

(T) consumer and homemaking education as described in section 150 of the Vocational Education Act of 1963; and

(U) research, demonstration, or pilot projects in consumer education as described in section 811(a)(1)(B) of the Elementary and Secondary Education Act of 1965.

(2) Not more than 20 per centum of the funds attributable to this section in any fiscal year may be used for purposes described in clauses (O) through (T) of paragraph (1) of this subsection.

(3) At least 35 per centum of the funds attributable to this section in any fiscal year shall be used to serve—

(A) persons who have academic or economic handicaps and who require special services and assistance in order to enable them to succeed in vocational education programs;

(B) handicapped persons; or

(C) persons of limited English language proficiency.

(c) State and local advisory councils for vocational education shall be appointed and shall operate according to the provisions of Section 105 of the Vocational Education Act of 1963.

Subpart 2—Adult and Continuing Education

SEC. 1223. (a) Each State selected to participate in the demonstration authorized by this title shall, as part of the comprehensive State plan described under section 1246, provide for a program designed to meet the needs for adult basic education, and neglected or delinquent children in adult correctional institutions.

(b) Programs in adult correctional institutions shall be coordinated with other educational programs provided for such persons.

Subpart 3—Education Projects Authorized Under Employment Training Programs

EDUCATION TRAINING PROGRAMS

SEC. 1224. (a) Each State selected to participate in the demonstration shall describe, in the comprehensive State plan required by section 1246, how the activities in the plan relate to employment and training programs conducted by the prime sponsors established under the Comprehensive Employment and Training Act of 1973, to assure a coordinated approach to meeting the vocation education and training needs of the area or community.

(b)(1) Any local education agency which engaged in the previous fiscal year in a cooperative training project with the prime sponsor serving the area in which the local education agency is located shall be eligible to receive a bonus grant equal to one-half the amount of funds the local education agency contributed to the project. Each grant received under this subsection shall be used for the same or other cooperative projects with the prime sponsor.

(2) The State shall accept applications for funds from local education agencies and shall certify to the Commissioner the amount of funds for which local education agenices in the State are eligible, which certification

shall accompany the plan required in section 1244(a)(4).

(3) There are authorized to be appropriated for each fiscal year ending prior to October 1, 1973, such sums as may be necessary to carry out the provisions of this section.

(4) If the sums appropriated for any fiscal year for making payments to States under this section are not sufficient to pay in full the amount to which each State is entitled under this section for such fiscal year, the amounts which all States may receive under this section for such fiscal year shall be ratably reduced. In case additional funds become available for making such payments for any fiscal year during which the preceding sentence is applicable, such reduced amounts shall be increased on the same basis as they were reduced.

SUBPART 4—DISTRIBUTION OF FUNDS TO LOCAL EDUCATIONAL AGENCIES

DISTRIBUTION TO LOCAL EDUCATIONAL AGENCIES

SEC. 1225. (a) From the funds provided to a State attributable to subparts 1 and 2 of this part for any fiscal year, the State shall allocate at least 80 per centum of such funds to local educational agencies and other eligible institutions in that State, based on enrollment and other criteria set forth in the comprehensive State plan required under section 1246.

(b) From the funds provided to a State attributable to subpart C of this part for any year, the State shall allocate all funds to local education agencies based on the certification furnished under section 1224.

PART C—SPECIAL EMPHASIS PROJECTS

Subpart 1—Libraries and Learning Resources

LIBRARIES AND SUPPORT SERVICES

SEC. 1231. (a) Each State selected to participate in the consolidation program authorized by the title shall carry out a program for making grants to local educational agencies, which program shall be described in the comprehensive State plan submitted under section 1246, provide for—

(1) the acquisition of school library resources, textbooks, and other printed and published instructional materials for the use of children and teachers in public and private nonprofit elementary and secondary schools; and

(2) the acquisition of instructional equipment (including laboratory and other special equipment, and audiovisual materials and equipment suitable for use in providing education in academic subjects) for use by children and teachers in elementary and secondary schools, and for minor remodeling of laboratory or other space used by such schools for such equipment.

(b) No personnel may be employed by a local educational agency with funds provided by this part.

Subpart 2—Special Curriculum Emphasis, Guidance and Counseling, Innovation, and Support Projects

SPECIAL PROJECT PROGRAMS

SEC. 1232. (a) Each State selected to participate in the consolidation program authorized by this title shall, in accordance with subsection (b), carry out a program for providing services and making grants to local educational agencies for—

(1) innovation and exemplary programs to stimulate and assist in the provision of vitally needed educational services not available in sufficient quantity or quality and to stimulate and assist in the development and establishment of exemplary elementary and secondary school programs (including the remodeling or lease of necessary facilities) to serve as models for regular school programs;

(2)(A) programs of counseling and guidance services for students in elementary and secondary schools, including—

(i) occupational, vocational guidance, personal social counseling, and information services,

(ii) pupil appraisal,

(iii) pupil motivation for academic success,

(iv) postsecondary placement assistance,

(v) research, evaluation, and followup activities, and

(vi) staff development;

(B) programs of testing students in elementary and secondary schools; and

(C) programs, projects, and leadership activities designed to expand and strengthen counseling and guidance services in elementary and secondary schools;

(3) demonstration projects by local educational agencies or private educational organizations designed to improve nutrition and health services in public and private nonprofit elementary and secondary schools serving areas with high concentrations of children from low-income families.

(4) the carrying out by such agencies in schools located in urban or rural areas, which have a high percentage of children from low-income families, and have a high percentage of such children who do not complete their secondary school education, of demonstration projects involving the use of innovative methods, systems, materials, or programs which show promise of reducing the number of such children who do not complete their secondary school education;

(5) strengthening the leadership resources of State educational agencies and assisting those agencies in the establishment and improvement of programs to identify and meet educational needs of the State;

(6) assisting and encouraging the use of the arts in elementary and secondary school programs;

(7) encouraging educational agencies and institutions to prepare students to use the metric system of measurement;

(8) advancing the education of gifted and talented children;

(9) programs, projects, and leadership for career education at elementary and secondary schools designed to—

(A) develop information on the needs for career education for all children,

(B) reassess the status of career education programs and practices including assessment of stereotyping career opportunities by race or by sex.

(C) provide for the demonstration of exemplary career education programs and practices by the development and testing of exemplary programs and practices using various theories, concepts, and approaches, and

(D) provide for the training and retraining of persons for conducting career education programs;

(10) activities to provide educational equity for women;

(11) establishing and supporting drug abuse and alcohol prevention and control projects, including projects for primary prevention and early intervention conducted in elementary and secondary schools;

(12) development of curriculum materials and dissemination of such materials in the elementary and secondary schools relating to the history, geography, society, economy, literature, art, music, drama, language, and general culture of any ethnic groups and the contributions of those ethnic groups to American heritage;

(13) strengthening the educational opportunities available to children in areas having high concentrations of low-income families, through improved programs of training and retraining for personnel eligible for the Teacher Corps including teachers, teacher aides, other educational personnel, teacher-interns, and volunteers who give instructional assistance in such areas through cooperative arrangements among State and local educational agencies and institutions of higher education for such training;

(14)(A) carrying out projects for schools having large numbers or high percentages of children with reading deficiencies, involving the use of diagnostic testing, individualized learning, innovative methods, systems, materials, bilingual materials when appropriate, vacation reading programs, or projects which show promise of overcoming such reading deficiencies, including projects for pre-elementary school children, and

(B) carrying out projects—

(i) to develop comprehensive programs and State leadership to improve reading proficiency and instruction in reading in the elementary schools of the State,

(ii) to arrange for and assist in the training of special reading personnel and specialists,

(iii) to furnish reading assistance and instruction to youths and adults who do not otherwise receive such assistance and instruction or to make grants for such reading academies to eligible institutions;

(15) environmental education activities at elementary and secondary education levels, including the development of curriculums (including interdisciplinary curriculums) in the preservation and enhancement of environmental and ecological balance, the dissemination of information relating to such curriculums and to environmental education generally, appropriate education training programs, and the planning of outdoor ecological study centers; and

(16) assistance to local educational agencies in strengthening the leadership resources of such agencies and to assist such agencies in the establishment and improvement of projects to identify and meet the educational needs of the schools of such agencies.

(17) special programs or projects for the education of handicapped and learning disabled children, if any such State selected for the demonstration is not eligible for assistance described in subpart 2 of Part A of this title.

(b) Each State program developed and carried out under subsection (a) of this section shall reflect the needs and priorities established by the local educational agencies in the comprehensive needs assessment conducted pursuant to section 1245(a).

Subpart 3—Distribution of Funds to Local Educational Agencies

DISTRIBUTION TO LOCAL EDUCATIONAL AGENCIES

SEC. 1233. (a) From the funds provided to a State attributable to clauses (1) and (2) of section 1231(a) of this title for any fiscal year, the State shall allocate to each local educational agency in that State an amount based upon enrollment any other relevant factor to be determined by the State such as tax effort, numbers or percentages, or both, of students whose education imposes a higher than average cost per child upon the State or local education agency, and the ability of the local education agency to finance public education. The formula for such distribution shall be included in the comprehensive State plan required by section 1246. The local educational agencies, based on needs of public and non-public school children, will be given sole discretion in determining how such funds will be divided among the various purposes described in section 1241.

(b) From the funds provided to a State attributable to section 1232 for any fiscal year, the State agency designated pursuant to section 1244(a)(1) shall allocate funds to local educational agencies in the State in accordance with criteria developed in the comprehensive State plan, after a consideration of the needs assessments required by section 1232(b) for the purposes described in such clauses. Amounts attributable to clauses (5) and (14)(B) of section 1232 be retained by the State for programs conducted by the State education agency. Funds at-

tributable to clause (17) shall be used only for the purpose stated in clause (17).

PART D—GENERAL PROVISIONS

RESERVATION OF FUNDS FOR CONSOLIDATED PROGRAMS

SEC. 1241. (a)(1) From the amounts appropriated for the fiscal year 1979 and for each fiscal year thereafter ending prior to October 1, 1983, to carry out programs consolidated by this Act, the Commissioner shall reserve an amount equal to the aggregate amount necessary to make allotments under section 1242 to States selected for the demonstration under this title with respect to programs covered by the comprehensive State plan for each such State.

(2) In reserving funds under this section, the Commissioner shall use formulas for the distribution of funds among the States in provisions of law authorizing programs consolidated by this title. Wherever State formulas do not exist for programs consolidated by this title, the Commissioner shall reserve the amount of funds for all such programs which bear the same ratio to such amount as the number of children aged five through seventeen in the States which choose the option to consolidate bears to the number of children in all States except that funds for bilingual education programs will be reserved in accordance with the criteria under section 1242(a)(4) of this title and funds for consumer education will be reserved in accordance with the criteria under section 1242(b)(2)(B) of this title.

(b) From the amount allotted to each State under section 1242, the Commissioner shall pay to each State selected for the demonstration authorized by this title an amount equal to the amount expended in that State in carrying out a comprehensive State plan adopted pursuant to this title.

ALLOTMENTS

SEC. 1242. (a)(1) From the amounts reserved under section 1241 to carry out part A of this title for any fiscal year, the Commissioner shall determine the amount attributable to subparts 1, 2, and 3 of such part for all States selected to participate in the demonstration.

(2) From the amount reserved under section 1241 to carry out part A of this title and determined attributable to subpart 1 for any fiscal year, the Commissioner shall allot to each State the sum of—

(A) an amount equal to the amount which each such State would be entitled under—

(i) subpart 1 of part A of title I of the Elementary and Secondary Education Act of 1965, for all local educational agencies within that State,

(ii) part B of title I of the Elementary and Secondary Education Act of 1965,

(iii) that portion of subpart 2 of part A of the Elementary and Secondary Education Act of 1965 as relates to neglected and delinquent children, and migratory children,

subject to section 144 of the Elementary and Secondary Education Act of 1965, in each case;

(3) From the amount reserved pursuant to section 1241(a) for part A of this title and determined attributable to subpart 2, for any fiscal year, the Commissioner shall allot to each State the sum of an amount equal to the amount to which each such State would be entitled under—

(A) part B of the Education of the Handicapped Act, including funds under section 619 for States that provide direct services;

(B) section 121 of the Elementary and Secondary Education Act of 1965; and

(C) section 403(a)(8)(B) of the Elementary and Secondary Education Act of 1965.

(4) From the amount reserved pursuant to section 1241 for carrying out Part A of this title and determined attributable to subpart 3 of such part for any fiscal year, the Commissioner shall allot to each State the sum of any amount which bears the same ratio to such amounts as the number of limited and non-English-speaking children aged five to seventeen in the State, as identified by the Bureau of the Census, bears to the number of such children in all States, for funds available under—

(A) title VII of the Elementary and Secondary Education Act of 1965;

(B) section 708(c) of the Emergency School Aid Act; and

(C) subpart 3 of part B of the Vocational Educational Act of 1963.

(b)(1) From the amounts reserved under section 1241 to carry out part B of this Act for any fiscal year, the Commissioner shall determine the amount attributable to subparts 1, 2, and 3 of such part for all States selected to participate in the demonstration.

(2) From the amounts reserved under section 1241 to carry out part B of this title and determined attributable to subpart 1 for any fiscal year, the Commissioner shall allot to each State an amount equal to the amount to which each such State would be entitled under—

(A) part A of the Vocational Education Act of 1963; and

(B) an amount equal to the amount which bears the same ratio to the amount attributable to consumer education as the number of children age fifteen to seventeen, inclusive, in each State bears to the number of such children in all States.

(3) From the amount reserved under section 1241 to carry out part B of this title and determined attributable to subpart 2 for any fiscal year, the Commissioner shall allot to each State an amount equal to the amount to which the State would be entitled under—

(A) the Adult Education Act;

(4) from the amount reserved under section 1241 to carry out Part B of this Act and determined attributable to subpart 3 for any fiscal year, the Commissioner shall allot to each State an amount equal to the amount to which each such State is entitled in accordance with the criteria under section 1224 of this title.

(c)(1) From the amounts reserved under section 1241 to carry out part C of this title and for any fiscal year, the Commissioner shall determine the amount attributable to subparts 1 and 2 of such part for all States selected to participate in the demonstration.

(2) From the amount reserved under section 1241 to carry out part C of this title and determined attributable to subpart 1 for any fiscal year, the Commissioner shall allot to each State an amount equal to the amount to which each such State would be entitled under part B of title IV of the Elementary and Secondary Education Act of 1965 (other than the amount attributable to guidance and counseling).

(3) From the amount reserved under section 1241 to carry out part C of this title and determined attributable to subpart 2 for any fiscal year, the Commissioner shall allot to each State an amount equal to the sum of the amount to which each State would be entitled under—

(A) part C of title IV of the Elementary and Secondary Education Act of 1965 less the 15 per centum set aside for handicapped education in section 403(a)(8)(B) of such title, if the State is eligible for part A, subpart 2, of this title. The 15 per centum set aside in section 403(a)(8)(B) shall be included in the allotment under this subsection for States not eligible under subpart 2 of part A.

(B) that portion of part B of title IV of such Act attributable to guidance and counseling; and

(C) an amount equal to the amount which bears the same ratio to the amount attributable to clauses (6) through (16) of section 1232(a), as the number of children age five to seventeen, inclusive, in such State bears to the number of such children in all States selecting to participate in the programs consolidated under title III of this Act.

(4) For the purpose of paragraph (3) of this subsection, the Commissioner shall determine the number of children age five to seventeen, inclusive, on the basis of the most satisfactory data available to him.

(d)(1) For the purpose of this section, "all States" means for any fiscal year all States selected to participate in the demonstration.

(2) For the purpose of subsection (b) of this section, the term "State" does not include Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

(e) Any funds granted to a State under any program consolidated under this title prior to the consolidation which remain available for expenditure during the succeeding fiscal year pursuant to section 412(b) of the General Education Provisions Act, shall be available for use by that State during that year for the purpose for which they were originally granted or for carrying out the State's consolidated plan for that year under this title.

(f) Any expenditures made to close out any programs consolidated by this title may be included as administrative expenses under section 1244(c)(1) of this title.

PLANNING GRANTS

SEC. 1243. (a) Any State selected to participate in the consolidation program authorized by this title, shall, in order to prepare a consolidated plan in accordance with the provisions of this title, receive a one-year planning grant.

(b) The maximum amount of a grant which a State may receive under this section is equal to 1 per centum of the total allotment of that State under programs consolidated by this title, for the fiscal year for which the determination is made, except that no State shall receive less than $200,000 nor more than $1,000,000.

(c) There are authorized to be appropriated for fiscal year 1979 such sums as may be necessary to carry out the provisions of this section.

STATE ADMINISTRATION

SEC. 1244. (a) Each State selected to receive a grant for the consolidation program authorized by this Act for any fiscal year shall—

(1) designate the State educational agency and the State board for vocational education (if applicable) within the State to administer the financial assistance made available under this Act;

(2) develop and publish prior to implementation of the demonstration authorized by this title a four-year comprehensive State plan which—

(A) is developed in accordance with the procedures described in section 1245, and

(B) contains the provisions designed to meet the requirements of 1246.

(3) develop and publish an annual update of the comprehensive State plan, and

(4) submit to the Commissioner for his approval the comprehensive State plan or annual update in accordance with the provisions of this title.

(b) A State which receives a grant for the demonstration program authorized by this title for any fiscal year shall, in addition to the requirements of subsection (a)—

(1) provide for an audit of expenditures for each program year in accordance with generally accepted accounting principles, conducted, as determined by the State by—

(A) an auditor of the State, using certified public accountants, or

(B) a private certified public accountant

or auditing firm utilizing certified public accountants;

(2) provide for an annual evaluation of the implementation of the State's final comprehensive plan, and any amendment thereto, adopted under section 1245,

(3) submit to the Commissioner for his approval the procedures established by the State to carry out the provisions of clauses (1) and (2) of this subsection, with such supporting material as the Commissioner may require; and

(4) prepare and submit an annual report of that audit and evaluation which report shall include—

(A) such information as the Commissioner may reasonably prescribe consistent with the consolidation and provisions of this Act, and

(B) assurance that funds were expended in accordance with this Act and the comprehensive State plan.

(c) The Commissioner shall pay to each State for the proper and efficient administration of the consolidation program authorized by this title an amount, in one grant award, equal to 1 per centum of the aggregate of that State's allotment for the fiscal year for which the determination is made except that no State shall receive less than it received for the administration of programs consolidated by this Title in the previous fiscal year.

PROCEDURE FOR DEVELOPING THE COMPREHENSIVE STATE PLAN

SEC. 1245. Each State shall in the development of the comprehensive State plan establish procedures designed to assure that—

(1) a comprehensive assessment is conducted of the educational needs of the children of that State aged five to seventeen, inclusive, for educational services, the needs of children below aged five eligible for services under this Act, the needs of adults in that State for basic educational and continuing educational services, and for vocational education programs, the local labor market requirements, the current status of employment and the economy, the location of training facilities, and the needs of the individuals to be served. Particular attention shall be given to the identification of children with special educational needs, the services which the students are receiving, and the need for continued, additional, and related services for each of the programs specified in parts A, B, and C of this title,

(2) local education agencies will determine priorities for subpart 2 of part C of this title and for Part B as part of the needs assessment process,

(3) there is participation of interested citizens, local educational agencies, units of general local government, appropriate State agencies and organizations, and, if appropriate, prime sponsors under the Comprehensive Employment and Training Act of 1973, prior to and during the development of the comprehensive plan,

(4) the legislature of the State will be informed of the development of the procedures required by this subsection,

(5) as a part of the comprehensive planning process priorities will be established for the use of funds under section 1247,

(6) the use of funds for purposes described in parts A, B, and C of this title will be coordinated with the use of State and local funds extended for similar purposes,

(7) the use of funds for purposes described in parts A, B, and C of this title will be coordinated with each other and other Federal programs to avoid duplication of effort,

(8) the proposed comprehensive State plan or the annual update thereof will be submitted to the Commissioner and will be published at least ninety days prior to its effective date and such plan or update thereof will be available to interested parties and to local educational agencies within the State. Comment relating to such plan must be accepted for a minimum of forty-five days after such publication,

(9) a final comprehensive State plan, or annual update thereof, will be published and made available prior to its effective date together with a summary of the comments received,

(10) any amendment to the final comprehensive State plan prepared by the State educational agency or other agency designated pursuant to section 1244(a)(1) will be published as a proposed amendment on which the public may comment for a period of at least twenty days, and thereafter the final amendment, together with a summary of the comments received and the action taken on such comments will be published,

(11) regulations and rules established, amended, or repealed by that State will be established, amended, or repealed with the counsel of local education agencies and consistent with State administrative procedures and due process,

(12)(A) local education agencies may agree to join together and form consortium for the purpose of carrying out any of the programs authorized by this title, and

(B) such consortium will be considered as a local educational agency for the purpose of distribution of such funds.

PROVISION OF THE COMPREHENSIVE STATE PLAN

SEC. 1246. A comprehensive State plan meets the requirements of this section if that plan—

(1) sets forth the procedure used and the results of the needs assessments conducted pursuant to section 1245(a)(1);

(2)(A) sets forth the goals to be achieved under the plan, the basic program objectives and a description of the programs to be assisted in accordance with the provisions of parts A, B, and C;

(B) sets forth the type of individuals to be served in each such program together with the services or activities to be supported and the estimated enrollment for each such program;

(3) sets forth the policies and procedures to be followed by the State to assure that the distribution of funds under parts A, B, and C of this title to local educational agencies and other appropriate agencies and organizations within the State is in accordance with the provisions of each such part;

(4) contains a description of the organizational structure through which the program consolidated by this title will be administered;

(5) sets forth the procedures for monitoring activities of the local educational agencies within the State including a provision for technical assistance by the State to each such local educational agency;

(6) contains a description of the process that the State will use to insure that any local educational agency in the State which receives funds under this Act will annually develop or update a comprehensive plan for the use of such funds; that a program site advisory council will be established for programs pursuant to sections 1211 and 1216 to advise in the development of the plan for such programs; and that the plan will be made available to the public for comment in a manner consistent with the manner and provisions required for the comprehensive State plan under this title;

(7) provides, consistent with State law and practice, for audit of local educational agency expenditures under this title;

(8) sets forth procedures to assure that—

(A) the aggregate amount, or

(B) the amount of the average per-pupil expenditure, whichever is less, to be expended by the State and its local educational agencies from funds derived from non-Federal sources for the consolidation program under each Part of this title for any fiscal year will not be less than the amount so expended for the preceding fiscal year;

(9) sets forth procedures to assure that funds made available under this Act will be used so as to supplement the level of State and local funds expended for the purposes described in the plan and in no case to supplant such State and local funds;

(10) provides that funds pursuant to section 1311, 1313, and 1315 are used only for the excess costs of programs under those sections.

(11) provides that the only applications for funds for programs under this title in addition to the local comprehensive program plan which a local educational agency shall make to the State are for programs under the State plan which are competitive;

(12) sets forth procedures to be used by the State to eliminate unnecessary paperwork and duplication of informational requests in regard to local educational agency applications, evaluations, and reporting;

(13) provides due process procedures to be taken by the State in regard to a local educational agency which has failed to develop or implement a comprehensive program plan, including due process procedures for withholding of funds;

(14) provides a local educational agency appeal process within the State for any local educational agency which is dissatisfied with the State's action with respect to the State's compliance with substantive and procedural provisions of the Act.

SUPPLEMENTAL GRANTS

SEC. 1247. (a) The Commissioner shall make a grant, in accordance with the provisions of this section, to any State selected to participate in the demonstration program authorized by this title. The amount of the grant that each State shall receive for each fiscal year under this section shall be 10 per centum of the aggregate amount allotted to the State under section 1242 for the fiscal year preceding the fiscal year for which the determination is made, except that for fiscal year 1980 such maximum amount shall be equal to 10 per centum of the aggregate amount received by such State in fiscal year 1979 for the programs described in parts A, B, and C of this title. However, no State shall receive less than $300,000.

(b) The Commissioner shall pay to each State having an approved comprehensive State plan the amount to which the State is entitled under this section. The funds paid under this section may be used for any programs described in parts A, B, or C of this title.

(c) Funds received by a State under this section shall be distributed to local educational agencies in the following manner:

(1) Fifty per centum of such funds shall be distributed to the local education agencies within the State according to enrollment.

(2) Fifty per centum of such funds will be distributed to local education agencies according to criteria set forth in the comprehensive State plan required in section 1246.

(d) If the sums appropriated for any fiscal year for making payments to States under this section are not sufficient to pay in full the amount to which a State is entitled under this section for such fiscal year, the amounts which all States may receive under this section for such fiscal year shall be ratably reduced. In case additional funds become available for making such payments for any fiscal year during which the preceding sentence is applicable, such reduced amounts shall be increased in the same basis as they were reduced.

(e) There are authorized to be appropriated for fiscal year 1980 and for succeeding fiscal year ending prior to October 1, 1983, in addition to any amount reserved pursuant to section 1241, such sums as may be necessary to carry out the provisions of this section.

FEDERAL ADMINISTRATION

SEC. 1248. (a) The consolidated program authorized by this Act shall be administered

by a separate identifiable administrative unit to be designated within thirty days after the date of enactment of this Act by the Commissioner.

(b) The Commissioner shall establish procedures to eliminate all unnecessary paperwork in regard to information required of State and local educational agencies.

(c) The Commissioner shall establish procedures for approval of State plans submitted in accordance with section 1246 of this Act. In exercising his authority under this section, the Commissioner shall apply only the provisions of this Act.

(d) The Commissioner shall establish procedures to permit a local education agency to appeal to the Commissioner a State's final ruling on an appeal to the State by that local education agency under clause 14 of section 1246.

(e) Requests from State educational agencies for information concerning legality of State actions under this Act shall be answered by the Commissioner of Education within 45 days.

MONITORING AND TECHNICAL ASSISTANCE

SEC. 1249. (a) The Commissioner shall define the criteria which State monitoring activities required under Section 1246(5) shall meet. These shall include criteria to determine—

(1) the extent to which the programs described pursuant to section 1246(2)(A) have been implemented;

(2) the appropriateness and effectiveness of services provided to the individuals identified pursuant to the requirements of section 1246(2)(B); and the effectiveness of the procedures established pursuant to the requirements of all other subsections of section 1246.

(b) The Commissioner shall conduct annually such monitoring programs in each State selected to participate in the demonstration program authorized by this title as he deems appropriate. The monitoring program authorized by this section shall include—

(1) review of the development of the comprehensive State plan for compliance with the provisions of this title.

(2) review of implementation of programs for conformity with this title and with the comprehensive program plan.

(3) review of the monitoring activities of the State for compliance with subsection (a) of this section. Each State shall be notified in advance of monitoring visits. (c) Whenever as a result of monitoring activities conducted pursuant to this section, the Commissioner identifies areas of noncompliance, the Commissioner shall establish procedures with the appropriate State agency designated under section 1244(a)(1) for the necessary modifications.

(d) The Commissioner shall provide advice, counsel, and technical assistance upon request of State and local educational agencies.

(e) Monitoring activities carried out by the Commissioner or the State education agencies shall not require additional paperwork of the agencies under review.

EVALUATIONS

SEC. 1250. (a) The Commissioner after consulting and with the assistance of State agencies designated pursuant to section 1244(a)(1) shall prepare and design a model for evaluation of program effectiveness which will be consistent with the purposes of each program described in parts A, B, and C of this title. Evaluation of local educational agency programs should focus on the services provided for students, the number of students served by each program, and the effect or results of such services.

(b)(1) Each State participating in the demonstration authorized by this title shall be responsible for the use of that model in program evaluation of the demonstration authorized by this title. Such evaluation shall involve participation by local educational agencies of that State.

(2) An evaluation report consistent with the procedures established pursuant to this section and the State comprehensive plan shall be prepared annually by each local educational agency and submitted to the State agency designated pursuant to section 1244(a)(1).

(3) The annual State agency evaluation report prepared pursuant to this subsection shall be submitted to the Commissioner on such date as the Commissioner shall establish. The Commissioner shall analyze the State evaluations received under this paragraph and shall, not later than March 1 in the year succeeding the year in which the evaluations are submitted, prepare and submit to the Congress a report on such evaluations.

EVALUATION OF THE DEMONSTRATION

SEC. 1252. (a) The National Institute of Education shall undertake a thorough evaluation and study of the effectiveness of the reorganization and consolidation authorized by this title. Such evaluation shall include a comparision of the administration of Federal education funds according to the requirements of this title with the administration of those funds under applicable statutes prior to the consolidation.

(b) For purposes of this comparison, the Institute shall collect data from both those State agencies operating under the demonstration, and from a representative sample of LEAs within those States.

(c) The study required by this section shall include—

(1) an examination of the administrative burden at the State and local levels, to include an assessment of the extent to which operation under consolidation reduces duplication of effort and unnecessary paperwork;

(2) an examination of changes in the decision-making process for local program implementation, including the effect of the demonstration on the degree of coordination between and among Federal programs and local education services;

(3) an analysis of changes in the services provided to target populations, including the extent to which services shift among target groups or changes in the quantity and quality of services for particular target populations;

(4) the effects of the demonstration on the composition of target populations;

(5) the effects of the demonstration on the ability to monitor and evaluate the effectiveness of programs for separate target groups;

(6) the effects of the demonstration on state and local jurisdictions in relation to distribution of educational funds based on fiscal capacity, tax effort and educational need; and

(7) findings and recommendations with respect of (1)-(6) above.

(d) The Institute shall make an interim report to the President and the Congress not later than December 31, 1981 and shall make a final report thereto no later than 12 months after the date of submission of such interim report on the result of its study conducted under this section. Any other provision of law, rule, or regulation to the contrary notwithstanding, such reports shall not be submitted to any review outside the Institute before their transmittal to the Congress, but the President and the Commissioner of Education may make to the Congress such recommendations with respect to the comments of the reports as each may deem appropriate.

(e) The Institute shall submit to the Congress, within 120 days after enactment of this title, a plan for its study to be conducted under this section and shall not initiate research proposed to be conducted under that plan until 30 legislative days after such submission.

(f) There are authorized to be appropriated $500,000 for FY 1979, $2,000,000 for FY 1980, 1981, and 1982, and $500,000 for FY 1983 to carry out the provisions of this section.

ENFORCEMENT

SEC. 1253(a) (1) No payment may be made under section 1241(b) to any State that has failed to submit a comprehensive State plan as required by section 1244(a)(4).

(2) In the case of any State that has submitted a plan, if the Commissioner, after reasonable notice and opportunity for a hearing to the State, finds that the comprehensive fails to comply with the requirements of section 1245 and 1246, or the State has failed substantially to comply with any provision of that plan or parts A, B, or C, or has failed to inform the Commissioner of any substantial failure to comply with any provision of that plan or those sections, the Commissioner shall—

(A) reduce the amount otherwise payable to the State under section 1241(b) until he is satisfied that there is no such failure, but not in excess of 5 per centum of the amount payable to the State, or

(B) make no further payments to the State under section 1241(b) for all or any part of such funds until he is satisfied that there will no longer be any failure of the plan to comply with the requirements of sections 1245 and 1246.

(3) In the case of any State that has submitted the plan required by section 1244(a)(4), if the Commissioner after reasonable notice and an opportunity for a hearing to the State—

(A) disapproves, or withdraws his approval, of the procedures submitted under section 1244(b)(3), or

(b) finds that the State has substantially failed to comply with the procedures approved under section 1244(b)(3),

the Commissioner shall notify the State that further payments will not be made to the State under section 1244(b) until he is satisfied that there will no longer be any such failure to comply, and until he is so satisfied he shall make no further payments to the State.

(b)(1) If any State is dissatisfied with the Commissioner's final action with respect to any action taken under this section, the State may within sixty days after notice of that action, file with the United States court of appeals for the circuit in which the State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

(2) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(3) Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

(c) The Secretary and the Comptroller General of the United States, in the exercising of their authority under section 434(a)(2) of the General Education Provision Act may only audit activities undertaken with-

in the State with funds provided under this Act, and such other activities as are necessary to verify compliance with this Act.

CONSTRUCTION

SEC. 1254. Funds paid to a State under this Title shall be available for construction of any facilities for which funds would have been available for any program consolidated in this Title. For the purposes of this Title, the term "construction" means the erection, acquisition, alteration, remodeling or improvement of facilities, including the acquisition of land necessary therefor, and the cost of construction includes the cost of achitect's fees.

CIVIL RIGHTS REQUIREMENTS

SEC. 1255. (a) Funds made available under this Title shall be subject to title IV of the Civil Rights Act of 1964 (42 U.S.C. 1691–1686), title IX of the Education Amendments of 1972, and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

(b) Whenever the Secretary of Health, Education, and Welfare determines, pursuant to the procedures applicable to any of the provisions in subsection (a) of this section, that one or more local educational agencies in a State are not in compliance with any of those statutory provisions, and none of the funds provided to that State under this title shall be made available to such local educational agencies during the period of non-compliance; and the allotment to that State under section 1241 for that period shall be reduced by the amount of such funds received by those districts in the fiscal year prior to the year in which determination of noncompliance was made.

PARTICIPATION OF NONPUBLIC SCHOOL CHILDREN

SEC. 1256(a) The State educational agency or agencies designated under section 1244 (a)(1) of any State and local educational agencies receiving a grant under this title shall provide that—

(1) to the extent consistent with the number of—

(A) children enrolled in private nonprofit elementary and secondary schools who reside in area of the State eligible to be served by programs assisted under this title, and

(B) children in Indian Tribal elementary and secondary schools in the State, who have need for the services provided by those programs.

Such children shall be given, after consultation with the appropriate private school officials, an opportunity to participate, on an equitable basis, in activities assisted under this Act; and

(2) title to and control of funds received under this Act and other property derived therefrom will remain in one or more public (including Indian Tribal government) agencies.

(b) The means by which the requirements in subsection (a) will be met within a State shall be set forth in the plan of the State adopted under section 1246.

(c) If a State is prohibited by law from providing for the participation of children enrolled in private nonprofit or Indian Tribal elementary and secondary schools or if the Commissioner determines, after affording notice and opportunity for a hearing, that a State has substantially failed to provide for such participation, he shall waive the requirements of subsection (a)(1) and he shall arrange, by contract or otherwise, for such children to receive, on an equitable basis, services similar to those provided under this title to public school children in the State. The cost of providing those services for any fiscal year shall be paid from the allotment of the State under section 1242.

DEFINITIONS

SEC. 1257. For the purpose of this title—

(1) The term "adult basic education" means education for adults above the age of sixteen whose inability to speak, read, or write the English language constitutes a substantial impairment of their ability to get or retain employment commensurate with their real ability.

(2) The term "area vocational education school" means any such school as defined in section 195(2) of the Vocational Education Act of 1963.

(3) The term "educationally deprived children" refers to those children deemed to be eligible under Section 103 of the Elementary and Secondary Education Act of 1965.

(4) The term "free appropriate education" means special education and related services which have been provided at public expense without charge and under public supervision and which meets the standards of the State education agency.

(5) The term "gifted and talented children" is used as defined in section 801(1) of the Elementary and Secondary Education Act of 1965.

(6) The term "handicapped children" means the children defined in section 602(1) of the Education of the Handicapped Act.

(7) The term "local education agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. Such term also includes any other public institution or agency having administrative control and direction or a public elementary or secondary school.

(8) The term "migratory children" refers to children who are eligible under section 122 of the Elementary and Secondary Education Act of 1965.

(9) The term "special education and related services means the programs defined in section 602(16) and (17) of the Education of the Handicapped Act.

(10) The term "State" includes, in addition to the several States of the Union and the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(11) The term "State educational agency" means the State board of education or other agency or officer primarily responsible for the State supervision for public elementary and Secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

(12) The term "vocational education" means the programs defined in section 195 (1) of the Vocational Education Act of 1963.

(13) "Program of Bilingual Education" means the programs defined under section 703(a)(4) of the Elementary and Secondary Education Act.

(14) "Children and limited English language proficiency" refers to children who are eligible under section 703(a)(1) of the Elementary and Secondary Education Act.".

(15) The term "excess costs" means costs directly attributable to programs which exceed the average per pupil expenditure for the local education agency for pupils in the grade or grades included in such programs.

Mr. DOMENICI. Mr. President, I am certain that the managers of the bill recognize the amendment I sent to the desk, because it looks far more like a new education bill than an amendment. As a matter of fact, it is. I sent it to the desk because so many of my colleagues have helped in the development of this optional consolidation method which is envisioned by the bill. I feel constrained today to spend a little time talking about it, since we have all worked so hard on it. A number of my colleagues have given their views to me in writing today, to submit for the RECORD. Therefore, I may take considerable time. The committee members and the staff members will understand that I have spent a great deal of time trying to find some solutions to the problems I found in the field when I spoke to the administrators of our Federal aid to public education programs.

Basically, they are genuinely concerned with the increasing redtape, the growing relationship of detail between the U.S. Government, HEW and the independent school districts around the country, and with the States and their demands of education.

As the committee knows, the support for this measure is manifold. A great number of educators support it. The State legislatures and their associations around the country support it. I want to talk about it a little, so that we might have a dialog and see where we are.

Mr. President, on June 29, 1977, I introduced legislation on behalf of myself and my esteemed colleague Senator HENRY BELLMON from Oklahoma. Other cosponsors included Senator JENNINGS RANDOLPH from West Virginia, Senator WARREN MAGNUSON and Senator HENRY JACKSON from the State of Washington, Senator SAM NUNN from Georgia, Senator BOB PACKWOOD and Senator MARK HATFIELD from Oregon, Senator S. I. HAYAKAWA from California, Senator JOHN HEINZ from Pennsylvania, Senator HARRISON SCHMITT of New Mexico, Senator EDWARD ZORINSKY of Nebraska, Senator RICHARD LUGAR of Indiana, Senator STROM THURMOND of South Carolina, Senator CHARLES PERCY of Illinois, and the late Senators James Allen from Alabama and Lee Metcalf of Montana.

This legislation, S. 1780, is designed to reorganize, simplify, deregulate, and consolidate certain elementary and secondary education programs in order to provide improved State and local administration of the programs. Its purpose is to reorganize and consolidate a number of Federal education programs. Our goal in developing the bill was to improve State and local administration of Federal education programs as a means of improving the services to children reached by those programs.

The act permits greater flexibility in the use of funds, simplifies the categorical requirements, and places greater decisionmaking responsibility at the point of service delivery; that is, the local and State education agencies. Programs are reorganized and consolidated by educational functions and are specificallly targeted to the special needs of populations to be served. Participation in the consolidation is optional with States choosing either to administer programs according to this act or according to the current categorical legislation. It should be clear, therefore, that we do not offer a block grant in the customary usage of that term, but rather a carefully shaped consolidation of Federal programs which will insure more flexibility at the State and local levels while protecting the purposes and populations originally identified by the Congress.

Our approach simplifies administrative requirements and limits the data and documents which the Federal Government can require of States, and that States can require of local education agencies.

A multiyear program cycle for needs assessment and planning, with a single consolidated comprehensive program plan will lead to improved services for children and will allow for the coordination of Federal programs with each other, and with similar programs provided by State and local resources.

At this time I ask unanimous consent to insert in the RECORD a detailed outline of the bill's provisions and what we expected to accomplish in each section.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF S. 1780

Title I encompasses the special needs of high cost population. This title identifies three such populations and targets funds to each of the three. Part A of title V consolidates five for educationally disadvantaged children into one grant award. Funds derived from title I, parts A and B of the Elementary and Secondary Education Act of 1965 will flow through to local education agencies according to the low income formula established in part A of title I of the 1965 Act. Once the funds are in the local school district, they must be used for educationally deprived children. The local agency will determine how and where such services will be provided in the comprehensive planning process. Requirements for use of the funds include comparability, a prohibition against supplanting which applies to the entire act, and maintenance of effort which is applied by title to the entire act. Programs for migrant children, neglected and delinquent children and Follow Through programs are also included in this part.

Part B consolidates four programs which serve handicapped children. The provisions of this part guarantee the right of a handicapped student to a free appropriate education and maintain procedural safeguards which protect those rights. All funds in this part must be spent on excess costs for handicapped programs.

Part C consolidates three programs which provide services to persons of limited English-speaking proficiency. States can distribute the funds to locals on either a formula or a project grant basis depending on the nature and needs of the State's population of such children.

Title II, part A consolidates all vocational education programs. All funds pursuant to this part must be spent for vocational education, and a minimum of 75 percent of the funds must be distributed to local school districts or area vocational schools. Title II, part B provides for adult education.

Title II, part C provides a bonus for local education agencies which jointly fund training programs with a prime sponsor under the Comprehensive Employment and Training Act. The purpose of this provision is to provide an incentive to coordinate services available to the same clientele.

Title III consolidates programs that deal with specific curricular areas. Part A libraries and learning resources flows to the local education agencies and must be used to purchase equipment and materials. Part B funds will be distributed to local education agencies based on criteria developed in the comprehensive State plan. This part, which consolidates 12 different curriculum programs, will allow States and local school districts to determine priorities within the curricular areas which have been identified for special emphasis.

Title IV contains administrative and program requirements including prvision for a single needs assessment, a comprehensive four year state plan, and provision for program monitoring and fiscal auditing.

Mr. DOMENICI. Mr. President, it may be worthwhile to review the influences which prompted this proposal. Over the years, the Federal Government has focused its educational assistance to the States on the provision of educational opportunities for those with special needs. The Federal role has come to be one of identifying problems and possibilities which ordinarily do not receive sufficient attention by the Nation's educational establishment, and then providing the means and direction to address these needs. At the time of their initiation, many of these legislative efforts were unquestionably useful and served to insure that efforts were undertaken which were much needed. However, with the passage of time, and the proliferation of numerous and sometimes implicative categorical grant programs, other consequences have emerged which counter the appropriateness of such a specifically directed Federal effort. The Federal role has produced piecemeal legislation which now adds up to a crazy patchwork quilt of programs, each with varying requirements, guidelines, program cycles, reporting obligation, eligibility standards, and regulations which enormously confuse and confound the daily job of educating the Nation's children.

The reorganization which we propose will preserve the original Federal role while simplifying the Federal education effort through consolidation of 32 programs into 8 programs, and by streamlining administrative requirements.

S. 1780 was written with the help of educators and those interested in education from around the country. In initiating the legislation, Senator BELLMON and I sought out the opinions and help of hundreds of persons with knowledge and expertise in education, particularly those with local or State experience in Federal education programs. A draft of the bill was introduced in 1976 for the sake of discussion, in order to expand the already large number of persons involved in the open process of developing this bill.

Many educators from around the country have endorsed the measure, and several national organizations have expressed enthusiastic support for the concept, including: The National Conference of State Legislatures, the National Elementary School Principals Association, the National School Boards Association, the Council of Chief State School Officers, the Association for Supervision and Curriculum Development, the National Association of Secondary School Principals, and the American Association of School Administrators.

In May of this year an amendment was offered in the Human Resources Committee on behalf of myself, Senator BELLMON, and the bill's cosponsors Senators RANDOLPH and HAYAKAWA, to incorporate the principles contained in S. 1780 into a six-State demonstration project. That amendment narrowly failed in committee.

The amendment I have introduced today provides for such a six-State demonstration. The support for this proposal is quite strong around the country. I feel certain the votes exist in the Senate to pass this amendment today. I am concerned, however, since no similar provision exists in the House bill, that such a vote will produce a hollow victory, as the amendment would certainly be dropped in conference.

Mr. President, it has never been my intention to fight the committee on this issue. I have spent many, many hours on this bill, and I believe my proposal to be eminently sound from an educational point of view and in keeping with the congressional intent that created the Federal role in education. I have been deeply disappointed that the leadership of the committee did not give this bill, over the past year, the attention its cosponsors and I believe it deserves.

However, I am most pleased and delighted with recent committee action. At the suggestion of my esteemed colleague from New York, Senator JAVITS, and the respected committee chairman, Senator WILLIAMS, the committee determined it would undertake a major study of the proposal to demonstrate the reorganization and simplification contained in S. 1780.

I have seen a preliminary outline of the proposed study which Chairman WILLIAMS' staff has prepared. I am most pleased with the recommendations for this objective study which will be carried out by educational testing services and the Congressional Research Service. I would like to thank Senators WILLIAMS and JAVITS, and the committee for their efforts to insure that this innovative approach to Federal education programs receives the attention and consideration it deserves.

At this time, I would like to pose several questions to the managers of the bill and to the chairman of the Senate Human Resources Committee.

Mr. President, it is with a great deal of remorse that I find myself in a position in which the committee did not see fit to adopt this optional method. However, there are some provisions in this bill that I would like to discuss with Senator PELL and Senator JAVITS today.

I hope our discussion will insure an indepth evaluation of the approach contained in S. 1780. I want to generate discussion with a view toward a reconsideration of the idea next year, even though we are authorizing a 5-year bill today.

My reluctance in voting up and down on this amendment is as follows:

First, it is indeed a completely different approach from that which we have been following for years. I have great respect for the committee. They saw fit, after great deliberation, not to implement it, even as an optional system, this year. That is first.

Second, for some reason, the administration opposes this measure, even as an experiment or an optional approach involving five or six States. I do not understand that objection on the part of the administration. In many respects this demonstration would have moved our aid to education in the direction that the President of the United States would

like—that is, simplified, easier to administer, leaving as much decision as possible at the local level.

I think this would have been an excellent tool to measure this approach against the ever-growing categorical grant program that is before us today.

Mr. President, I ask unanimous consent to have printed in the RECORD statements by the Senator from Georgia (Mr. NUNN) and the Senator from Oklahoma (Mr. BELLMON), since they diligently helped with this new approach.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. NUNN. It is a pleasure for me to join with Senators BELLMON and DOMENICI in offering an amendment to the Elementary and Secondary Education Act that would authorize a six-State demonstration project for the consolidation of Federal educational programs. I am a primary sponsor of the legislation authorizing this optional program which these two distinguished Senators introduced last year. I have long felt that this optional consolidation approach would provide much needed flexibility in our Federal assistance programs to public education. I believe that the establishment of a six-State project on a pilot basis would give educational officials at the State and local levels, teachers, parents, the administration, and Congress the data needed to truly assess the benefits of this Congress. I have confidence that, given the opportunity, State and local educational agencies could more effectively utilize Federal funds without undue paperwork, technicalities, conflicting goals, and the general frustration that is associated with the Federal bureaucracy.

I feel that the primary purpose of Federal involvement in public education is welcomed by most people who are interested in equal educational opportunities for all our citizens. Certainly, Federal educational programs have had a tremendous impact on the efforts to bring quality education to our citizens with special needs. Unfortunately, this Federal participation in public education all too often results in Federal dominance.

Such dominance makes public education remote, with much of the decision-making powers removed from the hands of those who know the community and could more accurately address its needs. Instead of predominantly providing educational services to the individual region or community, the state and local educational officials must constantly address the never ending task of completing forms, meeting eligibility requirements and complying with exacting and often conflicting guidelines.

The amendment which we are offering today is based upon the careful deliberations of citizens from every segment of the educational community. This measure incorporates the suggestions and reflects the concerns of those who work with education on a daily basis. In formulating this bill, the problems of the past have been analyzed, and hopefully, the pattern for future Federal educational participation will be established.

My distinguished colleagues from New Mexico and Oklahoma have discussed the provisions of this amendment, and I do not feel that further explanation is needed. Mr. President, I would like to reiterate, however, the need for reform in our existing educational programs. It is my strong hope that Congress will act favorably this year on the proposed Department of Education Act which I feel will streamline the administration and end the fragmentation of our Federal education programs. I also believe that a cabinet-level Secretary of Education will provide Congress and the American people with a highly visible, responsible, Federal official who can be held accountable for the successes or failures of educational programs and policies at the Federal level.

However, this Department, in and of itself, will not solve all our problems. We must take further steps to insure that the primary responsibility for the education of our children will remain in the appropriate hands at the State and local levels, and not be dominated by Federal influence.

I believe that this amendment offers an opportunity to assess this proposal that could massively reform the structure of our Federal educational programs. Our State and local education agencies deserve the chance to develop their capabilities, to have flexibility in making decisions which affect their school and to respond to the concerns of the citizenry who foot the bill for public education. Our Nation's children also deserve to have educators who can devote more time to the learning process, who can focus on long-range educational goals without being blinded by a maze of paperwork and conflicting requirements, and who can make sensible adaptations to the specific needs of the area's citizens. This amendment would give six States the opportunity to pursue a new relationship with the Federal educational bureaucracy. I believe that this new relationship will be rewarding to us all.

I urge my colleagues on the Senate Education Subcommittee to give this proposal their most careful attention in the coming months. I fully believe that, after careful analysis of the goals and opportunities which this legislation presents, my colleagues will agree that this proposal offers sound and workable alternatives for Federal involvement in the education of our Nation's youth.●

● Mr. BELLMON. Mr. President, Senator DOMENICI's idea of an optional grant program for education represents a sound and positive approach to a very difficult problem. I am pleased to have been one of the original cosponsors of this legislation, which has received so much favorable comment.

The logic of consolidation is compelling. It provides a vehicle for the simplification and decentralization of administration of Federal programs. The bureaucratic burden under which educational programs usually suffer is thereby lessened. State and local educational agencies, rather than remote regional or Washington bureaucracies, are responsible for the basic decisions and program actions with which they must live. Instead of having a multitude of categorical programs, each with its own funding and administrative peculiarities, programs may be grouped logically for administrative ease.

Currently, the mass media are examining the bases for the failure of public education in many situations. It seems worthwhile to point out that we have increasingly given to school administrators, school boards and teachers specific responsibilities for correcting social ills which cumulatively may exceed the capacity of the institution to deal with. One consequence is that compliance with the many, often overlapping and duplicative, requirements imposed by the Federal Government have crowded out some of the most essential functions of education. It is no wonder that school officials complain they can do little else but satisfy Federal requirements. A step in the direction of redressing this imbalance can be made through the amendment Senator DOMENICI is offering today.

Consolidation represents a potential turning point in the funding of Federal programs in education. For more than two decades, Federal Government initiatives created many programs of educational aid to the States and local education agencies until we now have more than 100 separately authorized program activities in the Office of Education. Today, there is Federal Government support for about 7 percent of the total cost of elementary and secondary education. Most of that support flows through many narrow categorical programs. It is distributed through the States to local education agencies using formulas that contain such factors as school age population and income levels of students' families. As responses to national problems, these remedies have grown into a web of administrative regulations and paperwork, causing school systems to devote more time and manpower to meeting Federal requirements and completing necessary paperwork. School administration has become more a matter of satisfying rigid requirements and shouldering administrative burdens than a creative process for insuring quality education to meet local needs and objectives.

Those who may be concerned that the consolidation approach will serve to reduce the Federal commitment to education need not worry. No State which exercises this option will lose money. Nor should there be any concern that consolidation will be uesd as an excuse to avoid responsibility for the special educational needs of particular groups, such as the disadvantaged and the handicapped. Special "hold harmless" and maintenance of effort requirements will ensure that these obligations will continue to be met. Local educational agencies will be protected by provisions for flow-through of money. It will not be necessary for States to enact special legislation in order to exercise this option.

This approach seeks to group programs into clusters which are logically related in order to create several blocks. Flexibility within each category will allow States and localities to fashion educational programs more nearly in accord with needs than is now possible under categorical programming.

Consolidation will undoubtedly create anxieties among supporters of specific categorical grant programs. If a program is a legitimate priority within a State, it will undoubtedly continue to receive funding commitment under the consolidated approach. The proliferation of small categorical programs has caused local education agencies to expend, in some cases, more time and effort applying for funds than the funds were worth. Consolidating the programs into a single competitive process at the State level will significantly reduce the cost in man-hours.

An important feature of this new legislation will be the requirement of a participatory planning process within each State which chooses to receive its Federal funds in the consolidation grant. The views of interested citizens, constituent groups, local education agencies, units of local government and appropriate State agencies and organizations will be solicited in the process of developing a comprehensive State plan for the expenditure of this Federal money. The resulting proposed comprehensive State plan will have to be made available to all interested parties, and public comment on the plan accepted. The same publishing and comment requirements will apply to regulations issued by the States. These are powerful remedies for the often unthinking and unresponsive actions of distant bureaucracies.

I strongly support the Domenici amendment, which would open up, on a limited basis, the educational system to new experimentation which can only have the refreshing effect of revitalizing the educational process. I hope this amendment will be accepted as a part of the Elementary and Secondary Education bill.●

Mr. DOMENICI. Mr. President, I should like to ask the floor managers of the bill a couple of questions about this approach.

Am I correct that there is a study provided in this bill, and that it requires completion by the first day of January 1979?

Mr. PELL. That is correct.

I also compliment the Senator from New Mexico on his very real interest in this subject and the eloquent statement he made before the Subcommittee on Education, Arts, and Humanities during its hearings last year.

As the Senator knows, we did not adopt this proposal in the committee in large part because of uncertainties as to its potential impact both on States and the intended beneficiaries of Federal aid programs. However, we did agree to undertake the feasibility study of such a program and issue the report, as the Senator says, by January 1, 1979.

Mr. DOMENICI. I understand, that the study will not be conducted exclusively by HEW but rather by the Educational Testing Service at Princeton and by the Congressional Research Service. Is that correct?

Mr. PELL. That is my understanding.

Mr. DOMENICI. Let me ask either the chairman or the ranking minority member a question. As they know, this effort to simplify programs is of utmost importance to me and obviously to a number of other Senators who sponsored the effort. I wish to be certain that, when this study is completed, it will be considered by the committee. I know that the Elementary and Secondary Education Act is a 5-year bill. However, I am looking for assurances that consideration of this elementary and secondary proposal will not be put off next year on the basis that S. 1753 is a 5-year bill.

Mr. PELL. The Senator has my assurance that that will not be the reason that we would not consider it or act on it. There may be other reasons why we would not act on it.

Mr. DOMENICI. Indeed.

Mr. PELL. But we will not use that as a reason.

Mr. JAVITS. I join in that assurance.

Mr. DOMENICI. I thank the Senator from Rhode Island and the Senator from New York.

I personally feel very, very strongly about the bill. Ultimately, it was going to be an optional system and only six States would be chosen for the experiment. Senators all know that I feel very strongly that this will be one of the most exciting ways to measure the efficacy and capacity of the grant system as to its effectiveness, and to find something to measure it against. It is my hope that the committee will give every consideration to the approach. Obviously, the committee, with its educational expertise, will make improvements and changes. It is my hope that the bill will work its way through the committee process and that it might be reported next year.

Will either the ranking minority member or the chairman once again explain for me and for my many cosponsors how they treated this approach in the bill that is before the Senate?

Mr. PELL. It was considered by us and discussed. As I said earlier we did not incorporate it in the committee bill because we were uncertain of the potential impact both on the States and the intended beneficiaries of the Federal aid program. While program simplification is a laudatory goal we must not allow our concern with sheer simplicity to jeopardize benefits to those individuals, the handicapped, or others, which Congress singled out for special treatment.

Mr. President, I ask unanimous consent to print in the RECORD a letter addressed from the chairman and from the ranking minority member to Dr. Joan Baratz at the Educational Policy Research Institute, and also a document from the Library of Congress on the subject of consolidation of Federal programs.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON HUMAN RESOURCES,
Washington, D.C., August 7, 1978.

Dr. JOAN BARATZ,
Director, Educational Policy Research Institute, Washington, D.C.

DEAR DR. BARATZ: On May 5, 1978, the Committee on Human Resources voted to undertake a Committee study of a modified version of S. 1780, the Optional Educational Simplification Act, offered as an amendment to S. 1753, the Education Amendments of 1978, by Senators Jennings Randolph and S. I. Hayakawa. The Committe committed itself to undertaking this study within a six month period.

Accordingly, we are writing to officially request that the Education Policy Research Institute consider an analysis of the potential impacts of the Randolph-Hayakawa amendment on education programs. We believe that an objective study by an experienced and respected policy research organization would be of great help to the Committee. Our decision in this regard is also supported by Senator Claiborne Pell, Chairman of our Subcommittee on Education, Arts and Humanities, and Senator Robert T. Stafford, Ranking Minority Member of that Subcommittee.

We would appreciate your assistance in undertaking this study and hope that you will forward to us an outline of your approach to the study. We understand that our staff has discussed this matter with you and that agreement has been reached regarding many of the important aspects of the study design.

Your interest in our work is greatly appreciated and it is with great expectations that we look forward to your assistance.

With best wishes,

Sincerely,

HARRISON A. WILLIAMS, JR.,
Chairman.

JACOB K. JAVITS,
Ranking Minority Member.

EDUCATIONAL TESTING SERVICE,
Princeton, N.J., August 11, 1978.

Senator HARRISON A. WILLIAMS,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR WILLIAMS: Joan Baratz, Director of ETS' Education Policy Research Institute has forwarded your request concerning a study of the potential impacts of the Randolph-Hayakawa amendment on education programs. We are pleased to be of assistance to the Committee on this matter.

I am enclosing a suggested work plan prepared by Dr. Baratz and Terry Hartle in cooperation with Committee staff. This study design indicates the scope of activities to be undertaken, the work schedule and the product to be delivered.

We look forward to working with the Committee on this important project.

Sincerely yours,

WILLIAM W. TURNBULL,
President.

Enclosure.

ANALYSIS OF POLICY IMPLICATION OF S. 1780 OPTIONAL EDUCATIONAL AND SIMPLIFICATION BILL OF 1977

(Prepared by Education Policy Research Institute of Educational Testing Service)

During deliberations on S. 1753, the Education Amendments of 1978, the Senate Committee on Human Resources considered a modified version of S. 1780, the Optional Educational and Simplification Bill of 1977, as an amendment to ESEA. The proposed amendment was voted down 8–5. It would have authorized the Commissioner to certify a demonstration consolidation of many federal education programs in no more than 6 states.

The Committee subsequently authorized "a study to determine the feasibility, assets, and liabilities of S. 1780 as a demonstration effort in public education policy" (S. Report No. 95–856, 95th Congress, 2nd Session at 116). A report of the study is to be issued by the Committee "not later than 6 months" following the filing of the report of S. 1753 in the Senate. (S. Report No. 95–1086 at 116). Since Senate Report No. 95–1086 was filed on May 15, 1978, the Committee is expected to issue a report of the study no later than November 15, 1978.

S. 1780, as introduced and as modified, proposes to consolidate several major and minor

federal education programs into three broad categories: special needs programs, vocational programs, and special emphasis programs. Set forth below is a list of existing programs which would fall under each of these categories. This list is not taken from S. 1780, but from the modified version of S. 1780 which was proposed as a new Title XII of ESEA (Reorganization and Consolidation Demonstration Project).

SPECIAL EDUCATIONAL NEEDS PROGRAMS

1. Subpart 1 of Part A of Title I ESEA (LEA grants).
2. Subpart 2 of Part A of Title I ESEA as it relates to state operated programs for: (a) neglected and delinquent children and (b) migratory children.
3. Part B of Title I ESEA (Special Incentive Grants).
4. Part B of the Education of the Handicapped Act (as amended by PL 94-142) (assistance for education of handicapped children).
5. Section 121 of Title I ESEA (programs for handicapped children).
6. Section 403(a)(8)(B) of Title IV ESEA (State plans for libraries, learning resources, educational innovation and support).
7. Title VII of ESEA (Bilingual education).
8. Section 708(c) of ESAA (Special programs and projects—minority children/language barriers/cultural differences).
9. Subpart 3 of Part B of VEA (Program improvement and supportive services).

NOTE: Headstart and Follow-Through were not included in the modified version.

VOCATIONAL EDUCATION PROGRAMS

1. The Vocational Education Act.
2. Section 811 of ESEA (Consumer education).
3. The Adult Education Act.
4. Grants for joint CETA/Vocational Education projects (Section 112 of CETA and VEA).

NOTE: Section 405 of the Education Amendments of 1974 (Community schools) was in S. 1780, but not in the modified version.

SPECIAL EMPHASIS PROGRAMS

1. Part B of Title IV ESEA (Libraries and learning resources).
2. Part C of Title IV ESEA (Educational innovation and support).
3. Section 403 of Education Amendments of 1974 (Metric education).
4. Section 404 of Education Amendments of 1974 (Gifted and talented).
5. Section 406 of Education Amendments of 1974 (Career education).
6. Section 409 of Education Amendments of 1974 (Arts and education).
7. Title V of HEA (Teacher Corps).
8. Title VII of Education Amendments of 1974 (except Sections 721 and 722) (National Reading Improvement Program).

NOTE: Section 408 of the Education Amendments of 1974 (Women's education equity was in S. 1780, but is lined out of our copy of the modified version). Other provisions in S. 1780, but not in modified version, include: Environmental Education Act, the Alcohol and Drug Abuse Education Act and Title IX of ESEA (Ethnic heritage).

In short, programs to be consolidated are from several major pieces of legislation: ESEA, VEA, ESAA, HEA and possibly CETA.

You have requested an analysis of the proposed consolidation that would examine both the broad issue of education program consolidation and specific issues related to the feasibility of a demonstration consolidation. The study would identify the implications of S. 1780 for federal education policy.

In our view such an analysis requires four separate activities:

1. Review of existing consolidations
2. Identification of policy issues.
3. Legal research on affected programs, and
4. Analysis of the feasibility impact, and policy implications of a demonstration consolidation.

The following paragraphs briefly review the analysis to be undertaken in each of these tasks.

Previous consolidation efforts. In recent years Congress has enacted several block grant programs that consolidated a number of categorical programs. These grants were designed to improve economy and efficiency, allow more administrative and policy decentralization, and strike a balance between the achievement of national purposes and the enhancement of recipient discretion. These objectives are reflected in the consolidated grants established by the: Comprehensive Employment and Training Act, Housing and Community Development Act, 1974 Amendments to the Social Security Act, the Vocational Education Act, and Title IV (Parts B and C) of the Elementary and Secondary Act.

Because each of these programs has been in place for several years, valuable lessons can be learned from a comparative analysis of the history, implementation and current operation of these grants. We propose to review these programs to determine how effective they have been in meeting their objectives. In addition, this review will identify policy issues that need to be considered in the consolidation of additional educational categorical programs.

In performing this review we will rely on a comprehensive literature search and interview congressional policymakers, federal and state program officers and interest group representatives.

Policy issues. Consolidating categorical programs portends significant administrative and financial changes for the federal role in education. Among the primary issues congressional leaders must address in considering grant consolidation are:

How will federal education goals be affected by a shift from categorical to a consolidated block grant?

How will the states allocate the consolidated money to local districts?

What choices can school administrators be expected to make given additional flexibility?

How will a consolidated grant affect state and local program administration?

Should expenditure constraints (e.g., maintenance of effort supplanting, comparability) provisions be included in consolidated grants?

What administrative provisions should be included to assure progress toward Federal goals that yet allow state and local level administrative flexibility?

What Federal and other monitoring and accountability provisions should be included?

Who will have responsibility for evaluating the impact of consolidated grant money on target populations?

In this study we will identify the policy issues that are raised by grant consolidation proposals such as S. 1780. The emphasis will be on raising all major issues that need consideration and presenting a range of potential solutions.

Legal analysis. To properly analyze the impact of S. 1780, it is necessary to review the legal requirements for each affected program. Among the issues that need to be considered are: (1) target populations/intended beneficiaries; (2) eligible applicants; (3) funds allocations provisions; (4) eligibility provisions; (5) planning/program design provisions; (6) evaluation requirements; (7) coordination requirements; (8) parent involvement/advisory council provision; (9) requirements for federal and state administration (e.g., application approval, monitoring, technical assistance, auditing and audit resolution, withholding and suspension, data and reporting requirements, and other accountability provisions; (10) requirements for local administration, e.g., recordkeeping and reporting, evaluation, etc. This analysis should also extend to the General Education Provision Act (GEPA).

The time and cost of investigating each program in such detail would be prohibitive. As a way of identifying the numerous legal issues that need to be addressed we will analyze the impact of S. 1780 on a single program, Title I of ESEA. This will, of course, require an analysis of GEPA as well as Title I and S. 1780.

Given that the Education Amendments of 1978 may result in significant changes in Title I, it will be inappropriate to begin this analysis until the Congress has completed its revisions of ESEA. If the Conference Committee does not complete its work in a timely fashion it may be difficult to meet the November 15 deadline for this activity.

Feasibility and impact study. A final component of this study will be to assess the feasibility and impact of a demonstration project to implement a consolidated block grant. This activity will require an analysis of the financial, administrative and political issues that would emerge in an experimental block grant program. Among the issues that need to be addressed are:

What incentives should be available to states who are willing to participate?

How long should the experimental program run to provide meaningful results?

What planning, monitoring and evaluation requirements will exist in experimental states?

What data will be necessary to evaluate the demonstration program at the federal and state levels?

What criteria should be used to select participating states?

What will be the relationship of OE program monitors to state and local officials participating in the experimental programs?

What are likely impacts or individual beneficiaries in demonstration states?

These and other issues that must be resolved before an experimental social program can be attempted will be identified and addressed.

Work Plan. This study will be undertaken by the Education Policy Research Institute (EPRI) of the Educational Testing Service (ETS). The study will be directed by Joan C. Baratz, Director of EPRI, and Terry W. Hartle, Associate Research Scientist. The EPRI staff members will work closely with the staff members of the Senate Human Resources Committee in undertaking this research.

A draft final report will be submitted to the Committee by November 15, 1978 for review and comment. The final report will be submitted by January 1, 1979.

Attention: Franklin Zweig.

From: Education and Public Welfare Division.

Subject: Assistance to the Committee Concerning Pilot Consolidation of Federal Programs.

In response to our conversation and your request for a discussion of the ways in which CRS could work with the Committee in the conduct of the study concerning pilot consolidation of funding for Federal elementary and secondary education programs, the following activities seem to be most appropriate for CRS:[1]

---

[1] Even though CRS has identified the resources required to conduct the following activities, the discussion must be considered as tentative because final clearance for certain budgetary items and operational procedures has not been received as of the date of this memorandum.

Activity 1. Issues Paper. The term consolidation means joining or bringing together, and the act of doing so results in the loss of the separate identification that characterized the previous units. Several issues related to changes in Federal, State, and local roles and functions will in all likelihood be involved in consolidation of education program. CRS suggests that an issues paper will be an important component in any serious discussion of the relative merits of program consolidation in education. The purpose of this paper will be to identify and discuss the issues that relate to the general concept of program consolidation of education programs with special emphasis on the unique delivery system for elementary and secondary education in America and the traditional role of the Federal Government in education programs.

Detailed issues have not been identified; however, the major issue areas will include the following—programmatic thrust, fiscal accountability, target populations, and administrative structure. Criteria for inclusion of an item as an issue will include Federal legislative requirements, program delivery system, and the interests of reference groups.

Activity 2. Background Paper on Previous Consolidation Efforts. CRS has completed previous projects on grant consolidation programs enacted by the Congress. These materials could be revised and presented in a format of value of this effort. This historical discussion of previous consolidation legislation would provide the Committee with a review of the evolution of previous consolidation efforts. For the past several years, the Advisory Commission on Intergovernmental Relations has been doing research in this area, and these efforts will provide much of the basic material for the paper.

Activity 3. Cross Matrix Analysis of Programs to be Consolidated. Since the proposed legislation provides for consolidation of several programs and since a consistency or universality in structure and program operation does not exist among programs, CRS suggests that each program be analyzed utilizing a pre-established set of common criteria. (Examples of such criteria include fiscal prerequisites such as maintenance of effort, comparability, and supplemental use of Federal funds; funding formulas, target population; program planning and evaluation procedures; parental and community participation; pupil and LEA eligibility requirements; and compliance submission.) This structured analysis would permit a visual comparison of the manner in which all involved programs would be affected on a selected set of criteria.

Activity 4. Symposium. The concept of program consolidation is not new and there is a reservoir of experience from previous legislation that has resulted in the consolidation of various programs. A few of these consolidations have been in effect sufficiently long for various amendments to have been enacted. CRS suggests that a symposium be convened consisting of the scholars who have studied the programs and are familiar with the concept, the congressional staff persons from the authorizing committees, and representatives of those field groups that might be affected by the program. (Further detail concerning this activity is contained in the attached prospectus.)

CRS would provide coordination and direction for the symposium; responsibility for logistics would be assigned to a private contractor. Invited scholars would provide the position papers for the symposium, and a transcript of the discussion would be made. These should provide additional insights into the problem beyond those contemplated in the first three activities proposed for CRS and the work to be done by the Education Policy Research Institute (EPRI). It is anticipated that CRS would reproduce the commissioned papers in the event that the Committee did not choose to include them in the study report.

Activity 5. Field Interviews. In addition to EPRI's plans to conduct interviews with various policy and bureaucratic persons in Washington, CRS staff members are of the opinion that interviews should also be conducted with staff members of State and local educational agencies, State legislators, and educational reference groups in several States. Even though the national spokespersons may favor the idea and the concept may appear to have support at the State and local level, in-depth State and local interviews might provide additional insights into potential implementation problems and school-level concerns. It is possible that the Committee could arrange for a cooperative effort in which CRS would design and field test the interview guide and the General Accounting Office (GAO) would conduct the field interviews. Depending upon capacity to meet the schedule, either CRS or GAO would analyze the data and prepare the report. The findings from this process should provide additional information that would be of value as consideration is given to program consolidation.

Activities for Educational Policy Research Institute (EPRI). If the Committee should desire for CRS to conduct the five activities outlined above, EPRI could conduct the four major activities outlined in its proposal. Some coordination would be desirable relative to the review of existing consolidations since CRS would be preparing a paper on this item. The issues paper to be prepared by CBS might provide background for the work of EPRI in its efforts to identify policy issues or the CRS paper might be deemed to provide sufficient coverage of that area. The in-depth examination of ESEA Title I would appear to be an activity independent of any of the work that might be done by CRS. This latter point also could be made for the feasibility study outlined in the EPRI proposal.

Potential Materials for the Committee Print. If the Committee should choose to have all of the previously discussed activities conducted, the Committee print[2] conceivably would include the following items:

1. Issues Paper (CRS)
2. Previous Consolidaton Efforts (CRS)
3. Background Papers for the Symposium (Coordinated by CRS)
   a. Historical Discussion of Block Grants
   b. History of Federal Block Grants in Other Programs
   c. S. 1780 in Historical and Theoretical Context
   d. Impact of Block Grants on Organization of State Educational Agencies
   e. Impact on Local Educational Agencies
   f. Impact on Local School Operations
4. Summary of the Discussion at the Symposium (CRS)
5. Cross Matrix Analysis of Program (CRS)
6. Policy Issues Discussion (EPRI)
7. Results of Interviews with Policy Makers and Interest Groups (EPRI)
8. Legal Analysis of ESEA Title I (EPRI)
9. Discussion of Findings from Field Interviews (CRS and GAO)

CRS Personnel. CRS anticipates that the team assigned to this major project would include Paul Irwin, K. Forbis Jordan, and Bill Sanda. Mr. Jordan would serve as team leader and would be in a position to draw from the expertise of persons in the Education Section as well as the total resources of CRS. If the CRS activities outlined in this discussion should be considered desirable by the Committee, the three persons on the team would be spending a major portion of their time on this project from September through December.

Following discussion with staff persons from the Committee, CRS understands that a project completion date of its activities on or before December 31, 1978 will be satisfactory.

CRS appreciates the opportunity to participate in a discussion of the manner in which the study might be conducted and looks forward to working with the Committee in a mutually acceptable manner.

K. Forbis Jordan.

[2] In the preparation of the Committee print, it is assumed that the various components would be identified with the organizations or persons who were responsible for the research and preparation of the documents.

Proposal for a Symposium

During the deliberations on S. 1753 (the Elementary and Secondary Educational Amendments of 1978), consideration was given to an amendment that would have provided for demonstration of consolidated Federal education programs in no more than six States. The amendment was defeated by the Committee, but the Committee voted that a feasibility, assets, and liabilities study be conducted by the Committee with a report being submitted within six months (S. Report No. 95–1086 at 116).

In view of the diversity of opinions on this subject, the range of knowledge of details of the proposal under consideration, and the importance of an understanding of the history of consolidation efforts in other programs, it would appear advisable to conduct a symposium during which the various issues could be examined in depth. This symposium would involve State and local officials; scholars familiar with the concept of the proposed legislation; and key staff members from the Senate and the House. Background and briefing papers will be commissioned and distributed in advance. The "Issues Paper" in Activity 1 would also be forwarded to participants. Major components of the symposium tentatively would include papers on items such as the following:

1. Background of Concept of Block Grants
2. History of Federal Block Grants in Other Programs
3. S. 1780 in Context
4. Impact of the Policy Choice on Organization of State Educational Agencies
5. Impact on Local Educational Agencies
6. Impact on School Operations

Logistics for the symposium, negotiations with the presenters, and actual conduct of the sessions will require a considerable amount of person time, and the topic suggests it may be advantageous to have CRS contract with a private agency to conduct the symposium. It is anticipated that the symposium would last for two days and would be in a captive setting to facilitate interaction among the participants. The contractor would provide meals and housing for the participants, travel for the out-of-town participants, support from the Institute, honoraria for the commissioned papers, and transcriptions of the proceedings.

Mr. JAVITS. Mr. President, if the Senator will yield to me, I think it should also be noted in this connection that a number of elements in the Domenici-Bellmon demonstration amendment are now in the committee bill, and they are as follows:

First. Consolidation of program applications and reports;

Second. Shifting from annual to multi-year program plans;

Third. Reducing and simplifying other reporting requirements; and

Fourth. Increased flexibility of State and local administration of title I.

In short, I simply amplify that the

statement of what the Senator and his cosponsors desire has not gone unheeded.

Mr. PELL. Mr. President, if the Senator will yield there, we point out also that I was too conservative in referring to the nonaction of the committee. We actually did take action, and had a rollcall vote on the amendment, which was turned down by 8 nays and 5 yeas.

Mr. DOMENICI. I am going to withdraw the amendment, obviously I am asking this institution to vote on a whole new approach to the educational system and I am a member of the committee. But let me just say this: I truly appreciate the commitment of the committee, the chairman, and the ranking minority member, and the many dedicated staffers who staff that committee.

I am firmly convinced that people are going to demand some very basic drastic changes in the present grant program.

I am not prepared to say that we have not improved it with some of the consolidations referred to. But I am prepared to say this: If the average citizens from the average school district in the United States knew how difficult it was for the superintendents and administrators of the public school system to participate in this Federal aid program, I believe they would be clamoring for change. The teachers, the administrators, the auditors, the budgetmakers, the State legislators, get more confounded every year with the complexity of the Federal Government's attempt to aid students with special needs. I know there is no miraculous cure, but I truly believe we should not be afraid to demonstrate another approach. The approach which we have been using is growing more complex in spite of legislative effort to make the programs easier, less complex and more responsive, it seems that by the time we are through in the guidelines and directives, we move farther away from our goal of simplification.

I greatly appreciate the consideration given to the new approach. I can say unequivocally that I have great confidence that the study will show positive results, especially if looked at from the standpoint. First, will it do as well as we are doing, and, second, is it apt to permit us to measure the efficiency and effectiveness of the present categorical grant program in our aid to education on the national level versus the States and school districts?

Having said that, Mr. President, I withdraw my amendment and I yield the floor.

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER (Mr. NELSON). The Senator from Delaware.

UP AMENDMENTS NO. 1721

(Purpose: To insure equal protection of the laws with respect to the transportation of students)

Mr. ROTH. Mr. President, I call up my unprinted amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH), for himself, Mr. BIDEN, Mr. BARTLETT, Mr. HAYAKAWA, Mr. SCHWEIKER and Mr. DECONCINI proposes an unprinted amendment numbered 1721.

Mr. ROTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new title:

TITLE V—EQUAL PROTECTION AND THE TRANSPORTATION OF STUDENTS COURT ORDERS: DISCRIMINATORY PURPOSE

SEC. 501. No court of the United States shall order directly or indirectly the transportation of any student on the basis of race, color, or national origin unless the court determines that a discriminatory purpose in education was a principal motivating factor in the constitutional violation for which such transportation is proposed as a remedy.

TYPE OF RELIEF ORDERED

SEC. 502 (a) In ordering the transportation of students, the court shall order no more extensive relief than reasonably necessary to adjust the student composition by race, color, or national origin of the particular schools affected by the constitutional violation to reflect what the student composition would otherwise have been had no such constitutional violation occurred.

(b) Before entering such an order, the court shall conduct a hearing and, on the basis of such hearing, shall make specific written findings of (1) the discriminatory purpose for each constitutional violation for which transportation is ordered, and (2) the degree to which the concentration by race, color, or national origin in the student composition of particular schools affected by such constitutional violation presently varies from what it would have been had no such constitutional violation occurred.

INTERDISTRICT TRANSPORTATION ORDERS

SEC. 503.(a) Any order by a district court requiring directly or indirectly the interdistrict transportation of any student on the basis of race, color, or national origin, shall be stayed until all appeals in connection with such order have been exhausted, except that any such stay may be vacated by a majority of a court of appeals panel composed of not less than three members, or a majority of the Supreme Court.

(b) In any case in which such order is stayed pursuant to subsection (a) of this section, any appeals that are to be taken from such order must be commenced by filing a notice of appeal with the clerk of the district court within ten days of the date of the entry of such order. The record on appeal shall be transmitted to the court of appeals within forty days after the filing of the notice of appeal and filed by the clerk of the court immediately upon receipt of the record. The appellant shall serve and file his brief within forty days after the date on which the record is filed. The appellee shall serve and file his brief within thirty days after service of the brief of the appellant. The appellant may serve and file a reply brief within fourteen days after service of the brief of the appellee, except for good cause shown, a reply brief must be filed at least three days before argument. The appeal shall be heard within fifteen days thereafter and a decision shall be rendered within forty-five days after argument. No extension of the time periods shall be allowed, except for extraordinary circumstances.

EFFECTIVE DATE

SEC. 504. (a) This title shall take effect with respect to any judgment or order of a court of the United States which is made after June 27, 1977 or which is made prior to such date but is not final or has not been effected by such date.

(b) No judgment or order of a court of the United States which is not yet final or which has not yet been effected on the day before June 27, 1977 shall remain in force or effect, unless the court has complied with the requirements of this title.

On page 21, in the table of contents, at the end thereof add the following:

TITLE V— EQUAL PROTECTION AND THE TRANSPORTATION OF STUDENTS

Sec. 501. Court orders; discriminatory purpose.
Sec. 502. Type of relief ordered.
Sec. 503. Interdistrict transportation orders.
Sec. 504. Effective date.

Mr. ROTH. Mr. President, the amendment my distinguished colleague from Delaware (Mr. BIDEN) and I are offering to this bill is S. 1651, legislation we offered last year to limit the use of busing as a remedy in school desegregation cases. The primary purpose of our amendment is to establish guidelines that are consistent with the U.S. Constitution regarding the circumstances under which courts may order the transportation of students on the basis of race, color, or national origin.

S. 1651 was the subject of extensive hearings by the Judiciary Committee in June and July of 1977 at which time we heard from legal scholars, sociologists, and other experts in support of the legislation. I am happy to say the full Judiciary Committee reported S. 1651 favorably last September by a vote of 11 to 6.

Our amendment codifies the recent Supreme Court decisions of Dayton Board of Education versus Brinkman, Village of Arlington Heights against Metropolitan Housing Development Corporation, Washington versus Davis and Milliken versus Bradley concerning equal educational opportunity under the 14th amendment to the Constitution. Our amendment is completely consistent with the recent actions of the High Court in the Austin, Indianapolis, Pasadena, and Omaha desegregation cases. We believe these cases signal the Court's readiness to accept a clear mandate of Congress establishing reasonable guidelines for court-ordered busing.

In summary, our amendment provides as follows:

First, it requires a court to find that "a discriminatory purpose in education" was a principal motivating factor in the constitutional violation for which busing is proposed as a remedy.

Second, courts would be required to determine the extent to which acts of unlawful segregation have caused a greater degree of racial segregation in a school or schools than would have otherwise existed, and student busing would be limited to eliminating the degree of racial segregation attributable to those proven unlawful acts.

Third, all Federal interdistrict busing orders would be stayed pending appeal. However, such stays could be vacated by a majority of the Supreme Court or a court of appeals panel of not less than three members.

Finally, our amendment would take effect with respect to any judgment or order not final or effected by June 27, 1977, the effective date of the amendment. Thus, in addition to prospective cases, the amendment would apply to cases in litigation on its effective date

In short, our amendment would establish clear guidelines for the Federal courts concerning the use of busing. In practice, it would require the court to determine the extent to which specified acts of unlawful discrimination by governmental officials have caused a greater degree of racial concentration in a school or school system than would have existed absent those acts. It would further require the court to limit remedial busing to that necessary to eliminate racial imbalance caused by those deliberate acts. In other words, courts would no longer be able, where only limited or isolated acts are proven, to order busing throughout the entire school district or between districts simply for the purpose of achieving racial balance.

Mr. President, in the name of educational quality, in the name of our color blind society, above all, in the name of our melting pot of neighborhood schools and our American families and schoolchildren of all races, creeds, and colors, I say to my colleagues: The time has come to put this issue of busing to rest.

At the heart of this issue lies a simple but incontrovertible fact: Both opponents and proponents believe busing directly affects the American ideal of human rights for all, the human rights of American families and communities to nurture and convey their culture to their children.

Why are we back on the Senate floor with another antibusing bill many of our colleagues ask us?

Because, Mr. President, the vast majority of Americans, black and white, in opinion poll after opinion poll, ask and deserve no less than simple human rights. These rights include not only the right to equal educational opportunity, but also the right to send their children to the neighborhood schools of their choice, the right to set the standards of educational quality for their schools, and the right to self-determination in their own lives and families and in their own neighborhoods and communities.

Local control over education is the history of this Nation and is guaranteed by the constitutional requirements of the 10th amendment, recently underscored by the Supreme Court in the National League of Cities versus Usery case. No tradition in this country is stronger than local control over schools, and no local governmental function in America is more traditional than education.

But in the past decade, the delicate line between the judiciary in the form of Federal district courts and the legislative branch in the form of local control over community schools has been dangerously blurred. In the guise of achieving a supposedly "ideal" racial mix in our schools even where no discriminatory intent has been found, the courts have reached deep into the once private confines of family life to engineer social change that separates families from their communities and children from their families.

The real tragedy is that, while the debate over busing continues, national attention and energy are diverted from the urgent problem of educating the Nation's youth. The quality of public education, as we are only too aware, has declined precipitously. School tests demonstrate that children no longer learn the basic skills that have sustained America's growth and development for two centuries. And the results of the Scholastic Aptitude Test taken by college-bound seniors have been steadily declining since 1963.

Mr. President, the results are now coming in on forced busing, and a threefold consensus is developing among local leaders, legal scholars, educators, sociologists, and, above all, the American people:

First, a broad majority of Americans, black and white, still oppose busing as a means of achieving equal educational opportunity for all. Opinion polls continue to show that public opposition to forced busing is deeply-felt and cuts across all races, colors and income levels.

Second, busing does not work. That is, busing provides neither higher educational quality for blacks and whites nor better relations between the races. In fact, busing has brought confusion, havoc and disruption to many of our Nation's best public school systems.

Finally, an emerging consensus of educators, sociologists, and legal scholars ranging from Dr. Nathan Glazer, professor of sociology at Harvard University, to Dr. David Armor of the Rand Corp., and including Dr. James S. Coleman of the University of Chicago, author of the landmark 1966 "Coleman Report" on equality of education in America, and Prof. Raoul Berger, of Harvard University, author of a recent masterwork of constitutional scholarship on the 14th amendment—this consensus concludes that forced busing, far from reducing the inequality of educational opportunity in the United States, has, in fact, had the exact opposite effect: Busing causes a white exodus from the public schools, sharpens the conflict among groups, and lowers the quality of education for all students, black and white.

I shall summarize the evidence on each of these conclusions.

AMERICANS OF ALL RACES, CREEDS, AND COLORS SUPPORT SCHOOL DESEGREGATION BUT OPPOSE FORCED BUSING

The vast majority of American people support a policy of desegregation. For example, the 1975 Harris survey showed that nationwide, 56 percent of Americans favored desegregation of public schools, and only 35 percent—still much too large—opposed it, with 9 percent unsure. Similarly, the 1977 National Opinion Center poll, showed 85 percent in favor of school desegregation and only 15 percent opposed.

But the important thing about both these polls was the consensus of opposition by both blacks and whites to forced busing to achieve school desegregation. The 1975 Harris poll showed only 20 percent of the Nation supported forced busing while 74 percent opposed it. The 1978 National Opinion Research Center poll showed a full 79 percent of the American people still opposed busing to achieve racial balance, while only 21 percent supported it. The polls also show that heavy public opposition to forced busing cuts across all races, creeds, colors and income levels.

BUSING DOES NOT WORK

Dr. James S. Coleman, professor of sociology at the University of Chicago, was the principal author of the "Coleman Report," a landmark study on equality of education and the effects of racial isolation in schools. On April 21, 1978, Dr. Coleman presented a paper on "School Desegregation and City-Suburban Relations" to a community college in Dearborn, Mich. In that paper, Dr. Coleman made the following observations concerning three major beliefs about segregation and integration:

> We have now come to a point at which it is possible to be sober, straightforward, and realistic about school desegregation in major metropolitan areas. There are three major beliefs about segregation and integration that have finally been shown to be incorrect.
>
> First, it was once assumed that elimination of school segregation due to official actions, whether dual school systems in the South or gerrymandering and other school district actions in the North, would eliminate all, or nearly all, racial segregation in schools. . . . But any knowledge of urban areas, and of the residential segregation that develops in urban areas along ethnic, income, and racial lines leads immediately to the recognition that most segregation, whether ethnic, or class, or race, in urban areas is due to residential patterns. . . . (W)hite exodus to the suburbs has produced a situation in which most of the largest central-city school systems are majority black, while the surrounding ring remains predominantly white. Such segregation did not arise by official action, unless one wants to argue that actions of the courts in instituting racial balance orders which resulted in whites leaving the city are "official segregating acts."
>
> Second, it was once assumed that integration would automatically improve the achievement of lower class black children. I hasten to say that it was research of my own doing that laid the basis for this assumption. . . . However, it has not worked out this way in many of the school desegregation cases since that research. A review of a large number of analyses of effects of desegregation on achievement has recently been carried out, showing no overall gains . . . thus, what once appeared to be fact is now known to be fiction.
>
> Third, it was once assumed that policies of radical school desegregation could be instituted, such as a busing order to create instant racial balance, and the resulting school population would correspond to the assignment of children to the school. It is now evident, despite the unwillingness of some researchers and others to accept the fact, that there are extensive losses of white students from large central cities when desegregation occurs in those cities. . . .
>
> There are many school policy makers and many courts still operating under the fiction that constitutionality requires racial balance that have not recognized this, so that there are still harmful school desegregation policies being implemented in American cities.

Dr. Coleman's observations are reinforced by Dr. David Armor, Rand Corp. social scientists, who in testimony before the Judiciary Committee on S. 1651 stated:

> There is no solid rigorous evidence that minority students will achieve more or get more educational benefits from going to a majority white school or a school that has a balanced racial and ethnic composition.

Black and white residents of many of our metropolitan areas do not need to read the conclusions of this preeminent

educator and this nationally recognized sociologist to know how badly our great urban school systems have suffered under forced busing. The names of affected cities are a litany of shame for our courts, the social engineers they listen to, and, above all, for the U.S. Congress that has so far turned its back on what the courts are doing to the neighborhood school in this country.

Americans in these cities do not need to be told busing does not work; they know it.

FORCED BUSING INCREASES INEQUALITY OF EDUCATIONAL OPPORTUNITY

Dr. Nathan Glazer and Dr. David Armor in testimony before the Judiciary Committee concluded that, contrary to hopes and expectations, mandatory busing neither improves minority educational achievement nor increases harmony between the races. In fact, they pointed out, the evidence increasingly shows busing can be socially counterproductive and educationally irrelevant. Dr. Glazer stated that a significant proportion of the racial concentration in our society is not attributable to unlawful Government action. Rather, he stated:

The general reality is racial residential segregation reflects the economic circumstances of blacks and whites, and on the average, blacks are still less economically affluent than whites. It reflects secondly, the general tendency of ethnic groups to concentrate for convenience; for access to family and friends; and for reasons of access to specific cultural, religious and commercial facilities which serve specific groups.

Dr. Armor has completed extensive research on the increased racial residential concentration that frequently results as a consequence of court-ordered busing. In a paper to be presented at the American Sociological Association meeting in San Francisco in September 1978, Dr. Armor concludes, quote:

In most cases the size of the effect (of desegregation on the flight of white affluent families out of the urban areas) is both large and long term, accounting for 30 to 60 percent of all white losses over extended periods following desegregation. *The white losses are such that, in many cases, the amount of desegregation—defined as minority exposure to whites—is declining, and for some districts has fallen below the pre-desegregation level.* (Emphasis added.)

Court ordered desegregation, coupled with normal demographic trends, is producing increasing ethnic and racial isolation in many larger districts. If this trend is to be stopped or reversed other remedies need to be considered. Given the strong public opposition to mandatory busing as well as to the current legal situation, the prospects for metropolitan desegregation appear limited. On the other hand, voluntary methods have worked well in some cases and may offer a more viable alternative in larger cities.

In sum, forced busing, far from achieving the goal of a desegregated society, in fact exacerbates urban residential segregation and increases inequality of educational opportunity.

A COLOR BLIND SOCIETY FOR ALL

Mr. President, I want to make it clear that I strongly support the goal of a society free from racial prejudice. I also strongly support the concept of quality education and the neighborhood school.

Mr. President, it is time that this Nation moves in new directions to obtain what we all want and that is a color-blind society. It makes no sense to continue along a path that neither provides quality education for our children, black or white, nor achieves desegregated schools. It is time we quit experimenting with the lives of tens of thousands of children that is achieving no meaningful good.

Mr. President, the American people look upon education as the means, the door to a better life, to success for the children. As the committee report points out, in reporting out favorably, our legislation—each generation has sought the best possible education for its children. In neighborhoods everywhere, the school has been the tie that binds an area into a community.

Public schools exist in a world in which confidence in Government is seriously eroded. Schools are a nerve, close to the surface of an anxious public, and the erosion of confidence rubs that nerve raw. The committee report on S. 1651 continues to point out that the parents of minority families are concerned about the quality of education provided their children. There is a crushing burden of evidence that the segregated schools of years ago were inferior schools and that this was a wrong that must be remedied.

Brown against Board of Education recognized equality of educational opportunity as a principle to which our Government must adhere, and it offered proof that courts were an avenue that could restore confidence in public institutions in general and public schools in particular. The Brown case opened a whole new field of law, and it is only now that we can see what equal opportunity means in a legal sense.

This is a diverse nation and the facts which underlie each court case are different. This makes the process of clarifying the law a time-consuming one. The status of public education in our Nation today dictates that Congress take note of the constitutional meaning which has emerged from these decisions.

Mr. President, that is exactly what this amendment intends to do. The principles adopted in our proposed amendment are simple ones with a long history in law.

First, our amendment will require that the court must find that officials intended to cause racial segregation of students before there has been a violation of the Constitution; and second, courts must order a remedy for the segregation that is limited to the extent of that violation.

Mr. President, I believe adherence to these principles, as the committee report points out, will help restore public confidence in schools and Government. I think it important that Congress does that. It is our responsibility, not that of the courts, to establish this type of school policy for the Nation and its children.

I yield back the floor.

Mr. BIDEN. Mr. President, I ask unanimous consent that the following staff members have the privilege of the floor during the consideration of this measure: Irene Emsellem, of Senator ABOUREZK's staff; Mark Gitenstein, Katrina Lantos, and Paul Laudicina, of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN. Mr. President, I rise in support of the amendment offered by my colleague from Delaware.

Mr. President, the times they are a-changing and this time I believe it is for the better. After years of confusion and chaos in the field of school desegregation, it appears that the rule of reason will prevail and the job of educating our children can proceed in an atmosphere of freedom and harmony. The reason for my optimism in this regard is that the Supreme Court has finally begun to speak out in a clear and reasonable voice on the constitutional demands of the 14th amendment.

By introducing this legislation today, Senator ROTH and I hope to expedite the process of providing local judicial authorities with the guidelines that will enable them to comply with the requirements of the Constitution, as interpreted by the Supreme Court, in implementing school desegregation plans. As recent history has shown, such statutory guidelines are necessary.

In the years following the landmark decision in Brown against Board of Education some legislators and jurists interpreted the 1954 prohibition against racial discrimination as a universal command to compulsorily integrate society. To a large extent, the history of court-ordered busing is a prime example of understandable but misguided zeal.

But, as we all know, the road to hell is often paved with good intentions. What was meant to be utopia by fiat turned into disaster by decree.

Mr. President, it would be redundant for me to catalog here the dissension, strife, and alienation that excessive, and unwarranted court-ordered busing has created in our society. Unfortunately, we are all too familiar with its numerous manifestations. Constitutional and social reasons previously offered as justifications are no longer justified.

However, the prospect for the future is hopeful. For we seem to be entering a new age of reason in the arena of 14th amendment protections. My basis for saying this is some recent decisions by the Supreme Court.

In the areas of employment and housing discrimination, the Supreme Court has formulated a "discriminatory purpose" rule which in essence provides that a court cannot impose a remedy for alleged discrimination based upon evidence of discriminatory effect alone. The Court now requires that there be a finding that "a discriminatory purpose was a motivating factor in the constitutional violation for which the remedy is proposed." [*Washington* v. *Davis* 426 U.S. 229 (1976), *Arlington Heights* v. *Metropolitan Housing Corp.* 429 U.S. 252 (1977)]. In Arlington Heights the Court stated simply that:

Proof of racially discriminatory intent or purpose is required to show a violation of the equal protection clause, *Arlington Heights* v. *Metropolitan Housing Corp.* 429 U.S. 252 (1977).

This discriminatory purpose rule applies to school desegregation cases as well. The rule was stated as early as 1973 in the case of *Keyes* v. *School District No. 1* 413 U.S. 189 (1973).

The Court there wrote that plaintiffs:

Must prove not only that segregated schooling exists but also that it was brought about by intention State action at 198.

More recently the Court has restated and clarified this important principle in the 1977 school desegregation case, Dayton Board of Education against Brinkman:

The duty of both the District Court and of the Court of Appeals in a case such as this, where mandatory segregation by law of the races in schools has long ceased, is to first determine whether there was any action in the conduct of the business of the school board which was intended to, and did in fact, discriminate against minority pupils, teachers or staff.

In short, the Supreme Court has made it clear that unconstitutional racial discriminatiion cannot be found without a finding that the action was purposefully discriminatory. The thrust of our proposed legislation is to insure that lower courts do in fact, follow the mandate of the Supreme Court as outlined in the Dayton case.

The effect of our proposed amendment would be to codify this rule for busing cases.

Our measure provides a resolution of the dilemma facing our society, of reconciling the noble, yet superficially conflicting goals of eliminating deliberate segregation while preserving neighborhood schools.

Under our amendment the remedy of busing could still be used to right the wrong of deliberate segregation. However, neighborhood school communities could no longer be destroyed.

This would be accomplished by permitting busing as a remedy in school desegregation cases only when the Court has determined that a discriminatory purpose in education was a principle motivating factor in the constitutional violation for which busing is proposed as a remedy.

It is high time that we acknowledge that there is a fundamental difference between deliberate segregation and the natural growth of communities.

Our amendment limits the remedy of busing to deal with this difference.

Our amendment also incorporates the principle that the remedy must fit the wrong. All too often in the past certain Federal judges sought the drastic restructuring of school districts based on findings of isolated instances of discrimination. But that is not the law. Time and time again, the Supreme Court has said:

The nature of the violation determines the scope of the remedy. *Swann* v. *Board of Education* 402 U.S. 1 (1971) at 16.

In *Milliken* v. *Bradley* 418 U.S. 717 (1974), speaking of desegregation remedies, the court wrote that such remedies are

Necessarily designed, as all remedies are, to restore the victims of discriminatory conduct to the position they would have occupied in the absence of such conduct (at 746).

Our legislation mandates the use of this important rule in desegregation cases.

Mr. President, it has been said that there are only two precious gifts we can give our children: wings and roots. I believe that these two gifts are exemplified by education, our wings—and our home communities, our roots.

It is my deep hope that this bill will make both of these gifts more accessible to our children.

The legislation which Senator ROTH and I propose today is a reasonable and balanced effort to deal with the problem of involuntary busing.

Unlike some other congressional efforts in the busing area, we believe it is constitutional and will be followed by the courts.

As I indicated earlier, it is predicated on a series of Supreme Court decisions in which the Court has clarified the rules in racial discrimination cases.

The basic rule which the Court has applied is that a court may not impose a remedy for alleged discrimination based on evidence of discriminatory effect alone.

The Court now requires that there be a finding that:

A discriminatory purpose was a motivating factor in the constitutional violation for which the remedy is proposed.

In essence, the Roth-Biden amendment would provide legislation to incorporate that principle for busing cases, along with other important provisions.

First, it would require a court to find a "discriminatory purpose in education" behind any violation for which student transportation is proposed as a remedy.

Second, courts would be required to determine the extent to which acts of unlawful segregation have caused a greater degree of racial segregation in a school or schools than would have otherwise existed, and student busing would be limited to eliminating the degree of racial segregation attributable to those proven unlawful acts.

All Federal interdistrict busing orders would be stayed pending appeal. However, the stay could be vacated by a majority of the Supreme Court or a court of appeals panel of not less than three members. Finally, there requirements would apply both to orders issued after the date of enactment and to those which have not been put in effect by that date.

The bill would establish for the Federal courts clear guidelines concerning the use of busing.

In practice, it would require the Court to determine the extent to which specific acts of unlawful discrimination by governmental officials have caused a greater degree of racial concentration in a school or school system that would have existed absent those acts.

It would further require the court to limit remedial busing to that necessary to eliminate racial imbalance caused by those deliberate acts.

In other words, courts would no longer be able, where only limited or isolated acts are proven, to order busing throughout the entire district or between districts simply for the purpose of achieving racial balance.

Our amendment strikes at the heart of the injustice of court-ordered busing—in Wilmington, Del., and throughout the country.

It prohibits the Federal courts from disrupting our educational system under the guise of the Constitution where there is no evidence that Government officials intended to discriminate.

However, we believe that the amendment is both limited and reasonable.

It does not prohibit all busing orders. On the contrary, it goes only as far as the Supreme Court has gone in circumscribing busing orders. The legislation only goes that far because we want to stay completely within constitutional guidelines and because we want the bill to be adopted by the Senate, I sincerely hope that a majority of the Senate will support this measure as a reasonable solution to the problem of unnecessary busing.

It is the classic dilemma of a democratic legislative body such as the U.S. Senate to try and reconcile noble but apparently conflicting ideals.

Based on the firm belief that the first step in this process of reconciliation is an airing of different views, the Judiciary Committee held extensive hearings on S. 1651 last year.

The amendment introduced by Senator ROTH and me today is essentially the same as S. 1651 which was reported out of the Judiciary Committee last September.

There were two main issues which these hearings on this bill sought to address.

The first was the question of the bill's constitutionality. The committee has heard testimony on that issue from constitutional law experts across the country and across the political spectrum.

Although not all the witnesses supported the purposes of the bill, there has been remarkable agreement that its provisions are arguably constitutional.

These expert witnesses generally affirmed that the bill closely tracks and clarifies recent Supreme Court decisions in the area of the 14th amendment guarantees insofar as it requires a finding of discriminatory purpose before busing may be ordered to remedy an alleged constitutional violation.

And while they diverged on the desirability of enacting this bill, there was some agreement that it is—on the whole—a sound and moderate piece of legislation.

Needless to say, when men with such differing perspectives as Prof. Lino Graglia, a long-time opponent of busing, and Prof. Charles Abernathy, an equally long-time civil rights activist, can agree on the fundamental issue of constitutionality that must be seen as a strong endorsement of the bill's legal merit.

Perhaps most significant is Attorney General Bell's memorandum on the bill in which he agrees that the legislation can be interpreted so as to be constitutional.

The second issue focused on in the hearings was the social impact of busing on our communities.

We have learned from distinguished sociologists such as Nathan Glazer and David Armor that some Federal judges have ordered busing remedies which far exceed any proven or, indeed, any possible wrong.

This is so because they have either ignored or been unaware of data showing that some residential racial concentrations are not attributable to official action but to patterns of urban and ethnic development.

In other words, what was formerly thought of as the American "melting pot" may be more analogous to a "salad bowl" where all the component parts retain some individual identity.

This preservation of identity often is manifested by concentrations of racial or ethnic groups in certain residential areas.

While not all housing and school concentrations can be thus explained and factors such as income certainly play a part, many judges have discounted this factor entirely, to the detriment of individuals, groups, and society as a whole.

We have also learned that busing orders which are intended to promote integration may sometimes have the opposite effect.

Many parents who do not wish to relinquish control over their children's education leave the city and move to areas where their children can attend neighborhood schools.

The separation which results from this exodus is often far more extensive than what existed before the busing order and it cannot be cured by the judicial fiat.

Thus, what begins as an attempt to increase integration frequently ends up achieving the opposite result.

In the view of these sociologists, to the extent that S. 1651 will clarify what is and is not a proper circumstance for busing, it will help alleviate the problems that result when unwarranted and counterproductive orders are imposed.

Although I cannot fully catalog the valuable testimony presented to the committee, I can say that based on the evidence I am more convinced than ever that S. 1651 does represent a moderate and acceptable means of reconciling the worthy goals of eliminating unconstitutional segregation from our society while preserving the invaluable asset or our neighborhood communities and schools.

This bill, and the Roth-Biden amendment before the Senate now, limits busing to situations where an unconstitutional violation has been proven and where busing is appropriate.

It tailors the remedy to fit the wrong.

To most of us, these provisions seem to make good commonsense.

What these hearings have shown is that they also make good constitutional and social sense.

With the strong record established by these hearings Senator ROTH and I now hope to be able to persuade our colleagues that our amendment is a reasonable mechanism for coping with the inescapable problem arising out of court-ordered busing.

Mr. President, I would like to make some additional remarks on specific aspects of this legislation. I think the points made by Senator ROTH in his opening statement are very significant in two respects: One, they speak to the constitutionality of the legislation which we are proposing here today.

Second, they also address the social question on the merit of whether or not busing to achieve a racial balance is a socially worthwhile goal; whether or not it has more detrimental effect than a positive effect.

For the purposes of my remarks at this point, and I expect there will be a number of remarks on this legislation today, I am going to confine myself in this first round to speaking to the constitutionality of the Roth-Biden amendment to S. 1753.

Mr. President, I have been in the Senate for a little over 5 years now, and during that time we have had a number of amendments that have been characterized as antibusing. Some I do not think legitimately could be considered antibusing amendments, and others are very legitimate amendments. I think many of our colleagues have been somewhat disillusioned, and, if not disillusioned, confused, about the amendments which have been offered.

It seems every time there is a bill that comes forward which deals with education somebody on the floor of the Senate has an antibusing amendment. To steal a phrase from one of our counterparts in California, it's sort of become a buzz word when we say antibusing amendment. About 80 percent of our colleagues duck. They put their hands over their head and say, "Oh, Lord, no, not again."

I think that is in large part because over the past 6 years there have been some very frivolous amendments which have been offered with regard to busing. I think what has happened is that the eyes of our colleagues have been taken off this subject.

None of us tend to focus on issues in a very deep way unless one of two things occurs: either, in the first instance, it is a subject matter which comes before a committee of which we are a member, or, second, unless it is a matter which directly affects our State.

I guess maybe there is a third time we tend to focus very keenly, and that is when national sympathies and national concerns have risen to such a degree that it is the front page story of the newspapers of America from east to west.

Fortunately, we are not in the last situation I described, that is, where the front pages of the newspapers of America are reporting the issue of busing.

I do not have a single solitary doubt in my mind that if there were a busing order in every State in America affecting a significant portion of every State in America that this body would rise up almost instantaneously and deal with the issue in a constructive way. But, unfortunately for purposes of stopping the misguided policy on busing that we have been following in this country for the past decade, that situation does not exist.

With regard to the second point that I raised, whether people focus when it affects their particular State, it has not been directly focused in the majority of the States in America. Consequently, it is understandable that my colleagues, say, from the States of Idaho, Alaska, or Montana, are focusing more on mining problems than they are on this, just as I must honestly state that I do not pay nearly as much attention to issues of Federal lands and control of Federal lands as my colleagues from the Western States do. It is something I tend to have a staff memorandum written about. As I get off the elevator when a vote is to be cast after having read the memorandum, I ask whether or not the debate on the floor has altered the substance of the memorandum which has been written. If they say, "Yes," I ask how, or I have already made up my mind and I walk on the floor and vote.

The first instance is whether or not it is a subject matter of committees of which we are members. The fact of the matter is committees in the Senate have been judicious in their avoidance of dealing with this issue, which brings me to our bill. The bill that Senator ROTH and I wrote, to the best of my knowledge is the first substantive antibusing bill which has had the full consideration of the Senate Judiciary Committee, and which has been passed upon favorably.

That may seem like an insignificant point to the people listening to this debate, but the reason I mention it is that I think that that alone warrants our colleagues taking this amendment out of the overall category of frivolous antibusing amendments that deal with energy bills, the national debt, or all the other things we have heard argued about busing in the past.

I would like now, Mr. President, to speak specifically to what I believe to be the most critical issue that we must face on any antibusing amendment which comes before this Congress. That is the question of its constitutionality.

Mr. President, criticism of the Roth-Biden busing legislation does, and I believe should, focus on the constitutionality of our bill.

In essence critics of the bill contend that it is either unconstitutional, or if constitutional, unnecessary in that it would complicate school desegregation cases by causing additional litigation. The former position is characterized by Senator BROOKE and the NAACP in their testimony before the Judiciary Committee while the latter more cautious position is adopted by Attorney General Bell in his letter of July 26, 1977, to Chairman EASTLAND.

For the purpose of the argument at this point, we will rely upon the Attorney General's analysis of S. 1651 since the basic arguments and case law set out in that letter are similar or identical to that offered by Senator BROOKE, the NAACP, and other critics who take a less ambivalent position on the bill. To the extent that we rely upon arguments made by other opponents and proponents of the legislation, our source is the hearings of the Judiciary Committee conducted in July of last year. Incidentally, the Judiciary Committee rejected the opponents' arguments on these matters and reported the bill to the Senate on September 21, 1977.

I should note parenthetically that Senator ROTH and I could have brought up this bill and attached it to other amendments or to other pieces of legis-

lation that were not as appropriate as this piece of legislation. We would have much preferred to have this legislation voted on and disposed of last year. We would have liked very much to have it voted on and disposed of at the beginning of this year.

The fact of the matter is that the situation in the Senate precluded that and we were informed by the leadership on both sides that our amendment would not be permitted to be taken up on all fours at any time that they could see in the near future. Consequently, here we are, at the end of August, and I am sure the opponents will say, "Why is it that BIDEN and ROTH waited until now to bring up this legislation? Don't they know they are being disruptive? Don't they know that school is about to start? Do calendars run differently in Delaware than they do in other parts of the country?"

The answer is that the opponents of this legislation were the reason we could not bring it up before, because there was an indication that if we brought up our bill on its merits, flat out, not attached to anything else, there would have been an extended debate on the issue, which meant it flew in the face of other matters coming before the Senate, not the least of which were the Panama Canal treaties, labor law reform, energy legislation, and on and on.

Mr. ROTH. Will the Senator yield for a question?

Mr. BIDEN. Surely, I yield.

Mr. ROTH. Is it correct that when the two Senators from Delaware attempted to schedule the legislation for floor consideration, we were told that we could not expect that unless we could guarantee that cloture would be voted?

Mr. BIDEN. That is precisely correct. The leadership in this body on both sides of the aisle told us that directly. We also found that we obviously could not guarantee cloture. Quite frankly, I am not prepared to guarantee 50 votes today, let alone being able tc guarantee enough votes for cloture.

The reason I raise it now, again, is to try to lay the argument to rest before we get into this debate today so we can deal with the issue at hand. This amendment deserves to be treated as a significant, straight-up piece of legislation that is not frivolous, that has been considered by a committee, that has been considered by the full committee, that has had extensive hearings, and that has constitutional experts on both sides of the issue testifying as to its merit.

I'd like to return to the question of our amendment's constitutionality. Our first contention is that the Roth-Biden amendment is constitutional. The Attorney General does not, in his testimony or his letter, take the position that S. 1651 is unconstitutional. He simply raises concerns about the meaning and possible application of certain provisions of the bill which could—I emphasize "could"—lead to an unconstitutional result. In essence, Senator BROOKE and others assumed that the legislation will have that application and that the bill is unconstitutional on its face.

Mr. President, it is not my practice to speak about a Senator's comments with regard to legislation without his or her being on the floor of the Senate. The reason I mention Senator BROOKE, however, is in a complimentary sense. The distinguished Senator from Massachusetts has, in the main, made the strongest, most forceful argument against our position in the Judiciary Committee. Since I must speak to the arguments that were raised about the constitutionality of the bill, I must speak to the most articulate and the most forceful of those arguments which were made by the distinguished Senator from Massachusetts.

All the opponents of our bill point to a maximum eight possible areas of concern, where the bill could or would, depending upon their perspective, lead to an unconstitutional result.

Senator ROTH and I take the position that in all eight areas, the bill is constitutional and will be constitutionally construed. Our position is based not only upon our own analysis of the bill and the relevant Supreme Court cases, but also upon the testimony in favor of the constitutionality of the bill by constitutional law experts from the University of Texas, Georgetown, and Yale Law Schools.

I might add that the constitutional expert from Georgetown, Professor Abernathy, although testifying to the constitutionality of our bill, saying it was constitutional, did not support the bill. The reasons he did not support the bill were unrelated to the bill's constitutionality.

Now, let me take some of these points and I shall try not to delay my colleagues very long, because I imagine I shall have an opportunity to raise some, if not all, of these points throughout the remainder of the debate.

The first argument made concerns the "discriminatory purpose as a principal motivating factor" language in our legislation.

The heart of S. 1651 is the rule stated in the very first section of the bill, in essence requiring that busing cannot be ordered as a remedy unless:

> The court determines that a discriminatory purpose in education was a principal motivating factor in the constitutional violation for which such transportation is proposed as a remedy.

As the Attorney General's letter points out, most critics do not take issue with the requirement that a discriminatory purpose is a prerequisite to a constitutional violation. Indeed they all cite Brown against Board of Education as etablishing that principle and accept it as basic 14th amendment law.

However, opponents are concerned with the language that requires that discriminatory purpose be a "principal motivating factor" in the constitutional violation. For example, Senator BROOKE points out that "principal motivating factor" is nowhere explicitly mentioned in the two recent decisions in which the Supreme Court reminded the lower courts of the "discriminatory purpose" rule: *Washington* v. *Davis*, 426 U.S. 229 (1976) and *Arlington Hts.* v. *MHDC* 429 U.S. 252 (1977).

Senator BROOKE is correct. But, as Professor Abernathy from Georgetown pointed out in his testimony, the "principal motivating factor" rule is implicit in these and subsequent decisions. Indeed, the compelling argument in favor of the necessity of this legislation is the fact that the Supreme Court has never clarified the weight which must be given "discriminatory purpose" in determining whether a constitutional violation has occurred.

We agreed with Professor Abernathy and the Attorney General that, in order to be constitutional, this section must be interpreted consistent with Supreme Court decisions from which the rule implicitly arises.

Professor Abernathy states the position in a much more articulate way than I can, so I am going to take the liberty of quoting him from his testimony before our committee.

> The other requirement of section 1, that the discriminatory intent has been the "principal motivating factor" in an official's decision, is not explicitly sanctioned by *Davis* and *Arlington Heights*, although it draws some implicit support from the latter decision. In *Arlington Heights* the court noted that rarely could a plaintiff prove that race had been an official's "sole" or "predominate" motive, and therefore it required only that he show that race had been just one of many motivating factors.
>
> In a final footnote, however, and in a succeeding case, the court has left a defendant official free to prove that he would have reached the same decision even apart from his discriminatory motive. In effect, the principal motivating factor test as it is used in S. 1651 is also employed in *Arlington Heights*, although the burden of proof is on the defendant officials.
>
> Assuming that section 1 of S. 1651 retains the same allocation of burden of proof so as to conform to the demands of *Arlington Heights*, and I am told that that is Congress' intent, section 1 is constitutional. [Hearings, pp. 42–43]

On page 4 of his letter the Attorney General makes essentially the same point as Professor Abernathy:

> The provision could possibly be interpreted so as to secure its constitutionality, leaving on the State or local officials the burden of proving that racial factors were not the basis for their action.

Unfortunately the Attorney General goes on to debunk that position and the bill by contending that the litigative process would be "time consuming" and "unnecessary." Ironically, since our position, Professor Abernathy's, and the Attorney General's all spring from the same case law you could direct that same criticism at the present ambiguous state of Supreme Court case law. Since the burden of proof motivating factor rules are ambiguous there is going to be "time consuming" litigation whether this bill is passed or not. Indeed, we contend that the enactment of this bill might reduce the amount of litigation by clarifying the rule once and for all.

The second argument concerns the language discriminatory purpose "in education."

Opponents of the legislation contend that the requirement that the discriminatory purpose be "in education" is un-

constitutional because it excludes consideration of other unconstitutional official action, such as housing discrimination, outside the control of the school officials. The opponents contend that the Supreme Court in the Swann and other cases have held that school officials are not responsible for nor can the lower courts remedy through busing, the unconstitutional acts of nonschool officials.

However, opponents are rightfully concerned that the language could mean that nonschool officials and school officials could act in concert to frustrate school desegregation. Obviously that is not our intent. We agree with the Attorney General that the language should be interpreted in such a way as to permit the court to consider the interrelationship of other official action and school action. Perhaps Professor Winter of Yale Law School said it best in his testimony before the committee when he interpreted the language to cover the following hypothetical situations:

> If a sheriff in the suburbs outside Wilmington were to come along and not let blacks cross the border and the local authorities were to take action to stop blacks from moving into a town, you could show that one of the reasons they were doing that was to stop blacks from going to a school they wanted to go to, then clearly there is a remedy for that. [Hearings, p. 98]

We adopt the same interpretation of this language as does Professor Winter and the Attorney General.

We do not contend that our legislation would stop courts from enjoining that kind of activity, nor would we want it to. We do contend that our legislation of requiring "discriminatory purpose in education" is, in fact, constitutional.

(Mr. FORD assumed the chair.)

Mr. BIDEN. Mr. President, the third criticism pertains to the three-judge court provision. Senator ROTH has already spoken to that, so I will not belabor that point.

The fourth concern pertains to provisions requiring that the remedy must equal the wrong.

Section 3 of S. 1651, section 2 of the bill as reported by the committee and as proposed on the floor as an amendment to the education bill, requires that the busing order shall be:

> No more extensive . . . than reasonably necessary to adjust student composition . . . of the particular schools affected by the constitutional violation to reflect what the student composition would have been had no such constitutional violation occurred.

In general terms this language simply enacts the familiar rule of equity that a court is only empowered to put the plaintiff in the position he would have been had the wrong not occurred, no better no worse.

Although Senator BROOKE finds this provision defective because it is fraught with unspecified "legal and operational" problems, the Attorney General concedes that it simply recodifies existing law.

The fifth area concerns the school-by-school determination that the remedy is equal to the wrong.

Attorney General Bell is concerned about one aspect of the "remedy equal to the wrong" language contained in section 2. He interprets the reference to "particular schools" as meaning that the court must determine for each school subject to its jurisdiction the actual racial composition of each school had the violation not occurred. In Attorney General Bell's opinion this could, if misinterpreted, violate the Supreme Court's decision in Dayton because it might require a court to make a school-by-school determination despite the fact that the court had already found a constitutional violation which is by definition systemwide and despite practical difficulties (for example schools which have been closed or consolidated into new schools since the violation occurred).

The Attorney General concedes, however, that this language could simply be viewed as a codification of what the Supreme Court was saying in the Dayton case, that district courts must determine the:

> Incremental segregative effect these (constitutional) violations had on the racial distribution of the . . . school population as presently constituted, when that distribution is compared to what it would have been in the absence of such constitutional violations. The remedy must be designed to redress that difference . . . 45 U.S.L.W. at 4914.

We agree with the Attorney General and interpret the language of our bill as consistent with this Supreme Court rule. Obviously, we could not be asking judges to do the impossible but we are requiring that they, to the extent feasible, attempt to apply the Dayton rule down to each school rather than label a constitutional violation as "systemwide" without any serious attempt to determine whether it actually affected each school district.

The sixth area concerns written findings requirement.

The second half of section 3 of S. 1651 and section 2 of the proposed amendment to the education bill simply requires the judge to make written findings that the first section (requiring a constitutional violation) and the rule that the remedy meet the wrong (set out in the first half of this section) have been met.

We want to know that the court has viewed these interdistrict busing cases and all the other cases in a very particular manner. We want them to put it in writing. I do not think asking judges to put their rationale in writing is either unconstitutional or unwarranted.

Therefore it requires that before ordering busing he must make a factual finding of the constitutional violation consistent with section 1 and that the remedy meets that violation and goes no further, as set out in section 2.

The Attorney General, in analyzing this written finding section restates his concern that the "remedy equal the wrong" for particular schools be interpreted consistent with Dayton. We agree. We want it interpreted consistent with Dayton.

He goes on, however, to express an additional concern about this provision. In essence, the Attorney General contends that this provision could be inconsistent with the Supreme Court decision in *Green* v. *County School Board,* 391 U.S. 430 (1968), which in essence requires that even if a school board action on its face appears neutral but perpetuates segregation which was once officially sanctioned then the action is a violation. The Attorney General reasons that if the requirement of specific findings undercuts that doctrine it is unconstitutional.

The problem here is more fundamental. In our view that doctrine of continuous affirmative obligation to redress past discrimination is not what it once was. Our view is best summarized by Professor Abernathy, who has, incidentally, a background that is not one which would lend itself to readily take a position consistent with ours. He is a former civil rights lawyer. He says:

> Whether this provision comports with the Constitution depends upon which of two currently contending views wins over the minds of five Supreme Court Justices. One view holds that once a constitutional infection is discovered, the court, as physician, has a duty to cleanse the entire body, removing all vestiges of infection. The contending view takes a narrower perspective, arguing that a court-as-physician has the power and duty only to heal the one hurt discovered, not range over the patient's body and heal all of him.
>
> Historically the wider perspective has prevailed. Dissatisfied with the slow progress of school desegregation after *Brown* v. *Board,* the court exploded with anger in 1968 in *Green* v. *County School Board,* holding that freedom of choice desegregation plans—which removed all officially imposed discriminatory pupil assignments—were constitutionally inadequate. Rather, the court required not simply that officially intended school segregation be eliminated, but all school segregation.

Professor Abernathy goes on to explain how this Green position enjoyed its most unanimous and far-reaching impact in the famous Charlotte busing in 1971 where a systemwide busing order was approved regardless of the requirement of specific findings of violations for specific schools. However, by 1974 in the Detroit case and the Pasadena case in 1976 the Supreme Court was talking of "remedy equaling wrong" as the basic rule to be followed. Professor Abernathy goes on to conclude that the latter rule, the rule reflected in this bill, will prevail. We agree and, therefore, contend that this section of the bill, although not specifically sanctioned by any present case, would be upheld if it were presented to this Supreme Court.

The seventh issue I will address relates to the arguments against the stay provision in our bill.

Section 4 of our bill requires that any busing order could be automatically stayed until all appeals had been exhausted. The opponents were rightfully concerned that this provision could permit a stay even where the district court found a heinous constitutional violation that would never be reversed by a higher court. Therefore, the Judiciary Committee amended that section to permit a majority of a three man appeals panel or a majority of the Supreme Court to vacate such a stay. Section 3 of our proposed amendment to the education bill is consistent with the Judiciary Commitee version.

Finally, the Attorney General expresses concern about the last section of

the bill which would apply it to any busing order "not yet effected" or "not yet final." He reads this section with the prior section which authorizes stays and concludes that it might permit delays in cases where the district court finds a heinous constitutional violation which would never be reversed by higher courts. We feel that the special "escape clause" built into the stay provision by the Judiciary Committee (permitting a higher court to vacate the stay) cures this constitutional concern on the part of Attorney General.

I will conclude now by responding to the last argument. The argument was, "All right, ROTH, your bill may be constitutional; BIDEN, your bill may be constitutional; but even if it is, we don't think it is necessary, because it is going to confuse things."

In our view, the opponents of the Biden-Roth busing legislation make the case for its necessity, and make it very forcefully. At every turn, the opponents claim that when we provide for a rule or codification of the law consistent with the Supreme Court decisions, the litigation under the new statute will be time consuming and therefore unnecessary, because the result will simply be for the Supreme Court to uphold the statute.

In our view, the opponents have described exactly what the defect is with present Supreme Court decisions on busing. They are ambiguous; over time they appear inconsistent and they stimulate time-consuming litigation. The Biden-Roth bill, on the other hand, attempts to take all of the decisions of the last decade from Green County to Dayton, consolidate and codify them into a coherent Federal rule on busing.

We do not deny we have made choices between competing theories or approaches to the problem of busing, always choosing the more cautious approach. For example, we choose the Pasadena-Detroit line of cases over the Green County case. We apply the Washington-Arlington Heights "discriminatory purpose"/"principal motivating factor" rule to busing. In every case, however, where we make such a choice we do so in a manner that would clearly be upheld by this Supreme Court, as I hope we have demonstrated this morning.

In short, what we do in this legislation is exactly what Congress should have been doing all along in school desegregation—leading the Court and creating simple, coherent, enforceable Federal law in the area.

I might note that in the past when I have risen on this floor to offer amendments that relate to antibusing, I have been told that the reason we are in the mess we are in is that Congress has not spoken forcefully, that Congress has not spoken effectively, or Congress has not spoken at all, leaving it to the Federal courts to make the decision for us.

Now the same argument is being used—at least, it was in the testimony—against this legislation. I submit that you cannot have it both ways. If it is proper for the U.S. Senate to set down constitutional guidelines in any case, it is proper in this case. This proposed legislation is constitutional, and is necessary.

This is by its nature the legislative responsibility of this body. Under article III of the Constitution, the Supreme Court can only hear the cases presented to it. It cannot make a Federal code for busing. That is exactly the position in which we put the Court. If Congress acted 15 years ago, we would not be where we are now—if it had said clearly, "This is what we mean; this is how we think this issue should be handled."

If I had time—which I will not take—I could go back to the arguments made against the Biden One amendment in 1975, the first so-called antibusing amendment that passed the Senate and was written into law. They said, "Biden, you are confusing it." I want to clarify it, and Senator ROTH wants to clarify it. The clarification happens to be consistent with the Constitution and consistent with the feeling of an overwhelming majority of the people in this country.

We can and should do so. The Biden-Roth amendment accomplishes that goal without doing violence to the 14th amendment. To that extent our amendment tells school officials when they must face the disruption of busing and when they must not, in a way that the Supreme Court cannot. That is why Roth-Biden is not only necessary; it is essential for orderly public education consistent with the 14th amendment.

Mr. ROTH. Mr. President, will the Senator yield?

Mr. BIDEN. I yield to my colleague from Delaware.

Mr. ROTH. Not only does Congress have the right, but also, would the Senator agree that it has the responsibility to act in these circumstances?

Under section 5 of the 14th amendment, it is specifically provided:

> The Congress shall have the power to enforce by appropriate legislation the provisions of this article.

A careful reading of the recent book by Professor Berger of Harvard University, "Government by Judiciary," makes very clear that in many of these circumstances, Congress has not been living up to its full responsibility. Certainly here, with a matter of such tremendous importance nationwide, it seems to me only fair to say that we have not only the right but also the serious responsibility to establish national standards in this area for this country.

Mr. BIDEN. I agree with the Senator and further point out to our colleagues that I have not heard but two or three Senators in the Chamber stand up and say, "Do you know what? I think busing is a good idea. I think it works, and I think we should have more of it." I hear everyone stand up in this Chamber and say, "Although I do not like busing, although I do not think it is a good idea, I do not think we can alter the Constitution. We must let the court remedy constitutional wrongs."

We agree. We agree fully. But what we are saying here today is, we now have a clear-cut constitutional way of limiting the court. While we acknowledge that this amendment would not stop busing in all instances, we must restrict the Court's ability to order busing. In fact, I think the Court is looking for some guidance on this.

Look at what recently happened in Columbus. There is an order for a stay. The order is made to one judge who happens to have that jurisdiction. He denies the stay and an appeal is made to a second judge on the Supreme Court. He grants the stay. In a case in Wilmington there was an appeal for a stay that was made to Justice Brennan. Justice Brennan may or may not grant the stay. There will be a move to get the stay from another justice.

It seems to me the court is crying out and saying: "Look, we cannot write a code book. We cannot write a handbook. But what we can do is we can tell you what the basic principles are. You fill in the spaces."

This bill, I believe, fills in some of those spaces in a manner totally consistent with the Constitution of the United States of America.

Depending on what my colleague from Delaware wants, I am prepared now to answer questions, yield the floor, or proceed in any other manner with debate on our amendment.

Mr. PELL and Mr. BROOKE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I listened with great interest to the eloquent statements of the Senators from Delaware, who are truly a good partnership as well as being Senators from the same State.

However, as I have said to them privately, I do feel compelled to oppose this amendment and do intend to offer a tabling motion in 20 minutes or so.

My objections to this bill are, first, it limits busing to school districts where the court finds that a discriminatory purpose in education is the primary motivating factor for the pattern of segregation. But a court could not order busing to correct intentional discrimination in housing, for example, which also resulted in educational segregation.

Also, second, it is opposed by the Attorney General because, as he says, "Much confusion and time-consuming litigation will unnecessarily have been generated" by its provisions. Third, we already have exactly the same bill before us on the calendar as Calendar Order No. 404, which was reported out of the Judiciary Committee, which is really the committee to which it should have been referred and out of which it should have been reported.

For all of these reasons I find myself in opposition to the amendment.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. PELL. I yield to the Senator from New York.

Mr. JAVITS. Mr. President, I, too, shall be brief. I am strongly opposed to this amendment, and I shall support the motion to table for the following reasons:

I take my text from what was just said: "We would not be where we are now." We would not be where we are now because of what? The fact is that there is a greater measure of peace in respect of school desegregation than there ever was before. The fact is that the adoption of an amendment like this would do

exactly the contrary, and let me prove that to Senators.

The Attorney General of the United States opposes this particular amendment. One of his major reasons for opposing it is found on page 40 of the report on the bill, which was reported out of the Judiciary Committee. As Senator PELL has properly said, the Judiciary Committee is the appropriate forum for debating and settling this matter. That report shows that in a long list of cases—Alabama, California, Arkansas, Texas, Mississippi, Nebraska, Missouri, Ohio, Kansas, and so on—this particular amendment, because of its effect upon the decrees in school desegregation cases which for one reason or another may not have become completely final, will simply upset an existing situation.

The fact is that with all of our wrestling around we have come to some degree of accommodation between the proponents and opponents of this kind of legislation. And the thing to do now is to give it an opportunity to season and work, not to throw in new procedural safeguards as the proponents call it and new changes in the substantive law which will again completely upset the situation.

Let us remember with respect to these goals that are constantly talked about, that these civil rights are intended to protect minorities, and they are minorities, real minorities. So we cannot expect these goals to generate great popular waves of enthusiasm such as we see for tax cuts. As Justice Frankfurter said:

> These people are often not the most washed and the best dressed and the best educated and the most intellectual. That is why they most need our protection.

Mr. President, the Attorney General of the United States is no wild-eyed radical. He is opposed to this particular measure and he so stated in unequivocal terms, and this is cited in the report upon the bill to which I have referred.

I shall not take the time of the Senate with a long dissertation on the bill although I will do so if the motion to table fails. But I think these points which I have just made are critically important to us as Senators. The state of our national tranquillity will be contributed to by tabling this amendment rather than by agreeing to it.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. BROOKE. Mr. President, let me first say that I have the greatest respect and admiration for both of my distinguished colleagues from the great State of Delaware who have introduced this amendment. But I think this is the most pernicious amendment that has been introduced in the whole area of quaranteeing equal educational opportunities for all Americans.

I do not even believe that my colleagues understand just how pernicious this amendment is. It does not direct itself to HEW, or to any other executive department agency. It directs itself to the Judiciary. The legislative branch of the Government would be telling the judicial system that it would be restricted in i's authority to fashion relief for constitutional violations.

As both Senators from Delaware are lawyers, they should understand that this goes far beyond anything that we have ever had before the Senate regarding desegregation remedies.

I must state at the outset that I have drafted 95 amendments to this amendment. But it is my understanding that the distinguished Senator from Rhode Island, who is the floor manager of this bill, intends to offer a motion to table the amendment offered by the two Senators from Delaware, Mr. ROTH and Mr. BIDEN.

I must state at the outset that I profoundly disagree with this amendment. My disagreement is based not upon emotional feelings about busing or the fact that many of our Nation's public schools remain illegally segregated nearly a quarter of a century after the Brown decision. Rather, I object to this amendment, because I believe it to be unconstitutional in purpose, substance and effect. I further believe that the bill is unnecessary and unworkable, and would, if enacted, generate public confusion, and further delay the already protracted process of school desegregation which, fortunately, is working in many parts of our Nation, primarily in the South.

The authors of this amendment contend that it is constitutional, because it conforms to the standards enunciated by the Supreme Court. Even if the specific provisions of the bill conformed to current constitutional standards regarding the use of student transportation to remedy illegal school segregation, which as I will demonstrate they do not, the bill would, nevertheless, violate the constitutional doctrine of separation of powers, and I think this is an issue which both the junior and senior Senators from Delaware should be very much concerned about. The legislation repersents a blatant congressional attempt to restrict the judiciary's power to remedy illegal segregation and vindicate constitutional rights.

Article III vests the judicial power of the United States—which extends to all cases in law and equity arising under the Constitution—in one Supreme Court, and such inferior courts as the Congress may establish. Because the right to attend nonsegregated public schools is guaranteed by the Constitution, a determination of what constitutes adequate and appropriate relief to remedy unconstitutional school segregation is the sole province of the judiciary. Judicial power resides in the judiciary, not the Congress. Because of its commitment, as a matter of policy and constitutional doctrine, to the separation of powers, Congress should not seek to restrict the Supreme Court's authority to fashion relief for constitutional violations.

Moreover, the legislation cannot be reconciled with the authority granted Congress by section 5 of the 14th amendment "to enforce by appropriate legislation the provisions of this article." The purpose and effect of this amendment—to limit the power of the Federal courts to remedy violations of the 14th amendment—is fundamentally negative and restrictive. As the Supreme Court noted in Katzenbach against Morgan which considered the constitutionality of a provision of the Voting Rights Act:

> Contrary to the suggestion of the dissent, post, p. 668, section 5 (of the 14th amendment) does not grant Congress power to exercise discretion in the other direction and to enact "statutes so as in effect to dilute equal protection and due process decisions of this court." We emphasize that Congress' power under section 5 is limited to adopting measures to enforce the guarantees of the Amendment; section 5 grants Congress no power to restrict, abrogate, or dilute these guarantees.

While Congress, in the exercise of its section 5 authority, could expand relief, it cannot withhold or deprive relief to the victims of discrimination prohibited by the 14th amendment.

Even if this amendment did not violate the doctrine of separation of powers, it would, nevertheless, represent a congressional encroachment on the power and integrity of the judiciary. This amendment attempts to fix standards to regulate the award of equitable relief in school desegregation cases. In so doing, it distorts the legal concept of equity. As the Supreme Court noted in Brown II, the 1955 decision on implementation of the constitutional prohibition against school segregation, an essential characteristic of equity is "a practical flexibility in shaping * * * remedies * * * " In the 23 years since Brown the Federal courts have refused to adopt a rigid set of remedial standards in school desegregation cases; rather, they have attempted to fashion remedies that were practically effective and sensitive in the light of the widely differing circumstances of local school districts. Legislative prescription of school desegregation remedies, no matter how well drafted, would circumscribe the power of the courts to provide equitable justice and would thereby rob the Constitution of its living strength.

Before turning to the specific provisions of this amendment, I want to say a few words about the character and import of the bill as a whole. The authors of the legislation aver that it is not designed to restrict constitutional rights, but rather to limit the use of court-ordered busing. Indeed, the bill does not attempt to define "constitutional violation" but only the circumstances under which student transportation may be used by Federal courts to cure unconstitutional school segregation. I believe, however, that the authors' distinction between rights and remedies is deceptive and illusory. Student transportation is just one of many remedies which the Supreme Court has found necessary to eliminate de jure school segregation. Although this amendment pretends to focus exclusively on remedies, it ultimately affects constitutional rights. Let us not deceive ourselves, "a right without a remedy is like a bell without a clapper"—hollow and empty.

Turning now to the substantive provisions of the amendment, section 1 provides:

> Notwithstanding any other provision of law, no court of the United States shall order directly or indirectly the transportation of any student on the basis of race, color, or national origin unless the court determines that a discriminatory purpose in education was a principal motivating factor in the constitutional violation for which such transportation is proposed as a remedy.

According to its authors, section 1 of

this amendment conforms to and clarifies current constitutional standards. They view the Supreme Court's recent employment decision in Washington against Davis and its housing decision in Arlington Heights against Metropolitan Housing Corp. as giving rise to what they appropriately describe as a "discriminatory purpose rule." While the authors of this amendment correctly recognize the existence of a "discriminatory purpose rule," they misperceive its origins. The rule is not new; it did not originate in the Court's recent decision in Washington and Arlington Heights; and it has long been applied in school desegregation cases. As the Supreme Court stated in Keyes against School District No. 1, a 1973 decision:

> We emphasize that the differentiating factor between *de jure* segregation and so-called *de facto* segregation . . . is *purpose* or *intent* to segregate. (Emphasis in original) 413 US 189 at 208.

A great deal more serious than their misapprehension of the origins and applicability of the discriminatory purpose rule to school desegregation cases is the authors' incorrect formulation of the rule. The authors contend that the Washington and Arlington Heights decisions support their "principal motivating factor" formulation of the discriminatory purpose rule. Neither of the decisions, however, employs such a narrow and restrictive standard. Quite the contrary, the Court stated in Arlington Heights:

> Davis does not require a plaintiff to prove that the challenged action rested solely on racially discriminatory purposes. Rarely can it be said that a legislature or administrative body operating under a broad mandate made a decision motivated solely by a single concern, or even that a particular purpose was the "dominant" or "primary" one. In fact, it is because legislators and administrators are properly concerned with balancing numerous competing considerations that courts refrain from reviewing the merits of their decisions, absent a showing of arbitrariness or irrationality. But racial discrimination is not just another competing consideration. When there is proof that a discriminatory purpose has been a motivating factor in the decision, this judicial deference is no longer justified. (Slip Opinion 75–06, p. 12, Jun. 11, 1977.)

Davis simply has no language supporting the "principal motivating factor" theory advanced by the authors of the legislation, and Arlington Heights is unequivocal in its rejection of that standard. Quite simply, the narrow and restrictive standard set out in this bill does not conform to, but rather conflicts with, current constitutional standards.

Finally, the standard set out in section 1 which effectively bans the use of student transportation to remedy constitutional violations unless the violation was motivated by "a discriminatory purpose in education" is constitutionally suspect.

In fact, the Supreme Court has never acknowledged any such limitation. Indeed, in 1975, the High Court summarily affirmed the decision of the three-judge court in the Wilmington case, Evans against Buchanan, which found an "interdistrct violation" on the basis of five separate factors unrelated to education. The Buchanan district court found that governmental housing policies had resulted "to a significant degree (in) the increasing disparity in residential and school populations between Wilmington and its suburbs in the past two decades." 393 F. Supp. at 438. Specifically, the court pointed to discriminatory practices, unrelated to education, in the following areas to support its finding of a constitutional violation: FHA mortgage policies; enforcement of racially restrictive covenants; publication of a discriminatory manual by the State Real Estate Commission; concentration of public housing in the city even though the Wilmington Housing Authority had jurisdiction to site units in part of the surrounding county; and the failure of the county housing authority to build any units since its creation in 1972.

Similarly, Justice Stewart concurring in the Detroit case, Milliken against Bradley, observed that "purposeful, discriminatory use of housing and zoning laws" may serve as a basis for ordering crossdistrict relief in school desegregation cases.

Thus it is misleading and inaccurate to assert, as the bill's proponents do, that section 1 of the bill is a simple restatement of the Supreme Court's jurisprudence as developed in recent cases.

The subsection 2(b)(1) requirement that the courts make specific written findings "of the discriminatory purpose for each constitutional violation for which transportation is ordered" is impossibly ambiguous. The bill gives no guidance as to the scope of the phrase "each constitutional violation." Given the fact that the Supreme Court has held that plaintiffs in school desegregation cases need not "bear the burden of proving the elements of de jure segregation as to each and every school * * * within the school system" (*Keyes*), the phrase cannot refer to segregation of individual schools.

Subsection 2(b)(2) requires the courts to make specific written findings of the "degree to which the concentration by race, color, or national origin in the student composition of particular schools affected by such constitutional violation presently varies from what it would have been in normal course had no such constitutional violation occurred." This requirement belies the dynamic complexity of segregation in our society. The Supreme Court has devoted considerable attention to the symbiotic relationship between residential and educational segregation and the fact that they interact, amplify, reinforce, and cause one another. Even when school and noneducational governmental officials are not consciously acting in concert, the effects of their actions are cumulative and reciprocal. To require the courts to disentangle the intricate web of residential and educational segregation, a web that has grown in complexity and scope over the years, is to mandate a futile exercise in pseudo precision.

Moreover, the futile, speculative procedure specified in this subsection—a veritable "chicken versus egg" inquiry into causation and blame—distorts the fundamental responsibility of Federal courts in school desegregation cases. Once a court has determined that educational officials have unlawfully segregated schoolchildren, its paramount concern must be the vindication of constitutional rights. The proper focus of judicial inquiry in hearings on remedial relief, therefore, is the practical effectiveness of the various school desegregation alternatives.

Finally, I would like to address sections 3 and 4 of the bill. These provisions, independently and taken together, violate the spirit of the Supreme Court's 10-year-old proclamation that the time for "all deliberate speed" has ended and the time for desegregation is now. Masquerading in the guise of due process, these provisions can only impede and delay the process of school desegregation. Sections 4 and 5 would provide recalcitrant school districts and scofflaw school officials with still another opportunity to spend hundreds of thousands of dollars on legal appeals designed to frustrate the constitutional rights of our children.

H. L. Mencken once said that—

> For every difficult and complex problem, there is an obvious solution that is simple, easy, and wrong.

Assuring equal educational opportunity for every child in America is, indeed, difficult and complex. Mr. President, the proposed legislation before this Senate is simple, easy, and wrong and I ask the Senate to reject it.

Mr. President, I want to briefly discuss with my friend, the junior Senator from Delaware, his earlier remarks about no one standing up for school busing. I do not believe that is true. School busing has been used to a great extent in this Nation for more than 50 years.

The vast majority of children in the schools, indeed, more than 65 percent, go to school by some form of transportation, rather than walking to school as many of us did in the old days. And less than 4 percent of these students are bused for the purposes of desegregation.

I believe it is also important to note that there has been more busing used in this country for purposes of segregation than has ever been used for the purposes of desegregation.

And, in many instances, as I said earlier, particularly in the southern part of this Nation, school desegregation is working because the people have allowed it to work—not school integration but school desegregation—and the Senator from Delaware knows that there is a very clear legal distinction between the two.

Mr. President, I fervently hope that the motion of the distinguished Senator from Rhode Island to table this amendment will carry. For this amendment is unconstitutional and would set a dangerous precedent for the Congress of the United States. Indeed I do not see how any lawyer or any student of the Constitution could ever vote for it. For it represents a congressional attempt to deny the Supreme Court remedies for relief that have long been established by constitutional authority.

Mr. President, having said that and because of the time constraints, I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I would like first to yield to the Senator from Delaware (Mr. BIDEN). I understand he has a remark or two, and then to the Senator from North Carolina (Mr. MORGAN).

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. Mr. President, I would like to take, at some point, 2 minutes to answer three or four of the arguments, but I would like to yield to Senator ROTH first, if I may.

The PRESIDING OFFICER. The Senator is retaining 2 minutes, and yielding to the senior Senator from Delaware?

Mr. BIDEN. Yes.

The PRESIDING OFFICER. The senior Senator from Delaware is recognized.

Mr. ROTH. Mr. President, I too, will be brief, but I want to make two or three points in answer to what the distinguished Senator from Massachusetts has said.

This Congress has been criticized, in years gone by, for not living up to its responsibilities, particularly in its relationship to the White House. I think one of the most serious charges that can be made against Congress is that we are likewise not living up to our responsibilities in relationship to the Supreme Court.

The courts are coequal, not supreme, to Congress and it is Congress, the elected body, that has the responsibility of establishing national policy. It is curious to me that the minute we talk about limiting remedies, we are infringing on the rights of the Supreme Court, but when many of us supported the legislation for civil rights, that was no encroachment on the Supreme Court.

It is time that Congress takes upon itself the responsibility that has been given to us under our Constitution. I speak, for example, of the 14th amendmend itself, which specifically provides that Congress has the responsibility "to enforce, by appropriate legislation, the provisions of this article."

So I cannot buy the argument that Congress should not act. As President Andrew Jackson said in 1832:

> It is as much the duty of the House of Representatives, of the Senate, and of the President to decide upon the constitutionality of any bill or resolution which may be presented to them for passage or approval as it is of the supreme judges when it may be brought before them for juricial decision. The opinion of the judges has no more authority over Congress than the opinion of Congress has over the judges, and on that point the President is independent of both. The authority of the Supreme Court must not, therefore, be permitted to control the Congress or the Executive when acting in their legislative capacities, but to have only such influence as the force of their reasoning may deserve.

In closing, however, Mr. President, I want to make one basic point. What is at stake here, what is important, is quality education for all children. We can no longer tolerate this experimentation with tens of thousands of children of every color, every race, every creed. The facts are showing that this experimentation of recent years is not working. It is not providing quality education for our children, and it is not providing a color-blind society, which we all desire.

All we are suggesting is that this route of busing is not the correct one, that we should seek other avenues of assuring quality education for all black and white children.

I thank the chair.

The PRESIDING OFFICER. The junior Senator from Delaware has 2 minutes, and then the Senator from North Carolina will be recognized.

Mr. BIDEN. Mr. President, I hope this motion will not be agreed to, so that we will be able to debate the constitutionality at some length later, but for now I wish merely to respond to one or two questions.

The Senator from New York said we should not disturb the situation, that we have peace now. I would like to recommend to him that he look into the situation in Ohio, with several cities about to be under order, and other cities in California. He said we are upsetting the situation, that it is harmonious. He can ask people out in Ohio in charge of the school systems if they think things are going smoothly in Dayton, Cleveland, or Columbus with all of this uncertainty and disruption.

The Senator from Massachusetts said we should not direct this at the judiciary. Mr. President, all the titles in the United States Code direct themselves at the judiciary. I think we must direct legislation at the judiciary.

Earlier the Senator from Rhode Island made the point that this bill is on the calendar. I say to the Senator, if there had been any hope that the bill would be brought up, we would not be here now. This is the point I made at the beginning. I hope we get an opportunity to argue it further, and I hope my friends in the Senate will not vote for the motion to table our amendment.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. MORGAN. Mr. President, I rise in opposition to the amendment offered by the distinguished Senators from Delaware, and in support of the proposed motion to lay on the table of the Senator from Rhode Island.

I think all of us would agree that busing of children across from one side of the city to another side is not desirable, and I think we all would agree that it is perhaps not the best way to provide a quality education for all of our children. But I think what the amendment would do would be, in fact, or certainly in effect, to perpetuate the dual standard that has existed in this country for a long time, partly because of laws and partly because of housing patterns—a standard that we are trying to rid ourselves of.

Busing in the South is working. As I mentioned, it is not desirable, but we are doing it in North Carolina. The original Charlotte versus Swan case was a North Carolina case. I was counsel for the State of North Carolina when that case was argued in the Supreme Court, and I opposed the busing order.

But it is now a fact, Mr. President, and we are doing it all over the South. What this amendment would do is say, in effect, that what we have done about ordering busing in areas of the country where it is now in existence under court order is all right, "but we are just not going to do it any more."

I think what we need to do is try to rid ourselves of these vestiges of segregation, regardless of whether they existed from State laws, as they did in my State, or whether they existed from housing patterns and real estate practices, as in States in the North and in the Midwest.

Once we have done that, Mr. President, I think we will all be willing to work together to try to find better ways of providing quality education for all of our children, regardless of what section of the country they live in, or what section of the State or what section of the city.

But I fear if we adopt this amendment and perpetuate this double system, we will never be willing to work together to find a way of providing good neighborhood schools for all of our children. The quickest way we can return to neighborhood schools, is to find a better way of providing quality education. I do not believe this is the way, Mr. President.

So I shall vote to table the amendment, and I hope my colleagues will do likewise.

● Mr. BAKER. Mr. President, I rise in support of an amendment offered by the distinguished Senators from Delaware to S. 1753, a bill to extend the Elementary and Secondary Education Act. The intent of this amendment is to limit the use of forced busing as the remedy in school desegregation cases.

I have long opposed forced busing as a means of desegregating school districts and have stated that our national goals of obtaining a good education for every child and assuring equal educational opportunities for all are not furthered by the judicial mischief of busing. The people of our Nation have overwhelmingly registered their opposition in pubic opinion polls and, even more convincingly, at the polls in State and national elections. This demonstration of the will of our citizens cannot be ignored or frustrated any longer, and I am hopeful that decisive legislative action can be taken now.

The effect of the pending amendment would be to prohibit the implementation of busing orders unless there was a finding of intentional discrimination. Moreover, the extent of the busing order could not exceed the scope of the problem as defined by the Court. And finally, pending busing orders would be stayed until the Court determined that the order was consistent with the language of this amendment.

I believe that this amendment represents a constructive first step toward a legislative solution to this troublesome and difficult issue. I urge my colleagues to support the amendment offered by the two distinguished Senators from the State of Delaware.●

● Mr. DECONCINI. Mr. President, I rise in support of the amendment offered by the distinguished Senators from Dela-

ware. I should also like to commend them for bringing into this forum what is one of the most controversial social policies of our day. Too many Americans would rather not deal with this issue; they would rather allow the Federal courts to make our vital political decisions. The two Senators from Delaware would restrict and limit the power of those same Federal courts to order busing in only those circumstances when discrimination was the purpose behind the establishment of school boundaries.

I believe, Mr. President, that the issue of busing is clearly and unequivocally a political question; and one that should be settled through traditional political structures like the Congress and State legislatures. That is one of the reasons why the Senate should give serious consideration to the present proposal.

The Senate should be aware that the Judiciary Committee did consider this legislation, and conducted a lengthy mark-up session where substantial compromises were made. The Judiciary Committee has ordered this bill reported and a majority of its members have endorsed its provisions. It is no argument that S. 1753 is not the proper vehicle for this measure. Each of us is well aware that the Biden-Roth bill will not be considered. We are in a situation where a small minority of the Senate can virtually prevent any piece of legislation from consideration by the majority.

It seems to me, Mr. President, that too many Federal judges have taken upon themselves the task of restructuring and reordering our society. Over a period of many generations certain housing and other patterns have evolved in our cities which clearly run counter to our present desire to see the integration of all peoples. Our Federal courts are engaging in some social engineering which is neither directly relevant to the question of discrimination, but which is—more importantly—terribly disruptive to the fabric of our society.

We simply cannot change the patterns in our cities and our societies overnight. We can and we have outlawed racial discrimination. We should continue to be ever vigilant to enforce these laws. But the busing decisions addressed by this legislation clearly fall outside the scope of the purposeful discrimination. Rather, they are part of lengthy evolution.

The correct approach to the matter of America's development into a harmonious, multiracial society in which all vestiges of inequality are obliterated is not through an artificial device such as busing. What we must correct are the patterns of overt discrimination and the patterns of clear deprivation which have led to the emergence of ghettos and blighted inner cities. The pattern in American society has always been to seek to raise all citizens to the highest level possible, not pull all citizens down to the lowest common denominator.

No one, Mr. President, has any quarrel with busing that is clearly designed to remedy intentional discrimination. Where discrimination is the motivating factor behind the establishment of school districts, busing is a proper remedy. But where the lack of balanced schools is simply the result of natural patterns of residential settlement, the Federal courts should be prevented from disrupting the harmony of neighborhoods and from disrupting the lives of our children. Who are we punishing for what crime? Are we punishing our children and their parents because of the failure of American society and American law over the last 200 years? Is this just? I cannot believe that a majority of Americans—black or white—would agree. In fact, all the evidence that is available suggests just the opposite. Most Americans—black and white—oppose forced busing.

Finally, Mr. President, there is the very immediate and real concept of the neighborhood and the neighborhood school that is at stake. Certainly, a pleasant neighborhood in which to live and raise one's children is part of the American dream. It is one of the things to which we aspire. Yet, through forced busing, we would deny this part of what our citizens desire because it has not yet been attained by all. That seems to be vindictive, at worst, and retrogressive, at best. No child should be forced to spend hours on a school bus to attend a strange school unless there is a compelling reason. And this legislation leaves the option of busing open if overt discrimination is, indeed, responsible.

I urge my colleagues to support the measure.●

Mr. THURMOND. Mr. President, I rise in support of the pending amendment to the Elementary and Secondary School Act Amendments, S. 1753.

This amendment is identical to a bill, S. 1651, that is now on the Senate Calendar and was reported by the Senate Judiciary Committee on August 1, 1977.

The primary purpose of the amendment is to establish guidelines that are consistent with the Constitution and the rulings of the Supreme Court which courts may order in the transportation of students on the basis of race, color or national origin.

Mr. President, the amendment provides for several prinicples to be followed by Federal courts. First, it would require a U.S. district court to find "a discriminatory purpose in education" behind any violation for which student transportation is proposed as a remedy.

Second, courts would be required to determine the extent to which acts of unlawful segregation have caused a greater degree of racial segregation in a school or schools than would have otherwise existed.

Third, student busing would be limited to eliminating the degree of racial segregation attributable to those proven unlawful acts.

Fourth, cases in which student busing is proposed as a remedy would have to be heard by a three-judge court.

Finally, the amendment requires Federal court busing orders to be stayed until all appeals are exhausted.

Since the decision of Brown against Board of Education in 1954, the courts have spoken a number of times and in some cases, with different voices on the issue of segregation. This amendment seeks to bring reason and order to an area of constitutional law that affects the lives of so many Americans.

The courts have, in recent years, departed somewhat from the Court's decision in Brown by saying that the Constitution only requires desegregation, it does not require school racial integration for its own sake. In *Washington* v. *Davis* (1976), the Supreme Court clearly rejected the view that even the location of a new school building could have a racial impact. An act is not unconstitutional solely because it has a racially disproportionate impact. The court must find that the action was purposefully discriminatory.

Mr. President, the requirement that a court find a principal motivating factor, which means that a discriminatory purpose must be an indispensable component of the decisionmaking process, in the action of a defendant, has been upheld as a valid test in the case of *Arlington Heights* v. *Metropolitan Housing Development Corporation* (1977). In other words, a decision by a local school board to close a school, move certain grades to another school, or locate a new school in a certain area of town, is not on its face racial discrimination.

Mr. President, I believe that in certain cases the courts have misinterpreted the mandate of Brown against Board of Education. Likewise, sociologists in this country have advocated positions that are not truly representative of the thinking of a majority of the American people. Both black and white Americans want a good education for their children. I share that desire. But, in many cases, the goal of gaining a racial mix becomes primary, and the education of our children becomes secondary. This should not be the case.

The amendment being offered by the Senators from Delaware seeks to provide a rational set of criteria for the courts to follow in judging circumstances under which the transportation of students can be achieved. It is an amendment that says in effect, the education of our children should come first, but if suspected constitutional violations occur in achieving that goal, then the courts need guidelines to follow in judging whether such actions in fact violate the Constitution.

This is not necessarily an antibusing measure. It does not prohibit the transportation of students in order to avoid racial segregation. It still permits such actions.

This amendment does not allow school officials or local governments to engage in conduct that would violate the law. It simply provides Federal courts with the principles set out by the Supreme Court for judging the constitutionality of actions by local school officials.

Mr. President, the people of South Carolina are all mindful of the requirements of the Federal laws with regard to racial discrimination in the public schools. But they are also vitally interested in seeing that their children get a good education. South Carolina has 90 percent of its children enrolled in public schools, which is about the same as the national average. Thus, the difficulties, the inconveniences, and sometimes, the frustrations of transporting students to schools outside of their neighborhoods is experienced by South Carolinians as well as most Americans. This amend-

ment would hopefully result in a more careful application of court ordered busing plans, thereby easing the frustrations and problems now experienced by many American families.

The hearings on S. 1651 in the Judiciary Committee support the argument that when busing orders go beyond what is required to correct any unlawful actions there is a counter-productive result. One consequence of court ordered busing is the so-called "white flight." Economically affluent white families flee the cities to escape the impact of busing orders. This result is not, according to recent research, due to latent racism but rather a strong belief in neighborhood schools as a concept worth supporting.

In addition, there is evidence that ethnic groups concentrate for convenience; for access to family and friends; access to religious, cultural and commercial facilities that serve specific groups. Court orders that unnecessarily disrupt these positive social conditions do not improve the educational opportunities of our children. This amendment seeks to limit the scope of these orders so that the negative social aspects will be reduced.

Finally, Mr. President, I want to commend the Senators from Delaware for bringing this amendment to the attention of the Senate. The bill, S. 1651, reported by the Judiciary Committee has been on the Senate Calendar since September of last year. This is an important issue to all Americans and even though the Senate may not see fit to adopt this amendment today, it does provide the opportunity for debate on a matter of interest to not only the people of South Carolina, but the Nation.

Mr. President, I urge my colleagues to adopt the amendment.

Mr. PELL. Mr. President, I move to lay on the table the pending amendment of the Senators from Delaware.

Mr. JAVITS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I favor the amendment, its content, and its substance. I also gave Senator BIDEN my proxy in reporting it to not foreclose any measure facing the Senate. But because of the workload and scheduling problems, in this instance I will support the motion to lay on the table.

Mr. BIDEN. Mr. President, will the Senator yield to add a cosponsor?

Mr. PELL. I yield.

Mr. BIDEN. I ask unanimous consent that the name of the Senator from Florida (Mr. CHILES) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the motion to lay on the table the amendment of the Senators from Delaware. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Louisiana (Mr. LONG), are necessarily absent.

The result was announced—yeas 49, nays 47, as follows:

[Rollcall Vote No. 352 Leg.]

YEAS—49

Abourezk	Hart	McGovern
Bayh	Haskell	McIntyre
Bellmon	Hatfield, Mark O.	Melcher
Brooke	Hatfield, Paul G.	Metzenbaum

Domenici	Nunn	Tower
Ford	Packwood	Wallop
Garn	Proxmire	Young
	Randolph	Zorinsky

NOT VOTING—4

Anderson	Johnston
Eastland	Long

So the motion to lay on the table UP amendment No. 1721 was agreed to.

Mr. BIDEN. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JAVITS. I move to lay that motion on the table.

Mr. ROTH. I ask for the yeas and nays, Mr. President.

Mr. ROBERT C. BYRD. Mr. President, let us not have the yeas and nays on a motion to table. If we do, I hope it will be overwhelmingly agreed to. I am for the amendment, for the substance of it.

The PRESIDING OFFICER (Mr. CHILES). The motion is not debatable.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for 30 seconds.

The PRESIDING OFFICER. Is there objection?

Mr. ROTH. Regular order.

The PRESIDING OFFICER. The objection is heard.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

The result was announced—yeas 51, nays 45, as follows:

[Rollcall Vote No. 353 Leg.]

YEAS—51

Abourezk	Haskell	Melcher

NOT VOTING—4

Anderson	Inouye
Eastland	Johnston

So the motion to lay on the table the motion to reconsider was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I yield briefly to the Senator from South Carolina.

Mr. HOLLINGS. I thank the distinguished leader.

UP AMENDMENT NO. 1722

(Purpose: To delete title XII relating to nonpublic educational assistance)

Mr. HOLLINGS. Mr. President, I call up my amendment.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS), on behalf of himself, Mr. BELLMON, and Mr. HODGES, offers an unprinted amendment No. 1722.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 318, beginning with line 12, strike out through line 9 on page 324.

On page 324, line 12, strike out "SEC. 113." and insert in lieu thereof "SEC. 112.".

On page 326, line 18, strike out "SEC. 114." and insert in lieu thereof "SEC. 113.".

On page 19 in the Table of Contents insert end quotation marks after item Sec. 1108.

On page 19 in the Table of Contents strike out item Sec. 112, title XII and items 1201 through 1207.

On page 19 in the Table of Contents redesignate items Sec. 113 and Sec. 114 as items Sec. 112 and Sec. 113, respectively.

Mr. HOLLINGS. Mr. President, I ask unanimous consent to have four opinions

printed in the RECORD. They find it is clearly unconstitutional, and that is why I move to strike item 12.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Library of Congress Congressional Research Service]

JUNE 22, 1978.

From: American Law Division.

Subject: Constitutionality of Title XII of the Elementary and Secondary Education Act, As Proposed To Be Added by S. 1753, and Suggestions on Changes Needed To Render It Constitutional.

This is in response to your request for a brief memo analyzing the constitutionality of Title XII of the Elementary and Secondary Education Act, as proposed in S. 1753, and if it appears unconstitutional, for suggestions as to how it might be made constitutional. This memo will respond to these inquiries in order.

CONSTITUTIONALITY OF THE PROPOSED TITLE XII

Title XII, as proposed in S. 1753, would authorize $500 million each year from fiscal 1979 through fiscal 1983 for grants to nonpublic elementary and secondary schools. The grants could be used by the recipient schools only for the following purposes:

(1) secular textbooks (limited to those approved for use in public schools);

(2) standardized tests and scoring services (limited to those used in the public schools);

(3) diagnostic speech and hearing services on the premises of the nonpublic school;

(4) diagnostic psychological services on the premises of the nonpublic school;

(5) guidance and counseling services on the premises of the nonpublic school;

(6) secular instructional materials and instructional equipment; and

(7) transportation to and from nonpublic elementary and secondary schools. Sec. 1202(b).

The constitutional question that arises from this proposed grant program stems from the fact that a substantial majority of nonpublic elementary and secondary schools are church-related[1] and from the language of the First Amendment which provides that "Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof. . . ." Application of this language, as interpreted by the Supreme Court in numerous decisions, to the proposed grant program suggests that it may be constitutionally infirm, in two respects, first, several of the purposes for which the grant funds could be used by the recipient schools would not appear to accord with the pertinent Supreme Court decisions. Secondly, the nature of the program as a direct grant program to predominantly religious institutions would appear to violate the excessive entanglement and, perhaps, the primary effect tests as these have been elaborated by the Supreme Court.

The compatibility of each of the possible uses for the grant funds with pertinent Supreme Court decisions would appear to be as follows:

(1) *Secular textbooks*—In several cases the Supreme Court has upheld programs in which the state purchases and loans to nonpublic schoolchildren such secular textbooks as are approved for use in the public schools. *Wolman v. Walter*, 433 U.S. 229 (1977); *Meek v. Pittenger*, 421 U.S. 349 (1975); *Board of Education v. Allen*, 392 U.S. 236 (1968). In every such program, however, ownership of the books has remained with the state and the direct beneficiaries have been the nonpublic schoolchildren and their parents rather than the schools. The textbook program in Title XII would be different: the schools would own the books, and thus the schools would be the immediate beneficiaries. Because a majority of the Court in *Wolman v. Walter*, supra, made clear their intention not to extend the rationale supporting the textbook loan program beyond the program itself, this purpose would not appear to be sufficiently limited to be constitutional.

(2) *Standardized tests and scoring services*—In *Levitt v. Committee for Public Education*, 413 U.S. 472 (1973), the Court held unconstitutional a program reimbursing nonpublic schools for, among other things, the costs of giving, compiling, and reporting the results of tests and examinations required by the state. In *Wolman v. Walter*, supra, the Court upheld a program providing standardized tests and scoring services to nonpublic schoolchildren. The provision in Title XII would appear to be more like the latter than the former, and thus likely would be constitutional.

(3) *Diagnostic speech and hearing services on the nonpublic school premises*—The Court has made clear that government cannot subsidize the functions of personnel likely to engage in religious proselytizing. Even when the subsidized function has been secular in nature—secular teaching, guidance counseling, psychological services, etc., the Court has perceived a danger that the personnel involved would become religious advocates because of the pervasively religious atmosphere of sectarian schools. *Lemon v. Kurtzman*, 403 U.S. 602 (1971); *Meek v. Pittenger*, supra. This has been true both when the personnel have been employed by the school itself and when they have been public employees. In *Wolman v. Walter*, supra, however, the Court found it constitutionally permissible for public personnel to provide diagnostic speech and hearing services on the nonpubic school premises, on the grounds that such functions are not closely related to the educational mission of the school and that the relationship between the diagnostician and the child is limited in nature. The employees providing the services sanctioned in *Wolman v. Walter*, supra, however, were public employees. Under Title XII the personnel would necessarily be hired by the sectarian school itself. Consequently, the danger that such employees would be religious advocates would seem to arise, and this use of the grants would not seem sufficiently limited to be constitutional.

(4) *Diagnostic psychological services on the nonpublic school premises*—In *Wolman v. Walter*, supra, the Court upheld diagnostic psychological services on the same rationale as diagnostic speech and hearing services. Again, however, the personnel involved were public. Under Title XII the personnel would be hired by the sectarian school itself, and consequently, the danger that such employees would be religious advocates would again seem to arise. Thus, this use of the grants would not seem sufficiently limited to be constitutional.

(5) *Guidance and counseling services on the nonpublic school premises*—The Court has upheld the provision at public expense of guidance and counseling services *off* the nonpublic school premises by public employees but has struck down the provision of such services *on* the sectarian school premises. Compare *Wolman* v. *Walter*, with *Meek* v. *Pittenger*, *supra*. Even where it has found the services constitutional, the Court has cautioned that such counselors cannot become too intimately involved in helping a student select particular courses in the school. Under Title XII this use of the grants would appear to have the infirmities both that the personnel would be employees of the sectarian school and not public employees and that the services would be provided on the nonpublic school premises.

(6) *Secular instructional materials and equipment—In Meek* v. *Pittenger*, supra, the Court struck down a program loaning secular instructional materials and equipment directly to sectarian schools, on the grounds that such loans would, given the interrelationship between secular and religious education in such schools, advance the school's religious mission. In *Wolman* v. *Walter*, supra, the Court struck down, for the same reason, a program loaning the equipment and materials to the students rather than to the schools. This use of the public funds provided under Title XII would not appear to be constitutional.

(7) *Transportation to and from school*—in *Everson* v. *Board of Education*, 330 U.S. 1 (1947) the Court upheld the provision at public expense of bus transportation between home and school for sectarian schoolchildren. In *Wolman* v. *Walter*, supra, the Court held unconstitutional the public subsidy of transportation for field trips by sectarian schoolchildren, both because the schools controlled such field trips and because they were an integral part of the educational experience. The language used in subsection 1202(b)(7) would appear to be broad enough to include field trips, and thus would seem to be unconstitutional.

In addition to these infirmities in the individual uses proposed for the grants, Title XII would seem to be constitutionally infirm in that it would provide direct grants to sectarian elementary and secondary schools. Every program considered by the Court which has provided funds or in-kind goods directly to sectarian elementary and secondary schools has been held unconstitutional. See *Lemon v. Kurtzman*, supra; *Levitt v. Committee for Public Education*, supra; *Committee for Public Education v. Nyquist*, 413 U.S. 756 (1973); *Meek v. Pittenger*, supra. Where the program has by its nature not been limited to secular uses only, as in the maintenance and repair grants in *Nyquist*, the Court has held the program to have the inevitable effect of advancing religion. Where the program has been nominally limited to secular uses, as in the subsidies for secular teachers in *Lemon*, the subsidies for tests in *Levitt*, and the loan of secular equipment in *Meek*, the Court has either held that the state surveillance necessary to be sure the restrictions to secular use are honored would give rise to excessive entanglement or that, because of the subordination of secular functions to the schools' religious mission, the programs would have a primary effect of advancing religion. Given the list of permissible uses for the grants in Title XII, both effects would appear likely: Excessive entanglement would likely result from monitoring the schools' use of the grants to be sure that the use restrictions were honored, and advancement of religion would likely be the result of at least the secular instructional materials and equipment and the transportation use, and perhaps also of the secular textbook use.

Possible Modifications of Title XII To Make It Constitutional

If the above analysis is correct, modifications are necessary both in the direct grant nature of the program and in several of the permitted uses. In the first instance, it would appear necessary that the grants be made not directly to the sectarian school but to public educational authorities. This would reduce the danger both that the grant as a whole would be found to advance religion and that excessive entanglement would be found to result from the necessary continuing audit

[1] The 1972 report of the President's Commission on School Finance estimated that about 93 percent of the children enrolled in nonpublic elementary and secondary schools are enrolled in church-affiliated institutions, most of which are Catholic. *Schools, People, Money: The Need For Educational Reform* (April 5, 1972), p. 53.

of the schools' use of the grants. Because of state constitutional limitations, a bypass provision comparable to that found in Section 130(b) of S. 1753 might also be included. The permitted uses would also need to be modified, as follows:

(1) *Secular textbooks*—This could be changed so that the public educational authority purchases and loans to nonpublic school students such secular textbooks as are approved for use in the public schools. The definition now in subsection 1202(c)(1) is permissible.

(2) *Standardized tests and scoring services*—To comport with *Wolman v. Walter*, supra, the public educational authority could provide the tests and scoring services in kind rather than by way of reimbursement or subsidy.

(3) *Diagnostic speech and hearing services*—Such services could be provided by public employees or persons under contract with the public educational authority, although it is permissible for such services to be provided on the nonpublic school premises.

(4) *Diagnostic psychological services*—This permitted use could be limited to services provided by public employees or persons under contract to the public educational authority, and can be provided on the nonpublic school premises.

(5) *Guidance and counseling services*—This use must, again, be limited to services provided by public personnel, and can be provided only off the nonpublic school premises, at religiously neutral sites not identified with the sectarian school. A qualification might also be added to make clear that counselors may not become engaged in planning and selecting particular courses in the sectarian school.

(6) *Secular instructional materials and equipment*—This use should be stricken altogether.

(7) *Transportation*—This use could be modified to assure that the subsidy flows to the parents or the students and is limited to transportation between home and school.

Several additional permitted uses for the grants might also constitutionally be added, as follows:

(1) Remedial and accelerated educational services and programming for handicapped children, provided by public personnel at religiously neutral sites off the premises of the sectarian school.

(2) Physical health services for nonpublic schoolchildren, such as physician, nursing, dental, and optometric services, provided by public personnel or persons under contract to the public educational authority, on or off the nonpublic school premises.

(3) Therapeutic speech, hearing, and psychological services, provided by public personnel or persons under contract to the public educational authority, at religiously neutral sites off the sectarian school premises.

Finally, a general proviso could be added that in no use of the grants should the benefits available to nonpublic schoolchildren exceed those available to public schoolchildren. That is, in every instance the disbursements made on behalf of nonpublic schoolchildren should have their equivalents in disbursements for public schoolchildren, and in no instance should the amount expended per pupil in nonpublic schools exceed the amount expended per pupil in public schools.

We hope the above is responsive to your request. If we may be of additional assistance, please call on us.

DAVID M. ACKERMAN,
Legislative Attorney.

DEPARTMENT OF JUSTICE,
Washington, D.C., August 22, 1978.

Hon. ERNEST F. HOLLINGS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HOLLINGS: You have asked for our views concerning the constitutionality of proposed Title XII of the Elementary and Secondary Education Act. Although our authority to give legal advice and opinions is limited by statute, see 28 U.S.C. §§ 511, 512, we are happy to give you our general comments on the proposed legislation.

Section 1202 of Title XII—Non-public Educational Assistance, would authorize the Commissioner of Education to grant funds to nonpublic elementary and secondary schools for the following purposes:

(1) secular textbooks, to non-public elementary and secondary school students which are approved by the State educational agency for use in public elementary and secondary schools in the State;

(2) standardized tests and scoring services for the use of non-public elementary and secondary school students which are in use in the public schools of the State;

(3) providing speech and hearing diagnostic services to pupils attending non-public schools, if such services are provided in the non-public school attended by the pupil receiving the services;

(4) providing diagnostic psychological service to pupils attending non-public schools if such services are provided in the non-public school receiving the services;

(5) providing guidance and counseling (A) to advise students of courses of study best suited to their ability, aptitude, and skills, (B) to advise students in their decisions as to the type of educational program they should pursue, the vocation they should train for and enter, and the job opportunities in the various fields, and (C) to encourage students with outstanding aptitudes and ability to complete a course of study necessary for admission to institutions of higher education;

(6) providing secular, neutral, and nonideological instructional materials and instructional equipment, which are incapable of being affixed to the non-public school facility and which are capable of portability from the school to the home by the students of the non-public school.

(7) providing necessary transportation to and from non-public elementary and secondary schools to non-public elementary and secondary school children.

As you may know, our Office has had several occasions in recent months to study the constitutional limits on aid to sectarian schools. Those limits are defined by the Establishment Clause of the First Amendment, which sharply curtails the extent to which government may provide such aid. Since we understand that the great majority of nonpublic elementary and secondary schools nationally are sectarian, proposed Title XII raises obvious questions under the Establishment Clause.

To withstand constitutional challenge, a legislative program providing assistance to sectarian schools must meet the three-part test developed in recent Supreme Court decisions:

First, the statute must have a secular legislative purpose; second, its principal or primary effect must be one that neither advances nor inhibits religion . . .; finally, the statute must not foster "an excessive entanglement with religion."

Lemon v. *Kurtzman*, 403 U.S. 602, 612–13 (1971). The Court has applied that test, in *Wolman* v. *Walter*, 433 U.S. 229 (1977), and *Meek* v. *Pittenger*, 421 U.S. 349 (1975), to two state-nonpublic school assistance programs similar to the program outlined in Title XII.

In *Meek*, the Court considered the validity under the Establishment Clause of a Pennsylvania statute authorizing various types of aid to nonpublic schools and students: loans of textbooks to nonpublic school students; loans of instructional material directly to nonpublic schools; and, provision of auxiliary services—remedial and accelerated instruction, guidance counseling and testing, speech and hearing services—to nonpublic schools on nonpublic school premises. The Court sustained only the textbook loan portions of the statute.

In *Wolman*, the Court reviewed an Ohio statute enacted shortly after and in light of the *Meek* decision. The Ohio statute authorized provision of the following services: a textbook loan program similar to that approved in *Meek;* standardized tests and scoring services; speech, hearing and psychological diagnostic services on nonpublic school premises; therapeutic and guidance services outside nonpublic school premises; purchase and loan to pupils or their parents of instructional materials and equipment; and, field trip transportation and related services. The Court held that only the latter two forms of aid violated Establishment Clause standards. In reaching those conclusions with respect to the services and equipment authorized under the Pennsylvania and Ohio statutes, the Court provided detailed guidance as to the extent of government aid to sectarian schools permissible under the Establishment Clause.

Based upon those decisions, it is our view that proposed Title XII fails to meet Establishment Clause standards in several respects. The principal constitutional flaw in the Title XII program is that it would provide grants directly to nonpublic schools. Although the Court has approved particular programs authorizing grants and loans to nonpublic school students and their parents, the Court has consistently indicated that direct grants to sectarian schools are constitutionally impermissible. See, *e.g., Wolman* v. *Walter*, 433 U.S. at 253; *Lemon* v. *Kurtzman*, 403 U.S. at 621.

Moreover, any program which authorizes direct government grants to sectarian schools raises serious problems of Church-State entanglement. Efforts by the Government to ensure secular use of the funds provided may result in the "comprehensive, discriminating, and continuing state surveillance" that the Establishment Clause prohibits. *Wolman* v. *Walter*, 433 U.S. at 254; *Lemon* v. *Kurtzman*, 403 U.S. at 619. Such a program also creates the potential for continuing political strife along religious lines. See, *e.g., Meek* v. *Pittenger*, 421 U.S. at 372.

In addition, in those instances where the Court has sustained the grant or loan of materials and services, the statutory program has provided equal benefits to both public and private school students. See, *e.g., Meek* v. *Pittenger*, 421 U.S. at 360 and n. 8, 362 n. 12. Although the report of the Senate Committee on Human Resources refers to "equitable participation" of nonpublic school students, see S. Rep. No. 95–856, 95th Cong., 2d Sess. 87 (1978), portions of Title XII focus solely on aid to private schools without regard to whether public school students are entitled to receive equivalent materials and services.

Finally, the guidance and counseling section of Title XII fails to observe the careful lines drawn by the Court with respect to those forms of aid, as it does not foreclose the possibility that these services may be provided on nonpublic school premises or by personnel employed by the nonpublic school or subject to its influence or control. *Wolman* v. *Walter*, 433 U.S. at 248; *Meek* v. *Pittenger*, 421 U.S. at 371–72.

In short, our review of recent Supreme Court interpretations of the Establishment Clause indicates that the proposed Title XII program of direct grants to nonpublic schools, if challenged in the courts after enactment, would be held to be unconstitutional. I hope that our comments are helpful to you.

Sincerely,

JOHN M. HARMON,
Assistant Attorney General,
Office of Legal Counsel.

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., June 23, 1978.

Hon. HARRISON A. WILLIAMS, Jr.,
Chairman, Committee on Human Resources,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: In a colloquy between Senators Pell and Javits during the Human

Resources Committee mark-up of S. 1753, the Department was asked to state its views on the cost, administrability, and constitutionality of the Non-public Educational Assistance Act of 1978, which the Committee bill would include as a new title XII of the Elementary and Secondary Education Act of 1965.

Under this new program, the Commissioner of Education would be authorized to make grants directly to non-public elementary and secondary schools to be used to purchase the following materials or services:

(1) secular textbooks approved for use in public schools,

(2) standardized tests and scoring services,

(3) speech and hearing diagnostic services,

(4) diagnostic psychological services,

(5) guidance and counseling relating to educational and vocational decisions,

(6) secular, neutral, and non-ideological instructional materials and equipment,

(7) transportation to and from non-public schools.

Grants would be made upon an application containing assurances that funds received would be used only for the purposes of the new program. The new title contains no criteria for distributing available funds among eligible schools. There is no needs test or other device in the title to focus the programs on particular types of non-public schools. The only eligibility criteria are that a recipient school must be accredited or approved under State law and exempt from taxation as a nonprofit organization described in section 501(c)(3) of the Internal Revenue Code of 1954.

Because of the broad nature of the assistance authorized under the proposed new program, a definitive estimate of its cost is not possible. The authorization of appropriations in section 1207 is for $500,000,000 annually through fiscal year 1983. However, we cannot judge at this time whether that amount exceeds or falls short of the amount necessary to meet the reasonable needs of non-public schools for services that would be authorized under title XII.

We may be able to make some rough approximations of likely demand for appropriations under this program based on State experience with similar programs. In the Pennsylvania program which was the subject of the Supreme Court's *Meek* v. *Pittenger* decision, $17,560,000 was appropriated for school year 1973–74 for textbooks and instructional materials for that State's approximately 400,000 non-public school children (approximately $44 per child). For a similar Federal program, even without adjusting for inflation, we can assume that the cost for this portion of the activities authorized under the new program would be approximately $250,000,000 for the 5,000,000 non-public school children in the country. This figure, of course, represents the cost of only a portion of the uses of funds authorized by title XII.

In the Ohio program that was partly upheld and partly invalidated by the Supreme Court in *Wolman* v. *Walter*, $88,000,000 was appropriated for two years (1975 and 1976) for a range of services very similar to those that would be authorized under title XII. This represents approximately $175 per year for each of the 250,000 children enrolled in the non-public schools in Ohio. At that level of support, again without adjusting for inflation, the Federal program would cost roughly $875,000,000 annually.

We foresee serious problems in administering this new program. One of those would be the need to coordinate this program with similar State programs. Many States already provide some or all of the services that would be authorized under title XII. Transportation and texbooks are the items most frequently provided by the States for children in private schools. We would need to devise some means for determining what the legitimate needs are of private schools under the program to ensure that this assistance would not duplicate or supplant the efforts of the States. Moreover, the existence of such a Federal program would be a disincentive for States to create or broaden their own programs for assistance to non-public school children.

Another administrative problem is the sheer number of schools that would be eligible under the program. There are about 18,000 nonpublic schools that could receive grants under the program. If all eligible schools were to apply for assistance under this program, the processing of that number of grants would be an expensive and time-consuming task. Assuming that one-half a person-day would be needed to review each application, a staff of at least 80 persons would be required. That size staff would be sufficient to perform only minimal review and monitoring functions for the new program.

With regard to the constitutionality of the proposed new program, the Department of Justice has advised us, on the basis of its prior opinions concerning the Establishment Clause of the First Amendment and the Supreme Court's decisions in *Wolman* v. *Walter* and *Committee for Public Education* v. *Nyquist*, that it believes title XII would be held to be unconstitutional.

In view of the foregoing, the Department is opposed to the enactment of this legislation.

OMB advises that there is no objection to the presentation of these views, and that enactment of the non-public Educational Assistance Act would not be in accord with the President's program.

Sincerely,

DICK WARDEN,
Assistant Secretary for Legislation.

HARVARD LAW SCHOOL,
Cambridge, Mass., August 18, 1978.

Hon. ERNEST F. HOLLINGS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HOLLINGS: I am glad to respond to your invitation to express my opinion on the question whether the program of grants authorized by Title XII, as added by Section 112 of S. 1753, appears to be constitutional under recent Supreme Court decisions. The problem relates, of course, to various categories of grants to church-related elementary and high schools, including schools which impose sectarian qualifications for admission of students or appointment to the faculty, and schools whose purpose is to integrate religious and secular instruction.

As you know, problems of public aid in this area have come under intensive judicial review in recent years, beginning with *Lemon v. Kurtzman* and *Early v. DiCenso*, 403 U.S. 602 (1971), through *Committee for Public Education v. Nyquist*, 413 U.S. 756 (1973), *Sloan v. Lemon*, 413 U.S. 875 (1973), and *Levitt v. Committee for Public Education*, 413 U.S. 825 (1973), to *Meek v. Pittinger*, 422 U.S. 1049 (1975) and *Wolman v. Walter*, 97 S.Ct. 2593 (June 24, 1977). The *Wolman* case involved an Ohio program of state aid which appears to have served in some respects as a pattern for the new Title XII, with certain differences the significance of which becomes important to consider.

In general, the Court since its comprehensive consideration of the issues in the 1971 decisions has applied a three-part standard for judging the validity of public aid to church-related schools: the primary purpose must be secular; the aid must not in its effect directly and materially impede or advance the cause of religion; and there must be no undue entanglement of church and state in the administration or political aspects of the program. Applying these standards, the Supreme Court has held invalid a series of programs of public aid, including unrestricted grants, partial payment of salaries of teachers in secular subjects, loans and grants of instructional materials in secular subjects, partial tuition rebates and tax credits to parents. The Court has sustained certain forms of aid, namely, the loan of publicly adopted secular textbooks to students and the provision of various nonpedagogical services to students.

With this general background, let me turn to the specific categories of grants in the proposed Title XII.

TEXTBOOKS

Subsection (1) authorizes federal grants to religious and other nonpublic schools for secular textbooks "to . . . students." This authority goes beyond the decisions that have upheld the provision of textbooks in limited circumstances. Those precedents derive from the *Allen* case, 392 U.S. 236, decided in 1968, which sustained the loan of secular textbooks to students in nonpublic as well as public schools. *Allen* was based on an analogy to the bus-fares precedent, which had emphasized the distinction between benefit to the pupil and that to the religious school. The whole line of decisions thereafter, employing the three-pronged standard, has left the *Allen* case as an anomaly. The Court has been reluctant to overrule it but has limited it to its precise facts. It was followed in the *Meek* and *Wolman* cases, *supra*, where the textbook provisions were identical with those in *Allen*. Where there has been a difference the Court has distinguished *Allen*. In *Public Funds for Public Schools v. Marburger*, 417 U.S. 961, the Court in a per curiam opinion affirmed a district court decision striking down a textbook program that called for reimbursement of parents of nonpublic school children for the purchase price of secular books while public school pupils were only loaned such books. Moreover, as will be seen, the Court has refused to apply *Allen* in principle to the loan of instructional materials that are not textbooks. The result is, as the Court has frankly acknowledged, a "tension" between *Allen* and the line of later decisions on public aid. *Wolman*, p. 2607, n. 18. *Allen* has been followed as "a matter of *stare decisis*." *Ibid.*

Subsection (1) appears to be outside the shelter of *Allen* in three respects. First, it does not prescribe a loan of books to students but would authorize a use of funds for purchase by students. Second, it does not require that the books be owned by the public authorities. Third, it contemplates a grant of funds to religious schools, not a grant or loan in kind, and thus necessitates a degree of supervision over the use of the funds that raises problems of administrative entanglement not involved in *Allen* and its sequels. For these reasons, in my opinion, the textbook provision does not satisfy the strict and special criteria of validity that the Court has insisted on in the textbook cases.

INSTRUCTIONAL MATERIALS AND EQUIPMENT

The anomalous character of the textbook cases is shown by comparison with the rulings concerning other secular teaching materials, like maps, globes, charts, tape recorders, and science kits, the kind of portable equipment covered in subsection (6). These might seem more acceptable public provisions than textbooks, from the standpoint of possible use in religious instruction. And yet in *Wolman* in 1977 the Court refused to sanction these, even when merely loaned to the student. As in all the cases, the Court stressed the inseparability of the religious and secular components in the mission of religious schools: "Thus, even though the loan ostensibly was limited to neutral and secular instrumental material and equipment, it inescapably had the primary effect of providing a direct and substantial advancement of the sectarian enterprise." 97 S. Ct. at 2606.

I therefore conclude that subsection (6) is incompatible with governing Supreme Court law.

STANDARDIZED TESTS AND SCORING SERVICES

The authority to subsidize these appears to be supported by the *Wolman* case. In formulation, execution and evaluation the *public school system is in control,* and use for sectarian purposes is hardly possible.

SPEECH AND HEARING DIAGNOSTIC SERVICES

Subsection (3) differs from a corresponding provision upheld in *Wolman* in that here there is no requirement, as there was in *Wolman,* that the technician performing the services be employed by the State. The issue in *Wolman* was whether the performance of the services on the premises of the religious school would place "pressure on the public diagnostician to allow the intrusion of sectarian views." The Court held the risk to be minimal, distinguishing the case of a therapeutic relationship, where, it was held, following the *Meek* case, the subsidized services must be performed off the premises of the religious school. The validity of subsection (3) is thus not free from doubt, as it would be if it were limited to paying for the services of a publicly employed diagnostician.

DIAGNOSTIC PSYCHOLOGICAL SERVICE

Subsection (4) is possibly vulnerable for the same reasons as (3), and in somewhat greater degree, since the process is less mechanical and more open to the risk of sectarian indoctrination than speech and hearing diagnosis. Again, a requirement of public employment would probably avoid the problem.

GUIDANCE AND COUNSELING

Subsection (5) includes advice regarding both courses of study and career plans. These are so intimately related to the religious aspect of the school that public subsidy seems clearly impermissible. Indeed, in *Wolman* the Court indicated that even off-premise counselling of this kind would not be a legitimate object of public aid for religious-school pupils. As to "planning and selection of particular courses" the Court said: "We agree that such involvement with the day-to-day curriculum of the parochial school would be impermissible." 97 S.Ct. at 2604, n. 13. Subsection (5) is not compatible with the governing constitutional limitations on public aid.

The foregoing analysis has been based on decisions of the Supreme Court in the last decade. Account has not been taken, thus far, of dissenting views in the Court. In that regard, it should be noted that in *Wolman,* the most recent and most closely applicable case, there were Justices who would have taken a more permissive position regarding public aid, and others who would have taken a more restrictive position. In the first group, for example, the Chief Justice and Justices White and Rehnquist would have upheld the provision of instructional materials, and Justice Powell would have done so to the extent they were loaned to students by the State. On the other hand, Justices Brennan, Marshall and Stevens would have struck down the loan of textbooks and all the other forms of public aid (except perhaps diagnostic services by employees).

It should be remarked that the precedents have involved State, not Federal, aid. Since the mandate of the First Amendment is applicable expressly to the Federal government, and only by absorption into the Fourteenth against the States, it is not to be expected that the Court will approve more relaxed standards for the Federal government under the Establishment Clause.

I trust that this analysis will be of some service to you and your colleagues.

Sincerely,

PAUL A. FREUND.

COMMUNITY SCHOOLS

● Mr. CHURCH. Mr. President, many public programs are putting a greater emphasis on the role the community can play in the development and delivery of services. More and more focus is being placed on community health care. Neighborhoods are the center of new housing, health care, and social services proposals. Volunteer programs are being urged to involve the community as much as possible.

I have long thought that community support is essential for the success of such programs. This is why I became interested in community education, which had emerged in Flint, Mich., where the schools were "given to the community" after official school hours. Community residents, young and old, were encouraged to use the school facilities for an array of educational, recreational, and social services. Flint responded so positively that community schools soon flourished elsewhere in the Nation.

In 1971, I introduced legislation to create a federally assisted community schools program. This legislation was incorporated into the Elementary and Secondary Education Act and is now administered by the Office of Education.

Therefore, I was very pleased to join Senator WILLIAMS in sponsoring S. 2711 which creates an expanded community education program, a new title X for community schools under the Elementary and Secondary Education Act. The support that the chairman of the Human Resources Committee, Mr. WILLIAMS, and the chairman of the Subcommittee on Education, Mr. PELL, have given to community education is to be commended. I congratulate them for their leadership in seeing that the new title for community schools has become a significant part of the Elementary and Secondary Education Act.

The new title X reflects the interest and growth in community education that have occurred in recent years. Greater support is given to both State and local educational agencies to develop and expand their community education programs. This support is intended to assist the State and local agencies to coordinate with other educational, recreational, health, and social services to work together to serve the particular needs of the communities.

I was particularly pleased that the bill contains a section that encourages the coordination of community education with other programs. As chairman of the Senate Committee on Aging, I am well aware the importance that a comprehensive community education program can have for the elderly. New friends, new learning, recreational activities, nutrition, and health services encourage them to take an active reentry into community life and concerns.

Mr. President, community education gives people themselves a voice in deciding what services can meet their needs. This legislation encourages that concept and I urge the Senate to act favorably.●

REDUCTION IN RATE OF EXCISE TAX ON INVESTMENT INCOME OF PRIVATE FOUNDATIONS

Mr. ROBERT C. BYRD. Mr. President, under the order that already has been ordered, I ask the Chair to lay before the Senate H.R. 112, Calendar No. 721.

The PRESIDING OFFICER. The bill will be stated by title.

The second assistant legislative clerk read as follows:

A bill (H.R. 112) to amend the Internal Revenue Code of 1954 to reduce the excise tax on the investment income of private foundations from 4 percent to 2 percent.

The Senate proceeded to consider the bill.

Mr. LONG. Mr. President, I ask unanimous consent that during floor consideration of various Finance Committee bills this afternoon, the following Finance Committee staff members be permitted on the floor: Mike Stern, Joe Humphreys, Bob Cassidy, Bill Finan, Jack Curtis, Charles Bruce, Bill Galvin, George Pritts, Jim Heinhold, and Rick Johnston.

And the following Joint Committee on Taxation staff members: Bob Shapiro, Mark McConaghy, Don Ricketts, Carl Bates, Michelle Scott, Harold Hirsch, Alvin Geske, and Errol Halperin.

The PRESIDING OFFICER. Without objection, it is so ordered.

The following Senators requested the privilege of the floor for certain staff members; and, by unanimous consent, the requests were granted: Mr. PROXMIRE, Mr. MCINTYRE, Mr. GRAVEL, Mr. MOYNIHAN, Mr. HART, Mr. CHAFEE, Mr. THURMOND, Mr. HATHAWAY, Mr. BAYH, Mr. BARTLETT, Mrs. ALLEN, and Mr. KENNEDY.

The staff members are as follows: Howard Shuman, David Allen, Chester Finn, Peter Gold, Terry Johnson, Bill Donovan, Carey Parker, Tom Connaughton, Jim Magner, Jim Lochemy, Pam Melton, Sally Rogers, Deming Cowles, Jerry Gauche, Ed King, and Mike Rousch.

Mr. LONG. Mr. President, H.R. 112 reduces from 4 to 2 percent the rate of excise tax imposed annually on the net investment income of domestic private foundations, under section 4940 of the Internal Revenue Code.

The Tax Reform Act of 1969 enacted a 4-percent excise tax to be imposed on the net investment income of all private foundations. In each of the last 6 years, this tax had produced more than twice the revenue needed to finance the operations of the Internal Revenue Service with respect to all types of tax-exempt organizaions, including private foundations. Thus even after the tax is reduced from 4 to 2 percent, it will produce more revenue than the estimated cost of Internal Revenue Service operations with respect to all exempt organizations.

Under the charitable payout rules made applicable to private foundations by the 1969 act, the amount of this tax is subtracted from the minimum amount that such foundations must spend or grant for charitable purposes. Thus in many cases, the tax actually has reduced charitable expenditures. In these cases,

the reduction in the tax made by this bill will result in a corresponding increase in charitable expenditures or grants.

This experience with the tax since 1969 and its adverse impact on charitable expenditures has led the Finance Committee to conclude that it is appropriate to cut the tax rate in half for taxable years beginning after September 30, 1977.

Mr. President, the Senate approved a provision reducing the rate of this tax during its consideration of the 1976 Tax Reform Act. However, the House conferees did not at that time accept the provision. The House has now approved reducing the rate of this tax, and I urge the Senate likewise to adopt H.R. 112.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. PROXMIRE. Was there a hearing on this bill?

Mr. LONG. Yes; there was.

Mr. PROXMIRE. Who is the primary beneficiary?

Mr. LONG. I do not think there is any primary beneficiary, because this involves all foundations.

Incidentally, I say to the Senator that I have no enthusiasm at all for the bill, but everyone else on the committee favors it.

Mr. PROXMIRE. I am asking some routine questions. I am sure I understand what the bill does. Was there a revenue loss estimated on this or not by the Treasury?

Mr. LONG. Yes. The revenue loss is estimated to be $2 million for fiscal year 1978 and over a 4-year period a decrease in budget receipts of $27 million a year.

Mr. PROXMIRE. $27 million?

Mr. LONG. This involves all foundations.

Mr. PROXMIRE. What is the Treasury's position on this?

Mr. LONG. They favor it.

Mr. PROXMIRE. I thank the Senator.

Mr. CURTIS. Mr. President, as the ranking minority member of the Committee on Finance, I support H.R. 112. This will would reduce the rate of tax on private foundation investment income from 4 percent to 2 percent. This bill is not opposed by the administration and similar legislation has previously been passed by the Senate.

Passage of this bill is particularly important, Mr. President, since it will reinstate a long-standing Federal policy of not subjecting charitable, educational, and similar organizations to a general revenue tax. As many of my colleagues will recall, the Tax Reform Act of 1969 subjected private foundations to substantial restrictions both with respect to their financial practices and their grant-making activities. The House version of the 1969 legislation also subjected foundations to limited income tax both for general revenue purposes and to fund audits of tax-exempt organizations by the Internal Revenue Service.

In 1969, the Finance Committee and the full Senate concluded that foundations should pay only an audit fee tax. However, the House-Senate conference rejected this approach and adopted the 4 percent tax that is now part of the Internal Revenue Code. Thus, for nearly 8 years, private foundations have been subject to a general revenue tax. As the Finance Committee's report on H.R. 112 points out, this tax has produced more than twice the revenue needed by the IRS for its activities with respect to tax-exempt organizations.

The Senate has addressed this issue in the interim period since 1969. Hearings were held by one of the Finance Committee's subcommittees and, as part of the Tax Reform Act of 1976, the Senate adopted a tax reduction provision which was virtually identical to that contained in H.R. 112, the bill which is now before us. The Senate version of the 1976 act also contained an amendment reducing the so-called "minimum investment return" percentage applicable to private foundations to 5 percent. Neither amendment was opposed by the then current administration, but the House conferees on the 1976 act would only accept one of the two foundation amendments. After considerable discussion, the tax reduction amendment was deleted from the 1976 act. However, the House conferees agreed that the tax reduction issue would be reexamined by the Ways and Means Committee at a later date. H.R. 112 is the product of that reexamination and I urge the Senate to once again indicate its support for the proposition that private foundations should not be subject to a general revenue tax. Audit fees are one thing, but a general revenue tax is an inappropriate and unwarranted departure from well-established Federal tax policies. Passage of H.R. 112 will return us to a more appropriate tax policy.

In closing, Mr. President, let me emphasize that this tax reduction bill will not permit foundations to retain funds that would otherwise be paid in taxes. As the Finance Committee's report points out, the tax on investment income reduces the amount which foundations are required to expend or distribute for exempt purposes. Consequently, a reduction in tax will produce a corresponding increase in the flow of foundation grants to our schools, hospitals, and other recipients of foundation support.

For all of these reasons, Mr. President, I support H.R. 112 and urge the Senate to pass it promptly.

● Mr. GRAVEL. Mr. President, as Chairman of the Finance Committee Subcommittee on Energy and Foundations, I was pleased to introduce S. 2204, the Senate companion bill to H.R. 112. Along with more than 50 of my colleagues here in the Senate I sought to reduce the tax on foundations from 4 percent to 2 percent. Reduction of the 4-percent tax on foundations to 2 percent will restore $30 million to charitable purposes. The tax on foundations reduces directly, dollar for dollar, the charitable distributions of foundations. Foundations are required to distribute for charitable purposes the greater of their net income or 5 percent of the value of their assets. Under this minimum payout requirement the law allows foundations to credit as a payout for charitable purposes the amount paid as tax. Thus, the tax directly reduces the amount which foundations are required to distribute for charitable purposes. A reduction in the tax will directly increase, by the exact amount of the tax reduction, the flow of funds from foundations for charitable purposes.

The 4-percent tax was requested by Treasury in 1969 to cover the costs of auditing foundations and enforcing compliance with the law. Prior to 1969 foundations were free from tax. The 1969 Tax Reform Act instituted restrictions on foundations and required Treasury to enforce these restrictions. Since then the Internal Revenue Service has audited nearly all U.S. foundations and found high compliance with the 1969 reforms. The Service has determined that the tax could be reduced to 2 percent while still covering the costs involved in auditing and enforcing the law with respect to foundations. Treasury has estimated the costs of supervising foundations at $10 million annually. But reducing the tax to 2 percent Treasury will still raise $30 million annually from foundations, more than enough to finance IRS supervision and enforcement.

Private philanthropy has traditionally served an important function in our Nation. The foundations have taken leadership roles in education, health services, housing, and community development. Foundations have the flexibility and independence to act where government cannot, to develop innovative and perhaps politically infeasible new ideas and programs. Once proven, these programs are often adopted by government agencies while the foundations go on to break new ground elsewhere.

The passage of H.R. 112 marks the culmination of a long process and I am pleased to see that the Senate has acted, as it has acted in the past, to encourage private philanthropy in America.●

AMENDMENT NO. 2251

(Purpose: To extend for 4 years the exclusion from gross income of amounts which represent a discharge of indebtedness under certain student loan programs)

Mr. LONG. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes for himself and Mr. HASKELL an amendment numbered 2251.

SEC. . Subsection (c) of section 2117 of the Tax Reform Act of 1976 (relating to cancellation of certain student loans) is amended by striking out "January 1, 1979" and inserting in lieu thereof "January 1, 1983".

Mr. LEAHY. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. LONG. I yield to the Senator from Vermont.

Mr. LEAHY. Mr. President, I ask unanimous consent that Michael Choakes, of my staff, be accorded the privilege of the floor during debates and votes throughout the remainder of the day.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. PERCY. Mr. President, will the Senator yield for the same purpose?

Mr. LONG. I yield.

Mr. PERCY. Mr. President, I ask unanimous consent that Lawrence Gersham, of my staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. MOYNIHAN. Mr. President, before we pass on this matter, I wish to cosponsor the measure, and I express my appreciation and very deep gratitude on behalf of the foundation officials, boards of directors, and recipients, I should think, around the country for the courtesy that the distinguished chairman and distinguished ranking minority member of the committee have shown in this matter.

As a cosponsor of this measure, I rise to speak in support of its passage. Private foundations have played a distinctive and invaluable role in our history—and in world history, for many of them are international in their scope—for the past half century. In one field after another, they have provided sustenance to important endeavors ranging from biomedical and agricultural research to art museums and symphony orchestras. They have supported advanced scholarship in many subjects and major research centers.

Their contributions to education, health care, and social welfare have been superb. Although less celebrated, the majority of foundations are small, community-centered organizations that have concentrated their good work on local needs and concerns.

Perhaps especially noteworthy is the record of private foundations as the vanguard of social progress, supporting major undertakings that were—particularly in their early days—inappropriate or politically impractical areas for Government to become directly involved with. Of these, surely the most significant is the civil rights movement, broadly described.

These endeavors have not been without controversy, and in some instances have not succeeded as well as their optimistic sponsors had hoped. But one of the distinctive features of private foundations—one so conspicuously lacking in Government agencies—is their capacity for learning from experience and for redirecting their efforts into promising pursuits.

Foundations have also provided sustained funding to other programs whose character was not conducive to funding by commercial institutions. Millions of children view Sesame Street which is in part funded by a grant from the Ford Foundation.

The taxation of investment income of foundations was not meant to be a revenue-raising measure, but was rather meant to provide the IRS with enough money to administer the tax laws applying to private foundations.

The experience of the IRS is that at the present 4 percent tax rate, it was collecting twice the money that it needed to administer this program. Besides raising revenue from a source that was never intended to provide it, this tax also reduced the amount of money that these foundations contributed to the various programs they funded, thus undermining their purpose.

I urge my colleagues to correct this inequity.

Mr. BENTSEN. Mr. President, will the Senator yield me a couple minutes?

Mr. LONG. I yield.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. Mr. President, I fully support this measure which I have cosponsored in the past. I thank the chairman of the committee and the manager of the minority for their assistance on this.

The 4-percent excise tax was originally enacted to cover some of the auditing costs of foundations, and it was found to be excessive. The 2-percent proposal is much more in line with what is needed.

The 4-percent excise tax on investment income of private foundations was enacted 8 years ago. This tax has produced more than twice the revenue needed to finance the operations of the Internal Revenue Service with respect to tax-exempt organizations.

Because of the operation of the private foundations charitable distribution provisions, this tax reduces the minimum amount that private foundations are required to spend or grant for charitable purposes. In many cases, the tax actually has reduced charitable expenditures.

Because of the adverse impact of this tax on charitable expenditures, it is now appropriate to cut the tax rate in half.

Mr. President, this bill will help private foundations fulfill such important objectives as promotion of better health care and greater educational opportunities for all Americans. The 4-percent excise tax reduces the amount of funds available for such worthy public objectives.

I urge the Senate to reduce this excise tax from 4 to 2 percent.

Mr. GRAVEL. Mr. President, will the Senator yield?

Mr. LONG. I yield to the Senator from Alaska.

Mr. GRAVEL. Mr. President, as a prime sponsor of this legislation I obviously think it has great merit. I am very happy that we finally got it cleared to go to the other body.

I understand that there will be an unusual amendment proposed on it. I understand also that the chairman of the full committee will be opposing that effort pending action by Congress or a decision collectively going into next September.

I say to my colleagues who intend to put an amendment on this that here is something that is very meritorious. It is a technical correction to an injustice that has existed. It involves a considerable sum of money, $29 to $34 billion for the foundations which will permit them to get more money into research and other activities that the foundation money is used for.

There are several other type measures available of a tax nature.

The chairman of the full committee has been very provident in this, and we have a little cache in the Finance Committee where we hide these little measures and every so often when one is needed, the chairman reaches down in this little cache and pulls one out and we load a saddle on this little bill and sometimes it is an old dilapidated saddle, sometimes it is the most glorious silver saddle you have ever seen in New Mexico. It depends on the situation.

So I just caution my colleagues that I am for what they are trying to do, but I think there is going to be a point in time here where we should cut out what can be saved in an intelligent energy bill that is noncontroversial that will enhance the energy-solving problems in this country and put it on a piece of legislation, and I would be voting for that and speaking for it.

But I tactically, one, do not want to see this vehicle sacrificed for that cause, and that is what would happen in this point in time because what my colleague has done is he has a good thought but I do not think that all the bases have been covered and everyone brought in because we all want to be party to this effort, and I think that not only in this Chamber but on the Ways and Means Committee, so it would do us little value to send over to the House of Representatives something that is going to go to the Ways and Means Committee but they are not going to take up because they do not think it is time to move in this area.

Mr. HART. Mr. President, will the Senator yield?

Mr. GRAVEL. I am happy to yield.

Mr. HART. Obviously, we are discussing an amendment which has not been offered yet, so I think we should wait until the amendment is offered.

I only make two observations. One, there is never going to be a perfect vehicle, and someone who is going to be particularly a principal sponsor of the vehicle is going to object because it may jeopardize that vehicle. So someone is going to have the same complaint on any bill that comes up.

Mr. GRAVEL. If I could just speak to that one point briefly, we have bills in this little cache in the Finance Committee that no one objects to. I can assure the Senator the silkworm bill would be a great vehicle for this to ride on. That little silkworm will just crawl right across this Senate floor over to the House Ways and Means Committee and no one on the floor is going to fight his heart out for the silkworm bill. We have other bills just like that, I can assure the Senator. When we get something that affects all the foundations in the country we have ourselves a little bit of a bearcat on our hands.

I do not think the Senator does his cause any justice in that regard.

Now as to the Senator's second point——

Mr. BUMPERS. Mr. President, will the Senator yield?

Mr. GRAVEL. I yield to Senator Hart who had a second point he wished to make.

Mr. HART. Only it is important in these considerations not merely to have a vehicle that no one objects to but also to have a vehicle that some people want. Vehicles have a way of disappearing here. And then what is imperative on an issue of this sort is to save a vehicle that someone wants.

Mr. GRAVEL. Let me say to my colleague that he has a saddle bigger than the burro here because what he wants is more important than the foundation bill because once there is a consensus reached there is going to be a lot of support for this. In fact, individually, as I understand what would be proposed is not objectionable, but I think it would work better based upon a broader consensus of Congress, and I do not mean just this body or individual Members, but I think the bases have to be touched on the House side with the Ways and Means Committee, and the like.

So I did not want to debate the merits of what the Senator is proposing. I was merely making an appeal to keep this bill virgin because we were careful in the Finance Committee not to touch a line of this bill so that it would go back to the House of Representatives and be accepted immediately.

There will be nothing that we have to go to conference. So what my colleague is going to do is going to bring us to conference and we are back again with the brouhaha with energy. So he will not have advanced his situation by any time element.

So I hope that my colleague will reconsider the tactical advantage of adding energy matters to this foundation corrective legislation.

Mr. BUMPERS and Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, I shall explain briefly the amendment that I have offered here.

Incidentally, Mr. President, while the amendment bears my name, because I brought it to the desk, this is really the amendment of Mr. HASKELL, the Senator from Colorado.

I ask that his name appear on the amendment because it is his amendment that I offer on behalf of the committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, under certain student loan programs established by the United States and various State and local governments, all or a portion of the loan indebtedness may be discharged if the student performs certain services for a period of time in a certain geographical area pursuant to conditions in the loan agreement. In 1973, the Internal Revenue Service ruled on a situation in which a State medical education loan scholarship program provided that portions of the loan indebtedness are discharged on the condition that the recipient practices medicine in a rural area of the State. The Service determined that amounts received from such a loan program were included in the gross income of the recipient to the extent that repayment of a portion of the loan is no longer required. In 1974, the Service determined that this ruling would be applied only to loans made after June 11, 1973, the date of the 1973 ruling.

The Tax Reform Act of 1976 provided that in the case of loans forgiven prior to January 1, 1979, no amount shall be included in gross income by reason of the discharge of all or part of the indebtedness of the individual under certain student loan programs if the discharge was pursuant to a provision of the loan agreement under which all or part of the indebtedness of the individual would be discharged if the individual works for a certain period of time in certain professions in certain geographical areas or for certain classes of employers.

The committee amendment would provide a 4-year extension, through January 1, 1983. Under the amendment, loans forgiven prior to January 1, 1983, would not be included in the taxpayer's income.

The PRESIDING OFFICER. Is there further discussion of the amendment? The question is on agreeing to the amendment of the Senator from Colorado.

The amendment was agreed to.

AMENDMENT NO. 3521

(Purpose: To increase the credit for State-imposed taxes on coin-operated devices and to repeal the Federal tax on such devices)

Mr. LONG. Mr. President, on behalf of Senator LAXALT and Senator CANNON I send to the desk an amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG), on behalf of Senators LAXALT and CANNON, proposes a printed amendment numbered 3521.

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . (a) Paragraph (2) of section 4464 (b) of the Internal Revenue Code of 1954 (relating to limitations on the credit for State-imposed taxes) is amended by striking out "80 percent" in the heading and text thereof and inserting in lieu thereof "95 percent".

(b) Subchapter B of chapter 36 of such Code is repealed.

(c)(1) Section 4402(2) of such Code (relating to exemptions from taxes on wagering) is amended to read as follows:

"(2) COIN-OPERATED DEVICES.—On any wager placed in a coin-operated device (as defined in section 4462 as in effect for years beginning before July 1, 1980), or on any amount paid, in lieu of inserting a coin, token, or similar object, to operate a device described in section 4462(a)(2) (as so in effect), or".

(2) Subsection (a) of section 4901 of such Code (relating to payment of occupational tax) is amended by striking out "or 4461 (a)(1) (coin-operated gaming devices)".

(d)(1) The amendment made by subsection (a) shall apply with respect to years ending June 30, 1979 and June 30, 1980.

(2) The amendments made by subsections (b) and (c) shall apply with respect to years beginning after June 30, 1980.

Mr. LONG. Mr. President, the committee approved the amendment and, as I say, this amendment was the amendment of Senator LAXALT on behalf of himself and his colleague from Nevada.

This committee amendment deals with the Federal excise tax on slot machines and other coin-operated gaming devices.

Under present law an annual tax of $250 is imposed upon each slot machine and gaming device. If a State imposes a similar tax, the State tax is a credit against up to 80 percent of the Federal tax. This State tax credit facilitates the raising of State revenue which, in Nevada, for example, is used to provide assistance to the schools.

This Federal tax contributes only about $6 million to the Treasury. Because of these considerations, the committee amendment raises the limitation on the State tax credit from 80 percent to 95 percent for years ending June 30, 1979, and June 30, 1980, and repeals this tax for years beginning after June 30, 1980.

The Treasury Department does not oppose the repeal of this tax.

Mr. CANNON. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. CANNON. During the 91st Congress I offered, together with my colleague, Alan Bible, legislation to provide that 80 percent of the Federal occupational taxes collected on coin-operated gaming devices be credited for similar taxes imposed by a State where the operation of such devices is legal.

This has been very important to us in Nevada. These taxes have been earmarked for education purposes.

The prevailing sentiment at that time was that Federal jurisdiction in the area of coin-operated gaming devices was primarily for oversight purposes and not for raising revenue. Therefore, I was extremely pleased when my proposal was agreed upon and signed into public law. My feeling at that time was that the credit figure should have been higher than 80 percent. Thus, I strongly urge support of this measure which would amend the Internal Revenue Code of 1954 to increase the limitation on the credit to 95 percent in 1979 and 1980, and to 100 percent after that.

I would like to point out that the Nevada Legislature enacted legislation to insure that proceeds resulting from the Federal credit be earmarked for the support of the State's public school system. I fully expect that this arrangement will continue if the proposed change is agreed upon by Congress.

The fact is the revenues from the taxes are extremely minor. In any event, I believe this proposed change is most reasonable. This provision was simply never intended as a revenue-raising measure.

Additionally, this change is entirely consistent with the findings and recommendations of the Commission on Review of the National Policy Toward Gambling, which recommended that State governments have sole jurisdiction for legalized gaming activity.

● Mr. LAXALT. Mr. President, I am pleased to support my distinguished senior colleague in his advocacy of this amendment. We have both worked long

and hard in this effort, and I wish to commend him for his labors.

Section 4461 of the code imposes a $250 annual tax on coin-operated gaming devices. In 1971, an amendment was added to allow an 80-percent credit for State taxes paid on these devices. I would, today, like the Senate to consider raising the credit level to 95 percent.

Moneys obtained from this credit have been very helpful to Nevada education and it is for this reason that I urge the Senate to expand it. Under State law, an amount equal to the credit is made available for education. The first $5 million is allocated to a fund earmarked for capital improvements in the University of Nevada system, including the community colleges. Funds in excess of $5 million go to the State distributive school fund, which, under Nevada law, is the principal mechanism for distributing State assistance to local school districts.

By Federal standards, the revenue losses associated with expanding the credit are rather small. But they are extremely important for education in my State. In 1977, the slot tax grossed $14 million, 80 percent, or $11.8 million, of which was offset by the State credit. Our estimates indicate that, at the 95-percent figure, $13.7 million would be available to the State, thus yielding an additional $2 million for Nevada education. In 1977, the State Legislature established a special Higher Education Capital Construction Fund in anticipation of an increase in the amount of the credit. Under this new Nevada law, the incremental gain from the increase in the credit would be specifically earmarked for the payment of interest and amortization of principal to defray construction costs for sorely needed continuing education and athletic facilities at the University of Nevada's Reno and Las Vegas campuses.

Mr. President, it is my understanding that some 15,000 students enrolled in about 475 continuing education programs at the university's fast-growing Las Vegas campus are now making do in borrowed classrooms or rented facilities off-campus with no permanent housing. It is my hope that the Senate will, today, help rectify this situation.

Mr. President, I urge favorable consideration of this matter.●

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. LONG. Yes.

Mr. PROXMIRE. What is the revenue loss on this?

Mr. LONG. $6 million.

Mr. PROXMIRE. $6 million?

Mr. LONG. That is a loss to the State of Nevada. The point is that the Treasury's attitude about this matter is that it raises so little tax when you let the State have a credit for most of it that they would just prefer not to fool around with it.

Mr. PROXMIRE. But the loss is to the State of Nevada not to the U.S. Treasury?

Mr. CANNON. Mr. President, if the Senator will yield, the Treasury would not collect that $6 million. It would go to the State of Nevada, yes.

Mr. PROXMIRE. I see. But there is no opposition on the part of the Treasury?

Mr. LONG. The Treasury advocates the repeal of the tax because there would be so little revenue flowing to the Treasury that they would rather not fool with it. They do not oppose the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nevada.

The amendment was agreed to.

UP AMENDMENT NO. 1723

(Purpose: To extend for one year tax treatment of certain small farming corporations)

Mr. BUMPERS. Mr. President, I send an amendment to the desk on behalf of myself, Mrs. ALLEN, Mr. SPARKMAN, Mr. MUSKIE, Mr. HATHAWAY, Mr. HODGES, and Mr. LUGAR, and ask for its immediate consideration.

The PRESIDING OFFICER. The will report.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) proposes an unprinted amendment numbered 1723.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following new section:

"SEC. . Section 207(c)(2) of the Tax Reform Act of 1976, as amended by Section 404 of the Tax Reduction and Simplification Act of 1977, Public Law 95–30, is further amended by striking the date "December 31, 1977" in Section 207(c)(2)(B) and inserting in lieu thereof the date "December 31, 1978."

Mr. BUMPERS. Mr. President, the Tax Reduction and Simplification Act of 1977, Public Law 95–30, permits certain kinds of family farming corporations to continue to use the cash basis of accounting for tax purposes. Under this act, corporations in which two families own at least 65 percent of the stock, or in which three families own at least 50 percent of the stock and substantially all of the remaining stock is owned by employees, their families, or trusts for the benefit of employees may elect to use the cash basis. The general rule, as Members will recall, enacted into law by the Tax Reform Act of 1976, is that farming corporations must use the accrual basis. There are a number of exceptions to this rule, however, one of which is embodied in the act we passed last year.

This exception, however, was effective for 1 year only. It was made temporary in the expectation that President Carter's tax reform program, then in the process of being prepared, would address the issue of cash versus accrual accounting and resolve it on a permanent basis. The issue is now being resolved. As a matter of fact, the House has now passed H.R. 13511, which would solve this problem permanently by allowing certain categories of family farms, including those covered by Public Law 95–30, to continue to use the cash basis at their option.

In the meantime, however, the 1-year exception has expired. It applied only to taxable years beginning before December 31, 1977. In order to preserve the status quo and allow those corporations presently covered by the exception to continue to avail themselves of its provisions, an additional extension of 1 year is necessary. This period of time will undoubtedly be sufficient for the problems to be addressed and solved on a permanent basis, since the Senate plans to take up H.R. 13511 in the near future.

The amendment I propose would simply extend the family exception in Public Law 95–30 for 1 additional year. The exception would be available for any taxable years beginning before December 31, 1978. The Treasury Department does not oppose the amendment. I ask unanimous consent that a letter dated May 3, 1978, from Donald C. Lubick, then Acting Assistant Secretary of the Treasury for Tax Policy, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE TREASURY,
Washington, D.C., May 3, 1978.

HON. DALE BUMPERS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BUMPERS: This is in response to your request for the Treasury's position regarding an additional two year postponement of the mandatory accrual accounting rules for certain large farming corporations.

For taxable years beginning after December 31, 1976 large corporations engaged in the business of farming are generally required to use an accrual method of accounting to compute taxable income. An exception is provided for farm corporations owned by members of the same family. Under the Tax Reform Act of 1976 this exception for the family farm corporations was restricted to corporations where 50 percent or more of the voting stock and 50 percent or more of all other classes of stock are owned by members of the same family. Under the Tax Reduction and Simplification Act of 1977, the family farm corporation exception was broadened to cover corporations where two families own at least 65 percent of the corporation's stock or where three families own at least 50 percent of the stock and substantially all of the remaining stock is owned by employees of the corporation, their families, or exempt retirement trusts established for the benefit of the employees.

The two-family and the three-family ownership exceptions were effective for one year, but legislation has been proposed to extend these exceptions for an additional two years. We do not oppose this legislation but recognize it only as an interim solution to alleviate certain competitive inequities suggested to exist by members of the poultry industry. These inequities would be permanently eliminated under the Administration's proposal discussed below.

The Administration has proposed the repeal of the exceptions for family farm corporations. Our proposal is based on the desire to require a more clear reflection of taxable income by all large farming corporations. We, of course, support the continuation of an exception from the accrual accounting rules for farm corporations with $1 million or less of gross receipts as a means of relieving small farmers from the administrative complexity of an accrual method of accounting. However, large farm corporations whether or not family owned, cannot fairly claim they lack access to the sophisticated accounting and recordkeeping procedures involved in the accrual method of accounting. In fact, many of these large corporations regularly use the accrual method of accounting for financial statement purposes.

We further believe that large farming corporations affected by the change from the cash method of accounting to the ac-

crual method of accounting will have the hardship of making the transition alleviated by the statutory provision currently included in section 447 which generally allows them to take the net adjustment which must be made into account over a ten year period.

Sincerely,

DONALD C. LUBICK,
Acting Assistant Secretary.

Mr. BUMPERS. Mr. President, hesitant as I am to offer this amendment on this particular bill, of which I am a cosponsor, it is a matter of great import to the poultry industry in which, as you know, my State is the leader across the country.

The matter is taken care of in the tax bill, H.R. 13511. This amendment would simply extend present law for 1 year, and it will eliminate a terrible discrimination against certain family farms in the country if the amendment is adopted.

I would urge its adoption. I have discussed this with the managers of the bill, and I will be happy to yield to my colleague from Maine.

Mr. HATHAWAY. Mr. President, I think it is a very good, worthwhile amendment. It does correct an inequity that was not considered at the time this bill was passed. The Committee on Finance is studying whether or not cash accounting or accrual accounting should apply to all farms. I think this 1-year extension is certainly equitable in this case. So that gives the committee a chance to study the whole problem of accounting on farms.

The PRESIDING OFFICER. Is there further discussion?

Mr. PROXMIRE. Mr. President, would the Senator from Arkansas yield?

Mr. BUMPERS. I would be happy to yield.

Mr. PROXMIRE. What is the revenue loss on this proposal?

Mr. BUMPERS. There is no revenue loss.

Mr. PROXMIRE. We would forego a revenue gain, is that not true?

Mr. BUMPERS. Not entirely. This bill was passed a year ago. This is an extension of the provision that was passed a year ago, and a similar provision is included in the House bill, the tax bill in the House, which is coming over here, hopefully, to be considered and passed by this body before the end of the session.

I am offering it today as a simple hedge against the possibility that that bill will not make it because of time constraints.

Mr. PROXMIRE. Is this the so-called chicken amendment? [Laughter.]

Mr. BUMPERS. It has been called by various names.

Mr. PROXMIRE. Well, the reason I asked it is does it single out industrial structures related to poultry production or treatment that do not apply to other industrial structures?

Mr. BUMPERS. No; that is not correct, Senator. In addition, the Treasury Department has given its endorsement, as the letter I put in the RECORD earlier indicates.

Mr. PROXMIRE. The Treasury Department supports the bill?

Mr. BUMPERS. Yes.

Mr. PROXMIRE. I thank the Senator.

● Mrs. ALLEN. Mr. President, I have joined with the distinguished Senator from Arkansas in offering an amendment to H.R. 112, inasmuch as I too believe that the serious inequity suffered by certain poultry producers as a result of the adoption of section 207 of the Tax Reform Act of 1976 (Public Law 94–455) ought to be corrected.

As Senators will recall, section 207 dealt with corporations engaged in farming and was designed to reduce the use of corporate farming operations for tax shelter purposes. To accomplish that purpose, section 207 forces agricultural corporations to use the accrual method of accounting. Appropriate exceptions were made to the section to permit relatively small-sized, family-controlled corporate farming operations to continue without coming under the new requirements set forth in the section. These exceptions recognize that many family-controlled small corporations are engaged in agriculture strictly for profit and are not utilized for sheltering of income earned from other nonfarm sources.

While there is probably general agreement in the Senate that the tax loopholes in corporate farming should have been closed, I doubt, Mr. President, that any Senator intended the result section 207 will have in actual fact when applied to certain owner-operated family corporations producing broilers and other poultry products.

It is my information that of the top 36 firms in the broiler industry, only two that were not publicly held were adversely affected by this provision. Thus, the impact of the provision penalized two firms in the entire industry. Surely, a provision which extracts such a discriminatory toll cannot pass for tax reform.

Mr. President, I am advised that the broiler industry is expanding at a rate of 5 to 7 percent annually. That fact alone makes the accrual method of accounting required by Public Law 94–455 undesirable. Stated simply, the accrual method would require a company to pay taxes on accounts receivable, cash on hand, and inventory so that taxes will fall due on accounts receivable which are increasing at a rate commensurate with the general increase in broiler production and income. On the other hand, the cash method of accounting, which was permitted to all broiler producers prior to the enactment of Public Law 94–455, required the payment of taxes only on in-hand cash earnings so that the projected growth aspect of the accrual method did not penalize the taxpayer.

The result, Mr. President, of forcing some broiler companies to go to the accrual method while allowing others to remain on the cash method will be simply to put at a tremendous competitive disadvantage certain family-owned operations which in actual character differ not one whit from other corporations which fit the formal exceptions set forth in section 207 of Public Law 94–455. Since the disadvantaged corporations are uniformly not corporations utilized for tax shelter purposes, do not see any reason that the inequity created should be allowed to go uncorrected.

I believe the seriousness of the situation merits adoption of the amendment proposed today by Senator BUMPERS in that it would delay the application of section 447 of the Internal Revenue Code for 1 year to permit time for permanent tax relief to prevent serious damage being done to companies involved as a result of the failure of Congress to foresee the full consequences of our earlier action.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was agreed to.

UP AMENDMENT NO. 1724

(Purpose: To allow a tax credit for certain residential energy conservation and alternative energy source expenditures)

Mr. HART. Mr. President, on behalf of myself and Senators MCINTYRE, PERCY, JAVITS, DECONCINI, MCGOVERN, MATSUNAGA, RIEGLE, BROOKE, GLENN, CLARK, PELL, HEINZ, THURMOND, WILLIAMS, DURKIN, INOUYE, and SPARKMAN, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Colorado (Mr. HART) proposes an unprinted amendment numbered 1724.

Mr. HART. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SEC. . RESIDENTIAL ENERGY CREDIT.

(a) GENERAL RULE.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting after section 44B the following new section:

"SEC. 44C. RESIDENTIAL ENERGY CREDIT.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

"(1) the qualified energy conservation expenditures, plus

"(2) the qualified renewable energy source expenditures, plus

"(3) the qualified hydrogen energy expenditures.

"(b) QUALIFIED EXPENDITURES.—For purposes of subsection (a)—

"(1) ENERGY CONSERVATION. In the case of any dwelling unit, the qualified energy conservation expenditures are 20 percent of so much of the energy conservation expenditures made by the taxpayer during the taxable year with respect to such unit as does not exceed $2,000.

"(2) RENEWABLE ENERGY SOURCES.—In the case of any dwelling unit, the qualified renewable energy source expenditures are the following percentages of the renewable energy source expenditures made by the taxpayer during the taxable year with respect to such unit:

"(A) 30 percent of so much of such expenditures as does not exceed $2,000, plus

"(B) 20 percent of so much of such expenditures as exceeds $2,000 but does not exceed $10,000.

"(3) HYDROGEN ENERGY.—In the case of any dwelling unit, the qualified hydrogen energy expenditures are 20 percent of so much of the hydrogen energy expenditures made by the

taxpayer during the taxable year with respect to such unit as does not exceed $2,000.

"(4) PRIOR EXPENDITURES BY TAXPAYER ON SAME RESIDENCE TAKEN INTO ACCOUNT.—If for any prior taxable year a credit was allowed to the taxpayer under this section with respect to any dwelling unit by reason of energy conservation expenditures or renewable energy source expenditures, paragraph (1), (2), or (3) (whichever is appropriate) shall be applied for the taxable year with respect to such dwelling unit by reducing each dollar amount contained in such paragraph by the prior year expenditures taken into account under such paragraph.

"(5) MINIMUM DOLLAR AMOUNT.—No credit shall be allowed under this section with respect to any return for any taxable year if the amount which would (but for this paragraph) be allowable with respect to such return is less than $10.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) ENERGY CONSERVATION EXPENDITURE.—The term 'energy conservation expenditure' means an expenditure made on or after April 20, 1977, by the taxpayer for insulation or any other energy-conserving component (or for the original installation of such insulation or other component) installed in or on a dwelling unit—

"(A) which is located in the United States, the Virgin Islands, or Guam,

"(B) which is used by the taxpayer as his principal residence, and

"(C) the construction of which was substantially completed before April 20, 1977.

"(2) RENEWABLE ENERGY SOURCE EXPENDITURE.—

"(A) IN GENERAL.—The term 'renewable energy source expenditure' means an expenditure made on or after April 20, 1977, by the taxpayer for renewable energy source property installed in connection with a dwelling unit—

"(i) which is located in the United States, the Virgin Islands, or Guam, and

"(ii) which is used by the taxpayer as his principal residence.

"(B) ITEMS INCLUDED.—The term 'renewable energy source expenditure' includes only expenditures for—

"(i) renewable energy source property, or

"(ii) labor costs properly allocable to the onsite preparation, assembly, or installation of renewable energy source property.

"(C) SWIMMING POOL, ETC., USED AS STORAGE MEDIUM.—The term 'renewable energy source expenditure' does not include any expenditure properly allocable to a swimming pool used as an energy storage medium or to any other energy storage medium which has a function other than the function of such storage.

"(3) HYDROGEN ENERGY EXPENDITURES.—

"(A) IN GENERAL.—The term 'hydrogen expenditures' means an expenditure made on or after April 20, 1977, by the taxpayer for hydrogen energy property and installation installed in connection with a dwelling unit—

"(i) which is located in the United States, the Virgin Islands, or Guam, and

"(ii) which is used by the taxpayer as his principal residence.

"(B) ITEMS INCLUDED.—The term 'hydrogen energy expenditures' includes only expenditures for—

"(i) hydrogen energy property, and

"(ii) labor costs properly allocable to the onsite preparation, assembly, or installation of hydrogen energy property, or to the modification of conventional property for the use of hydrogen as a fuel.

"(4) INSULATION.—The term 'insulation' means any item—

"(A) which is specifically and primarily designed to reduce when installed in or on a dwelling (or water heater) the heat loss or gain of such dwelling (or water heater),

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the item.

"(5) OTHER ENERGY-CONSERVING COMPONENT.—The term 'other energy-conserving component' means any item (other than insulation)—

"(A) which is—

"(i) a replacement furnace or boiler designed to provide more efficient energy utilization by improving heat generation or lowering heat losses,

"(ii) a furnace replacement burner designed to achieve a reduction in the amount of fuel consumed as a result of increased combustion efficiency,

"(iii) a device for modifying flue openings designed to increase the efficiency of operation of the heating system,

"(iv) an electrical or mechanical furnace ignition system which replaces a gas pilot light,

"(v) a storm or thermal window or door for the exterior of the dwelling,

"(vi) an automatic energy-saving setback thermostat,

"(vii) caulking or weather stripping of an exterior door or window,

"(viii) a heat pump which replaces an electric resistance heating system,

"(ix) meters which display the cost of energy usage,

"(x) a replacement fluorescent lighting system,

"(xi) an evaporative cooling device,

"(xii) an item (other than a fireplace) which is designed to use wood and peat as a fuel for space heating, the heating of water or cooking of food, or any combination thereof, including any controls, ducts, stovepipes, footing or other item (other than a chimney) necessary for the safe and efficient operation of any such item, or

"(xiii) an item of the kind which the Secretary specifies by regulations as increasing (by conversion or otherwise) the energy efficiency of the dwelling,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remains in operation for at least 3 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the item.

In establishing regulations under this paragraph, the Secretary shall prescribe (i) guidelines setting forth the criteria which are used in the determination of whether an item is an energy-conserving component, and (ii) a procedure under which a manufacturer of an item may request the Secretary to specify or certify that item as an energy-conserving component.

"(6) RENEWABLE ENERGY SOURCE PROPERTY.—The term 'renewable energy source property' means property—

"(A) which, when installed in connection with a dwelling—

"(i) uses solar energy to heat or cool such dwelling or to provide hot water for use within such dwelling, or to produce electricity,

"(ii) uses wind energy for nonbusiness residential purposes,

"(iii) is necessary to distribute or use geothermal deposits (as defined in section 613 (e)) which provide geothermal energy to heat or cool such building or provide hot water for use within such building, or

"(iv) uses any other form of renewable energy which the Secretary specifies by regulations,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 5 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the property.

"(7) HYDROGEN ENERGY PROPERTY.—The term 'hydrogen energy property' means property—

"(A) which, when installed in connection with a dwelling—

"(i) uses hydrogen as a fuel for the purpose of heating or cooling such dwelling or providing hot water for use within such dwelling, or

"(ii) is used in the electrolysis of water for the production of hydrogen,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 5 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the property.

"(8) CONSULTATION IN PRESCRIBING STANDARDS.—Performance and quality standards shall be prescribed by the Secretary under paragraphs (4), (5), (6), and (7) only after consultation with the Secretary of Energy, the Secretary of Housing and Urban Development, and other appropriate Federal agencies.

"(9) WHEN EXPENDITURES MADE; AMOUNT OF EXPENDITURES.—

"(A) Except as provided in subparagraph (B), an expenditure with respect to an item shall be treated as made when original installation of the item is completed.

"(B) In the case of renewable energy source expenditures in connection with the construction or reconstruction of a dwelling, such expenditures shall be treated as made when the original use of the constructed or reconstructed dwelling by the taxpayer begins.

"(C) The amount of any expenditure shall be the cost thereof.

"(D) If less than 80 percent of the use of an item is for nonbusiness residential purposes, only that portion of the expenditures for such item which is properly allocable to use for nonbusiness residential purposes shall be taken into account. For purposes of the preceding sentence, use for a swiming pool shall be treated as use which is not for residential purposes.

"(10) PRINCIPAL RESIDENCE.—The determination of whether or not a dwelling unit is a taxpayer's principal residence shall be made under principles similar to those applicable to section 1034, except that—

"(A) no ownership requirement shall be imposed, and

"(B) the period for which a dwelling is treated as the principal residence of the taxpayer shall include the 30-day period ending on the first day on which it would (but for this subparagraph) be treated as his principal residence.

"(11) ENVIRONMENTAL RESTRICTIONS ON CERTAIN WOOD AND PEAT BURNING ITEMS.—No credit shall be allowed under subsection (a) for expenditures with respect to any item described in paragraph (5)(A)(xii) which are to be installed in any metropolitan or other area after the date on which—

"(A) the Administrator of the Environmental Protection Agency certifies to the Secretary that the emissions from such items would cause air quality in such area to be in violation of any Federal law, or

"(B) the Secretary of Agriculture certifies to the Secretary that additional consump-

tion of wood in connection with such items would endanger forests in that area.

"(d) SPECIAL RULES.—For purposes of this section—

"(1) DOLLAR AMOUNTS IN CASE OF JOINT OCCUPANCY.—In the case of any dwelling unit which is jointly occupied and used during any calendar year as a principal residence by 2 or more individuals—

"(A) the amount of the credit allowable under subsection (a) by reason of energy conservation expenditures or by reason of renewable energy source expenditures (as the case may be) made during such calendar year by any of such individuals with respect to such dwelling unit shall be determined by treating all of such individuals as one taxpayer whose taxable year is such calendar year; and

"(B) each of such individuals shall be allowed a credit under subsection (a) for the taxable year in which such calendar year ends (subject to the limitation of paragraph (5) of subsection (b)) in an amount which bears the same ratio to the amount determined under subparagraph (A) as the amount of such expenditures made by such individual during such calendar year bears to the aggregate of such expenditures made by all of such individuals during such calendar year.

"(2) TENANT-STOCKHOLDER IN COOPERATIVE HOUSING CORPORATION.—In the case of an individual who holds stock as a tenant-stockholder (as defined in section 216) in a cooperative housing corporation (as defined in such section), such individual shall be treated as having made his tenant-stockholder's proportionate share (as defined in section 216(b)(3)) of any expenditures of such corporation.

"(3) CONDOMINIUMS.—

"(A) IN GENERAL.—In the case of an individual who is a member of a condominium management association with respect to a condominium which he owns, such individual shall be treated as having made his proportionate share of any expenditures of such association.

"(B) CONDOMINIUM MANAGEMENT ASSOCIATION.—For purposes of this paragraph, the term 'condominium management association' means an organization which meets the requirements of paragraph (1) of section 528(c) (other than subparagraph (E) thereof) with respect to a condominium project substantially all of the units of which are used as residences.

"(e) BASIS ADJUSTMENTS.—For purposes of this subtitle, if a credit is allowed under this section for any expenditure with respect to any property, the increase in the basis of such property which would (but for this subsection) result from such expenditure shall be reduced by the amount of the credit so allowed.

"(f) CARRYOVER OF UNUSED CREDIT.—If the amount of the credit determined under this section for the taxable year exceeds the liability for the taxpayer for the tax under this chapter for the taxable year, the excess shall be carried over to each of the 2 taxable years succeeding that taxable year. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 2 taxable years to which it may be carried, and then to the succeeding taxable year to the extent that it may not be added for a prior taxable year to which it might be carried.

"(g) TERMINATION.—This section shall not apply to expenditures made after December 31, 1985.".

(b) INSPECTION.—To the extent not presently authorized and utilized by an agency of the United States in the assessment and collection of income taxes, no procedure or practice which utilizes onsite inspection of the residence of an individual shall be employed to determine if that individual is entitled to a credit under section 44C of the Internal Revenue Code of 1954, as added by subsection (a), unless such procedure or practice provides that such inspection shall take place only with the written consent of such individual.

(c) TECHNICAL AND CLERICAL AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 44B the following new item:

"Sec. 44C. Residential energy credit.".

(2) Subsection (c) of section 56 of such Code (defining regular tax deduction) is amended by striking out "credits allowable under—" and all that follows and inserting in lieu thereof "credits allowable under subpart A of part IV other than under sections 31, 39, 43, and 44C.".

(3) Subsection (a) of section 1016 of such Code (relating to adjustments to basis) is amended by inserting after paragraph (20) the following new paragraph:

"(21) to the extent provided in section 44C(e), in the case of property with respect to which a credit has been allowed under section 44C;".

(4) Subsection (b) of section 6096 of such Code (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44B" and inserting in lieu thereof "44B, and 44C".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after April 20, 1977.

Mr. HART. I ask unanimous consent that Peter Gold and Terry Johnson of my staff and Robin Carpenter of Senator McGOVERN's staff be afforded privileges of the floor during debate and rollcalls on the pending tax measures.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. LONG. Might I ask the Senator not to insist on the yeas and nays on the amendment? We might be able to accept the amendment and, if that is the case, we can save some time.

Mr. HART. I wonder if we could get the yeas and nays, and if we can get them and then they are not necessary we can vitiate the order for the yeas and nays.

Mr. LONG. It takes unanimous consent to vitiate. If the Senator is not satisfied, we will order the yeas and nays.

Mr. BUMPERS. Mr. President, I ask unanimous consent that Richard Arnold of my staff be accorded the privileges of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. Mr. President, I make the same request for Ed Tanzman, Harris Miller, and Bob Millen of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. Mr. President, when President Carter introduced the National Energy Plan on April 20, 1977, the most popular and least controversial proposals were those providing tax credits for homeowners who invested in energy-conserving improvements and renewable energy resources.

The current impasse over the energy tax provisions of the national energy legislation has created hardships and disillusionment for homeowners who made energy-conserving improvements or invested in solar equipment in the belief that they would be eligible for the substantial Federal tax incentives proposed by the President. Continued inaction on these provisions has served only to undermine public confidence in the ability of the Congress to deal with our critical energy problems.

Of equal importance is the damaging effects that Congressional inaction has had on the growth and development of new industries engaged in the manufacture, installation and maintenance of renewable energy technologies.

A case in point is the solar energy industry. Many potential users of solar equipment have deferred purchases until it is clear that Congress will in fact adopt a National Energy Act with tax credits and other financial incentives for these systems. Consumers are also unsure as to whether these credits will be retroactive to April 20 of last year, or if the solar credit will be refundable to purchasers with low tax liabilities.

This ambiguous situation has had devastating effects on the solar industry. A recent survey of the solar energy industry in America conducted for the Department of Energy revealed that 14,000 solar units were manufactured and sold in the United States during the first 6 months of 1977, before and shortly after the President's energy message. In the 14 months since the President's energy announcement, only an estimated 22,000 solar units have been installed. The growth rate of this industry during the first 6 months of 1978 has slowed to an estimated 13.6 percent—a 40-percent decline from the same period just 1 year ago.

At the same time, the market share of "major" solar businesses—with annual sales of more than $1 million—has increased from 30 to 45 percent. The reason for this trend is all too clear. Small solar businesses are dependent upon continued growth for their survival. They must plow back earnings into new plant and equipment, which will permit them to realize the economies-of-scale. Only in this way will they be able to reduce the unit costs of these systems for consumers and remain competitive with the relatively few solar businesses with large capital resources.

Let me quote from a Washington Post article written by Mr. John McCombs, president of a small solar energy firm. Mr. McCombs wrote almost a year ago:

A lot of solar energy businesses across the country are sorry that they ever heard about the solar tax incentive proposed by President Carter on April 20. Ever since the announcement, their business has dropped off radically.

Solar firms were rushed by customers after the severe winter (of 1977), but after April 30, those customers said they would wait for legislation.

Everyone assumes that the national need for solar energy is great enough to be an incentive for people to become involved. However, as long as financing for solar companies is as difficult to obtain as it is, there will be far too few around to serve the demand for products and services when Congress finally acts.

Mr. President, it is a bitter irony that the solar flat plate industry in America fared better before the Federal Government attempted to implement a national solar commercialization strategy. Clearly, the indecisiveness of Congress on the tax provisions of the national energy legislation runs counter to our past efforts to promote a healthy and diversified solar energy industry.

Perhaps this situation could be understood if there were a legitimate reason for delaying the implementation of these programs. The fact of the matter is that the energy tax conference committee resolved virtually all of the differences between the Senate and House provisions before Christmas of last year, when the last substantive meeting of the energy tax conference took place. The sole reason for delay has been the decision to hold the solar and residential tax credits hostage in order to insure passage of a crude oil equalization tax (COET). Reaction to COET has been so negative, however, that its prospects must be regarded by everyone as extremely unpromising. Yet, there has been no attempt to reconvene the tax conference in order to report out these already agreed-to provisions, nor is such an attempt anticipated in the near future.

President Carter established a national goal of 2.5 million solar heated homes and businesses by 1985—a modest objective when compared to California's plan to construct or retrofit 1.5 million homes with solar equipment during the same period. To achieve the national goal, the solar collector industry—building on a base of 50,000 solar homes and businesses at the present time—will have to grow at an annual rate of approximately 65 percent. This is consistent with industry growth rates prior to the President's NEP announcement.

If, however, industry growth continues at its present pace—without the incentives provided by the national energy legislation—we can expect to have only 300,000 solar heated homes and businesses by 1985.

It has been said by critics that tax credits for homeowners who purchase solar equipment or make energy-conserving improvements are unnecessary, since they would only provide incentives to those who would make investments in any case. Experience has moved otherwise. For instance, in California and Arizona, States which provide significant tax incentives for residential use of solar energy, the number of installations have multiplied. California, which had only 25 solar-heated homes in 1976, expects to have 176,000 residential solar units within the next 3 years. Many solar businesses believe that sales in the four States which provide substantial incentives for the use of solar are the industry's only lifeline at the present time.

The Office of Technology Assessment (OTA) has stated:

> Without government help, solar energy is unlikely to make a significant contribution to U.S. energy supplies before the year 2000.

The energy offices of all 50 States have expressed the pressing need for implementation of these measures. In a recent telegram to the distinguished majority leader (Mr. BYRD) and House Speaker O'NEILL, they wrote:

> These credits are essential to the rapid development of solar energy and conservation. The delay in passing these credits has eroded the market for solar and conservation equipment, and strained the patience of homeowners across the country committed to installing energy-saving systems. If these credits are not passed, the vast energy savings economic development potential of solar and conservation will be delayed.

The difficulties experienced by the solar energy industry are by no means unique. Many companies attempting to develop wind, geothermal, alcohol fuels from renewable resources and other alternative energy technologies are in similar straits as a consequence of the Congressional impasse on the national energy legislation.

This amendment is based on the residential conservation and renewable resource credits of the original Senate energy tax bill. Modifications have been made only in instances where the House conferees have voiced objections to the Senate bill, for example, on the refundability of these credits.

Clearly, the cost of continued inaction is unbearable. While we all recognize the complexity and vital importance of many of the energy tax provisions which have not been agreed to in conference, the logical connection between these and other aspects of the energy tax bill has been strained in the 16 months during which Congress has debated this legislation. The predicament of the solar energy industry illustrates in a very poignant way that the arguments for considering the various tax incentives and disincentives as a package are, in some instances, proving counterproductive to the goals of the National Energy Act.

I yield to the Senator from New Hampshire.

Mr. MCINTYRE. Mr. President, I rise to support the amendment of the distinguished Senator from Colorado, and to add some explanations of my own as to why we are offering this amendment at this time.

Some of our colleagues may be asking why we are forcing this issue now. Why you might ask, do we not wait a little longer and allow the Finance Committee and the Ways and Means Committee of the House to complete their work and work out the details on this issue?

The main reason is that the energy tax conferees have already had nearly a year to work out their differences on this issue. But they decided to wait—to hold us all in suspense until the natural gas issue was settled. We have no guarantee yet—with just a few weeks remaining in the 95th Congress—that the natural gas issue will ever come to settlement.

However, we are willing to wait just that long. I am willing to wait only until the natural gas issues are settled, and the nautral gas section of the President's program is passed or defeated.

But the chairman of the Finance Committee is asking us for more than that. He is asking us to wait until after natural gas before we even see what kind of energy tax bill or energy tax amendments we will be voting on. Then we will be in the waning days of the session. Some will be necessarily absent because of campaigns being conducted. We will have to take it or leave it. The President will have to take it or leave it.

Some people are saying the crude oil equalization tax is dead. The Secretary of Energy told me, and several other Senators, that he believes it is dead. But no one seems to want to bite that particular bullet. In fact, Congressman ULLMAN, the chairman of the Ways and Means Committee in the House, has said that he will oppose passage of solar energy and energy conservation tax credits unless they are coupled to a crude oil equalization tax.

So the status of these tax credits in the energy tax conference is still highly uncertain, Mr. President. And we are proposing today to remove some of that uncertainty.

The reason that we want to remove some of that uncertainty is that we were in a very similar situation at the end of the last session. The House had passed solar and conservation credits, and the Senate had passed them as part of the tax cut bill H.R 10412. We had every assurance at that time, that the credits were safe, and that they would be passed as part of the tax cut. But they disappeared from the tax bill like change from a spendthrift's pocket, and we never saw the credits again.

We have similar assurances this time but little more than that. We have not seen any final action by the energy tax conferees. In fact, I have not yet seen a response to the letter that the Senator from Colorado (Mr. HART), the Senator from Illinois (Mr. PERCY), and I circulated, which was signed by 28 Senators in all, asking the energy tax conference to act upon the solar and conservation credits.

Passage of these credits is painfully urgent to the public and to the solar and conservation industries. We have left our public hanging, and we have left the solar and conservation industries out on a financial limb. They have made commitments of their time and resources based upon the promise of these credits a year and a half ago. And we have only to look again at the survey quoted by the Senator from Colorado (Mr. HART) to see just how disastrous this year-and-a-half delay has been for the solar industry. This disastrous market effect has been the direct result of our indecision—not just that of the energy tax conference, because the conferees are only acting in all our behalf—but of the Congress as a whole. The public knows that these credits are pending, and the public prudently is waiting to see if we come through with the promises made by President Carter and by both Houses of Congress in passing these credits in the first place.

So that my colleagues can better understand what it is that we are voting on today, I want to explain the importance of some provisions of this amendment.

First, one of the measures eligible for the credit is stoves which burn wood or

peat to heat homes. This provision was accepted by the Finance Committee on the Senate floor. As of this time, it has not yet been agreed to—nor has it been rejected—by the energy tax conference. I have several points to make regarding this amendment.

This credit would be the same amount as the residential conservation credit, a maximum of $400.

It has been stated that a tax credit for wood stoves favors only a few people, and it has been said also that this credit will be used primarily in New England. Neither of these assertions is true. I ask unanimous consent to have printed at this point in the RECORD some facts provided to me by John Lynn, president of Fisher Stoves International, the Nation's largest wood stove manufacturing firm. Fisher's headquarters, by the way, is in Oregon. That is a long way from New England.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

1. Industry data indicates that total radiant fuel burning appliance sales could, with the assistance of a tax credit, reach between 1978 and 1985, a total of approximately 5.5 million units. During this eight-year period, total equivalent barrels of oil saved would be 432 million, at a total value of $6.8 billion using a 1978 base cost per barrel of $11.90 plus a 6 percent annual cost increase (compounded).

2. Surveys by manufacturers indicate sales are highest to those income groups most affected by inflation and rising taxes.

16 percent making less than $10M per annum.

44 percent making less than $15M per annum.

24 percent making less than $20M per annum.

10 percent making less than $25M per annum.

3. Manufacturer surveys indicate sales are to:

40 percent blue-collar.

25 percent white-collar.

15 percent retired.

5 percent unemployed.

4. Manufacturer surveys indicate sales go 28 percent to new construction and 72 percent existing facilities, with 76 percent of total sales to permanent residences.

5. 1977 sales data by four major manufacturers with approximately 50 percent of the national market show a diversity of sales as follows:

29 percent of unit sales were in 12 Western and Rocky Mt. states.

17 percent of unit sales were in 14 Central and Midwest states.

37 percent of unit sales were in 14 Southeastern states.

17 percent of unit sales were in 9 Northeastern states.

The same manufacturers show a diversity of manufacturing locations, i.e., 52 factories in 28 states.

6. Radiant solid fuel appliances are labor-intensive from a manufacturing aspect and are produced in many locations due to weight considerations and consequently open up many small business opportunities for component supply and fabrication.

7. A 1976 leaflet (No. 559) from the U.S. Department of Agriculture Forest Service advises that wood is much lower in irritating pollutants than most fuels, has low ash content and what ash remains can be used as fertilizer. They stress the renewable aspect of wood and if used as fuel would reduce the burdensome piles of wood waste riddling our environment in woodlands, rural dumps and wood processing plants.

8. Modern forestry practices in the U.S. have increased the timber supply nationwide. Sustained-yield management which utilizes the process of commercial thinning of "waste wood," has significantly increased the growth potential of forests. Department of Agriculture statistics show us that enough new wood growth occurs every year in the U.S. to heat 33 million homes (based on 5 cords of wood per home over a 150 day heating season). Many homes are heated entirely on 2½ to 3 cords per year.

9. A February 1978 report by Brookhaven National Laboratory under contract with DOE assessed implications of employment on conversion of approximately 8 percent of New England homes to wood burning and found that additional jobs created in the cutting and transportation of wood would create from 13,200 to 19,500 jobs reducing current unemployment by 3.4 to 6.5 percent. This only covered the direct employment impacts so secondary and tertiary effects have been ignored.

10. The State of Idaho already has tax incentives to encourage the use of solid fuel stoves and we understand Alaska has recently passed a similar bill.

11. A federally funded study by T. B. Reed of the Solar Energy Research Institute, Golden Colorado indicates biomass sources cost $1 to $5 per million BTU's versus solar energy costs in excess of $20 per million BTU's.

Numerous solar housing designs incorporate radiant solid fuel stoves as the backup and supplementary system.

12. The preliminary results of a study by L. D. Garrett of the Northeastern Forest Experimental Station in Burlington, Vermont, show airtight wood-burning stoves used as a secondary system, make significant contributions to reducing the primary system's electrical power consumption.

13. If the Federal Government encourages the use of solid fuel wood-burning stoves as a viable alternative to petroleum products, nuclear and electrical energy sources many consumers not covered by the tax credit will also seriously consider purchasing radiant solid fuel appliances resulting in even larger energy savings than projected.

Mr. McINTYRE. In addition, my staff has put together a thorough study of the wood stove tax credit and the potential for wood stoves to provide heat.

This study found that every region of the Nation, and nearly every State, has substantial surpluses of wood available for use as home fuel.

In addition, Alaska, and several States in the Southeast and Midwest, have supplies of peat that could be used to heat homes. Many people are already using these fuels.

So this is not, I emphasize, a regionally based credit. And its potential is substantial. My home State is not the biggest wood heating State in the Nation, but in New Hampshire alone, we used the equivalent of 30 to 60 million gallons of oil in wood to heat homes in 1976.

Nationwide, according to the U.S. Forest Service, enough wood grows every year to provide the equivalent of 226 million barrels of oil. That amount could be substantially increased through improved forest management.

Another important area covered by this amendment is energy conservation in homes. I know that many of my colleagues have been concerned about the potential for a shortage of insulation, and were worried that this credit might increase demand and send prices soaring.

I have received assurances from two of the biggest manufacturers of mineral wool insulation that they are substantially increasing their capacity. Those companies are U.S. Gypsum and Owens-Corning.

In addition, there are other kinds of insulation that can be used in a home. The U.S. Consumer Product Safety Commission has just issued a new Federal standard for cellulose insulation to protect homes from fire and corrosion.

And many other measures are eligible for the energy conservation tax credit, with the potential for saving the Nation hundreds of thousands of barrels of oil per day.

One of the most cost-effective of these measures is the replacement of an old oil burner with a new burner nozzle which is more efficient. New burner nozzles now on the market can improve the efficiency of existing oil heating systems 15 to 25 percent, according to studies by the U.S. Department of Energy. I emphasize that these high-efficiency burners are already on the market, and can be installed at a cost of $200 to $350 per home. At that price, they pay for themselves in less than 2 years with savings on oil consumption.

If half of the old oil systems in the Nation were fitted with new, more efficient burners, the Nation could realize a saving of 200,000 barrels of oil per day. This is a readily achievable goal if we provide these tax credits to consumers now, without waiting.

Mr. President, the figures I cited above are very compelling arguments for adopting solar and energy conservation tax credits for homeowners. I urge the adoption of this Hart-McIntyre amendment.

I thank the Senator for yielding.

(Mr. BENTSEN assumed the chair.)

Mr. PROXMIRE. Will the Senator yield?

Mr. HART. I yield to the Senator from Illinois.

Mr. PERCY. I thank my distinguished colleague for yielding. I join with my distinguished colleague from Colorado (Mr. HART), a leader in this field, and my distinguished colleague from New Hampshire (Mr. MCINTYRE).

I would like to say, however, to the distinguished chairman of the Finance Committee (Mr. LONG) and to the ranking minority member (Mr. CURTIS) that I was somewhat concerned at amending this particular bill. I think this bill is such a good idea that I would not want to jeopardize its chances to sail right through. I see no reason it cannot, because it fulfills a commitment that was made by the Finance Committee to the foundations of this country in 1969.

I think the chairman and ranking minority member will remember that the Senator from Illinois testified at that time. I recall a very heated colloquy the Senator from Illinois had with the then Senator from Tennessee, Senator Gore, who felt that foundations were the dead hand of the past and we should pronounce a death sentence on them. What the committee in its infinite wis-

dom worked out was a way to encourage foundations to expend their income and not accumulate it indefinitely. That device was the 4-percent tax.

The Senator from Illinois objected very strenuously to that tax. I thought first of all it would never cost 4 percent for the Internal Revenue Service to carry on its operations with respect to tax exempt organizations. My estimate was right. The cost is about half.

Second, the Senator from Illinios saw no reason why, as long as we do not charge other taxpayers specifically for the cost of operation of the Internal Revenue Service, that foundations should be charged.

I think at that time the commitment was made by the committee, the chairman and ranking minority member, that if, in fact, the cost was substantially less, the tax would be adjusted. All this bill does is in good faith make the adjustment to what is more accurately the cost involved. I commend the committee for honoring its word in that time and I wish to take this opportunity to express my support for the reduction of the excise tax placed on the net investment income of tax exempt private foundations from the present 4 percent to a more reasonable 2 percent. This bill before the Senate, H.R. 112, passed the House of Representatives February 28, 1978, and was reported out of the Senate Finance Committee May 9. I should note that this bill is essentially the same as S. 2204 which was introduced by my distinguished colleague, Mr. GRAVEL, and cosponsored by 41 Members of the Senate, including myself.

The 4-percent excise tax imposed on the net investment income of tax exempt private foundations by section 4940 of the Internal Revenue Code was included in the Tax Reform Act of 1969 as a compromise along with other measures to supervise these foundations. The thrust of these measures was to correct perceived abuses occurring in the 1950's and 1960's. The purpose of the excise tax is to defray the costs of the Treasury Department in supervising the compliance of these foundations with the Federal tax laws. However, the tax has produced revenues well in excess of the cost of supervision. The excess funds represent lost charitable activities which the foundations could have supported.

If we still believe in the noble purposes of foundations, we should not diminish their ability to act by imposing taxation of an amount greater than needed to supervise their activity. It is true that Government funding at all levels, particularly the Federal Government, is the dominant force in traditional areas of charity such as medicine, education, and income assistance. However, just because Government has become the main actor in these arenas does not mean that these private foundations do not have a continuing vital role. Often these private foundations can react more quickly to a pressing need than a political body can. Similarly, private foundations frequently provide the cutting edge in entering new fields of support for the public good when Government action would suffer from inertia and a timelag between the need and the support. The excessive 4-percent tax damages the very public interest for which tax-exempt status was granted these organizations.

The 4-percent excise tax limits the potential of private foundations to act in the public interest and should be reduced until the revenues collected come more closely to the costs of supervision. As can be seen from the table, revenues from this tax have been more than three times the costs of supervising foundations since the tax was first imposed:

[In thousands]

Fiscal year	Revenue from 4 percent tax	Internal Revenue Service costs		Fiscal year	Revenue from 4 percent tax	Internal Revenue Service costs	
		Foundations	All exempt organizations			Foundations	All exempt organizations
1968	----------	$1,600	$7,100	1973	$76,617	$12,300	$18,600
1969	----------	2,100	7,500	1974	69,802	12,200	21,100
1970	----------	3,500	11,000	1975	63,828	5,476	23,603
1971	[1] $24,589	8,600	15,400	1976	59,538	2,980	25,915
1972	56,045	12,900	19,300	1977	78,592	2,258	25,656

[1] Because of the interrelationship of the effective date of the tax and return filing dates for private foundations, this figure includes only a part of the revenue yield of the tax for its first full year of operation. It does not include taxes paid by foundations reporting their income on the basis of fiscal years ending February 28, 1971, through December 31, 1971. A number of the largest foundations were in this group.

Since the tax has brought in more than double the amount of funds needed to supervise the compliance of all tax exempt organizations, a reduction in the tax by half to 2 percent will provide more than ample funding for the supervisory activities of the Internal Revenue Service.

Amounts collected under the excise tax directly reduce the amount of funds private foundations must disburse under section 4942 of the Internal Revenue Code. Therefore for each dollar the excise tax is reduced, the charitable giving of these private foundations is increased by $1. Thus the tax is being paid out of the very dollars which would go toward charitable purposes. In essence the recipients of foundation support are paying the excise tax and bearing the incidence of the tax rather than the foundations themselves.

I believe the reduction of the excise tax to 2 percent is a needed step to help continue the charitable purposes of these foundations while still protecting the supervisory activities of the Internal Revenue Service. I urge that H.R. 112 be given the full support of the Senate.

With respect to the amendment now being offered to the bill, again I feel there should be no substantive controversy at all. We are in no way attempting to convince the chairman and ranking minority member of the Finance Committee of the wisdom of it. Indeed, it is a provision that they themselves have been leaders in initiating.

This amendment provides an incentive for us to create the cheapest and cleanest new source of energy this country can create: conservation of energy. It encourages every home dweller in this country to seal up his home and stop the terrible waste of energy. And its mechanism is one that has always seemed to work in the past: A tax incentive.

The committee saw fit to honor the fact that the President addressed the American people in April of 1977 and said we should move in this direction, we should conserve energy, and we should have a tax incentive. The committee saw fit in its legislation to make that tax incentive retroactive to April of 1977.

So we are not trying to convince the committee or the Senate of the wisdom of it. No one has doubted that a tax credit for solar energy equipment or residential conservation improvements is a good idea. The Senate and the House have passed them overwhelmingly twice. Those of us sponsoring this amendment simply feel that it is time that they be enacted into law.

It is time, because our hesitation in passing a solar tax credit is killing the solar industry. A year and a half ago, we were committed to getting that industry going. But now, because of the uncertainty in tax policy, the industry is in a very bad way. It is struggling to stay alive.

Mr. President, solar manufacturers from the State of Illinois have written to alert me to their critical situation. I received one letter from the president of a small solar firm in Illinois that started off, "The solar energy industry is dying."

I have received letters with the same message from other Illinois solar firms.

The Senator from Illinois, together with the Alliance To Save Energy, was at a conference on solar energy keynoted by Secretary Henry Kissinger, in Chicago a year and a half ago. We had scores of companies come and exhibit. Everyone was excited. We were moving ahead. A tax credit was going to be enacted and there would be incentive to move ahead.

Now, some of these companies are simply dying on the vine. They were encouraged by Congress, encouraged by the President of the United States, and encouraged by what they felt was a solid

public attitude. Yet, with uncertainty about this tax credit, the growth rate in sales of solar collectors is down over 40 percent from last year. That rate must increase, not decrease, if the solar energy industry is to survive.

There is good cause to pass the insulation tax credits now, too. Homeowners who, in good faith, insulated their homes have waited too long for their promised tax credits. I have received many, many irate letters, as others of my colleagues have, from constituents who have lost faith in us for that reason.

I need only point out that the Alliance To Save Energy has 240 Members of Congress as sponsors. For almost 2 years now, they have encouraged conservation of energy and encouraged investment in insulating materials—storm doors, storm windows—on the part of industry, homeowners, and everyone else. Yet there is still, in August 1978, no solar or conservation tax credit.

In conclusion, therefore, Mr. President, I respectfully hope that this amendment will be supported by the floor managers of this present bill. It would give us the opportunity to enact into law very soon something that was reported out long ago by the Senate of the United States.

Mr. President, I would like to establish some legislative history on an aspect of solar energy that gets much too little attention: passive solar. Studies have shown that passive techniques for capturing solar energy may be the most economical and may have the most widespread applications of any solar technique.

The amendment before us leaves the definition of qualifying passive solar equipment unsettled.

I trust that the Internal Revenue Service will consult with experts at the Department of Energy and will define passive solar equipment in such a way that all known passive techniques are given a fair tax credit.

Mr. President, I ask unanimous consent that remarks on solar energy by Gus Speth, a member of the Council on Environmental Quality, be printed in the RECORD. Mr. Speth made this excellent speech on Sun Day. I was honored to sponsor a Senate resolution, cosponsored by better than half my colleagues, endorsing Sun Day. I think it is appropriate to insert Mr. Speth's Sun Day remarks here, now that we are finally acting to put into law the tax credits we promised the millions of solar supporters on Sun Day.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OUR MOST IMPORTANT LEGACY: A SOLAR GIFT TO THE NEXT GENERATION

(By Gus Speth)

I'm honored to be here today to participate in this celebration. Sun Day is, more than anything, an expression of our hope for the future. With some luck and a lot of application, we can make it mark a turning point in our National life.

While the present is surely no guide to the future, it is as good a place as any to begin thinking about the future. In preparing these remarks, I chose at random a publication devoted to describing the present: the April 26 copy of The Washington Post.

On page 1, I find that the Virginia Electric and Power Company, the Nation's eighth largest private electric utility, has asked for a $246 million rate increase . . . an increase that would raise residential customer bills by about 20 percent. The company is, says a VEPCO official, in no financial condition to compete for new investment capital. Among the reasons for its financial plight are these: an investment in a Wyoming uranium mine that did not pan out; a $15 million dollar loss stemming from the cancellation of two nuclear power units, whose costs had escalated, in seven years, from $600 million to $2.8 billion; another $82 million needed for start-up financing of a completed nuclear plant whose operation has been opposed because it is located on a geologic fault; and another $8 million to store radioactive wastes from the company's present nuclear units. Unless the company can boost dividends, says VEPCO, it cannot attract the additional $2.1 billion it needs in the next three years for current construction of new energy facilities.

Also on page 1, I read that "unit labor costs"—a critical index of inflation—rose during the first quarter of this year at an annual rate of 18 percent, the fastest rate in 27 years. Among the reasons cited is "the impact of the coal strike" early this year.

On page 4 is a report that "key Democrats" are opposing a part of President Carter's energy package—a provision that would bring the price of natural gas up to its true market value. On page 7, I read that Canadian Eskimos have won a temporary injunction against mining around their aboriginal lands. Such development would, they claim, drive off the caribou herds on which they rely for food. On page 9 is a brief item about the Constitutionality of a California law that is holding up construction of a $3 billion nuclear plant. And on the same page, in nine lines of type, is a report that three pipeline workers in Oklahoma City have been killed, and another critically injured, by a natural gas leak occasioned by construction of a shopping center. And on page 22, finally, is a small tale about the leak of 120 gallons of heating oil from an Italian nuclear studies center into a stream used for irrigation and cattle drinking; firemen were called to pump the stream, and "authorities" issued orders not to use the polluted water.

To repeat, I chose that issue of the Post at random. Had I wished to, I could have found much more sensational stories: the break-up of the *Amoco Cadiz* off the coast of Normandy a few weeks ago, for example.

Yet I think it is not so much the sensational stories, those that capture the attention of the world, but the humble stories we forget as soon as we read them which suggest the hidden as well as obvious costs we pay for our energy-consumptive, hard path way of life. The modest accounts I have quoted—a huge capital demand here, an interruption in supply there, a conflict between energy and food in another place—seem small change when read individually . . . but their recurrence day after day, in place after place, add up to a cumulative bill that we cannot total entirely in dollars. Year after year in our quest for conventional energy, we have been spending our earth, pushing risk on the future.

And, by one view of the future, the wise and prudent course for us is to continue as we have—only faster. Those who urge this course assure us that, yes, yes, energy conservation and solar energy are nice ideas, and some day solar energy will be worthwhile. However, they say, solar is not "practical" today, and shows no signs of becoming so within any period of time that will be helpful to us. "Why not an Oil, Gas, Coal, and Nuclear Power Day?" the Mobil ad ran yesterday.

Well . . . it's my distinct impression that we have had oil, gas, coal, and nuclear power days. Indeed, we have had oil, gas, coal, and nuclear power decades. We have spent two of those resources foolishly, and face serious problems in boosting our use of the other two.

We now use oil and gas for 75% of our energy. Yet domestic production of both has been declining for most of this decade, and excessive imports of these fuels—$45 billion a year—are already hurting our economy.

Coal has many problems, but perhaps the central one that limits our long-term reliance on it—or on any other fossil fuel, for that matter—is the buildup of carbon dioxide in the earth's atmosphere. All combustion of coal and other fossil fuels produces CO_2. Natural processes that remove CO_2, such as photosynthesis and absorption by the oceans, cannot handle the increasing amounts released as our use of fossil fuels rises. Thus carbon dioxide accumulates in the atmosphere, where it can retard the radiation of heat from earth back into space, and raises the earth's temperature.

According to a recent Oak Ridge study, even a modest increase of 2 percent per year in the consumption of fossil fuel world-wide could raise the earth's temperature by ½ of a degree to 2½ degrees centigrade within the next 50 years. It is impossible to predict the exact consequences to climate and ecological systems of a few degrees' rise in temperature, but they could be extremely serious—quite possibly increasing the area of desert and arid land and producing large shifts of agricultural land patterns. A 1977 National Academy of Sciences study says: "It is not implausible that the atmospheric (CO_2) concentration occurring in AD 2150 to AD 2200 might be 4 to 8 times the pre-industrial level." Carbon dioxide levels this high could produce a six-degree centigrade increase in the world's mean air temperature. During the last Ice Age, average mid-latitude temperatures were no more than 5 to 10 degrees below current levels.

Clearly, ignoring the CO_2 issue and leaving it for the next generation to consider would be imprudent. The energy development strategies we promote in the years immediately ahead will affect energy supply patterns for several decades, and perhaps longer. Even though our understanding of the carbon dioxide issue is imperfect and we cannot yet be certain of its dimensions, we must include it as best we can in our calculations.

For its part, nuclear power is also subject to stubborn problems that limit its expansion. One of the most serious concerns is the actual and potential increase in the number of countries that have access to technology, materials, and facilities leading to a capacity for making nuclear weapons. The continued growth and diffusion of nuclear enhances the potential for the proliferation of nuclear weapons, not only among nations, but among subnational groups such as terrorist and separatist organizations. This is particularly the case if the nuclear industry here and abroad launches nuclear power development into a new phase involving the reprocessing of spent fuel and the use of plutonium in a fission economy.

Because of these unresolved questions, President Carter, more than a year ago, called for deferral of plans to commercialize the plutonium breeder reactor and asked for cancellation of the Clinch River Breeder Reactor project. He also announced his intention to defer reprocessing indefinitely and to accelerate research on alternate nuclear fuel cycles that do not involve direct access to weapons-grade materials. Of great significance, he committed the U.S. to a refashioning of its nuclear export policy, to assure

that atoms for peace would not become bombs for sale.

The President's non-proliferation program, I am convinced, will come to be viewed as one of the most historically significant contributions to world peace and stability in this half-century. Having promoted nuclear power around the globe for two decades, the United States could not ask other countries to refrain from further commitment to plutonium unless we ourselves submitted to the same restraints.

As many of you know, the struggle over cancellation of Clinch River goes on. Elements of Congress—courted by an intense industry lobby acting in its narrowest economic self-interest—continue to support both Clinch River and the Barnwell reprocessing plant. The President deserves the support of all of us in seeing to it that these dangerous and unnecessary projects are halted. The case for their cancellation has been strengthened further by the work of a group of energy experts at Princeton. They recently testified before the Joint Economic Committee of Congress that efficient use of uranium would mean nuclear fuel reprocessing would not be economical until the middle of the next century, and that breeder reactors would not be economical until 100 years from now.

Today, there may seem to be considerable momentum abroad behind the plutonium economy. But there is also the swifter motion of public opinion, increasingly aware of the hazards of a nuclearized world. The nuclear industry will be making a dreadful mistake if it continues to promote a vision of technology triumphant over public prudence. If that is the future, the current nuclear recession will give way to nuclear extinction—an extinction of an industry which will, if it comes to a choice, be preferred to the extinction of the common peace.

Given these problems—and others—of coal and nuclear, and our dwindling supplies of oil and gas, it's not surprising that all of us are turning again to examine the prospects for solar energy. The key questions are: does solar have to potential to become a major energy source? And, if so, how soon?

The first test should be environmental and social acceptability, and solar certainly passes this test. While not completely free of adverse environmental effects, solar technologies will have a much smaller impact than conventional hard technologies. Solar poses little risk to climate, and creates little direct air pollution, no radiation hazards, and no risk of nuclear weapons proliferation.

It offers important economic advantages: as the acknowledged leader in many forms of solar technology, the United States could develop an important export market here—at a time when our continuing trade deficit has led to the decline of the dollar abroad. Further, solar could make a substantial dent in our nagging unemployment problem: preliminary data to be published this summer indicate that capital investment in solar heating systems will generate between 2 to 5 times as many jobs as the same expenditure for central station electric power plants.

Solar differs from other energy sources in its utter democracy: it fall on all of us. Hence it is not subject to embargoes. Its potential is immense: in principle, with an average collection efficiency of only 15 percent—an efficiency we could achieve with present technologies—we could meet all of our current energy needs by using roughly one percent of our land area. One way of putting this figure into perspective is to realize that approximately 17 percent of our land area is now devoted to crops. On a less theoretical level, a recent study for the Department of Energy concludes that from the standpoint of resource availability and technology, it should be possible for California to operate in the year 2025 almost entirely on solar energy, even with major increases in population and per capita income.

Thus, the potential is there: solar can be a leading source of U.S. energy supply, not just a supplement. Indeed, from the standpoint of technology and resources, there appears to be no reason why solar energy cannot meet most of our needs.

The only remaining questions are those of time and money; how soon will solar energy in its various forms be economically feasible? Last fall, puzzled by the consistently grim predictions of some people and the seemingly excessive optimism of others, the Council on Environmental Quality undertook its own analysis of solar energy. We conducted an extensive literature review and held discussions with numerous solar experts inside and outside of government. Three weeks ago, we published our report.

We reach three basic conclusions in our report:

First, solar energy is already a serious option with some applications at or near commercial feasibility. Moreover, because rapid progress in solar economics is expected to continue, and the price of competing fuels is expected to rise, we can make competitive during the coming decade a variety of solar technologies for the production of heat, electricity and liquid fuels.

Second, if we today make a strong national commitment both to accelerated solar energy use and to energy conservation, it should be possible to meet a significant portion—we estimate a quarter—of U.S. energy needs through solar by the year 2000.

And third, for the period 2020 and beyond, we believe it is now possible to speak unblushingly of our country's becoming a solar society—a society, that is, in which solar is not a supplementary source of energy, but the primary source of energy. A national goal of providing significantly more than half of our energy from solar sources by the year 2020 is, in our view, realistic—provided that our commitment to that goal and to energy conservation is strong.

Our conclusions, then, are optimistic. While there are significant economic and institutional barriers still to be crossed, the prospects for solar energy are brighter than most imagine. Consider the following:

Solar collectors can now produce hot water at costs competitive with electric water heaters, and the use of solar for heating homes and buildings is expected to be widely competitive by 1985.

Photovoltaics (or "solar") cells, which produce electricity directly from sunlight and have powered satellites, were 50 times more expensive a few years ago than they are today. If photovoltaics continue to drop in price as the Department of Energy expects, they could become a major source of new electrical generating capacity in the 1990's.

Biomass—which includes forest, crop and animal residues as well as crops grown for their energy content—can be burned directly or converted to a full range of storable liquid or gaseous fuels, such as methane and alcohol. With appropriate government support, fuels from biomass can be economical on a large scale by the century's end.

Small-scale hydroelectric and wind systems are already a practical reality. Recent government studies indicate that with rapid development these two sources could provide more than ten percent of the Nation's electrical energy demand by the year 2000.

With all this possibility, where then do we go from here? There is obviously much to be done, but let me suggest two fronts on which we must move ahead rapidly.

First, it is very important to solar's future that Congress speed enactment of the National Energy Act. President Carter's National Energy Plan, submitted to Congress a year ago, was the first major national commitment to conservation and to renewable energy. It contains several provisions that will accelerate solar development, including:

An income tax credit for those who want to install solar in their homes;

Authority for the federal government to spend $100 million in purchasing solar equipment for its own use; and

Measures to make the competing fuels such as oil and natural gas more nearly reflect the costs of replacing them—their true cost to society.

Enactment of the solar tax credit would substantially expand the federal government's financial commitment to solar energy: it is estimated that in 1979, $100 million that the federal government would otherwise receive in taxes, would go to help finance solar facilities.

Enactment of the Administration's energy proposals would also help reduce an important barrier to the use of solar energy: the artificially low pricing of competing fuels.

In his National Energy Plan President Carter stressed as one of 10 basic principles this statement:

"Prices should generally reflect the true replacement cost of energy. We are only cheating ourselves if we make energy artificially cheap and use more than we can really afford."

Oil and gas, coal and nuclear are subsidized in varying degrees through price controls, through large tax breaks for utilities, and through unpaid environmental, health and national security costs. These factors have not only led to excessive energy use—they also discriminate directly against solar energy.

We must also move on a different front—one made possible by President Carter's action May 3 establishing a comprehensive cabinet-level review of the federal government's solar program. In his Golden, Colorado speech the President endorsed a solar future and called for a cooperative national effort to hasten its arrival. He directed that an additional $100 million in the Department of Energy budget be allocated to solar R&D. This action and the solar tax credits bring the President's 1979 solar budget up to $600 million, an increase of 50 percent over 1978. And to accelerate the federal solar effort, the President issued this directive:

"Today I am ordering a Domestic Policy Review by Cabinet departments and agencies, to begin work on development of a national solar strategy. Secretary Schlesinger will head this Cabinet-level Solar Policy Review. The job of this Committee will be to develop an over-all solar strategy for speeding the use of solar technologies—both by new programs and by improving existing federal programs.

"I am asking for the Committee's recommendations by September 1, to help me make my budget and legislative recommendations next fall."

This review—in which the public will be included—should be a major step in implementing the goals to which we are here today to lend our strong support.

In conclusion, let us note that the shift to large-scale reliance on solar energy will be demanding, and will not be easy. Nevertheless, if we commit our wills as well as our resources to the effort, the United States can probably become a solar society within the lifetimes of today's children. A solar world—with its promise of safe, infinitely sustainable energy—may be the most important gift this generation can leave behind us for the future.

Mr. HART. Mr. President, I yield to the Senator from Colorado to take up an amendment.

Mr. HASKELL. Mr. President, I thank my colleague very much.

The PRESIDING OFFICER. Does the Chair understand correctly that the Senator has yielded for the purpose of a colloquy?

Mr. HASKELL. Mr. President, the Senator has yielded to me, I assume, for the purpose of putting forth my amendment to the Senator's amendment. Is that correct?

Mr. HART. The Senator is correct.

Mr. HANSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. There is no control of the time. There is no time on the amendment, so the Senator can only yield for a question.

Mr. HART. I yield the floor.

● Mr. HATHAWAY. Mr. President, I am pleased to cosponsor this amendment because I have great sympathy for the financial burden of installing many of these new energy saving devices. There is an economic gamble in many of these investments. We should provide tax incentives for these investments.

I believe that the credits for solar property, for wood and peat burning stoves and for replacement oil burners and furnaces are essential items to assist in a shift from imported heating oil to alternative energy property and to more efficient utilization of the oil products which cannot presently be substituted.

I am delighted that the Senate has moved forward with some of these important and worthwhile residential credits for alternative energy property. We are beginning to fulfill the commitment which President Carter made to the American people when he submitted to the Congress his national energy plan.●

The PRESIDING OFFICER. The senior Senator from Colorado is recognized.

Mr. GRAVEL. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GRAVEL. I understand that he will have an amendment to the amendment of the junior Senator from Colorado. Would other amendments to the amendment of the junior Senator from Colorado be in order?

The PRESIDING OFFICER. They would be in order after the disposition of the Haskell amendment to portions of the Hart amendment not touched by the Haskell amendment.

Mr. HANSEN. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HANSEN. Mr. President, I am a little confused as to what the situation is. It is my understanding of the rules of the Senate that a speaker could hold the floor and would be permitted to yield for questions. Though I agree with the statement made by my good friend from Illinois, it hardly seemed to me that it conformed to what I understood would be the procedure that would be followed here. I raise the question because, not many days ago, I was on the floor and I think in a somewhat similar position to that of the Senator from Colorado, and the question was raised—it may have been raised by the majority leader, I do not recall. Anyway, it was raised and there were calls for regular order. The point was made that you cannot yield your time on this; that you can yield for a question.

The PRESIDING OFFICER. The Senator makes his point well and the Chair has reiterated that point just a moment ago, to state that the floor can only be yielded for a question.

Mr. HANSEN. I understood the Senator was going to offer an amendment.

The PRESIDING OFFICER. The junior Senator from Colorado (Mr. HART) has given up the floor and the senior Senator from Colorado (Mr. HASKELL) has been recognized.

Mr. HEINZ. Mr. President, I seek recognition from the Chair.

Mr. HASKELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado has the floor.

Mr. HASKELL. I yield to my colleague for a comment.

Mr. HART. Mr. President, there is no intention on the part of the sponsor of this measure to allocate time. I had a list here of Senators who asked me to yield to them. That is all I was doing to accommodate their wishes. I do not choose to hold the floor. There is nothing devious at all here. The Senator from Colorado is on the list.

Mr. HANSEN. I did not mean to imply any deviousness on the part of my friend from Colorado. It was a questioning of the procedure under which we seem to be operating.

The PRESIDING OFFICER. Let the Chair reiterate once again that the Chair has stated the very point the Senator from Wyoming is making. The Senator from Colorado now has the floor and it is understood is preparing to propose an amendment.

Mr. HASKELL. The Chair is correct.

Mr. President, if I can, I yield to the Senator from New Hampshire.

Mr. McINTYRE. Mr. President, I ask unanimous consent that Robin Carpenter of Senator McGOVERN's staff be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. Mr. President, I make the same request for Martin Zeller of my staff and Rob Liberatore.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROOKE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BROOKE. Mr. President, is there a time agreement on the Hart amendment?

The PRESIDING OFFICER. There is no time agreement on the Hart amendment.

Mr. BROOKE. If there is no time agreement, is not the amendment then open to debate?

The PRESIDING OFFICER. The Senator is correct.

Mr. BROOKE. Well, can a Senator make a statement or talk in support or even in opposition to the Hart amendment without even having to respond to a question from the Senator from Colorado?

The PRESIDING OFFICER. A Senator gaining recognition can speak for or against the amendment at length.

Mr. BROOKE. Well, the Senator from Colorado can yield to the Senator from Massachusetts or a Senator from any other State?

The PRESIDING OFFICER. For a question only, and if the point is raised when he has yielded otherwise, then the point will be well taken and the Chair would rule that he could not yield for that purpose.

Mr. BROOKE. The purpose I rise for is to find out if I could make a statement in support of the Hart amendment at any time during debate.

The PRESIDING OFFICER. If the Senator obtains recognition, he will be privileged to do so.

Mr. BROOKE. And it will not have to be granted by the Senator from Colorado?

The PRESIDING OFFICER. That is absolutely correct.

Mr. BROOKE. I thank the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

UP AMENDMENT NO. 1725

(Purpose: To amend an amendment by Senator HART providing for tax credits for solar energy systems to include coverage of the credits to passive solar systems)

Mr. HASKELL. Mr. President, I send to the desk an amendment to the pending amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. HASKELL) proposes an unprinted amendment numbered 1725 to the Hart unprinted amendment numbered 1724.

Mr. HASKELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, lines 11, 12, and 13, strike all after "medium".

On page 9, lines 11, 12, and 13, strike section (i) and insert in lieu thereof the following:

"(i) uses solar energy, by means of an active solar system or a passive solar system, or a combination thereof, to heat or cool such dwelling or to provide hot water for use within such dwelling, or to provide electricity."

Mr. HASKELL. Mr. President, I compliment my distinguished colleague and his cosponsors for bringing this amendment to the floor of the U.S. Senate at this time.

I will just briefly explain the amendment which I propose to my distinguished colleague's amendment.

Basically, it would permit the credits for solar energy property to be available for passive as well as active solar systems. In the Senate Finance Committee, the original solar credit was proposed only for active systems. The Finance Committee, at my urging, expanded the definition of solar energy property to specifically include passive as well as active solar systems.

Mr. President, the so-called passive system has actually proved in many instances to be more cost effective than active systems and comprises a very large segment of the solar industry.

I hope that my distinguished colleague and the floor manager of the bill will see fit to accept this amendment.

I will briefly read from a letter which I wrote to the House and Senate energy tax conferees in July of this year.

The Senate conference report specifically states that the credit is eligible for both "'passive solar systems' as well as 'active solar systems'." Not to include passive systems which are often more cost-effective than active systems would be extremely detrimental to the commercialization of solar energy. The Solar Heating and Cooling Demonstration Act of 1974, administered by HUD, has already funded a number of passive and mixed passive and active systems.

Mr. President, I believe that this amendment would expand the credit to include most forms of residential solar energy. Indeed, I would endorse the statement of the distinguished Senator from Illinois, and also, although I was not on the floor, the statement of my distinguished colleague (Mr. HART), that leaving this business of credits up in the air has had a very adverse effect on the solar industry. As has been stated by others, we should do everything in this country that we possibly can to transfer as much of our energy resources as possible to solar systems. Indeed, the President of the United States, as the Senator from Illinois said, in April of last year, said the same thing.

So without further ado, I would be available for questioning.

Mr. PROXMIRE. Will the Senator yield for a question?

Mr. HASKELL. Yes.

Mr. PROXMIRE. Mr. President, as I understand it, the basic amendment offered by Senator HART——

The PRESIDING OFFICER. Does the Senator from Wisconsin seek recognition?

Mr. PROXMIRE. I am asking a question of the senior Senator from Colorado.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. As I understand the amendment by the junior Senator from Colorado, it is an amendment which would put into effect a provision that already passed the Senate and the House, is that right?

Mr. HASKELL. Not exactly.

Mr. PROXMIRE. Well, pretty much?

Mr. HASKELL. The amendment of my colleague, as amended by my proposed amendment, would put through a provision that previously has been passed.

Mr. PROXMIRE. That was my question. Has the amendment offered by the senior Senator from Colorado to the junior Senator from Colorado's proposal, has that passed the House and the Senate?

Mr. HASKELL. It has passed—

Mr. PROXMIRE. The passive solar systems included in this?

Mr. HASKELL. It has passed the Senate, not the House.

Mr. PROXMIRE. I see.

Mr. HART. Will the Senator yield?

Mr. PROXMIRE. On that point, let me in revenue lost by expanding this to inask the distinguished Senator if he can tell us if there is a substantial difference clude passive solar systems and, if so, what it is?

Mr. HASKELL. I will have to ask the joint committee staff in a moment.

Let me say this to the distinguished Senator from Wisconsin——

Mr. LONG. I can answer the question.

Mr. HASKELL. If I could yield——

Mr. LONG. It does not involve any significant revenue loss.

Mr. PROXMIRE. I thank the Senator.

Mr. HART. Will the Senator yield for a question?

Mr. HASKELL. I certainly will.

Mr. HART. To clarify the language.

It is the Senator from Colorado's understanding that the occasion for the amending language being offered now was a Treasury Department interpretation of the bill which passed the Senate, which said that as written the credits would not apply to passive systems and, therefore, the language being offered by my colleague is to accommodate that interpretation by the Treasury Department and clarify the language that it was, in fact, our intent to expand the credits to passive systems.

Mr. HASKELL. My colleague is correct.

Let me say that the Treasury opposed, in the Finance Committee, including both passive and active systems, and after we got the bill through the Finance Committee and the Senate, the Treasury Department continued to take the same view that the bill did not include passive systems. But the report of the Senate Finance Committee, as I quoted before, specifically states that the credit, which I said to the Senator from Wisconsin, which passed the Finance Committee and passed on the floor of the Senate, is eligible for both passive as well as active systems. That is a quote from the Senate Finance Committee report.

So, although my colleague is correct as to the Treasury stated position, I think they are dead wrong.

Mr. PROXMIRE. If the Senator will yield for a question, is the Senator saying that the Treasury would oppose his amendment?

Mr. HASKELL. I am sure the Treasury would oppose my amendment.

Mr. PROXMIRE. The distinguished chairman of the committee argues that there is not much revenue loss. On what basis would the Treasury oppose this amendment?

Mr. HASKELL. That I do not know.

Mr. PROXMIRE. I thank the Senator.

Mr. HASKELL. I hope my colleague and the distinguished manager of the bill could accept this amendment.

Mr. HART. Mr. President, for the reason stated, my colleague from Colorado has offered a very helpful and constructive amendment. It was as a result of the language the Senate passed and which we incorporated in our amendment that the question was left open as to whether past assistance would qualify. I think the language being offered to my amendment clarifies that question and is beneficial and helpful.

It is my understanding that the floor manager is correct, that there is no substantial increase in lost revenues. Like my colleague, I cannot account for the Department's position on the matter. As the Senator from Wisconsin knows, there is confusion in the administration on some of these issues.

I hope the amendment will be adopted.

Mr. THURMOND. Mr. President, I rise today to announce my strong support for this amendment to H.R. 112, by Senator HART, other Senators and myself, providing for solar energy and conservation tax credits. These very important tax credits have been locked up in conference on H.R. 5263, the energy tax bill, for the past year. I feel it is important that we act on these tax credits, which have been agreed to by the conferees, as soon as possible.

Mr. President, congressional inaction on this matter is having a very detrimental effect on our Nation's fledgling solar industry. Consumers who were considering installation of solar heaters in their homes have not done so in large part because these tax credits have not been enacted into law. Consumers must know that these tax credits are a fact that they can depend on when they file their next tax returns before they will take any action.

Solar energy is simple, efficient, abundant, and environmentally safe. As we look to the future energy needs of our Nation, and as we seek solutions to our immediate long-range energy problems, we would be foolish not to act as expeditiously as possible to encourage the American consumer to utilize solar energy and to support the development of a thriving solar industry.

Mr. President, I strongly urge my distinguished colleagues to support this amendment, of which I am a cosponsor.

I am confident it is in the best interests of this country that we proceed expeditiously.

Mr. DECONCINI. Mr. President in considering the Energy Tax Act of 1977, the Senate included provisions for residential energy credits. These tax credits will help bring the costs of insulation, solar equipment, and other important energy savings components within reach for most homeowners.

Almost 25 percent of our domestic energy resources is consumed in heating and cooling residences. Yet, under present law, no special tax credit or deduction is allowed for installing insulation or other energy-conserving components in, or on, a taxpayer's residence.

Ironically, those who need insulation, or an energy-saving device the most, are those least able to pay for it. It has been estimated that 43 percent of those below the poverty line live in houses with little or no insulation.

There can be no doubt that a long delay in making these tax credits available will not only negate the potential energy savings, but contribute to the decline of a developing solar energy industry. It would severely limit technological advancement and destroy much of the potential for short range renewable resource utilization.

Mr. President, the amendment I am

cosponsoring offers the basic provisions of the energy tax bill dealing with residential energy credits as it was passed by the Senate. It is my understanding that the changes incorporated in this amendment are consistent with the compromises tentatively agreed to by the House and Senate conferees. It is also my understanding that an identical amendment will be offered in the House. And while I prefer the provisions originally passed by the Senate, I find the compromise represented by this amendment to be acceptable. Failure to act now could, quite simply, be self-defeating.

I urge my colleagues to consider this need to expedite the implementation of the energy tax credit and to support the adoption of this amendment.

Mr. President, I ask unanimous consent that Jim Magner, of my staff, have the privilege of the floor during the debate and vote on this issue.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, I support the amendment. I sponsored a similar amendment a year and a half ago, but my amendment was tabled.

I might note that the Senator from Colorado and the Senator from New Hampshire voted to table my amendment a year and a half ago.

I thought it might have been a good idea to try to insulate homes in the summertime, when you can have the windows open and the doors open and put insulation on. I compliment them for getting on with it while it is still August. We could have waited longer.

Senators might enjoy knowing the rationale for voting to table my amendment, which was voted upon on April 28, 1977.

This is what the record vote analysis contains:

Those favoring the motion to table contended:

It would be better to wait for the President's energy package (being sent up next week) which will contain its own insulation credit, a credit which will probably be stronger than the one offered in this amendment.

Those opposing the motion to table contended:

By adding insulation, we could save at least 30 percent of the energy which goes to heat our homes.

The President has urged prompt action in insulating homes, and the time to start is now, during the warm months.

There are significant financial incentives in insulation. American industry will be required to expand and create more jobs to carry out this program.

I might note, parenthetically, that one of the problems that we knew about last year, and which I suspect is still very real, is the inability of industry to supply a sufficient quantity of insulation material. I think we may be in a little better shape now than we were last year. The point was made that if we were to make this tax credit available, there would be such a demand for insulation as to result in the price going sky high.

I could infer—though perhaps I would be taking liberties—that the action we see here today must suggest that the President's energy package, the tax part of that package, to which sometims he has referred as being the centerpiece of his whole energy program, is not going to pass. I will not ask my friends from Colorado and New Hampshire if that is their conclusion. I simply join them in taking the action that I regret very much we did not take a year and a half ago.

Mr. McINTYRE. Mr. President, many of us, as we sort of regretfully expect the distinguished Senator from Wyoming to be leaving these halls, are only now becoming more and more aware of his great foresightedness and his great talent. I only wish I had been as wise as he back in those days when he offered that very good amendment that I voted to table.

Mr. BROOKE. Mr. President, first, I congratulate the distinguished Senator from Colorado (Mr. (HART), the distinguished Senator from New Hampshire (Mr. McINTYRE), and the distinguished Senator from Illinois (Mr. PERCY) for sponsoring this amendment, the solar insulation tax credit.

By enacting the solar and conservation tax credit, in my opinion, the Senate would be acknowledging what the rest of the world knows to be a reality.

The realities are, one, that the crude oil equalization tax proposed by the President is not the same tax as the one in the House- or the Senate-passed energy tax bill; two, that these distorted and ill-conceived bills, fortunately, are dead; and, three, that the newborn solar industry is in desperate, perhaps mortal, trouble. This is because the solar and insulation tax credits, which have universal support, were dragged down by the other tax proposals.

Since December of 1975, I have been trying to get conservation tax credits passed as separate legislation. Each year, my efforts were defeated, because we were told that the taxes had to be part of a package and that there were political considerations, or that the time was not just right.

Mr. President, if the time is not right now, there may never be a right time for the vast majority of producers of solar power equipment. Only a few giant firms will survive further political paralysis and delay. The momentum of movement to commercialize solar power is already faltering. The small business character of the industry is in jeopardy.

These important tax incentives have been held hostage to other legislation for too long. Solar power can and must become a commonplace feature of our energy system. No one knows exactly what proportion of our future energy needs can be met by solar power, but most optimistic projections say that maximum effort can make solar meet 85 percent of energy needs within 50 years.

Thus, we need to commit significant Federal expenditures to invest in promoting commercialization of the industry. The tax credit proposed today would be the first and most visible contribution by the Government toward developing the new sector of our economy. Affirmative action is essential. We cannot depend on business-as-usual to change our energy economy. Shortages, severe dislocation, and shortrun solutions would be our only payoff. We need to guide our energy developments so that we actively choose the economy and the lifestyles of the future.

And it is both exciting and important to realize that an energy supply with a significant solar base is going to involve a very different social system from one entirely dependent on coal or nuclear technologies. Such a system is going to be diverse. It will require individuals and communities to set up and manage part of their energy resources. And it will mean that technology will be used flexibly to meet rapidly changing individual needs and circumstances.

This dream of a heterogeneous, self-renewing resource base owned by many individual users is not, as some would claim, antitechnology or antibusiness. On the contrary, it will require a high level technological genius to invent equipment both sophisticated enough to make power and simple enough to be managed by the individual user. We are far from this breakthrough. And there is no question that central power generation and the building of central facilities will go forward as one part of the entire energy picture. Similarly, countless new industries will grow stronger. But the richness of a diverse economy and the satisfaction of small-scale enterprises will be allowed to flourish. And they are of value in and of themselves. I firmly believe that a good reason for subsidizing solar is not only its potential share of needed resource production, but also the kind of lifestyles its adoption will reinforce. They are values worth planning and paying for.

Mr. President, just now the power of the Sun seems to be infinite. The American people clearly want to follow up on that promise. Congress must not fail them.

It is for that reason that I rise to support this addition, and I ask unanimous consent that I be added as a cosponsor to this amendment if the distinguished Senator from Colorado will yield for that purpose.

Mr. HART. The Senator from Massachusetts is already a cosponsor.

Mr. BROOKE. I wished to be sure.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. HASKELL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HASKELL. What is the pending business, Mr. President?

The PRESIDING OFFICER. The amendment of the senior Senator from Colorado to the amendment of the junior Senator from Colorado is the pending business.

Mr. HASKELL. To clear things up, I move the adoption of my amendment to my colleague's amendment.

The PRESIDING OFFICER. The Senator made a parliamentary inquiry. The Senator from Pennsylvania has the floor.

Mr. HASKELL. Mr. President, will the Senator from Pennsylvania yield merely for the purpose of getting my amendment to my colleague's amendment adopted? Then we are back on my col-

league's amendment and then the Senator will proceed. I simply wish to clear up one step of a parliamentary procedure.

Mr. HEINZ. Mr. President, I do not know that I have seen the Senator's amendment yet.

Mr. HASKELL. It is satisfactory to my colleague and satisfactory to the floor manager.

Mr. HEINZ. Is it satisfactory to Senator HART?

Mr. HASKELL. It is satisfactory to Senator HART and satisfactory to Senator LONG.

So, will the Senator yield for that purpose and get one step out of the way?

Mr. HEINZ. I will yield and ask unanimous consent that I do not lose my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. I thank the distinguished Senator from Pennsylvania.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the senior Senator from Colorado.

The amendment was agreed to.

Mr. HEINZ. Mr. President, I speak today both as a cosponsor of H.R. 112, the bill to reduce the excise tax on foundations before us, and as a cosponsor of Senator HART's amendment on residential energy credits.

Let me say very briefly that I think we all seek as a national goal and as a national priority an energy bill and a balanced energy bill, but the fact is that the President's plan and even the legislation that we passed or that we might get is not going to be very balanced.

The only thing that we can promise the consumers of the country, based on what I have seen brought back to this Chamber or what might come back, are either tax increases or higher prices.

I think the amendment of the Senator from Colorado does something—perhaps it is the exception to the rule—but does something for the consumer. Indeed, this is, I think, the best part of our energy bill, and I hope that my colleagues will join in adopting this amendment which for once, as a piece of our energy package, helps, not hurts, the consumer.

Mr. President, almost 1 year has passed since the Senate completed action on the energy tax portion of the National Energy Act. Unfortunately, in spite of diligent activity by the conferees, opposition to a few controversial segments of the bill will probably prevent the majority of the vital issues from being acted upon. The residential and solar energy credit programs are outstanding examples of widely accepted ideas that are in danger of being ignored because of their association and inclusion with other less popular proposals.

The Hart amendment would insure that tax incentives will be available to persons who employ new technology to take advantage of renewable energy sources or improve the insulation value of their residence to eliminate energy waste. Initial consumer response to the announcement of this proposal last year was very encouraging, and the proposal passed both House and Senate easily. However, as the energy tax provisions became bogged down in the legislative process and the prospects of receiving the proposed tax credits dimmed, interest in tapping this vast energy resource has stalled.

The potential savings of conservation practices by consumers have been demonstrated. The potential use of solar power has been demonstrated. By adopting this amendment we will enable consumers to realize the benefits of the potential that federally funded research has already demonstrated, while the Nation as a whole benefits from less dependence on foreign supplies of traditional energy sources.

The amendment we offer today seeks to incorporate the informal agreements reached by the Conference Committee staff. Individuals would be entitled to a 20-percent tax credit for the cost of qualified energy conservation expenditures up to a total of $2,000 per taxable year. In addition, investments in renewable energy resources would be entitled to a 30-percent tax credit for the first $2,000 of expenditures, plus 20 percent of costs that exceed $2,000 but do not exceed $10,000. These credits would be applicable to any expenditures made on or after April 20, 1977, for equipment installed in or on his principle residence the construction of which was substantially completed before April 20, 1977.

If the Senate fails to take advantage of this opportunity to pass legislation that includes tax incentives for residential energy conservation and renewable energy sources the progress made so far in the field of solar energy technology will be wasted. In the past year, the number of manufacturers of solar thermal collectors has fallen from 186 to 162, a decline of 13 percent, according to a survey taken by Anthony Adler for the Solar Energy Research and Education Foundation. In addition, the total number of medium-temperature and special collectors has declined by 13 percent over the past year. Clearly the initial enthusiasm for these alternative sources of energys has been suspended due to Congress inaction on the issue of tax credits.

In a time in which energy prices are becoming a greater proportion of the average citizen's budget, to ignore the chance to develop alternatives to this expensive energy is irresponsible. An analysis of the potential savings from this proposed program indicates that as much as 1.6 million barrels of oil per day could be saved or replaced by equipment purchased and installed through the incentive program that this amendment would institute.

Mr. President, I urge my colleagues to support our amendment.

The PRESIDING OFFICER. Who seeks recognition?

Mr. GRAVEL addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

UP AMENDMENT NO. 1726

(Purpose: To provide incentives for the use of alternative energy sources, and other purposes)

Mr. GRAVEL. Mr. President, I send to the desk an amendment to the amendment of the Senator from Colorado and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. GRAVEL) proposes an unprinted amendment numbered 1726.

Mr. GRAVEL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page —, line —, insert the following: at the end of the amendment add the following new sections:

ADDITIONAL PERCENTAGE FOR INVESTMENT CREDIT WITH RESPECT TO CERTAIN ENERGY PROPERTY

(a) IN GENERAL.—Subpart B of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting immediately after section 46 the following new section:

"SEC. 46A. SPECIAL RULES RELATING TO CERTAIN ENERGY PROPERTY.

"(a) IN GENERAL.—In addition to the amount which is determined under section 46(a)(2), the amount of the credit allowed by section 38 for the taxable year determined under section 46(a)(1)(B) with respect to energy property shall include an amount equal to 10 percent of the qualified investment (as determined under section 46 (c) and (d)) in section 38 property which is, (or, for the purpose of applying section 46(d), will be) energy property.

"(b) DEFINITIONS.—For purposes of this section—

"(1) ENERGY PROPERTY.—The term 'energy property' means property—

"(A) which is—

"(i) cogeneration equipment installed in connection with an existing facility, but only to the extent that the cogeneration energy capacity of such facility is expanded,

"(ii) recycling equipment,

"(iii) shale oil equipment,

"(iv) geopressurized methane gas equipment, or

"(v) equipment for the application of heat by electricity generated by the use of an alternate substance (including other on-site property necessary to effect process changes for the use of such equipment) which will use neither oil nor natural gas, and which will replace equipment used in an existing industrial facility which uses oil or natural gas as a fuel,

"(B) which is an integral part of, or used in connection with, a building or other structure located in the United States,

"(C)(i) the construction, reconstruction, or erection of which is completed by the taxpayer after April 19, 1977, or

"(ii) which is acquired after April 19, 1977, if the original use of such property commences with the taxpayer and commences after such date, and

"(D) which has a useful life of 3 years or more.

"(2) CERTAIN TRANSPORTATION EQUIPMENT TREATED AS ENERGY PROPERTY.—A commuter van (as defined in section 46(c)(6)(B)), and equipment designed to reduce energy consumption added to existing motor vehicles primarily engaged in the commercial transportation of property, shall be treated as energy property. An electric motor vehicle used in the taxpayer's trade or business shall be treated as energy property.

"(3) COGENERATION EQUIPMENT.—The term 'cogeneration equipment' means equipment which—

"(A) produces steam, heat, or other forms of useful energy (other than electric energy) to be used for industrial (including water purification or desalinization), agricultural, commercial, or space heating purposes, and

"(B) also produces electric energy.

"(4) RECYCLING EQUIPMENT.—The term 'recycling equipment' means any equipment which is used exclusively in the recycling of solid waste (including not more than a nominal amount of virgin materials) or to sort and prepare such solid waste for recycling, and any equipment used in the conversion of solid waste into a fuel or into useful energy such as steam, electricity, or hot water.

"(5) SHALE OIL EQUIPMENT.—The term 'shale oil equipment' means equipment which is used to extract oil from oil-bearing shale rock.

"(6) GEOPRESSURIZED METHANE GAS EQUIPMENT.—The term 'geopressurized methane gas equipment' means equipment which is used to extract geopressurized methane gas (as defined in section 44G(d)(1)).

"(7) EXISTING.—The term 'existing' has the same meaning as in paragraph (4) of section 44F(b).

"(8) ALTERNATE SUBSTANCE.—The term 'alternate substance' means any substance other than—

"(i) oil and natural gas, and

"(ii) any product of oil and natural gas.

"(9) EQUIPMENT MUST MEET CERTAIN STANDARDS OF QUALITY.—Equipment qualifies under paragraph (1)(A) (i) or (ii) or paragraph (2) only if it meets the performance and quality standards (if any) which—

"(A) have been prescribed by the Secretary by regulations (after consultation with the Secretary of Energy), and

"(B) are in effect at the time of acquisition of the property.

"(10) SPECIAL RULE FOR PROPERTY FINANCED BY INDUSTRIAL DEVELOPMENT BONDS.—In the case of property which is financed in whole or in part by the proceeds of an industrial development bond (within the meaning of section 103(b)(2)) the interest on which is exempt from tax under section 103, '5 percent' shall be substituted for '10 percent' in subsection (a).

"(c) SPECIAL RULES.—

"(1) CERTAIN SECTION 48 RULES WAIVED.—For purposes of this section, the rules contained in section 48(a)(3) (relating to property used for lodging) shall be disregarded and the words 'its structural components' contained in section 48(a)(1)(B) shall be disregarded.

"(2) APPLICATION WITH SECTION 44F.—Property described in section 44F shall not be treated as property described in this section.

"(3) QUALIFIED INVESTMENT.—For the purpose of determining the taxpayer's qualified investment, the applicable percentage (for purposes of section 46(c)(1)) shall be 100 percent (without regard to the actual useful life of the item).

"(4) RECAPTURE RULES.—For the purpose of applying section 47 to energy property, a disposition of such property, or the conversion of such property into property which is not energy property, which occurs before the property has been in service for half its useful life shall be treated as having occurred before the close of the third year after the property was placed in service.

"(b) ALLOWANCE OF REGULAR PERCENTAGE FOR BUSINESS INSULATION PROPERTY.—Subsection (a) section 48 (defining section 38 property) is amended by adding at the end thereof the following new paragraph:

"(10) BUSINESS INSULATION PROPERTY.—For the period beginning on April 20, 1977, and ending on December 31, 1985, insulation shall be treated as meeting the requirements of paragraph (1) and paragraph (3) shall not apply to insulation. For purposes of the preceding sentence, the term 'insulation' means any item—

"(A) which is specifically and primarily designed to reduce when installed in or on an existing industrial or commercial building or existing industrial or commercial facility the heat loss or gain of such building or facility,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years,

"(D) which meets the performance and quality standards (if any) which—

"(i) have been prescribed by the Secretary by regulations (after consultation with the Secretary of Energy), and

"(ii) are in effect at the time of the acquisition of the item, and

"(E) would not, but for this paragraph, be section 38 property.

For purposes of this paragraph, a building or facility will be treated as existing if it was placed in service before April 20, 1977.".

(c) CLERICAL AMENDMENT.—The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting immediately after the item relating to section 46 the following new item:

"Sec. 46A. Special rules relating to certain energy property.".

(d) EFFECTIVE DATES.—The amendments made by this section shall apply to—

(1) property to which section 46(d) of the Internal Revenue Code of 1954 does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer after April 19, 1977, but only to the extent of the basis thereof attributable to the construction, reconstruction, or erection after such date and before January 1, 1986.

(2) property to which section 46(d) of such Code does not apply, acquired by the taxpayer after April 19, 1977, and before January 1, 1986, and placed in service by the taxpayer before January 1, 1986, and

(3) property to which section 46(d) of such Code applies, but only to the extent of the qualified investment (as determined under subsection (c) and (d) of section 46 of such Code) with respect to qualified progress expenditures made after April 19, 1977, and before January 1, 1986.

SEC. 1033. PAYMENT IN LIEU OF CREDIT TO TAX EXEMPT ORGANIZATIONS.

(a) IN GENERAL.—In the case of a State or any political subdivision thereof, and in the case of any organization described in section 501(c)(3) of the Internal Revenue Code of 1954, or any electric utility cooperative described in section 501(c)(12), which is exempt from tax under section 501(a) of such Code for the taxable year, the Secretary of the Treasury shall pay to each such government, subdivision, or organization which files a claim during the calendar year in the form, manner, and at the time prescribed by the Secretary by regulations, an amount determined under subsection (b). Such payment shall be made as soon as possible after the receipt of such claim.

(b) AMOUNT OF PAYMENT.—The amount payable to a State, subdivision, or organization (hereinafter referred to as a "tax exempt entity") under subsection (a) for the calendar year shall be equal to the amount of credit which such tax exempt entity would, if it were liable for tax under chapter 1 of such Code, be allowed under section 44F of such Code with respect to its investment in alternative energy property and specially defined energy property and if such property were used in a trade or business.

(c) REPAYMENT.—If an entity which receives a payment under subsection (a) takes any action which would result in an increase of its tax under subpart B of part IV of subchapter A of chapter 1 of such Code if such entity were liable for tax under this chapter, then such entity shall be liable to the Secretary for an amount equal to the increased amount of tax which would be imposed under such subpart and such amount shall be collected as if it were the underpayment of a tax imposed under such chapter 1.

(d) TREATMENT AS OVERPAYMENT OF TAX.—For purposes of any law of the United States, including section 101 of the Treasury Department Appropriation Act of 1950 and title I of the Supplemental Treausry and Post Office Departments Appropriation Act, 1949, any payment made under this section shall be considered to be a refund of any overpayment of the tax imposed under chapter 1 of the Internal Revenue Code of 1954.

"(2) facilities for the on-site transportation, handling, storage, or treatment of coal, other raw materials, supplies, or any other materials in any preparatory process for the coal gasification or liquefaction process,

"(3) facilities for the on-site economic recovery, recycling, handling, storage, treatment, or utilization of byproduct materials or energy generated by the coal gasification or liquefaction process,

"(4) facilities for the on-site handling or transportation, or the increasing of the British thermal unit content per unit of volume, of synthetic gaseous or liquid fuels produced by the coal gasification or liquefaction process, and

"(5) other on-site facilities to the extent that such facilities are functionally related, and subordinate to, any facilities described in paragraphs (1) through (4).

For purposes of this section, the term 'synthetic gaseous or liquid fuels' means any gaseous or liquid product of a coal gasification or liquefaction process which can be used as a substitute for natural gas or oil regardless of its chemical composition or British themal unit content.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to obligations issued after December 31, 1977.

SEC. 1042. PERCENTAGE DEPLETION FOR PEAT, GEOTHERMAL DEPOSITS, AND GEOPRESSURIZED METHANE GAS.

(a) PEAT.—Section 613(b) (relating to percentage depletion rates) is amended—

(1) by inserting "peat (from deposits in the United States but only if used as a fuel or otherwise used to produce energy)," after "sodium chloride," in paragraph (4) thereof, and

(2) by inserting "(if paragraph (4) does not apply)" after "peat" in paragraph (6) thereof.

(b) GEOTHERMAL DEPOSITS AND GEOPRESSURIZED METHANE GAS.—

(1) APPLICABLE PERCENTAGE.—Section 613(b) (relating to percentage depletion rates) is amended by inserting after paragraph (7) the following new paragraph.

"(8) In the case of geothermal deposits located in the United States or in a possession of the United States, the percentages set forth in section 613a(c)(5) for calendar years shall apply to taxable years beginning in such calendar years, except that 10 percent shall be the applicable percentage for geopressurized methane gas (as defined in section 44G(d)(1)) extracted from brines withdrawn from such deposits."

(2) DEFINITION.—Section 613 (relating to percentage depletion) is amended by adding at the end thereof the following new subsection:

"(e) GEOTHERMAL DEPOSITS.—For purposes of this section, the term 'geothermal deposit' means a geothermal reservoir consisting of natural heat which is stored in rocks or in an aqueous liquid or vapor (whether or not under pressure). Such a deposit shall in no case be treated as a gas well for purposes of

this section or section 613A, and this section shall not apply to a geothermal deposit which is located outside the United States and its possessions."

(3) TECHNICAL AMENDMENTS.—

(A) Paragraph (1) of section 613(c) (defining gross income from the property) is amended by inserting "and other than a geopressurized methane gas well or a geothermal deposit" after "oil or gas well."

(B) Paragraph (1) of section 613(b) is amended—

(i) by inserting "and" at the end of subparagraph (A),

(ii) by striking out "and" at the end of subparagraph (B), and

(iii) by striking out subparagraph (C).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1977.

SEC. 1043. OPTION TO DEDUCT INTANGIBLE DRILLING COSTS IN THE CASE OF GEOTHERMAL DEPOSITS AND GEOPRESSURIZED METHANE GAS.

(a) IN GENERAL.—Subsection (c) of section 263 (relating to intangible drilling and development costs in the case of oil and gas wells) is amended—

(1) by adding at the end thereof the following new sentence: "Such regulations shall also grant the option to deduct as expenses intangible drilling and development costs in the case of wells drilled in the United States (within the meaning of paragraph (1) of section 638), or any possession thereof, for any geothermal deposit (as defined in section 613(e)) or for any geopressurized methane gas (as defined in section 44G(d)(1)) to the same extent and in the manner as such expenses are deductible in the case of oil and gas wells.", and

(2) by amending the subsection heading to read as follows:

"(c) INTANGIBLE DRILLING AND DEVELOPMENT COSTS IN THE CASE OF OIL AND GAS WELLS AND GEOTHERMAL AND GEOPRESSURIZED METHANE GAS WELLS.—".

(b) MINIMUM TAX ON INTANGIBLE DRILLING COSTS IN THE CASE OF GEOTHERMAL AND GEOPRESSURIZED METHANE GAS WELLS.—

(1) Paragraph (11) of section 57(a) (relating to intangible drilling costs) is amended by striking out "oil and gas properties" each place it appears (including in the heading of subparagraph (C)) and inserting in lieu thereof "oil, gas, geopressurized methane gas, and geothermal properties".

(2) Clause (i) of section 57(a)(11)(B) is amended by striking out "oil and gas wells" and inserting in lieu thereof "oil, gas, geopressurized methane gas, and geothermal wells".

(3) Paragraph (11) of section 57(a) is amended by adding at the end thereof the following new subparagraph:

"(D) PARAGRAPH APPLIED SEPARATELY WITH RESPECT TO GEOTHERMAL PROPERTIES, GEOPRESSURIZED METHANE GAS PROPERTIES, AND OIL AND GAS PROPERTIES.—This paragraph shall be applied separately with respect to—

"(i) all oil and gas properties which are not described in clause (ii) or (iii),

"(ii) all properties which are geothermal deposits (as defined in section 613(e)), and

"(iii) all geopressurized methane gas properties.".

(4) Section 614 (relating to the definition of property) is amended by inserting "or geothermal and geopressurized methane gas wells" after "oil and gas wells" each place it appears.

(c) GAIN FROM DISPOSITION OF INTERESTS IN GEOTHERMAL OR GEOPRESSURIZED METHANE GAS WELLS.—

(1) Paragraphs (1) and (2) of section 1254(a) (relating to gain from disposition of interest in oil or gas property) are each amended by striking out "oil or gas property" each place it appears and inserting in lieu thereof "oil, gas, geopressurized methane gas, or geothermal property".

(2) Paragraph (3) of section 1254(a) (defining oil or gas property) is amended to read as follows:

"(3) OIL, GAS, GEOPRESSURIZED METHANE GAS, OR GEOTHERMAL PROPERTY.—The term 'oil, gas, geopressurized methane gas, or geothermal property' means any property (within the meaning of section 614) with respect to which any expenditures described in paragraph (1)(A) are properly chargeable."

(3) The section heading of section 1254 is amended by striking out "OIL OR GAS" and inserting in lieu thereof "OIL, GAS, GEOPRESSURIZED METHANE GAS, OR GEOTHERMAL".

(4) The table of sections for part IV of subchapter P of chapter 1 is amended by striking out "oil or gas" in the item relating to section 1254 and inserting in lieu thereof "oil, gas, geopressurized methane gas, or geothermal".

(5) Subsection (c) of section 751 (relating to unrealized receivables) is amended by striking out "oil and gas property" and inserting in lieu thereof "oil, gas, geopressurized methane gas, or geothermal property".

(d) APPLICATION OF AT RISK RULES TO GEOTHERMAL DEPOSITS AND GEOPRESSURIZED METHANE GAS.—

(1) Paragraph (1) of section 465(c) (defining activities to which at risk rules apply) is amended by striking out "or" at the end of subparagraph (C) and by inserting after subparagraph (D) the following new subparagraphs:

"(E) exploring for, or exploiting, geothermal deposits (as defined in section 613(e)), or

"(F) exploring for, or exploiting, geopressurized methane gas (as defined in section 44G(d)(1))".

(2) Paragraph (2) of section 465(c) is amended by striking out "or" at the end of subparagraph (C) and by inserting after subparagraph (D) the following new subparagraphs:

"(E) geothermal property (as determined under section 614), or

"(F) geopressurized methnane gas property (as determined under section 614),".

(e) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply with respect to wells commenced on or after April 20, 1977, in taxable years ending on or after such date.

(2) ELECTION.—The taxpayer may elect to capitalize or deduct any costs to which section 263(c) of the Internal Revenue Code of 1954 applies by reason of the amendments made by this section. Any such election shall be made before the expiration of the time for filing claim for credit or refund of any overpayment of tax imposed by chapter 1 of such Code with respect to the taxpayer's first taxable year to which the amendments made by this section apply and for which he pays or incurs costs to which such section 263(c) applies by reason of the amendments made by this section. Any election under this paragraph may be changed or revoked at any time before the expiration of the time referred to in the preceding sentence, but after the expiration of such time such election may not be changed or revoked.

SEC. 1058. DUTY ON BUILDING INSULATION MATERIALS AND RELATED MATERIALS.

(a) IN GENERAL.—Subpart B of part 1 of the Appendix to the Tariff Schedule of the U.S. (19 U.S.C. 1202) is amended by inserting immediately after item 911.16 the following new items:

" 911.17	Glass fibers in bulk: glass fibers in the form of mats, batts, blankets, felts, pads casings and boards, all the foregoing, of a density not over 25 lbs. per-cubic-foot, whether or no coded, impregnated or bonded with glue, plastics, or other substances or lines, backed or supported with paper, paper board, fabrics, or similar materials, or with metal mesh or foil; glass-fiber filter with or without their frameworks or supports; and article not specifically provided for, of glass fibers (provided for in item 540.71, part 3, schedule 5)	Free	No change	On or before 6/30/79.
911.18	Mineral wool, in bulk or in batts, blankets, or similar forms, whether or not lined, backed, or supported with paper, paper board, or similar materials (provided for in item 522.81, part 1, schedule 5)	Free	No change	On or before 6/30/79.
911.19	Boric Acid (provided for in item 416.10, Subpart B, part II, schedule IV)	Free	No change	On or before 6/30/79. ",

(b) EFFECTIVE DATE.—The amendment made by subsection (a) of this section shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date of enactment of this Act.

SEC. 1060. INJECTION OF WATER TO ENHANCE CRUDE OIL RECOVERY.

Section 8(i)(2) of the Emergency Petroleum Allocation Act of 1973, as amended, is amended by adding the following new sentence at the end thereof: "Included in the count of the total number of wells on a property shall be all wells producing crude oil and all wells utilized for the purpose of injecting water and/or other materials into a producing reservoir for the purpose of enhancing crude oil recovery.".

Mr. GRAVEL. Mr. President, I retract my earlier requests to the Senator from Colorado that we try not to load this bill up. While I was speaking on that, I did not realize that the chairman of the committee had amendments that he was putting on. So far we have added on something for schools, we have added on something for slot machines, and we are doing a good job on energy. I think that is fine.

I only hope that this bill sees it all the way through Congress. We have seen a lot of bills that begin as a Christmas tree and just die.

Some of us feel very deeply about the foundations tax. It is a corrective measure. I hate to see the foundations tax reduction destroyed after the work that has been done. It has passed the House of Representatives. It has passed the committee. Now, obviously, it would pass

the Senate, but by using it as a workhorse it may die of heat prostration in the House.

But, since it is going to be a Christmas tree, I certainly will not stand back and see only a part of the energy package adopted.

The amendment that I have at the desk does exactly what Senator HART's package does, but on another side of the economy. The Finance Committee and the full Senate considered a whole host of matters with respect to energy and we passed them. So what I have done is that I have now taken from the Senate-passed bill the items that Senator HART has not taken up, and am now adding them to his amendment. So what we truly have is exactly the tax bill that passed the Senate with respect to the items I have added, and I will enumerate those items.

One is an additional 10 percent investment tax credit for alternate energy property and payment in lieu of credits for tax-exempt organizations. This goes with respect to recycling equipment, oil shale, nonoil or gas and electric equipment, with a useful life of at least 3 years. This is to give incentives for those items. Additionally there are payments in lieu of tax credits for tax-exempt organizations, such as electric co-ops.

The next item is a depletion allowance for geothermal that would start at 22 percent in 1978 and go down to 15 percent in 1983.

Then we have geopressurized methane, a depletion allowance of 10 percent for that and for peat. In addition to the credit we are going to have for the residential buyer to get a peat stove we are going to have a 10-percent depletion allowance for peat.

Mr. CURTIS. Mr. President, will the distinguished Senator yield for a question?

Mr. GRAVEL. I am happy to yield for a question.

Mr. CURTIS. Is it true that the Senator's amendment will add onto the amendment of the distinguished Senator from Colorado the entire energy tax bill that passed the Senate?

Mr. GRAVEL. I apologize. I did not hear the Senator.

Mr. CURTIS. Do I understand correctly that the Senator's amendment to the amendment of the distinguished Senator from Colorado embodies the entire energy tax bill that passed the Senate at an earlier date?

Mr. GRAVEL. That is exactly correct.

Mr. CURTIS. All of it?

Mr. GRAVEL. And to my knowledge all of this is not in controversy in the conference.

Mr. CURTIS. But it includes all of it.

Mr. GRAVEL. All of it.

Mr. CURTIS. I thank the Senator.

Mr. GRAVEL. All of it.

We sort of spotted areas he picked out and are putting in the remainder.

So if my colleague will yield——

Mr. HART. I would like to clarify that question. My understanding was to the contrary. The sum of the whole of the proposal being offered by the Senator, if it were still in controversy is in the conference and has not been approved; is that correct?

Mr. GRAVEL. No. I have other amendments, and I am having my staff scurry back to my office to get some more. But the amendments I have right here are exactly the pages that we took out of the bill and put onto a covering sheet, and you can go inspect it at the desk.

Mr. HART. The Senate bill in conference?

Mr. GRAVEL. To my knowledge these items are not in controversy in the conference. Let me finish reading them. For example, investment tax credits of 10 percent; depletion allowances for pressurized methane and peat.

The next item is to allow deduction for intangible drilling costs for wells drilled for geothermal and geopressurized methane. This is the same way we deal with oil wells. Why should we give oil an advantage over geothermal?

A further item is to suspend import duties on insulation materials until June 30, 1979. We received adequate testimony that there is a shortage. The impact of this I say to my colleague is $1 million in the Treasury. The committee passed it and it also passed the Senate.

The other item is a water injection enhancement of crude oil recovery. This includes in the number of wells on a property the wells used for water reinjection to enhance crude oil recovery. These are all items that have passed the Senate. These are items that are in conference and, to my knowledge—and I can only say to my knowledge, because I am not on the conference—well, I am on the tax part of the conference, and in the discussions we had in conference this was not the area of controversy.

Mr. HART. Mr. President, will the Senator yield for a question?

Mr. GRAVEL. I would be happy to.

Mr. HART. Were these items in the House-passed version of the bill?

Mr. GRAVEL. I think most of them were of one kind or another. I could not say with any preciseness, but I think the intent—in some cases, we may have been a little more creative in this regard, but I would say a lot of those elements were——

Mr. HART. I think it would be helpful to Senators to clarify that because I think there is also some disagreement and confusion on that. My understanding was that a number of these items were not in the House bill; there is controversy over in the House on them or at least not agreement.

Mr. GRAVEL. I would be happy to let it go overnight and give everybody a chance to reexamine what we are doing.

All I was doing was taking material out of the primary bill that passed the Senate. I do not know whether it passed the House, and if it did not I do not much care—the Senate passed on it, and our committee passed on it, and since we are sending them over one hell of a horse, let them worry about whether or not they like it when it gets there. I think these items are valid.

You have taken some things out of our work in the committee and I am just giving you the rest of what we did.

Mr. HART. Mr. President, will the Senator yield?

Mr. GRAVEL. I would be happy to yield.

Mr. HART. I think there is some logic to the amendment offered by the Senator from Colorado, the Senator from New Hampshire, and so on. This is a discrete package of two basic proposals which are defined primarily because of the element of homeownership and residential consumers.

The alternative energy supplies, particularly solar and the home insulation, obviously what the sponsors of this amendment did not try to do was to take every tax incentive or every provision in the Senate-passed bill or the House-passed bill or in the conference, and load it onto this amendment.

There was a conscious decision on the part of a number of Senators on both sides of the aisle and, particularly, those who were concerned about solar energy, to provide an opportunity for the Senate and the House to break those particular small portions of that bill out and give us a chance, to which the majority of both the Houses agree, to indicate to the American people and our constituents that we were now prepared to move on these noncontroversial items.

The Senator from Alaska, of course, is vastly expanding that step. To include, in my judgment at least, a number of controversial items, which may be objectionable to the House, and substantially change the character of the amendment before the Senate today. I think this is a very important distinction to make because it is not just a question of whether we have started down the path to breaking up the entire energy tax bill. I believe we have a chance here to pass an amendment to take a major energy step, and I am afraid if we adopt the procedure being suggested by the Senator from Alaska, that chance will evaporate almost instantaneously.

Mr. GRAVEL. Let me say to my colleague if we have a serious chance for passage of these amendments then let us do something for geothermal just as we are doing something in other areas. You are doing something for peat, and I want to do a little more for peat.

Mr. HART. No, the distinction is not the energy source.

Mr. GRAVEL. Let me finish with my colleague. If we have a serious chance to prevail on these amendments, let us do it.

The chairman of the full committee is prepared to accept your amendment and will accept mine. But, I sort of hear you telling me that you will not accept my amendment on your amendment when the chairman is prepared to accept it all. I get a little uptight about the argument the Senator is using in this regard which is, "Well, this is a nice little package that is going to be more acceptable."

I would suggest to my colleague that he is already in company with slot machines. I do not think it will hurt him too much more to be in company with a depletion allowance for geothermal, geopressurized methane, and peat.

So, if the present company does not

bother you, I would hope these fine things would not bother you either.

Mr. HART. Mr. President, will the Senator yield?

Mr. GRAVEL. I would be happy to yield.

Mr. HART. Obviously, the sponsors of the pending amendment had no choice one way or the other about slot machines or anything else. That was an action taken by the chairman on behalf of other Senators.

What I am talking about here are energy tax incentives, and we made a conscious decision in formulating this amendment not to include every possible energy source. It is not a question of doing something for peat and nothing for geothermal. It is a question of what can be done, as I think all of the Senators who sponsor this amendment believe, for the homeowners and the consumers regardless of what energy supply we are talking about, in order to provide those incentives without which the industry is being destroyed.

We do not in this amendment attempt to solve every energy problem. That is going to prove to be an impossibility, and one always has to make a decision about what you think is acceptable and what has a chance of passing. Now, there is a point beyond which, if everything gets put into this amendment, the whole purpose is defeated. That is all I am trying to say.

Mr. GRAVEL. Let me just answer my colleague by saying that I do not have much control either. I am the prime sponsor of this horse, and I was hoping to keep it clean so we can correct the deficiency in the foundation tax.

I am chairman of that subcommittee and I have lost control. I am only, therefore, trying to do exactly what the Senator is trying to do. Thus, I am not very sympathetic to the case he is making that maybe his stuff deserves a little more attention than mine which I think also, deserves a little bit of attention.

So I am very unsympathetic to that. I do not think these items are going to load down the Senator's proposal any more than it deserves to be loaded down. I think the Senator's proposal has merit. I stood on this floor back in 1971 fighting for solar energy and I could not get a cosponsor for it. So I feel very strongly about solar energy and I want to see it happen. But I want to see these other things happen, too.

I come from an oil State and I am here offering an amendment that will give an edge or at least give an equal edge, to other forms of energy. So I think this is a serious endeavor.

I just plead with my colleague, if he thinks his proposal has merit I would hope he would accord me the same courtesies that apparently the distinguished Senator from Louisiana is going to accord him.

And I, too, will accord the Senator courtesy because obviously I would be in a position to insist on a vote, since I am the prime sponsor of this bill. The chairman of the full committee merely exercised his privilege to jump up from there and carry this bill for me. I am not sure yet whether he is helping me or hurting me; I will only know in a month or so. I will leave the verdict out until I know.

But by the same token, I am prepared to say that I have seen the Senator from Louisiana do some interesting things where I have been opposed, and I am prepared to go ahead on his horse and ride it all the way.

I will cosponsor the Senator's amendment. But take the rest of the package, too, because it has equal merit. Not any more, but not any less.

Mr. HART. I think that is a decision for the Senate to make. I would hope we would be able to vote on it.

Mr. GRAVEL. Mr. President, I ask for the yeas and nays.

Mr. HART. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER (Mr. NUNN). Is there a sufficient second for the yeas and nays on the amendment of the Senator from Alaska? There is a sufficient second.

The yeas and nays were ordered.

Mr. HART. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. At this point, it would require unanimous consent to get the yeas and nays on the Hart amendment.

Mr. LONG. I object to that, Mr. President. Let us vote on this one first.

Mr. HART. I did not make the unanimous-consent request, so there is nothing to object to.

Mr. GRAVEL. Mr. President, could I ask the Senator from Louisiana a question?

My question is, if my amendment fails, would you, as manager for the majority, be prepared to accept the amendment without a vote?

Mr. LONG. My reaction is, I have heard a lot of speeches here, and I know why the energy bill has not passed. I have been on that conference a long time. I stayed around here 6 weeks last year after everyone else went home trying to resolve that issue.

That was the last energy bill to pass. Everybody agreed it had more controversy in it than any other bill. It had the crude oil equalization tax in the House part, and that is what is holding up that measure, the crude oil equalization tax. The House does not want to yield on that.

We tried the crude oil tax with every different combination of things we could wrap up with it, to try to come up with something the Senate could agree to, and the House will not yield on it. It is a new experience for me to be on a conference on a bill for a solid year, and I have been here 30 years, but that is something that has to happen sometimes, I guess.

The House is not going to accept this, whether it be the Gravel amendment on the Hart amendment or we take the Hart amendment up separately. The House is not going to yield on it. When they get ready to yield on the crude oil equalization tax, the House will accord with us on all the other things that are in the energy package. But the House is going to want to have their handiwork along with our handiwork. If it would make the Senator feel better to put this on the bill, and feel that thus there might be some additional assurance that if the tax bill fails, perhaps we could put it on as a rider and perhaps the House would feel better about it. I am willing to go along with it, but then I am willing to accept the bill whether it has the Gravel amendment on it or the Hart amendment on it. I will vote for both, as far as I am concerned.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. PROXMIRE. May I ask the Senator if what he is saying is that if the Gravel amendment and the Hart amendment pass, the House, in its judgment, will not accept it, and therefore the foundation bill, which I support and I presume the other Senators do, too, will be the victim?

Mr. LONG. No, I do not think so. I presume when we resolve the energy tax conference, that will settle this issue.

Mr. PROXMIRE. Well, that might be several years.

Mr. LONG. It has got to be resolved this year, for the simple reason that this Congress is going to expire.

Mr. PROXMIRE. So will the bill.

Mr. LONG. Well, it sounds to me like the classic case of Jarndyce against Jarndyce. It dragged on for generations. Finally the matter came to an end, and it was not decided; they simply ran out of court costs. The estate was finally consumed by the litigation over the generations that the case was in court, and finally the thing expired and came to an end. It was not decided or settled; it came to an end.

The Congress will come to an end, and the energy bill will be decided one way or the other. Every bit of it will be decided, either for or against. I have no doubt that before this Congress is over, we will have reached a conclusion on that energy tax bill we have been in conference on for a year. But that ought to come along behind the gas bill. That was the fifth of the five big bills, and everyone agrees it was the one that was most controversial. Finally we voted on one of them; the coal conservation bill has been voted on. We have four other bills to vote on, three out of the Energy Committee and one that we will bring to the Senate from the tax writing committees.

About at the time that the House concludes that they cannot resolve satisfactorily the crude oil equalization tax, then I will go ahead and settle the rest of it, because there are a lot of good things in that bill, like what the Senator is talking about here. We will resolve it; but being that the House will not agree to this until they are satisfied nothing can be done about the crude oil tax or anything like it, we will be in conference.

Mr. HART. Would the Senator's interpretation of what the House will do or not do be changed materially if the administration supported the efforts of the Senator from Colorado here today? The Department of Energy previously stated only that they have no objection to leaving the rest of the elements out. I do not want to overstate the administration's position, but it may indicate a significant change of policy or strategy on the part of the administration, and if the administration is willing to say to

Speaker O'NEILL and Chairman ULLMAN and others that they favor this position, I think perhaps the position of the chairman will not be the same.

Mr. LONG. What I hear, Senator, is this: The administration does not want to separate anything out of the conference, but if we are going to have to pass all of it piecemeal, they would have less objection to separating the solar part of it than anything else. That is my understanding.

Mr. HART. I think the Senator is correct, but the contact we have had with the Department of Energy today is that they are willing to go farther than that, and they have already authorized me to say they support this amendment.

What we are trying to do here—as opposed to the efforts of the Senator from Alaska—has already received the approval of the conference. I still have a misunderstanding with the Senator from Alaska as to whether the elements he is offering have been approved by the tax conference committee. Although the record is unclear on that, I think the record is clear that all the proposals put forward by the Senator from Alaska have not received conference approval.

Mr. GRAVEL. Mr. President, I do not know whether we are here with affidavits. I am asking my staff to determine whether his stuff has been approved by the conference. We do not know. We have the conference record; let us put it in the RECORD right now, and see what the conference did.

Mr. HART. Mr. President, I ask unanimous consent that it be in order to put the tax elements of the energy conference report in the RECORD at this point.

Mr. CURTIS. Mr. President, reserving the right to object, it is my understanding that the conference is not complete. We did not know about the report that was sent, and I am sure a number of conferees really intend to resist some of these tentative positions, should an adverse position be taken on some of those items not yet reached in conference.

There is nothing, to my knowledge, that indicates any finality or a decision on the part of the conference.

Does my chairman agree?

Mr. LONG. That is right. There is no conference report signed. We just agreed on certain things, but all that is subject to being reconsidered.

Mr. CURTIS. I dislike to object, but I hope my colleague will withdraw his request, because there is not any document signed by conferees.

Mr. LONG. I would have no objection to anyone making available whatever information there is, be it to the press, the minutes of the conference. That presents no problem. But I think the Senator from Nebraska is correct in saying that one cannot regard something that has been tentatively agreed to in a conference as final when the conference has not concluded its deliberations.

Mr. CURTIS. It is also true, Mr. President, that these notations are labeled tenative decisions. I think if it is admitted, it should not be admitted as evidence of an approval on the part of the conference.

Mr. HART. Mr. President, I withdraw the unanimous-consent request.

Mr. CURTIS. Mr. President, I seek recognition.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. CURTIS. I ask unanimous consent that Mr. Gerald Rosen, of Senator GRIFFIN'S staff, be granted the privileges of the floor for these several tax bills.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, there are many things in the energy tax bill in which I am very much interested. I hope we can soon enact the gasohol bill. It will add 10 percent to our motor fuel every place it is used.

I am also very much interested in the reduction of the tax on foundations, which is now 4 percent and action had been taken to make it 2 percent. It would be my hope that we would not have controversial amendments on this foundation bill.

So far as the Senator from Nebraska is concerned, I realize that in all legislative strategy or programming there is always a risk. So far as I am concerned, I am willing to trust the distinguished chairman of the Committee on Finance to contend for the Senate viewpoint in conference, and we have to trust to somebody the authority to work out the scheduling of these things.

I merely say that hoping that there can be restraint in what we add to these bills this afternoon.

Mr. MUSKIE. Mr. President——

Mr. DOMENICI. Mr. President——

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, I have listened with great interest to the discussion this afternoon concerning the amendment of Senator HART, and also the discussion proposing additions to the bill by Senator GRAVEL. I have been trying to sort out in my own mind the implications on the budget process in the approval by the Senate of these two proposals. These two proposals were part of the energy tax bill that the Senate approved a little less than a year ago.

I was not on the floor at the time because I was hospitalized, but that bill as it went to conference had a first-year cost in fiscal 1978 of $2 billion. The budget had allowed only $1 billion. So it was in violation of the budget resolution when it went to conference.

Now we are having pieces of that offered to the Senate this afternoon. I am sure I do not have figures in which I have final confidence as to the cost of these pieces. My best information is that the Hart amendment, by itself, would have a first full year cost of approximately $1 billion, and the cumulative projection through 1985 would be approximately $10 billion.

The Gravel amendment, which includes part but not all of another portion of that bill, represents a cumulative cost through 1985 of $19 billion.

Mr. GRAVEL. If the Senator will yield, I think there is a mistake in my amendment. My staff is clearing it up now. The $16 billion item is not in my amendment. My total cost is $2 billion to $3 billion. We will get the figures to the Senator.

Mr. MUSKIE. I am not trying to confirm or not confirm any figures. The point I am trying to make is that these proposals were part of the extended debate on the energy tax bill a little less than a year ago. They went to conference. The budget implications at that time were difficult to understand fully. There was disagreement about it, although we reached conclusions about those implications from the point of view of the Budget Committee. I suspect Senator LONG had a different view of those implications at the time.

I am simply pointing out the difficulty this afternoon of trying to put on a price tag and to evaluate the budget implications of these proposed amendments to an unrelated piece of tax legislation without the opportunity to make the kind of analysis that we did with the bill last fall.

Mr. HART. Will the Senator yield?

Mr. MUSKIE. I will just take a few minutes to finish my thought.

Second, I do not know what else is in Senator GRAVEL'S amendment, but I believe it may include payments to nontaxpayers, and, if so, may be subject to a point of order for reasons which were discussed on the floor of the Senate last week. Again, that is a point I have not had the opportunity to analyze, evaluate, or make a final, firm judgment about. I just find myself frustrated as chairman of the Budget Committee sitting here looking at the legislation which I did not expect to include these items, with the responsibility of advising the Senate on how it ought to proceed or what the Budget Committee's recommendations might be with respect to them.

This is not a new phenomenon with respect to tax bills. We have all experienced it. Those who have been here for 20 years have experienced it more than those who have been here 5 years. I suspect that 10 years from now we will still be experiencing it. I must say for myself, I am willing to sit here and continue to listen to debate, listen to attempts—and I am sure there will be such attempts—to reconcile these amendments with responsibilities of the budget process. Frankly, though I am fully sympathetic to Senator HART'S amendment, I am going to vote against any amendments to the pending legislation because I just find it impossible, with this state of affairs, to give the Senate any kind of thoughtful, responsible, and comprehensive judgment on what the impact on the budget process will be.

For example, here is a question: The energy tax bill which passed last year was considered within the budget limitations applicable to fiscal year 1978. Fiscal year 1978 is drawing to a close, as of October 1. The budget resolution for 1979 makes no provision for these tax proposals because an allowance was made in the 1978 fiscal budget. What, if anything, we need to do, I do not know, when Senator LONG comes back with a package that he and the House have been able to work out. It is something I have not worked out yet because I did not think I had to by this afternoon.

All I am saying is that when we approach a complicated piece of tax legislation in this fashion, we are just step-

ping so far outside the regular procedures or processes we have established that no one can have a clear judgment as to what the implications are from the point of view of the budget process.

I am happy to yield to my friend from Colorado.

Mr. HART. I believe I can answer the Senator's question. I do not think there is as much confusion on this issue as the Senator has indicated.

The calculations prepared by the Joint Committee on Taxation are as follows: In the Senate bill for the items named in this amendment, the figure involved there is $1,266,000,000. Again, as the Senator pointed out, the budget function there may have been for a previous year. I shall get back to that question.

The House bill for these items contained $748 million. The compromise in the conference, which is what is being offered to the amendment before us today, the Hart amendment, would cost $978 million, which is, of course, above the House provision by $230 million, but below the Senate version passed by some $300 to $400 million. That was largely as a result of a compromise on the question of refundability where the Senate receded in part from its position taken on the floor.

The principal point here, at least according to the calculations done by the Joint Committee on Taxation, is that the passage of the Hart amendment will amount to less authorization than the Senate originally passed as a result of that conference compromise, which is incorporated in the amendment.

As to the separate issue of what happens in the budget resolution, the Senator from Maine, as chairman of that committee, would be much more able to respond to this. What happens when a bill is carried over from year to year, as the energy package has been, I cannot say.

Mr. MUSKIE. I suspect, and this is off the top of my head, since I have had no opportunity to consider it, it may well be that since the Budget Act provides for the additional budget resolutions at any time that the national interest requires it, I suppose that an additional resolution is a conceivable option when Senator LONG is ready to come back to the floor; if we need additional action, that may be the vehicle for doing it.

The second point I make, referring to the figures, the figures of the Senator from Colorado are consistent with those that I have, roughly a billion dollars. The problem is that we are sending this over as a separate piece of legislation. I do not know whether the same conference committee will consider this bill or whether it will be another one, or how this bill will be handled in conjunction with the other one. We will have approved these provisions twice if the Senator's amendment is adopted and the bill as amended is passed. I suppose we can straighten it out when it all comes back to the Senate in some form. I am sure we are not going to pass the same program twice eventually.

But simply as a matter of orderly procedure, I simply cannot see this way of implementing this program. I do not believe that this program is going to become law on this bill.

Mr. PROXMIRE. Will the Senator yield?

Mr. MUSKIE. I suspect it is going to become law at some point and I shall support it when it becomes law, because I think it makes sense. But I think to do it this way is something that, as Budget Committee chairman, I ought to protest.

Yes, I yield.

Mr. PROXMIRE. As Budget Committee chairman, would the Senator feel that it might be a better proposition by the Senator from Colorado if he confined his amendment to what he has made a case for? There is an emergency need now for credit legislation for solar energy, not for insulation. The big cost of this amendment is in insulation. In insulation, they are operating at 100 percent of capacity, or close to it, in the production of insulation materials. This tax credit is simply going to be a bonanza for the people engaging in insulation production.

It will help them, but it will not increase the insulation.

Solar energy is different. The Senator from Colorado has made a case for it and made it well. However, that will have a much smaller budgetary impact, as I understand it, a fraction of the $978 million that the Senator says his amendment would cost now.

Perhaps the Senator from Maine would consider that as something that might be doable within budget constraints, perhaps not, I am suggesting that as a moderate compromise.

Mr. MUSKIE. My concern is not so much substantive as it is procedural, because the budget process was created to provide all the information that the Senate ought to have to evaluate proposals that have an impact on the budget, that have tax implications and spending implications. I just think that approaching proposals in this fashion, outside of the regular proceedings, deprives us of the kind of thoughtful, deliberative, comprehensive information we ought to have.

Mr. PROXMIRE. I understand.

Mr. MUSKIE. I do not challenge any Senator's right to use this approach. I understand what Senator Hart is doing. But I have watched these Christmas tree tax bills for so many years, I cannot imagine that anyone who has watched them can be blind to the birth of another one when it happens, or can be insensitive to the fact that they are really not productive in the long run and that they do generate some harm. I think some tax provisions have been written into the law that ought not to be in the law in the confusion generated by this kind of tax writing.

Maybe I am beginning the process of trying to resist Christmas-tree tax legislation. I was just sitting here, I was a bystander, and did not expect to get involved in this discussion. Then when we began to get involved in amendments that involved billions of dollars, I found I could not just sit on the sidelines; I had to speak.

Mr. McINTYRE. Will the Senator yield?

Mr. MUSKIE. Yes, I yield.

Mr. McINTYRE. The good Senator from Maine must realize that the Senator from New Hampshire and the Senator from Colorado are here this afternoon because we feel that these conservation provisions, the insulation and solar credits, have been held hostage too long. We think it is time that they be broken out. With all due respect to the budgetary process, and the Senator from Maine knows I have supported him time and time again, the fact remains that we are trying to highlight a part of the legislation that deserves to move. There is a consensus in both Houses that substantial parts of what we are talking about here today should already be law. The only way we have to make them law is to come down here and force the situation.

We recognize that it is not the most orderly way to do it, but I think the Senator from Colorado and other sponsors feel as I do, that it is high time this matter moved in the interests of the people of this country.

With all due respect to the people of Alaska, I do not feel that the Senator from Alaska has a situation with the urgency like that which faces the solar industry, with all due respect.

Mr. MUSKIE. May I say to my good friend from New Hampshire, there is no Member of this body for whom I have higher regard and affection. My good friend from New Hampshire has been here almost as long as I have, and I have campaigned in New Hampshire with him for the last 25 years, so I share his sense of urgency.

I certainly understand that the floor of the Senate is the place above all legislative bodies on the face of this planet for a Senator to protest when he does not like something that is going on. I certainly would not want to chill that right at all. But I would add that I have felt like kicking vending machines that did not produce after swallowing my quarter dozens of times in my life and it has not done one bit of good. I have always had to put another quarter in and often have lost that one, too.

If you want to kick this vending machine, I do not object, but I do not really think that it is going to produce this program that we so urgently need—and I agree with the Senator—in this fashion. We are just going to begin building another Christmas tree.

Senator LONG has devised, over the years, his own unique and innovative ways of dealing with Christmas trees, with Senator LONG ending up writing the final tax bill. The public interest, by and large, has been served by that system. But it seems to me that, although I can appreciate the motivation and I share completely the Senator's evaluation of the need of the program, as Budget Committee chairman, it is my business to point out whatever I think needs to be pointed out. It is the Senate's business to override the Budget Committee chairman if that is the Senate's wish.

Mr. HANSEN. Mr. President, I thank my distinguished friend from Maine.

I ask unanimous consent that Barbara

Washburn of Senator JAVITS' office and Sally Crossman of Senator STEVENS' staff be granted privilege of the floor during all of the debate and votes on these tax bills.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Will the Senator yield for the same purpose?

Mr. MUSKIE. Yes, to my good friend from Virginia.

Mr. HARRY F. BYRD, JR. I ask unanimous consent that Edward Beck of my staff be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. I yield to the Senator from Colorado.

Mr. HART. I, like my colleague from New Hampshire, think the fact this amendment has close to or over one and a half dozen sponsors——

Mr. MUSKIE. Beware of that.

Mr. HART (continuing). People on both sides of the aisle who have made their own decisions, that we have gone on long enough.

I share his frustration. I think a lot of us are frustrated by the inability of this vending machine to turn out an adequate program.

For some of us, I hope a majority, we will reach a decision today to move in a different direction.

Now, the Senator in his budget capacity objects on the grounds of orderly procedure, and I understand that.

But I think the orderly procedure was applied when first introduced and worked its way through the Congress. We have a significant piece of it here today, that both Houses agreed to. It has received informal conference approval. It was taken into consideration in the original budget process. It must become law, in the judgment of some of us, if we are to move in these important areas. Like many other pieces of legislation, it has worked its way through committee, worked its way through the Houses, worked is way through the conference committee, and it is just sitting there, a hostage to some very controversial petroleum pricing problems that some of us think will never be resolved, at least in this Congress.

So, for the Senator from Maine to say "Christmas tree," I think is to avoid a very important issue.

These provisions are not incentives for chili pepper growers, they are not incentives for slot machine owners, they are not incentives for some special interest here.

They are incentives to help solve the energy problems of this country.

Mr. MUSKIE. Will the Senator yield on that point?

Mr. HART. If the Senator will allow me, that is not, in my judgment, the Christmas tree approach.

I do not like to legislate by adding amendments of this consequence onto relatively insignificant tax bills, but something has to be done. I do not like to do it procedurally.

Mr. MUSKIE. If the Senator will yield—I guess I still have the floor.

No, I was not characterizing the substance of the Senator's amendment when I referred to the Christmas tree approach. I was characterizing the procedure which so often starts on the Senate floor.

Christmas trees often include a lot of meritorious proposals. So I am not denigrating the proposal. As a matter of fact, I support this form of incentive for conservation.

I just think, in the long run, we do ourselves a disservice using this type of procedure. Granted that the Senate is the one place in the parliamentary world where, when the Senate wishes to, it can abandon procedure in order to accomplish what it thinks ought to be accomplished. So I have lived with that, too.

Having made my point, I will not belabor it. The Senator understands it.

Unless the Senator from Alaska wanted to ask any questions, I will take my seat. I have made my point. I think I had a duty to make it.

Mr. GRAVEL. Could I ask this question?

I was just checking quickly the first year figures, which would have been this year had the bill passed last year, are less than second year figures.

I presume last year's budget resolution was for a period of time. Since we did not act on the bill, would it not be a proper inference that regardless of the size of this amendment that the costs are less what was projected for this year, because we never got to the second year?

Mr. MUSKIE. We would still be in the first year, I think.

Mr. GRAVEL. Would we?

Mr. MUSKIE. Until October 1.

Mr. GRAVEL. Well, obviously, this cannot take place——

Mr. MUSKIE. It could be last year, the best we can call is that last year's bill would have cost $2 billion in 1978, and $5 billion in 1979.

I do not know how much of that bill is encompassed in the combination of Senator HART's proposal and the Senator from Alaska's. So I am not going to make "guestimates" beyond those Senator HART provided, and any the Senator can provide, because I have no basis for independent evaluation, not having had an opportunity to make one or ask CBO to make one.

So whatever the Senator gives us as estimates, I assume they are the best he can get. I do not challenge that. It is simply that I do not yet have them, and I cannot provide the Senate with any, and I think that is an unfortunate situation.

Senator HART's figures, I think, are firmer because they are based on evaluation made by the Joint Committee on Taxation which certainly is a creditable source, although it is not CBO, and that is roughly a billion dollars for the first full year cost.

Mr. ROBERT C. BYRD. Vote!

Mr. GRAVEL. Mr. President, I would just like to speak to a point raised by the Senator from Wisconsin, which was an interesting point.

The plea is made for solar, and with respect to the West, or anywhere which is logical, I agree with that.

The plea is made, from me to my colleague from New Hampshire, that the cost that we have for the Hart amendment, is about, over a 5-year period, $10,500,000,000.

So the lion's share of that cost is in the credit.

Now, we do not have——

Mr. PROXMIRE. Credit for what? Not solar.

Mr. GRAVEL. No; not solar. Let me finish and I will explain.

The credit goes for furnace replacement, flue openings, caulking, wood peat stoves, insulation, heat pumps, fluorescent lighting, energy saving meters, and in some of this it was absolutely fantastic. I can recall the meter demonstration. It will save energy. It was not a high-cost item. As I recall, the high-cost item was insulation.

Now, this amendment which, of course, appeals to the consumer, and it is for the residence owner, has a lot of appeal. But when we go deeper, we find out, and I, for one, in committee was not terribly happy with the insulation credit because the prices are driven up. All the insulation that can be used is being used and this will not alter the dynamics of it. It looks like it might, but it will not.

In my amendment I am suspending import duties on insulation so that we can let more insulation material come into this country, because we do not have enough to go around.

So, we are giving credit here under this amendment, which has great virtue, to something that really does not need a credit, because there is not enough to go around. What the committee decided was to turn around and suspend tariff to get more into the country. That will help insulate more homes, to get more insulation in the hands of the workmen to fill in the studs. That will do something of value.

So I submit that prior to the budget discussion, the Senator from Colorado and I seemed to be parted on one particular issue, and that was that his had somewhat more virtue because it was agreed to by the conference. As was pointed out by the distinguished Senator from Nebraska, it obviously was a tentative agreement that we had and, subject to what other things were adopted. This was what we got down to on the list before everything fell apart.

So I submit that there is no extra merit to what the Senator is offering. It may have more sex appeal to talk in terms of what the Senator is going to give the homeowner, but in fact it is going to benefit some industrialist.

I submit that it is not very sexy to talk in terms of an investment tax credit for a producer who is going to dig holes for geothermal. But that may have a lot more impact on what is going to happen to energy in this country than caulking.

I suspect—and I cannot prove it, because I do not have the time—that the Senator's insulation credit, with all its sex appeal, costs more than what I am offering, which is $4.1 billion over the 5-year period, as opposed to the Senator's amendment, which is $10.5 billion.

So I submit that the Senate has acted on what the Senator is proposing and has passed it. The Senate has acted on

what I am proposing and has passed it. The chairman of the committee has indicated to both of us that he is prepared to accept both amendments.

So I find the Senator's opposition odd, in view of what I have just laid out here as to some of the elements contained in the Senator's amendment.

If I could do it, I would add gasahol to this amendment. It was left out inadvertently. We left out purposely the burner furnaces for large enterprises because the cost is horrendous and the marginal benefit is not as strong as some of these other items.

We are talking about an investment tax credit and the additional credit of 10 percent for cogeneration property. That means that if you have an enterprise that is already generating something and it has excess heat, you can take a credit for the extra costs of using that heat to generate electricity. You can get an investment tax credit of 10 percent to do that. That is an incentive to do it. That may be every bit as beneficial as caulking or heat pumps.

The next item we have in this 10 percent investment tax credit is a recycling amendment, which obviously will save energy and is provident.

Then, of course, there is oil shale equipment and nonoil or gas electric-generation equipment which has a useful life of at least 3 years. That is as reasonable as solar energy. That is as reasonable as anything the Senator has on his side of the bill.

What we are talking about is an investment tax credit similar to these other items that have tax credits.

So I do not know how one can play Solomon and think one proposal is not as meritorious as the other.

The other item in the part I am offering is a depletion allowance for geothermal, a depletion allowance for geopressurized methane, and an allowance for peat.

Pray tell me what the difference is, other than the sex appeal, to offer an investment tax credit for peat, when the Senator is offering an investment tax credit for a stove that can burn only peat or wood. Pray tell what the difference is in that regard.

I also am offering a deduction for intangible drilling costs for geothermal wells. Oil has that. Pray tell me what the difference is between offering an amendment providing a tax credit for furnace replacement or flue openings as opposed to allowing a similar type of tax advantage for drilling some geothermal wells. These wells which offer a great deal of potential, but are not being drilled because the incentives are not there.

So I submit that, if we are talking about an energy package that is going to have some suction and become law, I would like to see it become law with these items, which are every bit as virtuous as any items the Senator has in his proposal.

I say to the Senator that the only reason I think we are all up in arms over this is that it goes to the homeowner initially. Ultimately, it does not go to the homeowner. It goes to the person who will manufacture these new furnaces. It goes to the person who will manufacture the new flue openings. It will go to the industry that manufactures caulking. It will go to the insulation industry, which has more than it can say grace over right now. We should not be giving them a credit, it should be going to increase the credits.

So if my colleague insists that we go to a vote, I am prepared to vote. I hope it is agreed to, because I think it will be a fine turn of events to turn down one facet of a bill because it does not have quite the sex appeal and the vote-gathering appeal that the other process has.

In terms of equity, the Senate and the committee have done their work, and I think there is no reason to pull out selectively what we think is an advantageous provision.

So I am prepared to vote on this amendment at this point.

Mr. HART. Mr. President, the Senator from Alaska has referred to the amendment as my proposals. These are not my proposals or those of the Senator from New Hampshire or any of the other 18 or so cosponsors. These are the proposals accepted by the Senate and the House of Representatives and which have received solid acceptance in the conference committee.

The second fact of the agreement of the conference committee, I think, does distinguish the incentives of our amendment from those offered by the Senator from Alaska. The Senator from Alaska, unlike the information we have from the Joint Committee on Taxation, does not have the cost figures for the incentives he seeks to add.

Therefore, primarily by way of distinguishing his amendment from ours, and with all due respect to the Senator from Alaska, I move to table his amendment, and I ask for the yeas and nays.

Mr. GRAVEL. Will the Senator withhold?

Mr. HART. I withhold.

Mr. GRAVEL. I will be moving to table the Senator's amendment. Everything he does to me, I am going to do to him. Let us get that straight.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on the motion to table the amendment of the Senator from Alaska. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

The result was announced—yeas 53, nays 43, as follows:

[Rollcall Vote No. 354 Leg.]

YEAS—53

Bayh	Chafee	Domenici
Biden	Chiles	Eagleton
Brooke	Clark	Ford
Bumpers	Cranston	Glenn
Burdick	Culver	Goldwater
Cannon	DeConcini	Griffin
Hart	Laxalt	Percy
Haskell	Leahy	Proxmire
Hatfield, Paul G.	Lugar	Ribicoff
Heinz	Magnuson	Riegle
Hodges	McGovern	Sarbanes
Huddleston	McIntyre	Sasser
Humphrey	Melcher	Schmitt
Inouye	Metzenbaum	Schweiker
Jackson	Muskie	Stafford
Javits	Nelson	Stennis
Kennedy	Pearson	Stevenson
	Pell	Stone

NAYS—43

Allen	Gravel	Nunn
Baker	Hansen	Packwood
Bartlett	Hatch	Randolph
Bellmon	Hatfield, Mark O.	Roth

Curtis	Mathias	Tower
Danforth	Matsunaga	Wallop
Dole	McClure	Weicker
Durkin	Morgan	Williams
Garn	Moynihan	Young
		Zorinsky

NOT VOTING—4

Abourezk	Eastland
Anderson	Johnston

So the motion to lay on the table UP amendment No. 1726 was agreed to.

Mr. HART. I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JAVITS. The apparent demise of the energy tax bill has created severe hardships for homeowners and industry who made energy-conserving improvements, or invested in solar technology under the impression that they would qualify for major Federal tax incentives included in the national energy plan, proposed on April 20, 1977.

Now, because of the inaction on the energy tax bill, consumers have held back their purchases of solar equipment. This has devastated the new solar industry. For example, the Solar Energy Industry Association reports that during the first 6 months of 1977, the solar flat-plate industry sold 14,000 units. In contrast, in the 14 months since the President's energy plan was introduced, only 22,000 units have been sold. Thus, the solar industry fared better before the administration set up its solar commercialization strategy which placed the industry in an untenable situation.

Over 80 percent of the businesses that manufacture, sell, install, or maintain solar energy and other renewable energy systems are categorized as small businesses. If these businesses cannot be assured of continued growth, they will be unable to bring down the unit costs of these new technologies and maintain their competitiveness with the larger and more diversified businesses.

The passage of these tax credits for the purchase of solar and other alternative energy equipment, and for insulation and other energy conservation materials, is of major importance to our Nation. This amendment provides the necessary incentive in the marketplace to spur on conservation and help develop alternative energy sources. There is no better way to accomplish this goal than to provide incentives to the American homeowner, so that we may achieve

broad-scale implementation of renewable resource technologies.

I support this amendment and hope the Senate will adopt it. Time is running out for action, and further delay injures consumer industry, and our Nation's energy supply.

Mr. President, I support the Hart-McIntyre-Percy amendment, and I hope the Senate will approve it.

UP AMENDMENT NO. 1727

Mr. GRAVEL. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. STONE). The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. GRAVEL) proposes an unprinted amendment numbered 1727 to amendment numbered 1724.

Mr. GRAVEL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment, add the following:

ADDITIONAL PERCENTAGE FOR INVESTMENT CREDIT WITH RESPECT TO CERTAIN ENERGY PROPERTY

(a) IN GENERAL.—Subpart B of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting immediately after section 46 the following new section:

"SEC. 46A. SPECIAL RULES RELATING TO CERTAIN ENERGY PPROPERTY.

"(a) IN GENERAL.—In addition to the amount which is determined under section 46(a)(2), the amount of the credit allowed by section 38 for the taxable year determined under section 46(a)(1)(B) with respect to energy property shall include an amount equal to 10 percent of the qualified investment (as determined under section 46 (c) and (d)) in section 38 property which is (or, for the purpose of applying section 46(d), will be) energy property.

"(b) DEFINITIONS.—For purposes of this section—

"(1) ENERGY PROPERTY.—The term 'energy property' means property—

"(A) which is—

"(i) cogeneration equipment installed in connection with an existing facility, but only to the extent that the cogeneration energy capacity of such facility is expanded,

"(ii) recycling equipment,

"(iii) shale oil equipment,

"(iv) geopressurized methane gas equipment, or

"(v) equipment for the application of heat by electricity generated by the use of an alternate substance (including other on-site property necessary to effect process changes for the use of such equipment) which will use neither oil nor natural gas, and which will replace equipment used in an existing industrial facility which uses oil or natural gas as a fuel,

"(B) which is an integral part of, or used in connection with, a building or other structure located in the United States,

"(C)(i) the construction, reconstruction, or erection of which is completed by the taxpayer after April 19, 1977, or

"(ii) which is acquired after April 19, 1977, if the original use of such property commences with the taxpayer and commences after such date, and

"(D) which has a useful life of 3 years or more.

"(2) CERTAIN TRANSPORTATION EQUIPMENT TREATED AS ENERGY PROPERTY.—A commuter van (as defined in section 46(c)(6)(B)), and equipment designed to reduce energy consumption added to existing motor vehicles primarily engaged in the commercial transportation of property, shall be treated as energy property. An electric motor vehicle used in the taxpayer's trade or business shall be treated as energy property.

"(3) COGENERATION EQUIPMENT.—The term 'cogeneration equipment' means equipment which—

"(A) produces steam, heat, or other forms of useful energy (other than electric energy) to be used for industrial (including water purification or desalinization), agricultural, commercial, or space heating purposes, and

"(B) also produces electric energy.

"(4) RECYCLING EQUIPMENT.—The term 'recycling equipment' means any equipment which is used exclusively in the recycling of solid waste (including not more than a nominal amount of virgin materials) or to sort and prepare such solid waste for recycling, and any equipment used in the conversion of solid waste into a fuel or into useful energy such as steam, electricity, or hot water.

"(5) SHALE OIL EQUIPMENT.—The term 'shale oil equipment' means equipment which is used to extract oil from oil-bearing shale rock.

"(6) GEOPRESSURIZED METHANE GAS EQUIPMENT.—The term 'geopressurized methane gas equipment' means equipment which is used to extract geopressurized methane gas (as defined in section 44G(d)(1)).

"(7) EXISTING.—The term 'existing' has the same meaning as in paragraph (4) of section 44F(b).

"(8) ALTERNATE SUBSTANCE.—The term 'alternate substance' means any substance other than—

"(i) oil and natural gas, and

"(ii) any product of oil and natural gas.

"(9) EQUIPMENT MUST MEET CERTAIN STANDARDS OF QUALITY.—Equipment qualifies under paragraph (1)(A) (i) or (ii) or paragraph (2) only if it meets the performance and quality standards (if any) which—

"(A) have been prescribed by the Secretary by regulations (after consultation with the Secretary of Energy), and

"(B) are in effect at the time of acquisition of the property.

"(10) SPECIAL RULE FOR PROPERTY FINANCED BY INDUSTRIAL DEVELOPMENT BONDS.—In the case of property which is financed in whole or in part by the proceeds of an industrial development bond (within the meaning of section 103(b)(2)) the interest on which is exempt from tax under section 103, '5 percent' shall be substituted for '10 percent' in subsection (a).

"(c) SPECIAL RULES.—

"(1) CERTAIN SECTION 48 RULES WAIVED.—For purposes of this section, the rules contained in section 48(a)(3) (relating to property used for lodging) shall be disregarded, and the words 'its structural components' contained in section 48(a)(1)(B) shall be disregarded.

"(2) APPLICATION WITH SECTION 44F.—Property described in section 44F shall not be treated as property described in this section.

"(3) QUALIFIED INVESTMENT.—For the purpose of determining the taxpayer's qualified investment, the applicable percentage (for purposes of section 46(c)(1)) shall be 100 percent (without regard to the actual useful life of the item).

"(4) RECAPTURE RULES—For the purpose of applying section 47 to energy property, a disposition of such property, or the conversion of such property into property which is not energy property, which occurs before the property has been in service for half its useful life shall be treated as having occurred before the close of the third year after the property was placed in service.

(b) ALLOWANCE OF REGULAR PERCENTAGE FOR BUSINESS INSULATION PROPERTY.—Subsection (a) of section 48 (defining section 38 property) is amended by adding at the end thereof the following new paragraph:

"(10) BUSINESS INSULATION PROPERTY.—For the period beginning on April 20, 1977, and ending on December 31, 1985, insulation shall be treated as meeting the requirements of paragraph (1) and paragraph (3) shall not apply to insulation. For purposes of the preceding sentence, the term 'insulation' means any item—

"(A) which is specifically and primarily designed to reduce when installed in or on an existing industrial or commercial building or existing industrial or commercial facility the heat loss or gain of such building or facility,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years,

"(D) which meets the performance and quality standards (if any) which—

"(i) have been prescribed by the Secretary by regulations (after consultation with the Secretary of Energy), and

"(ii) are in effect at the time of the acquisition of the item, and

"(E) would not, but for this paragraph, be section 38 property.

For purposes of this paragraph, a building or facility will be treated as existing if it was placed in service before April 20, 1977.".

(c) CLERICAL AMENDMENT.—The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting immediately after the item relating to section 46 the following new item:

"Sec. 46A. Special rules relating to certain energy property.".

(d) EFFECTIVE DATES.—The amendments made by this section shall apply to—

(1) property to which section 46(d) of the Internal Revenue Code of 1954 does not apply, the construction, reconstruction, or erection of which is completed by the taxpayer after April 19, 1977, but only to the extent of the basis thereof attributable to the construction, reconstruction, or erection after such date and before January 1, 1986,

(2) property to which section 46(d) of such Code does not apply, acquired by the taxpayer after April 19, 1977, and before January 1, 1986, and placed in service by the taxpayer before January 1, 1986, and

(3) property to which section 46(d) of such Code applies, but only to the extent of the qualified investment (as determined under subsections (c) and (d) of section 46 of such Code) with respect to qualified progress expenditures made after April 19, 1977, and before January 1, 1986.

SEC. 1033. PAYMENT IN LIEU OF CREDIT TO TAX EXEMPT ORGANIZATIONS.

(a) IN GENERAL.—In the case of a State or any political subdivision thereof, and in the case of any organization described in section 501(c)(3) of the Internal Revenue Code of 1954, or any electric utility cooperative described in section 501(c)(12), which is exempt from tax under section 501(a) of such Code for the taxable year, the Secretary of the Treasury shall pay to each such government, subdivision, or organization which files a claim during the calendar year in the form, manner, and at the time prescribed by the Secretary by regulations, an amount determined under subsection (b). Such payment shall be made as soon as possible after the receipt of such claim.

(b) AMOUNT OF PAYMENT.—The amount payable to a State, subdivision, or organization (hereinafter referred to as a "tax exempt entity") under subsection (a) for the calendar year shall be equal to the amount of credit which such tax exempt entity would, if it were liable for tax under chapter

1 of such Code, be allowed under section 44F of such Code with respect to its investment in alternative energy property and specially defined energy property and if such property were used in a trade or business.

(c) REPAYMENT.—If an entity which receives a payment under subsection (a) takes any action which would result in an increase of its tax under subpart B of part IV of subchapter A of chapter 1 of such Code if such entity were liable for tax under this chapter, then such entity shall be liable to the Secretary for an amount equal to the increased amount of tax which would be imposed under such subpart and such amount shall be collected as if it were the underpayment of a tax imposed under such chapter 1.

(d) TREATMENT AS OVERPAYMENT OF TAX.—For purposes of any law of the United States, including section 101 of the Treasury Department Appropriation Act of 1950 and title I of the Supplemental Treasury and Post Office Departments Appropriation Act, 1949, any payment made under this section shall be considered to be a refund of any overpayment of the tax imposed under chapter 1 of the Internal Revenue Code of 1954.

"(2) facilities for the on-site transportation, handling, storage, or treatment of coal, other raw materials, supplies, or any other materials in any preparatory process for the coal gasification or liquefaction process,

"(3) facilities for the on-site economic recovery, recycling, handling, storage, treatment, or utilization of byproduct materials or energy generated by the coal gasification or liquefaction process,

"(4) facilities for the on-site handling or transportation, or the increasing of the British thermal unit content per unit of volume, of synthetic gaseous or liquid fuels produced by the coal gasification or liquefaction process, and

"(5) other on-site facilities to the extent that such facilities are functionally related, and subordinate to, any facilities described in paragraphs (1) through (4).

For purposes of this section, the term 'synthetic gaseous or liquid fuels' means any gaseous or liquid product of a coal gasification or liquefaction process which can be used as a substitute for natural gas or oil regardless of its chemical composition or British thermal unit content.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to obligations issued after December 31, 1977.

SEC. 1042. PERCENTAGE DEPLETION FOR PEAT, GEOTHERMAL DEPOSITS, AND GEOPRESSURIZED METHANE GAS.

(a) PEAT.—Section 613(b) (relating to percentage depletion rates) is amended—

(1) by inserting "peat (from deposits in the United States but only if used as a fuel or otherwise used to produce energy)," after "sodium chloride," in paragraph (4) thereof, and

(2) by inserting "(if paragraph (4) does not apply)" after "peat" in paragraph (6) thereof.

(b) GEOTHERMAL DEPOSITS AND GEOPRESSURIZED METHANE GAS.—

(1) APPLICABLE PERCENTAGE.—Section 613(b) (relating to percentage depletion rates) is amended by inserting after paragraph (7) the following new paragraph:

"(8) In the case of geothermal deposits located in the United States or in a possession of the United States, the percentages set forth in section 613A(c)(5) for calendar years shall apply to taxable years beginning in such calendar years, except that 10 percent shall be the applicable percentage for geopressurized methane gas (as defined in section 44G(d)(1)) extracted from brines withdrawn from such deposits."

(2) DEFINITION.—Section 613 (relating to percentage depletion) is amended by adding at the end thereof the following new subsection:

"(e) GEOTHERMAL DEPOSITS.—For purposes of this section, the term 'geothermal deposit' means a geothermal reservoir consisting of natural heat which is stored in rocks or in an aqueous liquid or vapor (whether or not under pressure). Such a deposit shall in no case be treated as a gas well for purposes of this section or section 613A, and this section shall not apply to a geothermal deposit which is located outside the United States and its possessions."

(3) TECHNICAL AMENDMENTS.—

(A) Paragraph (1) of section 613(c) (defining gross income from the property) is amended by inserting "and other than a geopressurized methane gas well or a geothermal deposit" after "oil or gas well".

(B) Paragraph (1) of section 613(b) is amended—

(i) by inserting "and" at the end of subparagraph (A),

(ii) by striking out "and" at the end of subparagraph (B), and

(iii) by striking out subparagraph (C).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1977.

SEC. 1043. OPTION TO DEDUCT INTANGIBLE DRILLING COSTS IN THE CASE OF GEOTHERMAL DEPOSITS AND GEOPRESSURIZED METHANE GAS.

(a) IN GENERAL.—Subsection (c) of section 263 (relating to intangible drilling and development costs in the case of oil and gas wells) is amended—

(1) by adding at the end thereof the following new sentence: "Such regulations shall also grant the option to deduct as expenses intangible drilling and development costs in the case of wells drilled in the United States (within the meaning of pararaph (1) of section 638), or any possession thereof, for any geothermal deposit (as defined in section 613(e)) or for any geopressurized methane gas (as defined in section 44G(d)(1)) to the same extent and in the manner as such expenses are deductible in the case of oil and gas wells.", and

(2) by amending the subsection heading to read as follows:

"(c) INTANGIBLE DRILLING AND DEVELOPMENT COSTS IN THE CASE OF OIL AND GAS WELLS AND GEOTHERMAL AND GEOPRESSURIZED METHANE GAS WELLS.—".

(b) MINIMUM TAX ON INTANGIBLE DRILLING COSTS IN THE CASE OF GEOTHERMAL AND GEOPRESSURIZED METHANE GAS WELLS.—

(1) Paragraph (11) of section 57(a) (relating to intangible drilling costs) is amended by striking out "oil and gas properties" each place it appears (including in the heading of subparagraph (C)) and inserting in lieu thereof "oil, gas, geopressurized methane gas, and geothermal properties".

(2) Clause (i) of section 57(a)(11)(B) is amended by striking out "oil and gas wells" and inserting in lieu thereof "oil, gas, geopressurized methane gas, and geothermal wells".

(3) Paragraph (11) of section 57(a) is amended by adding at the end thereof the following new subparagraph:

"(D) PARAGRAPH APPLIED SEPARATELY WITH RESPECT TO GEOTHERMAL PROPERTIES, GEOPRESSURIZED METHANE GAS PROPERTIES, AND OIL AND GAS PROPERTIES.—This paragraph shall be applied separately with respect to—

"(i) all oil and gas properties which are not described in clause (ii) or (iii),

"(ii) all properties which are geothermal deposits (as defined in section 613(e)), and

"(iii) all geopressurized methane gas properties.".

(4) Section 614 (relating to the definition of property) is amended by inserting "or geothermal and geopressurized methane gas wells" after "oil and gas wells" each place it appears.

(c) GAIN FROM DISPOSITION OF INTERESTS IN GEOTHERMAL OR GEOPRESSURIZED METHANE GAS WELLS.—

(1) Paragraphs (1) and (2) of section 1254(a) (relating to gain from disposition of interest in oil or gas property) are each amended by striking out "oil or gas property" each place it appears and inserting in lieu thereof "oil, gas, geopressurized methane gas, or geothermal property".

(2) Paragraph (3) of section 1254(a) (defining oil or gas property) is amended to read as follows:

"(3) OIL, GAS, GEOPRESSURIZED METHANE GAS, OR GEOTHERMAL PROPERTY.—The term 'oil, gas, geopressurized methane gas, or geothermal property' means any property (within the meaning of section 614) with respect to which any expenditures described in paragraph (1)(A) are properly chargeable.".

(3) The section heading of section 1254 is amended by striking out "OIL OR GAS" and inserting in lieu thereof "OIL, GAS, GEOPRESSURIZED METHANE GAS, OR GEOTHERMAL".

(4) The table of sections for part IV of subchapter P of chapter 1 is amended by striking out "oil or gas" in the item relating to section 1254 and inserting in lieu thereof "oil, gas, geopressurized methane gas, or geothermal".

(5) Subsection (c) of section 751 (relating to unrealized receivables) is amended by striking out "oil and gas property" and inserting in lieu thereof "oil, gas, geopressurized methane gas, or geothermal property".

(d) APPLICATION OF AT RISK RULES TO GEOTHERMAL DEPOSITS AND GEOPRESSURIZED METHANE GAS.—

(1) Paragraph (1) of section 465(c) (defining activities to which at risk rules apply) is amended by striking out "or" at the end of subparagraph (C) and by inserting after subparagraph (D) the following new subparagraphs:

"(E) exploring for, or exploiting, geothermal deposits (as defined in section 613(e)), or

"(F) exploring for, or exploiting, geopressurized methane gas (as defined in section 44G(d)(1))".

(2) Paragraph (2) of section 465(c) is amended by striking out "or" at the end of subparagraph (C) and by inserting after subparagraph (D) the following new subparagraphs:

"(E) geothermal property (as determined under section 614), or

"(F) geopressurized methane gas property (as determined under section 614),".

(e) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall apply with respect to wells commenced on or after April 20, 1977, in taxable years ending on or after such date.

(2) ELECTION.—The taxpayer may elect to capitalize or deduct any costs to which section 263(c) of the Internal Revenue Code of 1954 applies by reason of the amendments made by this section. Any such election shall be made before the expiration of the time for filing claim for credit or refund of any overpayment of tax imposed by chapter 1 of such Code with respect to the taxpayer's first taxable year to which the amendments made by this section apply and for which he pays or incurs costs to which such section 263(c) applies by reason of the amendments made by this section. Any election under this paragraph may be changed or revoked at any time before the expiration of the time referred to in the preceding sentence, but after the ex-

piration of such time such election may not be changed or revoked.

SEC. 1053. DUTY ON BUILDING INSULATION MATERIALS AND RELATED MATERIALS

(a) IN GENERAL.—Subpart B of part 1 of the Appendix to the Tariff Schedule of the U.S. (10 U.S.C. 1202) is amended by inserting immediately after item 911.16 the following new items:

" 911.17	Glass fibers in bulk: glass fibers in the form of mats, batts, blankets, felts, pads casings and boards, all the foregoing, of a density not over 25 lbs. per-cubic-foot, whether or not coded, impregnated or bonded with glue, plastics, or other substances or lined, backed or supported with paper, paper board, fabrics, or similar materials, or with metal mesh or foil; glass-fiber filter with or without their frameworks or supports; and article not specifically provided for, of glass fibers (provided for in item 540.71, part 3, schedule 5).....	Free.	No change	On or before 6/30/79.
911.18	Mineral wool, in bulk or in batts, blankets, or similar forms, whether or not lined, backed, or supported with paper, paper board, or similar materials (provided for in item 522.81, part 1, schedule 5).	Free.	No change	On or before 6/30/79.
911 19	Boric Acid (provided for in item 416.10, Subpart B, part II, schedule IV).....	Free.	No change	On or before 6/30/79'.',

(b) EFFECTIVE DATE.—The amendment made by subsection (a) of this section shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date of enactment of this Act.

SEC. 1060. INJECTION OF WATER TO ENHANCE CRUDE OIL RECOVERY.

Section 8(i)(2) of the Emergency Petroleum Allocation Act of 1973, as amended, is amended by adding the following new sentence at the end thereof: "Included in the count of the total number of wells on a property shall be all wells producing crude oil and all wells utilized for the purpose of injecting water and/or other materials into a producing reservior for the purpose of enhancing crude oil recovery.".

Part VII—Alcohol, Fuels Research and Demonstration Project of 1977

SEC. 1071. SHORT TITLE.

This part may be cited as the "Alcohol Fuels Research and Demonstration Project of 1977".

SEC. 1072. FINDINGS AND PURPOSE.

(a) The Congress hereby finds and declares that—

(1) domestic reserves of petroleum are finite and insufficient to meet current and foreseeable energy needs;

(2) it is desirable to achieve as rapidly as possible the capability of becoming independent of foreign sources of energy; and

(3) it is in the best interest of the Nation to rapidly investigate, develop, and employ technologies to economically produce and utilize domestic, nonpetroleum and nonnatural gas derived alcohol fuels as a substitute for, and as a supplement to, petroleum and petroleum products.

(b) The purpose of this part is, through a limited scientifically controlled, research and demonstration project which utilizes alcohol fuels (in lieu of or in combination with conventional petroleum-based fuels) in the operation of passenger vehicles, to provide Congress with information as to the economic, scientific, technological, and environmental feasibility of utilizing alcohol as a motor fuel on a large scale.

SEC. 1073. DEFINITIONS

For the purposes of this part—

(1) the term "alcohol fuel" means domestic ethanol and methanol of greater than 99 per centum purity derived from sources other than petroleum or natural gas;

(2) the term "United States" includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States;

(3) the term "motor vehicle" means any gasoline-powered passenger sedan or station wagon designed for use on the Nation's highways;

(4) the term "blend" means a fuel mixture consisting of at least 10 per centum alcohol by volume;

(5) the term "Project Administrator" means the chief executive official of the project agency selected under section 1074; and

(6) the term "executive agency" means an executive agency as defined in section 105 of title 5, United States Code, and shall also include the United States Postal Service.

SEC. 1074. SELECTION OF A PROJECT AGENCY

(a) No later than six months after the date of the enactment of this part, the Secretary of Energy shall, applying the criteria specified in subsection (b), select an executive agency to conduct the research and demonstration project authorized by this part.

(b) The Secretary in his selection of the project agency, shall apply the following criteria:

(1) the agency annually purchases or leases (for a period of a year or more) more than one thousand five hundred passenger sedans or station wagons which are expected to be fueled and maintained at a common facility or facilities;

(2) the agency's vehicles operate in several different locations under different climatic conditions; and

(3) the agency is capable of collecting research and other data which the Secretary expects to collect under section 1075.

SEC. 1075. ESTABLISHMENT OF A RESEARCH AND DEMONSTRATION PLAN.

(a) No later than six months after the selection of a project agency, the Secretary of Energy, after consultation with the Project Administrator, shall establish a research and demonstration plan (hereinafter in this title referred to as the "plan") which shall include—

(1) the variety of motor vehicle models, types, and sizes to participate in the demonstration, which, to the extent feasible, shall represent a cross-section of motor vehicles;

(2) the modifications required in conventional automotive design to utilize the alcohol fuel;

(3) the appropriate method of mixing, storage, and delivery of fuel blend;

(4) the changes in motor vehicle maintenance or operation anticipated in utilizing the alcohol fuel;

(5) the research and other data, both base and comparatve, particularly with regard to vehicle emissions and performance, to be collected by the Project Administrator under the plan and to be transmitted to the Secretary pursuant to section 1076(d).

(b) The plan shall require that all alcohol used shall be produced and refined in the United States.

(c) Except as provided in subsection (b), the Secretary of Energy, after his adoption of the plan, and after consultation with the Project Administrator, may alter the plan from time to time to further the purposes of this part.

SEC. 1076. OPERATION OF MOTOR VEHICLES USING ALCOHOL FUEL.

(a) In accordance with the plan but in no case later than one year after the establishment of the plan, the Project Administrator shall require for a period not to exceed three years that at least one thousand of the motor vehicles purchased or leased (for a period of a year or more) during such period and expected to be fueled at pumps under his control shall be equipped to utilize alcohol-blended fuel. One hundred of these motor vehicles shall be equipped to utilize a fuel which is at least 90 per centum alcohol.

(b) The Project Administrator shall provide such storage and pumping facilities, and require that they be operated in such a manner, as to conform to the plan. The Project Administrator shall operate and maintain motor vehicles involved in the plan in the manner specified in such plan.

(c) Pursuant to section 1075(b), the Project Administrator shall not use alcohol which was produced or refined outside the United States or which is of petroleum or natural gas origin.

(d) The Project Administrator shall collect and transmit to the Secretary of Energy such research and other data as may be specified in the plan.

SEC. 1077. REPORT TO CONGRESS.

(a) The Secretary of Energy, no later than sixty days after the end of each fiscal year, concluding with the fiscal year ending September 30, 1981, shall submit to Congress interim reports on the progress during each such fiscal year of the demonstration project provided for in this Act.

(b) The Secretary, no later than five years after the date of the enactment of this part, shall submit a final report to Congress on the results of the research and demonstration project provided for in this part and shall include in such report an analysis—

(1) of the research and other data collected under the project, particularly with respect to the environmental impact of substituting alcohol fuel for conventional fuel;

(2) of the projected impact on foreign energy consumption of increased use of alcohol fuel in motor vehicles;

(3) of the technological and economic feasibility of increased use of alcohol fuel in motor vehicles;

(4) of the desirability and feasibility of further research, development, and demonstration projects and implementation programs in this area, particularly with respect to expanding the use of alcohol fuels in motor vehicles; and

(5) of technological, economic, cultural, and political problems hindering commercialization of alcohol fuels ready for further use.

(c) The term "Inland States" means those States other than a Northern Tier State and other than California in the continental United States.

(d) The term "crude oil transportation system" means a crude oil pipeline within and subject to the jurisdiction of the United States, and including, but not limited to, the port, terminal, tank farm, pumping stations, off-take points, and other related fa-

cilities, associated with moving volumes of Alaskan crude oil by pipeline to Northern Tier or inland States.

INVESTMENT CREDITS TO ENCOURAGE CONSERVATION OF, OR CONVERSION FROM, OIL AND GAS OR TO ENCOURAGE NEW ENERGY TECHNOLOGY

SEC. 1031. ADDITIONAL CREDIT FOR INVESTMENT IN CERTAIN ENERGY-RELATED DEPRECIABLE PROPERTY.

(a) ALLOWANCE OF CREDIT.—Part IV of subchapter A of chapter 1 (relating to credits against tax) is amended by inserting after section 44E the following new section:

"SEC. 44F. CERTAIN ENERGY-RELATED DEPRECIABLE PROPERTY.

"(a) GENERAL RULE.—There is allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

"(1) 15 percent of the qualified investment (as determined under sections 46(c) and (d)) in section 38 property which is (or, for the purpose of applying section 46(d), will be) alternative energy property, and

"(2) by hydroelectric power, including turbine and equipment up to (but not including) the electrical transmission stage, and including the dam structure.

Mr. GRAVEL. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate is not in order.

The Senator from Alaska.

Mr. GRAVEL. I want to go over the ground once again since I think there was a lot of misunderstanding judging from statements made about how controversial these items are. They are not controversial. I do not know of any of them which are controversial.

I would like every Member to know that everything they just voted to table has already passed the Senate and is not in controversy. It primarily affects one part of the country, the West.

So what we are locked into, unfortunately, is the old producer-consumer dialog. We are not talking about increasing the price of oil or deregulation of oil or gas, so there is no reason for regionalism in this area.

The argument is made that this is too much weight for the Senator's original amendment, Senator HART's original amendment, to carry. What I have done is I have changed this. I have added gasahol which I inadvertently left out. I also added a good amendment which passed in committee and which I cosponsored, an investment tax credit for small hydro plants of 5 megawatts and less.

We received testimony that we can double the amount of hydrogeneration in this country. All we have to do is use the water that is around. A 10- to 20-foot head will provide for a 1- to 2-megawatt plant without violating any environmental standards. That is what the committee did.

So I, for one, resent somebody coming into the Committee on Finance work and pulling out a few sexy items and saying, "Boy, this we have to have or we are going to die."

The original argument was made that we need this for solar. Then we find out we have a couple of dogs in here, such as investment tax credit for insulation that we do not need. We were not happy about that in committee.

Let us be candid, it is in here, and it looks good for the homeowner to get an investment tax credit to insulate his house when the cost of insulation has just doubled. But, it has doubled, because there is not enough around. That is what is in the Senator's amendment.

The amendment you just tabled took off the tariff letting some material imports come in to lower the costs to the consumer. Who is really being fair to Mr. John Q. Public, somebody who is increasing the price or somebody who is lowering the price?

You know, I just do not understand how you can stand up here and vote for regionalism on a situation that, to my mind, is a little unfair. I am a member of the committee that worked hard on this part of the package and what this package contains. I thought gasahol had a lot of merit, and means jobs would be created in the farm area. We are probably not going to have a lot of gasahol in an oil State like Alaska, but the credit for the small hydroelectric plants, an investment tax credit for geothermal, an investment tax credit for recycling and cogeneration would help us. Now, cogeneration can affect any part of the country. Probably geothermal has an advantage for the Western part of the country. But I frankly got really upset over the fact that we always think in terms of only what is good from the homeowners' point of view, when in fact it is not the homeowners but the manufacturers who benefit, who get these credits.

I make an appeal to the body to vote for these issues; they are meritorious. You have voted for all of them before.

Do not make an issue that this stuff has not passed the House. It has simply not passed the House in this kind of form. The Senator has stated that his issue has passed the House, but it has not passed the House in that form. It has passed the House in another form, and it has not passed the conference committee, so those representations are inaccurate.

Mr. President, I would hope that I would be afforded the courtesy of an up-or-down vote on this issue on its merits. I would be prepared to afford any other Senator the opportunity to have an up-or-down vote on his issue on its merits. If there is some tactical reason why it has to be tabled, I would like to hear it.

Mr. HART. Mr. President, the issue that has tied up the Senate most of the afternoon, and I think rightly so, is very important to solving the energy problems of this country in the late 1970's.

The amendment fashioned by myself, the Senator from New Hampshire, and a dozen-and-a-half other sponsors was based on our collective judgment that the principal items in this amendment have the best chance of acceptance if broken away from the so-called energy package.

That judgment was based on the actions of the conference committee, as well as what seemed to us to be the overwhelming sentiment of both Houses. It is premised on our strong belief that the package approach has reached a stalemate which the country can not live with, where these measures were concerned, and I believe we have documented that case.

Mr. President, we are not attempting here to discuss the merits of the arguments being made by the Senator from Alaska. I voted for many of the things that he has mentioned. I had one of the first cogeneration bills introduced in Congress. I, along with many others, have advocated these kinds of incentives.

The issue is not whether you are for or against these things. The issue is whether you think there are a few areas we can agree on in both Houses and get a Presidential signature for, and do so expeditiously, not only to help the solar industry but also the homeowners and energy conservation.

I do not know, to use the language of the Senator from Alaska, what is sexy and what is not. All I know is that some things have broad support and others do not.

Mr. President, this amendment does not attempt to solve all of the energy problems in this country. That is what has tied Congress up for a year and a half. If we are to go back and examine everybody's idea about what the country ought to be doing in energy, we can start all over again. That is the problem we have with the proposal of the Senator from Alaska—that we would start all over again.

The Senate did pass many of these things. Some of them are having difficulty getting support in both Houses and in the conference. What we are trying to do is isolate the areas where we have agreement and can get them passed, as a very practical, pragmatic step.

Mr. President, my amendment has nothing to do with regionalism. It has nothing to do with one part of the country versus another. It has nothing to do, frankly, with an investment tax credit for insulation. There is no investment tax credit for insulation in the amendment of the Senator from Colorado.

So I would hope that Senators, in trying to resolve this matter and do so fairly and expeditiously, will not ask themselves whether they are good or bad proposals, and how you voted on them before. Ask yourself what has the best chance of being passed, so we can act on this measure, get it past the House, and get the President to sign it.

If everybody sticks to what he thought was a good idea a year or a year and a half ago, we are right back where we started from. Mr. President, I had no interest, in moving to table the Senator's amendment, in doing anything he seemed to think was a personal affront. It was an attempt to clarify where the principal proponents of the basic amendment stood and where the Senator from Alaska stood. That issue being clarified, hopefully, in the minds of most Senators, I am prepared to table again, but I would hope Senators would ask

themselves, "Will the vote I cast have incentives that Congress can move on?" And that the Senate would then proceed to vote on that basis.

Mr. GRAVEL. Mr. President, this amendment, which is an addition to the Senator's original amendment, does not have every possible incentive. We left off a number of incentives because they were too expensive.

Mr. President, could we have order, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. GRAVEL. Mr. President, the Senator is quite right; I used the expression "investment tax credit." It is not an investment tax credit, it is a credit for insulation, if a person goes out and insulates his home he gets a credit for 30 percent of the first $2,500. That amounts to $750 per home and then you get 20 percent of the next $7,500, up to $10,000, which amounts to $1,500.

The impact of that is that a person can insulate his home and receive that credit. But the point is that that fosters an abnormal demand upon insulation.

The price of insulation has skyrocketed. It has gone out of sight, because there is already an increased demand, with the increased cost of gas and heating oil, for people to insulate their homes. That demand is such that we cannot do anything more. This appears to be an outright gift to the homeowner, but the people who can get insulation will probably insulate anyway. Where it does become a gift is by creating an even greater demand which increases the price, since this is not a regulated product. So, obviously, we bring about windfall profits, and that is what this insulation credit does.

So we must understand the damage we are doing to the economy and the equities involved in this unusual amendment that Senator HART says must be acted on in all haste. The total cost of his package is in excess of $10.5 billion. The cost of this item alone is $4 billion. That is what the House reported out as their cost estimate for this item; so insulation credits are almost half of the whole cost. And as I stated before, the cost of my amendment, prior to gasohol and prior to the tax credit for small hydro, was $4.1 billion.

So here is an amendment that is supposed to have unusual virtue and merit. It has a $4 billion cost, and it is truly a ripoff in the area of insulation. It is not the best that our subcommittee did in that area, and it is most unfortunate that it is received as high priority.

Obviously solar is, but the solar credits are not a very costly item. Let me just say, as the prime sponsor of the bill that was originally violated and now continues to be violated, that I am asking for no more than the Senator from Colorado. I would submit that my proposal is considerably cheaper and will have a considerably larger benefit on the energy problems facing this country, albeit I will not be doing it through a credit to every single homeowner. He might think he has something extra, but in point of fact he does not. In point of fact, we have hoodwinked him because we have driven the cost of insulation up to a ruinous and preposterous level.

I want to correct the record, Mr. President. I was quoting the solar figures in the haste of dealing with this amendment. I share the concern of the Senator from Maine. I found out about this assault on my amendment late last night and did not give it credibility until lunchtime. So I have come here fast and furious.

The correct numbers in the amendment of the Senator from Colorado are 20 percent on the first $2,000 for conservation for a maximum of $400. So the figure that I gave of $750 is not correct. But the impact is still the same.

We received testimony that all of the insulation that can be used is being used so why go out and add a credit to it. It is just preposterous, particularly when that credit is going to cost $4 billion to the Treasury. All of the credits I am talking about, amount to somewhere between $4 billion and $4.5 billion.

That is what is preposterous. That is what the Senate has the opportunity of tabling. Since we want to have an opportunity to vote up or down on it, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays are ordered.

Mr. GRAVEL. I also ask unanimous consent that Mr. Hoffman of my staff be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Will the Senator yield for a question?

Mr. GRAVEL. I yield.

Mr. CURTIS. Will the Senator, by title, tell us what is included in this last amendment?

Mr. GRAVEL. I will repeat it again. The last item we put in is the item the Senator from Maine offered and I cosponsored, which is for small hydroelectric generation plants, for a small off-the-shelf plant of 1 to 5 megawatts.

Mr. CURTIS. What else?

Mr. GRAVEL. The Senator's gasohol proposal, which has been explained briefly. The other items: An investment tax credit which the committee passed and the Senate voted on. There appears to be no controversy on this. It is for a 10 percent investment tax credit for cogeneration. That means if you are already generating something and you can generate electricity as a by-product of that, then you get an investment tax credit for the cost of the additional facilities.

Next is a recycling, oil shale, and an additional tax credit for nonoil or gas generating equipment which has a useful life of more than 3 years. Obviously, that can apply anywhere. Then, the payment in lieu of a tax credit for tax exempt organizations, such as electrical co-ops.

The next is a depletion allowance for geothermal, for geopressurized methane, and for peat when it is used as a fuel.

The amendment allows a deduction—Mr. President, could we have order, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. GRAVEL. In response to the Senator's question, it allows the deduction of intangible drilling costs for wells drilled for geothermal or geopressurized methane.

This is an area which has lagged, and the reason why it has lagged is because we do not have the technology perfected. We have received testimony there is a possibility of heating half of the United States through these resources. What is more important, the paltry sum this will cost or the $4 billion which will go to the manufacturers as windfall profits on home insulation?

The last item is that this will suspend, rather than give a windfall to the manufacturers of home insulation, the tariff on home insulation and let foreign insulation come in so that it will depress the obscene levels now being charged for home insulation. So, I say to Senators who are up for election that you are subject to a charge by your opponent of voting for $4 billion to raise the cost of living when what you may have just voted to table would lower the cost of living to the homeowner who has to go out and insulate his home. That is what is involved.

It is to suspend the tariffs until June 30, 1979. It is not to suspend it permanently as we do not want to ruin the industry but we think they are making too much money and causing too much harm in the marketplace. So we are suspending the tariff.

That is what is in here for the homeowner.

Unfortunately, I think the primrose path has been heavily trodden today and I think there are some things that people may have voted against which they will be embarrassed about in the future.

I hope that answers the question of my colleagues as to what is in this amendment. I submit it is considerably more meritorious than Senator HART'S amendment although there are elements of his amendment which are extremely meritorious other than the insulation credits. I would be prepared to say that half of the cost of his amendment is meritorious and the other half is not.

Mr. LONG. Will the Senator yield?

Mr. GRAVEL. I yield.

Mr. LONG. Is the Senator willing to agree to end debate and vote on his amendment?

Mr. GRAVEL. Yes.

Mr. LONG. Mr. President, I ask that we proceed to vote on this amendment. I ask unanimous consent that we may proceed to vote.

Mr. GRAVEL. There are others who want to speak.

Mr. LONG. I ask unanimous consent that there be 5 minutes' limitation on each side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. McGOVERN. Will the Senator from Colorado yield me a couple of minutes?

Mr. HART. I yield such time out of the 5 minutes as the Senator wishes.

Mr. McGOVERN. Mr. President, I rise in support of the amendment of Senator HART. I think it has great force and effect. It is a very simple, commonsense proposal that is needed to break the impasse holding back the development of solar energy, solar devices, and solar equipment in this country.

For some 16 months it has been hung up on the tax equalization proposal, which does not seem to be going anywhere at this point. Meanwhile, all across the country homeowners and businesses, who have been expecting since a year ago last April that the Congress was going to make available tax credits which would make possible the equipping of our homes and small businesses with solar equipment, energy conserving equipment, have been left in the lurch. And not only the homeowners and the businessmen have had to go without the tax credit that they expected, but also the companies, many of which are small companies, which are manufacturing this equipment, are faced with bankruptcy because the customers are not there due to the lack of tax credits.

In my own State, I know of several small companies that are considering closing their doors after waiting all these many months for tax credits that were indicated a year ago last April, that are tied up in the tax equalization impasse. What Senator HART and others, including myself, who have joined with him in this effort are trying to do is break out of this impasse and free the proposal that the President made in April of 1977, that tax credits be made available to homeowners and to businesses that want to install energy-saving equipment solar devices, so that we can move ahead on it.

I hope very much that the Senate will not jeopardize the passage of Senator HART's amendment here this afternoon. I think it is clearly in the national interest. It will save energy, it will encourage the development of a renewable source of energy; it will create new jobs; it will save some businesses that otherwise will have to close their doors. It is an excellent investment in the public interest.

I hope the amendment, when we vote on it a little later this afternoon, will be adopted.

Mr. HART. Mr. President, I am prepared to yield back the remainder of my time on this.

Mr. GRAVEL. Mr. President, I only add that the Senator from South Dakota may have thought he cosponsored something of great merit and he is right on solar. I am the first person in this body that suggested money for additional solar energy in this country and could not get any support in 1971 and 1972. I do not take a back seat on that. I think it is a great amendment.

The problem the Senator should know, though, is that of the $10.5 billion in the amendment he just cosponsored, there is $1.5 billion for solar, which is meritorious. But, there is $4 billion in there for insulation, where the market is totally saturated right now. All it is going to do is drive the price up. So the poor people in his area that have to insulate their homes, and his is a cold weather area like mine, are going to pay more for the insulation. That will be the result of this amendment.

My amendment is going to do the opposite; it is going to open up our markets to foreign insulation coming in. I think the Members should be put on notice, maybe to somebody's embarrassment later on: You are voting $4 billion to increase the market price of insulation. I tell you, if this passes tonight, you are going to see the price of insulation going up tomorrow. Businessmen are not fools. They will think this is coming. I hope it is not coming.

I want to address myself to another point the Senator from South Dakota made, that this is going to move this part of the energy tax bill. This is not going to advance the bill one iota. This is a Christmas tree, it is not going to be accepted by the House, and the Senator from Louisiana explained that very well. I think it may have a little pressure, but not much more than that.

This area is going to be settled through other devices, not by the device of jeopardizing this particular bill.

I might say it looks good right now. But, I think the debate on this issue may some day serve as a great embarrassment to a lot of Members of this body when it is really understood by the media and by the American public that they are going to pay more to insulate their homes in New Hampshire, South Dakota, Wisconsin, and Illinois as a result of this action. There is $1.25 billion in here for solar and $4 billion for insulation, which is going to do nothing more than drive the price up.

Mr. HART and Mr. McINTYRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska has the floor.

Mr. GRAVEL. I reserve the remainder of my time.

Mr. HART. Mr. President, I only want to reiterate one fact that there is nothing contained in the Hart amendment, which is not the amendment we will be voting on, which departs significantly from the Senate-passed bill.

The Senator from Alaska speaks about that in his own amendment, but we may vote on insulation credits and the Senate already made that decision. So this is not any novel approach.

I ask unanimous consent that my colleague from Colorado (Mr. HASKELL) be added as cosponsor to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HART. I yield to the Senator from New Hampshire.

Mr. McINTYRE. Mr. President, I want to put one bogeyman to sleep here. That is the matter of insulation. A very large manufacturer has indicated plentiful supplies of insulation to my office—a new plant coming on line in Texas and other places. On the next tax bill coming up, we can pass the Senator's good idea of suspending out import tariffs on insulation.

Mr. GRAVEL. That may be the Senator's opinion, that there is a new plant going in in his backyard. Does he know why? Because they are making so much money. The best way to expand supply of a product is to let the price rise. The price has risen inordinately. Now what we are going to do is jam it up higher. That is what this vote will do.

I did not say this is a novel approach. There is no question that we voted favorably on this thing. There are a lot of things we vote on in this body that are not all that delightful.

I am persuaded that when someone stands here and tells me there is a bill that has to be rushed onto this foundation tax bill because it is an emergency, and it is really a dog like this, that it is not very good.

I do not recall whether I voted for or against insulation credits in committee, but I do recall I did not like them very much. Sometimes I vote for something I do not like. If I had a chance to vote on it again, I would vote against it on those merits.

There is something in there for solar, however, let me repeat, there is only $1.2 billion in there for solar, but $4 billion for insulation. As my colleague from New Hampshire said, there is no problem, we are building new plants. If there is no problem, we do not have to give a credit for insulation.

I yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. HART. I yielded back my time.

The PRESIDING OFFICER. If all time is yielded back, the question is on agreeing to the amendment of the Senator from Alaska. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Mississippi (Mr. EASTLAND), and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

The result was announced—yeas 42, nays 54, as follows:

[Rollcall Vote No. 355 Leg.]

YEAS—42

Bartlett	Mark O.	Ribicoff
Bentsen	Hathaway	Roth
Byrd, Robert C.	Hayakawa	Schweiker
Case	Helms	Scott
Church	Laxalt	Sparkman
Cranston	Long	Stevens
Curtis	Lugar	Talmadge
Danforth	Mathias	Thurmond
Dole	McClure	Tower
Durkin	Melcher	Wallop
Ford	Moynihan	Weicker
Goldwater	Nunn	Williams
Gravel	Packwood	Zorinsky
Hansen	Percy	
Hatfield,	Randolph	

NAYS—54

Allen	Byrd,	Domenici
Baker	Harry F., Jr.	Eagleton
Bayh	Cannon	Garn
Bellmon	Chafee	Glenn
Biden	Chiles	Griffin
Brooke	Clark	Hart
Bumpers	Culver	Haskell
Burdick	DeConcini	Hatch

Hatfield, Paul G.	Leahy	Proxmire
Heinz	Magnuson	Riegle
Hodges	Matsunaga	Sarbanes
Hollings	McGovern	Sasser
Huddleston	McIntyre	Schmitt
Humphrey	Metzenbaum	Stafford
Inouye	Morgan	Stennis
Jackson	Muskie	Stevenson
Javits	Nelson	Stone
Kennedy	Pearson	Young
	Pell	

NOT VOTING—4

Abourezk	Eastland
Anderson	Johnston

So the amendment (UP No. 1757) was rejected.

Mr. HART. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LONG. Mr. President, it seems clear to me that the Senate wishes to accept the Hart amendment, so I ask unanimous consent that we dispense with the yeas and nays on the amendment.

The PRESIDING OFFICER (Mr. PAUL G. HATFIELD). The yeas and the nays have not been ordered on the amendment.

Mr. LONG. Then, I urge the Senator to let us accept the amendment on a voice vote and go on to the next one. I will vote for the amendment.

Mr. HART. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. HART. As Senator GRAVEL very carefully pointed out, a lot depends on the degree of intensity of the chairman's commitment and conviction on these matters.

Mr. CASE. You cannot change that. [Laughter.]

Mr. HART. I think a majority of the Senate, those of us who favor this position, would feel a lot better if we felt that, as the principal negotiator for us, the distinguished committee chairman and floor manager was prepared to make a strong argument on our behalf with our House colleagues.

I know there is no way to get an oath in blood. But all of us have had the experiences at one time or another of amendments being accepted and then somehow disappearing mysteriously in conference.

One of the arguments in favor of a record vote is clearly to put the Senate on record——

Mr. LONG. I will be glad to stipulate that the record vote would be unanimous. [Laughter.]

Mr. GRAVEL. I would second that motion.

Mr. HART. Will the distinguished committee chairman agree that he will not bring back a bill for Senate approval without the provisions in the Hart amendment in that report?

Mr. LONG. Mr. President, if the House wants to take the amendment, the House is going to take the amendment.

I have fought for everything that is in this amendment. In fact, I fought for more than this. I fought for a refundable tax credit in this area. As a matter of fact, that is why we are having difficulty getting as much in this area as I would like to see done about the subject and the Senate conferees generally would like to see done. We are for it.

Some things we cannot do. We are not the House of Representatives. We do not control those pretty independent people over there. Any time you think they are not independent, they always make it a point to prove to you that they are. I cannot assure the Senator that the House will accept the amendment.

Mr. HART. The issue is, how strongly will the Senator from Louisiana urge the House to accept this amendment?

Mr. LONG. For the life of me, I cannot see what difference a yea and nay vote makes. If so, let us order the yeas and nays.

Mr. HART. All the Senator has to say is that he will do his best to bring back a conference report that contains these provisions. That is all we are asking.

Mr. LONG. Mr. President, I know what my duty is as a conferee. The Senate has not named conferees yet. The Senate might not name me. If the Senator does not think I should be a conferee, he can ask that somebody else serve. I am just trying to expedite the adoption of the Senator's amendment.

Mr. HART. All the Senator has to do is to say the magic word.

Mr. GRAVEL. Since I am the prime author of this measure, the chances are that I will be on the conference, and I will do my best.

Mr. BUMPERS. Mr. President, we could have voted long since, during the time this colloquy has been going on.

Mr. LONG. I will ask the House to agree to the amendment. I am asking them on another bill—and more than the Senator has in the amendment.

I will put it this way: If we cannot bring this back on the energy bill, I would like to see it on this bill. If they take it, that is great. So far as I am concerned, they will take it. The Senator can address himself to the House of Representatives on the amendment. I favored this long before this amendment was offered. I favored it 2 years ago.

Mr. HART. The Senator from Colorado does not have the same persuasive powers and leverage that the Senator from Louisiana has. That is why I hope the Senator from Louisiana would exercise both on our behalf.

Mr. LONG. If the Senator's amendment is agreed to, it will be the best thing in the bill. [Laughter.]

So I am not worried about asking the House to take it.

Mr. HART. Mr. President, with that statement on the record, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HART. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. BARTLETT. Mr. President, today the Senate is taking an important step to assist charitable operations through the passage of H.R. 112. During both the 94th Congress and this Congress I have introduced legislation containing the same language, and I am very pleased to see the action of the Senate today.

In my own State of Oklahoma there are approximately 200 private charitable foundations with a wide array of beneficial purposes. They range from specific grants for student education to actual treatment of medical disabilities. Recently, I received information from some 34 of these foundations indicating that their annual taxes amounted to approximately $600,000. This may seem an insignificant figure when compared to the Federal budget, but when applied as direct assistance to individuals or local beneficiaries even a few thousand dollars can mean the difference between continued operation and failure.

The excise tax on private charities was designed to cover administrative costs of Government audits on foundation books. However, the present 4-percent tax can represent several hundred thousand dollars annually on large charities. Obviously, this is far in excess of the amount necessary to maintain annual audits.

The 2-percent tax provided in this bill will more than cover all administrative costs of supervising private foundations. They are fulfilling on a voluntary basis functions which Government would otherwise have to finance and perform.

A large number of my colleagues have been interested in this legislation for some time, and I would like to congratulate the members of the Finance Committee for reporting this legislation to the floor so that action can be taken on it before the end of the 95th Congress.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 112) was passed.

Mr. LONG. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CURTIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REVISION OF MISCELLANEOUS TIMING REQUIREMENTS OF THE REVENUE LAWS

Mr. LONG. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 728, H.R. 7320.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7320) to revise miscellaneous timing requirements of the revenue laws, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Finance with amendments.

Mr. LONG. Mr. President, H.R. 7320 contains amendments relating to certain timing requirements of the Federal tax laws. These amendments have been developed from a list of legislative recommendations submitted by the American Bar Association, the American Institute of Certified Public Accountants, and various other groups including State and local bar and accounting associations.

The bill contains provisions relating to the time payment of expenses owed to related parties when the time for payment falls on a Saturday, Sunday, or legal holiday; election of special corporate liquidation treatment for involuntary conversions; election of subchapter S status by a corporation; filing of unrelated business income tax returns for exempt organizations; determining the status of a taxpayer as a farmer or fisherman for estimated income tax purposes; claiming credits or refunds arising from carrybacks; and collection of the penalty for failure to pay over withholding taxes where a bond is furnished. In addition to these seven timing provisions, the bill provides a basis adjustment for property distributions received by a corporation where gain is recognized by the distributing corporation.

All witnesses, including representatives of the Treasury Department, who testified at the hearings on this bill recommended its adoption. As a result of the testimony received, the committee adopted several perfecting modifications to the provision relating to election of subchapter S status by a corporation.

It is estimated that these provisions of the bill will not have any significant revenue effect.

The committee also adopted an amendment to permit duty-free importation of boric acid, mineral wool, or glass fibers from any most-favored-nation beginning on the date of enactment of the bill and before June 30, 1979.

It is estimated that this provision—that is the provision to relieve this boric acid and mineral wool from customs—will result in a customs revenue loss of about $1.7 million.

Mr. President, I urge that H.R. 7320 be adopted.

Mr. CURTIS. Mr. President, this is a meritorious bill. I know of no objection to it, and I urge its adoption.

The PRESIDING OFFICER. The Clerk will state the first committee amendment.

The assistant legislative clerk read as follows:

On page 5, beginning with line 11, strike through and including line 21, and insert in lieu thereof the following:

"(c) WHEN AND HOW MADE.—

"(1) IN GENERAL.—An election under subsection (a) may be made by a small business corporation for any taxable year—

"(A) at any time during the preceding taxable year, or

"(B) at any time during the first 75 days of the taxable year.

"(2) TREATMENT OF CERTAIN LATE ELECTIONS.—If—

"(A) a small business corporation makes an election under subsection (a) for any taxable year, and

"(B) such election is made after the first 75 days of the taxable year and on or before the last day of such taxable year,

then such election shall be treated as having been made for the following taxable year.

"(3) MANNER OF MAKING ELECTIONS.—An election under subsection (a) shall be made in such manner as the Secretary shall prescribe by regulations.".

(b) TECHNICAL AMENDMENTS.—

(1) Section 1372(e)(1)(A) (relating to termination in the case of new shareholders) is amended to read as follows:

"(A) an election under subsection (a) made by a small business corporation shall terminate if any person who is not a shareholder in such corporation on the day on which the election was made becomes a shareholder in such corporation and affirmatively refuses (in such manner as the Secretary may by regulations prescribe) to consent to such election on or before the 60th day after the day on which he acquired the stock.".

(2) The last sentence of section 1372(a) (relating to eligibility for election by a small business corporation) is amended to read as follows: "Such election shall be valid only if all persons who are shareholders in such corporation on the day on which such election is made consent to such election.".

(3) Subparagraph (C) of section 1372(e)(1) is amended by inserting "(or, if later, the first taxable year for which such election would have taken effect)" after "in the corporation".

The PRESIDING OFFICER. Without objection, the amendment is considered and agreed to.

The clerk will state the second committee amendment.

The assistant legislative clerk read as follows:

On page 7, line 18, strike "(b)" and insert "(c)";

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. PROXMIRE. Mr. President, will the manager of the bill yield?

Mr. LONG. I yield.

Mr. PROXMIRE. Will the manager explain? The first committee amendment sounded like a substantive amendment. Perhaps it is not.

Mr. LONG. The House bill provides a newly formed corporation may make the subchapter S election during the first 75 days of its first fiscal year rather than the 1-month period provided under present law. The committee modified this provision so that existing corporations may also make a subchapter S election during the first 75 days of its taxable year.

Mr. PROXMIRE. Is there a Treasury position on this amendment?

Mr. LONG. It is my understanding the Treasury supports this amendment.

Mr. PROXMIRE. Is there any revenue loss?

Mr. LONG. There is no revenue loss.

Mr. PROXMIRE. I thank the Senator.

Mr. LONG. This is more of an administrative type thing.

The PRESIDING OFFICER. Does the Senator ask unanimous consent that the remainder of the committee amendments be considered en bloc?

Mr. LONG. As I understand it, Mr. President, those are mainly renumbering of sections, and I ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Without objection, the remaining committee amendments are considered and agreed to en bloc.

The amendments are as follows:

On page 7, line 18, strike "amendment made by subsection (a)" and insert "amendments made by subsections (a) and (b)";

On page 7, line 23, strike "(c)" and insert "(d)";

On page 20, beginning with line 16, insert the following:

SEC. 10. TEMPORARY SUSPENSION OF DUTY ON IMPORTS OF INSULATION.

(a) IN GENERAL.—Subpart B of part 1 of the appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by inserting after item 907.20 the following new item:

" 907.40	Boric acid (provided for in item 416.10, part 2B, schedule 4).....	Free	No change	On or before 6/30/79 ".

(b) Such subpart B is amended by inserting before item 911.00 the following new items:

" 909.10	Mineral wool, in bulk, or in batts, blankets, or similar forms, whether or not lined, backed, or supported with paper, paperboard, or similar materals (provided for in item 522.81, part 1J schedule 5).....	Free	No change	On or before 6/30/79
909.30	Glass fibers in bulk; glass fibers in the form of mats, batts, blankets, felts, pads, castings, and boards, all the foregoing, of a density not over 4 pounds per cubic foot, whether or not coated, impregnated, or bonded with glue, plastics, or other substances, or lined, backed, or supported with paper, paperboard, fabrics or similar materials, or with metal mesh or foil (provided for in item 540.71, part 3A, of schedule 5).	Free	No change	On or before 6/30/79 "

(c)(1) The rate of duty prescribed in rate column numbered 1 of the Tariff Schedules of the United States, as amended by this section, shall be considered to have been proclaimed by the President as necessary or appropriate to trade agreements to which the United States is a party, not as a statutory provisions enacted by the Congress.

(2) The amendments made by this section apply with respect to articles entered,

or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

The PRESIDING OFFICER. The Senator from Kansas.

UP AMENDMENT NO. 1728

(Purpose: Disregarding, for purpose of certain taxes imposed by the Internal Revenue Code of 1954 with respect to employees, certain changes since 1975 in the treatment of individuals as employees)

Mr. DOLE. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) for himself, Mr. LUGAR, and Mr. DECONCINI proposes an unprinted amendment numbered 1728.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . (a) In determining whether an individual is an employee for purposes of chapters 21, 23, and 24 of the Internal Revenue Code of 1954, the Internal Revenue Service shall not apply any changed position or any newly stated position which is inconsistent with a general audit position in effect prior to January 1, 1976, or which is inconsistent with a regulation or ruling in effect on December 31, 1975.

(b) Notwithstanding subsection (a), an individual shall not be treated as an employee of any person for purposes of chapters 21, 23, and 24 of the Internal Revenue Code of 1954 if such person, in good faith, consistently treated such individual or the class of individuals of which such individual is a member as independent contractors for such purposes. Such person shall be deemed to have acted in good faith only if—

(1) all Federal tax returns (including information returns) required to be filed by such person were filed on a basis consistent with such person's treatment of such individual or such class of individuals as independent contractors; and

(2) such individual or such class of individuals were treated by such person as independent contractors in reasonable reliance on any of the following:

(A) past Internal Revenue Service audit practice with respect to such person;

(B) published rulings or judicial precedent;

(C) recognized practice in the industry of which such person is a member; or

(D) long-standing treatment by such person of such individual or such class of individuals as independent contractors for employment tax purposes.

In no event shall such person be deemed to have acted in good faith if the treatment of such individual or such class of individuals as independent contractors would, on the basis of the pertinent facts and circumstances, constitute negligence, intentional disregard of rules and regulations, or fraud within the meaning of section 6653 of the Internal Revenue Code of 1954.

(c) The provisions of this Act shall apply in determining the employment status of individuals for—

(1) all calendar quarters for which, on the date of enactment of this Act, assessment of an underpayment of tax, or refund of an overpayment of tax, under chapters 21, 23, and 24 of the Internal Revenue Code of 1954 is not barred by the operation of any law or rule of law, and

(2) for the calendar quarter in which this Act is enacted and for all future calendar quarters until the end of the calendar year in which the Congress enacts a law terminating the future applicability of this Act.

Mr. DOLE. Mr. President, I hope we might dispose of this amendment very quickly.

Mr. President, this amendment adopted by the Senate Finance Committee by a vote of 14 to 1 is designed to protect the independent contractor status of taxpayers who have been treated consistently and in good faith as independent contractors. This amendment incorporates my original bill, S. 3007, and the subsequent modifications I introduced in committee.

This proposal is supported by a number of groups including the American Pulpwood Association, American Retail Federation, Direct Selling Association, National Association of Independent Insurers, National Association of Realtors, National Club Association, National Hairdressers and Cosmetologists Association, National Home Furnishings Association, National Home Improvement Council, National Oil Jobbers Council, National Small Business Association, Retail Floor Covering Institute, and Specialty Advertisers Association.

Mr. President, for many years, the common law has been relied upon to distinguish independent contractors from employees for tax purposes. As a result, the law in this area was widely considered to be both reasonable and clear, and taxpayers such as direct selling representatives, insurance agents, real estate salespersons, and service station operators were treated as independent contractors. Many other taxpayers also structured their economic affairs under what they believe was clearly the law.

Beginning in the early 1970's, however, the Internal Revenue Service began to rescind the longstanding rules in this area and to adopt new and harsh interpretations of the common law in audit procedures. This produced great confusion in what had been a reasonably well-defined area.

Assessments involving millions of dollars have been made or proposed, and several businesses have ceased operations as a result. Millions of income-earning opportunities are threatened. These adverse consequences were confirmed in recent testimony before the Subcommittee on Taxation and Debt Management where several witnesses testified to the devastating economic consequences to small business resulting from these retroactive assessments.

Mr. President, the widespread alarm resulting from the actions of the Internal Revenue Service was recognized by Congress, and the Internal Revenue Service was urged in the conference report accompanying the Tax Reform Act of 1976 to "not apply any changed position or any newly stated position which is inconsistent with a prior general audit position in this general subject area to past, as opposed to future, taxable years" until the completion of a study of the problem by the staff of the Joint Committee on Taxation. Despite this urging, testimony before the Subcommittee on Taxation and Debt Management made clear that the IRS has continued to rescind longstanding rules and to adopt new and harsh interpretations of the common law.

Mr. President, this issue is enormously important. The Commissioner of Internal Revenue recently has indicated that—

At the present time in two districts of one region alone, there are three potential assessments against taxpayers ranging from $6 million to $60 million, involving an insurance company, an oil jobber, and a direct sales company.

He has also stated that—

There are situations where assessments exceed a taxpayer's net worth by a considerable amount. Furthermore, testimony before the Committee on Finance Subcommittee on Taxation and Debt Management has indicated that taxpayers have already been driven out of business by IRS employment tax assessments based on reclassifying individuals as employees even though they had long been considered by all to be independent contractors. Given these dire circumstances, it would be wholly inequitable to continue for another year to subject taxpayers to the confusion and uncertainty which now exists in this area of the tax law.

Mr. President, I urge the Senate to adopt this amendment which has received large bipartisan support.

Mr. President, in addition to those Senators mentioned as original cosponsors, the Senator from Indiana (Mr. LUGAR) and the Senator from Arizona (Mr. DECONCINI), the following Senators have also cosponsored S. 3007: Senators CURTIS, MCCLURE, HATCH, CHURCH, TOWER, DOMENICI, HAYAKAWA, GRAVEL, EAGLETON, SCHMITT, THURMOND, NELSON, and HASKELL.

I only suggest that perhaps this might be an amendment that could be accepted by the committee.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. PROXMIRE. My understanding is that the Treasury does not oppose this amendment; is that right?

Mr. DOLE. It is my understanding that the Treasury does oppose the amendment.

Mr. PROXMIRE. The Treasury does oppose the amendment?

Mr. DOLE. Does oppose it, yes.

Mr. PROXMIRE. Why does the Treasury oppose it?

Mr. DOLE. They have another proposal which as I understand it might defer any further action for a period of 1 year. They have a freeze on assessments. They made their case before the Finance Committee. I might say to the distinguished Senator from Wisconsin, after hearing their presentation the committee voted 14 to 1 to adopt the amendment.

Mr. PROXMIRE. Can the Senator tell me if they oppose the amendment, because of a revenue loss in part?

Mr. DOLE. I do not think it is so much a revenue loss. As far as I know there are no figures on revenue loss.

Mr. LONG. The reason is that the Treasury would like to have a permanent solution for the independent contractor problem. They do not have a rec-

ommendation to make at this point, but we would think that the Treasury will be down next year with recommendations on how we should tax independent contractors.

Mr. PROXMIRE. The author of the bill indicated there is no estimate as to the Treasury loss.

Mr. DOLE. I might say I do not think there will be any loss as far as this Senator knows. I do not think they gave us any estimate. They were not certain there would be any loss.

Mr. PROXMIRE. Will the Senator tell us in his judgment or the judgment of the staff of the joint committee there would be a significant loss?

Mr. LONG. The Treasury, as I understand it, would have no objection to freezing the present situation, but they do not want a forgiveness of any past liability that the Treasury might assert until we have a permanent solution to this problem and obviously the taxpayers would like to know where they stand. Therefore, I think the attitude of the committee is that of the taxpayer that they would like to know where they stand.

The Treasury would like to hold out for a permanent solution to the problem.

Mr. PROXMIRE. I am sympathetic with that, and I think I would support the amendment, but I want to be sure the manager of the bill and the committee indicate they do not think there is a sufficient loss or if there is a loss.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. LONG. There is a long list of big cases in litigation right now, and I do not think anyone can predict how those cases will come out if we continue to litigate. In other words, you have situations all over the country where people have real estate agents and others who have been doing business as independent contractors. One can understand why the Treasury, for purposes of effective administration, would like to make employers do the withholding and do the bookkeeping so they can more effectively collect their money.

But, on the other hand, it is a great big burden on behalf of taxpayers to have to do all that, so you and I if we were in the real estate business and we had people working for us would much prefer not to fool around with all that and let them do their own accounting with Uncle Sam. But Treasury would like to make us regard those people, whom we choose to regard as independent contractors, as our employees so they can make us withhold and account for it and do the bookkeeping for the Treasury.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. PROXMIRE. Yes.

Mr. CURTIS. I believe this would not change the tax liability, the income tax, very much, if any. It is very burdensome from the standpoint of bookkeeping and withholding. Whether or not someone is an employee or an independent contractor would make a difference on the liability for social security taxes. An independent contractor pays social security taxes at 1½ times the employee rate. If he was an employee, both employer and employee would pay.

Keep in mind these are individuals who have been treated as independent contractors for years and years.

The raising of this question by the Treasury has to be shown in their financial statements, puts a cloud over their assets, and they have a difficult time to operate.

The Treasury suggests a partial stopgap, but it would still keep it open and be burdensome for the businessman.

What this would do would be to leave it open so that Congress could later consider the final solution of the Treasury but, in the meantime, it would relieve their business of the uncertainty during this interim period.

Mr. PROXMIRE. I thank the Senator. Let me just persist in one more question. As I understand it, the manager says there is no way you can tell what the loss will be. It depends on the outcome of litigation. Could the manager indicate what the outside figure might be so we would have some notion of how this could affect the Treasury? Will it be in tens of millions, hundreds of millions of dollars?

Mr. LONG. I say to the Senator we just do not have a figure. If I had it I would be glad to give it to the Senator, but we just do not have it.

This is an area that could involve a lot of people. If the Treasury were successful in what they would like to contend, I am frank to say that if they were successful, as they would like to be, the Congress would intervene on behalf of the taxpayers so that while they hope they raise a great deal of money, Congress would not let them do that it they were as successful as they hope to be. We cannot blame them for zealously trying to obtain every dollar they can from the public's fist. But when the taxpayer screams, beyond a certain point Congress gets into the act as in the case here.

● Mr. DECONCINI. Mr. President, Senator HASKELL and I introduced a bill, S. 3037, on May 4, which has a direct bearing on the problem addressed by the amendment now before us. The measure we introduced, however, is more narrowly drawn and focuses specifically upon certain recent IRS rulings affecting the real estate industry.

These rulings, 76–136 and 76–137, were designed to effect far-reaching changes in established policy regarding the occupational classification and tax treatment of real estate agents. The result was a sudden, unanticipated, and dramatic shift in the definition of "independent contractor" within the real estate industry. The changes envisioned by these rulings would have been severely disruptive even had they been limited to future tax years. But, IRS had the arrogance to make them retroactive as well. As a consequence, innumerable realty firms were abruptly faced with retroactive assessments for payroll taxes on individuals whom they had, in perfectly good faith, treated as independent contractors, not employees. Many of these businesses, had the IRS been able to carry out its intentions, would doubtless have been bankrupted, creating untold personal hardship, and promoting the structural concentration of what has traditionally been one of the most highly competitive sectors of the American free enterprise system.

That would have been genuinely tragic had it been allowed to occur. Fortunately, thanks to congressional opposition and initiatives like S. 3007 and S. 3037, the Treasury has apparently had second thoughts about the advisability of such an unprecedented reversal of longstanding policy and has announced its intention to rescind the two rulings in question. It has yet to do so, however, and there is presently no statutory barrier to another IRS attempt to fatten the Federal coffers by simply changing its regulations, regardless of the cost and unfairness to those affected.

I am sure that the Senator from Kansas would agree as, indeed, would every Member of this body, that the proper forum for the alteration of basic policy guidelines of this sort is the legislative process. For this reason, I believe it is imperative that the Congress enact a moratorium on IRS rulemaking in this area until a comprehensive legislative solution has been framed. That was, and is, the objective of S. 3037, insofar as the real estate industry is concerned. As I understand it, that is essentially the goal of S. 3007.

We must not stand idly by and permit IRS to make capricious and unwarranted changes in revenue policy. To do so, would be to acquiesce in yet another usurpation of the prerogatives of the legislative branch. I, therefore, urge my colleagues to add their support to ours and insure the adoption of this amendment.●

Mr. DOLE. Mr. President, I might just emphasize that we tried to determine whether there would be any loss, and we were told it would be insignificant. There are, of course, attempts by the IRS to recover. We know three cases that range from $3 million to $60 million, and I assume if they were successful in every case it would amount to some revenue gain.

But from what we were able to determine, the revenue impact would not be very significant.

It would seem to me that the amendment we propose would at least retain the status quo until Congress takes some action. That is all we are suggesting. It would alleviate the situation in two ways: First, it is going to stop the IRS from changing the audit procedures; and, second, we recognize the independent contractor status by definition. If he has been treated as an independent contractor in good faith based on his past record, we think that should continue.

It seemed to us in the committee, again by a margin of 14 to 1, after hearing the Treasury's opposition, that we ought to take this action. I suggest there would be no great revenue loss.

SEVERAL SENATORS. Vote. Vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

AMENDMENT NO. 3471

(Purpose: For the relief of Josée and René de Chambrun)

Mr. LONG. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an amendment numbered 3471 for Mr. MATHIAS.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . For the purpose of determining the liability for tax of Josée or René de Chambrun, citizens of France, under chapter 12 of the Internal Revenue Code of 1954, and for the purpose of determining the liability for tax of the estate of the said Josée or René de Chambrun under chapter 11 of such Code, the Fondation Josée et René de Chambrun, Paris, France, shall be treated as if it were an organization described in sections 2522(b)(2) and 2106(a)(2)(A)(ii) of such Code, respectively.

Mr. LONG. Mr. President, this amendment is at the desk printed with my name on it. Actually this is a matter brought to our attention by the Senator from Maryland (Mr. MATHIAS). It deals with the foundation of Josee et Rene de Chambrun.

Under present law, Federal gift and estate taxes are imposed upon lifetime and death transfers by nonresident aliens with respect to property which is situated in the United States—sections 2501, 2511, and 2101–2108 of the Internal Revenue Code. For this purpose, nonresident aliens are allowed charitable deductions for transfers to domestic corporations which are organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, but not for transfers to foreign charities—sections 2106(a)(2) and 2522(b)(2) of the Code.

The rule which allows gift and estate tax deductions to nonresident aliens only for transfers to a domestic charity would disallow a deduction for transfers by a nonresident alien to the Foundation Josee et Rene de Chambrun. This foundation was created to preserve the home of General Lafayette, near Paris, along with his personal papers, belongings, and correspondence. Because the home of General Lafayette is located in France, it is not convenient for the foundation to be organized as a domestic corporation. However, the foundation, similar to many domestic charities, maintains property which is important to the history of this country. The foundation has qualified for income tax exemption in the United States.

The committee amendment would allow deductions for Federal gift and estate tax purposes to Josee and Rene de Chambrun and their estates for transfers to the Foundation Josee et Rene de Chambrun to the same extent as if the foundation were a domestic corporation.

The committee amendment would be effective for gifts made in calendar quarters, and for decedents dying, after the date of enactment.

Mr. CURTIS addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. CURTIS. Under our gift and estate tax law if a citizen gives part or all of his property to a charitable organization, he will be entitled to a charitable deduction. It makes no difference whether the organization is a U.S. organization or a foreign organization, just so long as it is a legitimate charity under our standards. However, we have a slightly different rule in our law for nonresident aliens who give their U.S. assets to charity. These people can get a charitable deduction only if the property is given to a U.S. corporation. No one seems quite sure as to why there is this difference in the law, but it was probably an oversight.

Every Senator should be particularly interested in this legislation because of a French foundation which has been created to preserve the home of General LaFayette, near Paris, along with his personal papers, belongings, and correspondence. The foundation has been operating for nearly 30 years and is almost exclusively supported by gifts of a Mr. and Mrs. Chambrun who are nonresident aliens. It is their intention to leave their entire estate to the foundation. However, it is feared that the curious twist in our law will impose a tax and not leave enough for the estate to sufficiently endow the foundation.

I need not tell you about the contributions of General LaFayette to this country. This foundation will not only be a museum but will also provide a treasure trove for American historians and researchers.

This foundation is obviously well regarded and has already been recognized by the IRS as tax exempt for U.S. income tax purposes.

This legislation would make the Code consistent and apply the same rule for aliens and nonaliens alike.

Mr. President, I rise in support of the proposition. As I understand it, the home of General Lafayette outside of Paris contains his letters, his files, his memoranda, all of which constitute a great portion of the history of the United States because these letters were exchanged with the men of his time, men like George Washington, Hamilton, and all the others.

This change in the gift tax law is one to which the Treasury has no objection. They prefer to do it by treaty, but otherwise they favor the objective. They favor the tax consequences that this would bring about.

It is important to the history of the United States and it is also important that we do this by statute because treaties take a long time and they get involved in other things.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana.

The amendment was agreed to.

AMENDMENT NO. 3522

(Purpose: To amend the Internal Revenue Code of 1954 with respect to certain charitable contributions)

Mr. LONG. Mr. President, I send to the desk an amendment and ask that it be reported.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG), proposes Amendment No. 3522.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . (a) Section 170(b)(1)(A)(iii) of the Internal Revenue Code of 1954 (relating to percentage limitations on charitable contributions) is amended by adding at the end thereof the following: "or an organization which on or before May 26, 1969 and continuously thereafter to the close of the taxable year, operated and maintained as its principal functional purpose facilities for the long-term care, comfort, maintenance, or education of permanently and totally disabled persons, elderly persons, needy widows, or children,".

(b) The amendment made by subsection (a) shall take effect on January 1, 1970.

Mr. LONG. Mr. President, this amendment was approved by the committee. It relates to the public charity status of certain long-term care organizations.

Under present tax law, a privately endowed long-term care organization—such as a convalescent home or orphanage—may not qualify as a public charity.

Public charities are not subject to the private foundation excise taxes. In general, the rules relating to income tax deductions by individuals for contributions to public charities or to private operating foundations are more favorable to the donor than the rules relating to the deductibility of contributions to private nonoperating foundations.

The committee amendment excludes from private foundation status an exempt organization which, on or before May 26, 1969, and continuously thereafter to the close of the taxable year, operates and maintains as its principal functional purpose facilities for the long term care, comfort, maintenance, or education of permanently and totally disabled persons, elderly persons, needy widows, or children. The amendment applies retroactively to January 1, 1970.

Mr. CURTIS. Mr. President, I support the amendment. I believe it is meritorious. It is just and fair, and I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. PROXMIRE. Mr. President, will the Senator indicate whether or not this amendment would include the Sand Springs Home and the Myron Stratton Home, those two foundations?

Mr. LONG. Yes.

Mr. CURTIS. The Sand Springs Home is an organization exempt from tax under section 501(c)(3), which is classified as a private foundation because of a large endowment. It is in no way controlled by the family which founded it in 1908, but rather by the Grand Lodge of the Oklahoma Masons.

The home operates a facility for the long-term care of needy widows and orphans assigned to it by the courts of the State of Oklahoma. Classification as a private foundation results in the diversion of substantial income to the payment of a 4-percent excise tax on investment income. More importantly, it requires the distribution of substantial amounts of income and principal each year, in excess of the operating needs of the fund, preventing the fund from setting aside money which may well be

needed for future capital needs of the home.

The amendment before us would solve the problem of the home—and of similarly situated orphanages, widows colonies, and homes for the aged—by including such facilities in the list of organizations exempt from the private foundation rules contained in code section 170(b)(1)(A)(iii). This amendment would accomplish its purpose in a simple, uncomplicated way by creating a separate functional classification exempt from private foundation rules. It would be administratively simple to determine whether an organization falls within the described functional classification or does not, and therefore it would be easy to determine which organizations qualify under the new provision. The functional classification approach is a consistent one because long-term care facilities have long-term obligations which require long-term planning and accumulation of capital. Since grantmaking charities have no such needs, it is unwise for the taxing statute to treat grantmaking charities and long-term care facilities in the same way. This principle was recognized in 1969 with respect to universities and hospitals, but probably through inadvertance, not to long-term care facilities.

Mr. PROXMIRE. Mr. President, I am very much concerned about this amendment. I have been told that these two foundations have been trying for 6 years to get out from under private foundation status.

The law makes a distinction between public charities—receiving financial support from a broad spectrum of the public—and private foundations—receiving financial support from endowments or private investments. The main distinctions are that private foundations have strict self-dealing rules to prevent principals from dealing between themselves as directors of the foundation and as individuals, prohibitions against excess business holdings, certain payout requirements to insure that income is paid out into the charitable stream each year, rules preventing jeopardy investments, etc. Also, the law imposes a 4-percent excise tax on private foundations to help pay for monitoring their activities.

Sand Springs Home and the Myron Stratton Home are two foundations with substantial investments in oil and gas and in real estate. They have been trying for 6 years, as I said, to get out from under private foundation status. They first argued that it is not the anti-self dealing rules they are concerned about but the payment of the excise tax and the—then—6-percent minimum payout rule applicable to private foundations.

The Ways and Means Committee originally had drafted a bill for these foundations that would reduce the 4-percent excise tax to 2 percent and cut the payout rate to two-thirds of what it had been. It did not pass.

Since then, a cut in the payout rate was approved for all private foundations—1976 act. A bill to reduce the excise tax to 2 percent was before the Senate today. It has, as I understand, passed earlier.

Obviously, the real purpose for the change is to get out from under the other requirements applicable to foundations.

As I understand it, these two homes, while they do do legitimate work for the elderly and the infirm, also have four to five times as much of their assets in real estate, oil, and gas, in dolomite, and in other activities, and while I would not charge that their work for the elderly and infirm is a cover, nevertheless this amendment permits them to escape, as I say, from the private foundation provisions of the law. No more than one quarter of their fund are invested in assets that are directly related to their exempt function.

As I understand, the lobbyists have lined up 26 other long-term care facilities who will benefit—presumably because of the elimination of the excise tax—obviously bootstrapping their support for the whole bill.

There is nothing wrong, now, with being a private foundation except you will pay a 2-percent excise tax to help IRS administer oversight since there is little other Federal accountability as to the management of these facilities. They do not have to go to the public for financial support. As a result of a lesser degree of public accountability, the Congress imposed certain restrictions in 1969 on private foundations.

Sand Springs had about $18 million in assets a few years ago. About three-fourths of the assets are invested in stock, oil, and gas, dolomite—about $5 million—and unimproved real estate.

Their investments were so extensive, they realized about $5 million in depreciation, depletion, and other writeoffs in 1971 according to their auditors report.

They will claim they are spending most of their income on operating the care faculty. But that is taxable income and does not include the cash generated from the huge tax writeoffs.

In addition, under the 1969 act, private foundations must divest themselves of certain wholely owned businesses or pay an excess business holdings tax. Sand Springs wants to avoid this requirement and retain control of these private enterprises.

The annual report which I have in my hand for 1976 for Sand Springs shows they had assets that year of more than $20 million.

Mr. LONG. Mr. President, some of the sponsors of the amendment are here, and I would like them to address themselves to the point that concerns the Senator.

We tried to work this matter out in the committee to satisfy the previous Treasury objection, and as I understand the Treasury has no objection to the bill as it has been modified. I would think some of those who are more familiar with this situation than the Senator from Louisiana, who were sponsors of the measure, might like to explain in more detail the merits of their position.

Mr. BARTLETT. Mr. President, I would say to my friend from Wisconsin that this amendment to the bill adds to the list of organizations exempt from private foundation rules; two institutions which operate and maintain facilities for the principal function of providing long-term care, comfort, maintenance, or education to indigent widows, elderly persons, children, and the permanently and totally disabled.

Now, if this home was operated by a civic club or a chamber of commerce or a labor union, it would have an exempt status, and I think it is just a matter of equity and justice that the Sand Springs Home, in providing this kind of care, should likewise enjoy a similar status.

Mr. PROXMIRE. Mr. President, if the Senator will yield, I do not understand why we should give an organization whose assets are obviously 80 percent invested in business a complete exemption from the private foundation provisions. Certain rules, such as self-dealing, excess, and business holdings should apply to them. It would seem to me is not right, not fair, and not equitable compared to other organizations which are subject to these rules.

Mr. BARTLETT. I think when you are talking about commercial enterprise, you are talking about their income, are you not?

Mr. PROXMIRE. Yes, indeed.

Mr. BARTLETT. Well, they operate from their income, and obviously if they did not have the income they would not be able to fund and operate this facility. It is providing very important care for widows and indigent children in our community.

Mr. PROXMIRE. Well, widows and cihldren are fine, but it would seem to me we ought to have some kind of private foundation restrictions apply to them.

But I pointed out a random year where three-fourths of the assets are invested in businesses and are not directly related to the care of the widows and others for whom this exemption is being pressed in the amendment.

Mr. BARTLETT. Well, I do not think that because they are not spending it right now, they might not spend it in the future. But it is very important to me to have them have the same tax status as someone else operating the same kind of program. I think the important thing here is that they provide this kind of care. They have been doing it for a long time, and I think that they plan to continue it forever. It is a long-range program, and I think that it is important that they do have proper financing, that would permit them to expand in the future.

Mr. PROXMIRE. May I ask the Senator why he cannot be satisfied with the bill that passed earlier, changing the tax from 4 to 2 percent? That seems to take care of the principal problem in most of these operations. It is true that they will not take care of the self-dealing and excess business holdings, but I think it would take care of the others.

Mr. LONG. First let me say that in regard to the tax on foundations from 4 to 2 percent, I voted against it in the committee. I am not interested in that part of it. But the committee reported it, and I was the only one in the committee who voted against it. I accommodated myself to the views of the majority of the committee and of the Senate.

But in this case, as I understand it, it

is true that a large portion of their assets are invested, but the income derived from those investments does go to support this home.

Mr. PROXMIRE. May I say to the Senator, we were informed earlier the Treasury either supported this or had no position. I am now informed that Treasury is definitely opposed to this. The office of the Assistant Secretary for Tax Policy has just informed us of that fact. We called them and they indicated that the Treasury is opposed to this, and I can see why they are.

Mr. LONG. In prior years they have been opposed to this. When this matter came up in the committee, the man who spoke for the Treasury sat there and nodded his head as though he agreed with it, and suggested the type of provision to cover this situation, and thus, I have to assume that they do not object to it.

Mr. PROXMIRE. This is not an assumption. We have the specific word. I will give the name of the man from Treasury, Dennis Drapkin. He says their position now is opposition to this amendment. They think it is wrong, that it is a mistake.

Mr. LONG. That man is far lower down in the hierarchy than Don Lubick, who is the Assistant Secretary for Tax Policy. Don Lubick sat there and worked with us in dealing with this situation. He is the man who should be speaking for the Treasury. He sat there and, as I took from his comments, was not opposed.

Mr. PROXMIRE. In view of the fact that there seems to be a conflict that we cannot reconcile at the moment, would the Senator agree to set aside this amendment and take it up on one of the later tax bills? He has four or five others coming up. It will be another hour or so before we finish. Perhaps we can get word from the Treasury on what their position is and be better informed when we decide what to do with the amendment. Would that be satisfactory?

Mr. LONG. Mr. President, I will withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 7320), as amended, was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REVOCATION OF ELECTION TO RECEIVE RETIRED PAY AS JUDGE OF TAX COURT

Mr. ROBERT C. BYRD. Mr. President, I ask that the Senate proceed to the consideration of Calendar No. 1033, H.R. 8811.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 8811) to amend section 7447 of the Internal Revenue Code of 1954 with respect to the revocation of and election to receive retired pay as a judge of the tax court.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Finance.

Mr. LONG. Mr. President, H.R. 8811 amends the Internal Revenue Code to allow any Tax Court judge or former judge to revoke his or her election to come under the Tax Court retirement system. Such an individual then could attempt to qualify for civil service benefits.

Under present law, a Tax Court judge may be covered either by the civil service retirement system or the Tax Court retirement system. In order to be covered by the Tax Court system, the Tax Court judge must make an irrevocable election to be covered by it. Once the election has been made, the judge is forbidden to receive benefits under the civil service retirement system, regardless of whether he or she ever qualifies for Tax Court benefits, or otherwise would qualify for civil service retirement. As a result, if a judge elects to be covered by the Tax Court system but fails to serve long enough to qualify for Tax Court retirement benefits, that judge finds himself or herself excluded from both retirement systems.

The bill corrects this inequitable result. It allows a judge or former judge to revoke an election to be covered by the Tax Court retirement system at any time before becoming entitled to benefits. That individual then could attempt to qualify for civil service retirement benefits.

If the judge or former judge makes contributions to the civil service retirement fund that would have been required if the judge had been covered by Civil Service, then his or her service time as a Tax Court judge will be counted as creditable time for civil service retirement benefit purposes. Similar conforming amendments are made as to survivors' benefits. The bill, however, does not allow a person to receive both Tax Court and civil service retirement or survivors' benefits.

Mr. President, the bill corrects an inequity in present law. Both the Treasury Department and the Civil Service Commission have stated that they have no objection to the enactment of the bill. I urge the Senate to approve H.R. 8811.

The PRESIDING OFFICER. Are there amendments to the bill?

AMENDMENT NO. 3470

(Purpose: Treatment of prepaid legal service contributions for Federal insurance contributions act and Federal unemployment tax act taxes)

Mr. LONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an amendment numbered 3470.

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . (a) Section 3306(b) of the Internal Revenue Code of 1954 (relating to the definition of wages for purposes of the Federal Unemployment Tax Act) is amended—

(1) by striking out "or" at the end of paragraph (10);

(2) by striking out the period at the end of paragraph (11) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new paragraph:

"(12) any contribution, payment, or service, provided by an employer which may be excluded from the gr. ; income of an employee, his spouse, or his dependents, under the provisions of section 120 (relating to amounts received under qualified group legal services plans).".

(b) Section 3121(a) of such Code (relating to the definition of wages for purposes of the Federal Insurance Contributions Act) is amended—

(1) by striking out the period at the end of subparagraph (15) and inserting in lieu thereof "; or"; and

(2) by adding at the end thereof the following new paragraph:

"(16) any contribution, payment, or service, provided by an employer which may be excluded from the gross income of an employee, his spouse, or his dependents, under the provisions of section 120 (relating to amounts received under qualified group legal services plans).".

(c) Section 209 of the Social Security Act is amended—

(1) by striking out "or" at the end of subsection (n);

(2) by striking out the period at the end of subsection (o) and inserting in lieu thereof "; or"; and

(3) by inserting after subsection (o) and before the sentence beginning with "For purposes of this title, in the case of domestic service" the following new subsection:

"(p) Any contribution, payment, or service, provided by an employer which may be excluded from the gross income of an employee, his spouse, or his dependents, under the provisions of section 120 of the Internal Revenue Code of 1954 (relating to amounts received under qualified group legal services plans).".

(d) The amendments made by this section shall apply with respect to taxable years beginning after December 31, 1976.

Mr. LONG. Mr. President, I would like the record to show this amendment is offered on behalf of Senator MORGAN and Senator PACKWOOD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. The committee amendment provides that any contributions, payments, or services which are excluded from an employee's gross income under the qualified group legal services plan also are excluded from wages for payroll tax purposes.

Under the Tax Reform Act of 1976 amounts contributed by an employer to a qualified group legal services plan for employees, as well as the value of any services received by an employee or any amount paid to an employee under the plan as reimbursement for legal services for the employee, his spouse, or his dependents, was excluded from an employee's gross income.

However, since the 1976 act did not expressly exclude these amounts from the definition of "wages" which are subject to payroll taxes under the Federal Insurance Contributions Act (FICA) and the Federal Unemployment Tax Act (FUTA), a question has arisen whether the excludable amounts are subject to FICA and FUTA payroll taxes.

The committee amendment provides that any contribution, payment, or service which is excludable from an employee's gross income under the qualified group legal services plan provisions also is to be excluded from wages for FICA and FUTA payroll tax purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Without objection, the amendment is agreed to.

AMENDMENT NO. 3523

(Purpose: Relating to the treatment of an involuntary conversion of real property to which the special farm valuation provisions of the Federal estate tax apply)

Mr. LONG. Mr. President, on behalf of Senator DOLE, I send another amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG), on behalf of Mr. DOLE, proposes an amendment numbered 3523.

Mr. LONG. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . INVOLUNTARY CONVERSION OF SPECIALLY VALUED FARM, ETC., REAL PROPERTY.

(a) IN GENERAL.—Section 2032A of the Internal Revenue Code of 1954 (relating to valuation of certain farm, etc., real property) is amended by adding at the end the following new subsection:

"(h) SPECIAL RULES FOR INVOLUNTARY CONVERSION OF QUALIFIED REAL PROPERTY.—

"(1) TREATMENT OF CONVERTED PROPERTY.—

"(A) IN GENERAL.—If there is an involuntary conversion of an interest in qualified real property and the qualified heir makes an election under this subsection—

"(i) no tax shall be imposed by subsection (c) on such conversion if the cost of the qualified replacement property equals or exceeds the amount realized on such conversion, or

"(ii) if clause (i) does not apply, the amount of the tax imposed by subsection (c) on such conversion shall be the amount determined under subparagraph (B).

"(B) AMOUNT OF TAX WHERE THERE IS NOT COMPLETE REINVESTMENT.—The amount determined under this subparagraph with respect to any involuntary conversion is the amount of the tax which (but for this subsection) would have been imposed on such conversion reduced by an amount which—

"(i) bears the same ratio to such tax, as

"(ii) the cost of the qualified replacement property bears to the amount realized on the conversion.

"(2) TREATMENT OF REPLACEMENT PROPERTY.—For purposes of subsection (c)—

"(A) any qualified replacement property shall be treated in the same manner as if it were a portion of the interest in qualified real property which was involuntarily converted, except that with respect to such qualified replacement property the 15-year period under paragraph (1) of subsection (c) shall be extended by any period, beyond the 2-year period referred to in section 1033(a)(2)(B)(i), during which the qualified heir was allowed to replace the qualified real property,

"(B) any tax imposed by subsection (c) on the involuntary conversion shall be treated as a tax imposed on a partial disposition, and

"(C) paragraph (7) of subsection (c) shall be applied—

"(i) by not taking into account periods after the involuntary conversion and before the acquisition of the qualified replacement property, and

"(ii) by treating material participation with respect of the converted property as material participation with respect to the qualified replacement property.

"(3) DENINITIONS AND SPECIAL RULES.—For purposes of this subsection—

"(A) INVOLUNTARY CONVERSION.—The term 'involuntary conversion' means a compulsory or involuntary conversion within the meaning of section 1033.

"(B) QUALIFIED REPLACEMENT PROPERTY.—The term 'qualified replacement property' means—

"(i) in the case of an involuntary conversion described in section 1033(a)(1), any real property into which the qualified real property is converted, or

"(ii) in the case of an involuntary conversion described in section 1033(a)(2), any real property purchased by the qualified heir during the period specified in section 1033(a)(2)(B) for purposes of replacing the qualified real property.

Such term only includes property which is to be used for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the qualified real property qualified under subsection (a).

"(4) CERTAIN RULES MADE APPLICABLE.—The rules of the last sentence of section 1033(a)(2)(A) shall apply for purposes of paragraph (2)(B).

"(5) ELECTION.—Any election under this subsection shall be made at such time and in such manner as the Secretary may by regulations prescribe.".

(b) ADJUSTMENT OF BASIS.—Section 1016 of such Code (relating to adjustments to basis) is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) INCREASE IN BASIS IN THE CASE OF CERTAIN INVOLUNTARY CONVERSIONS.—

"(1) IN GENERAL.—If there is a compulsory or involuntary conversion (within the meaning of section 1033) of any property the basis of which is determined under section 1023 and an additional estate tax is imposed on such conversion under section 2032A(c), then the adjusted basis of such property shall be increased by an amount which bears the same ratio to such tax with respect to the conversion of that property as—

"(A) the net appreciation in value of such property, bears to

"(B) the excess of—

"(i) the value of such property for purposes of chapter 11 as determined with respect to the estate of the decedent without regard to section 2032A; over

"(ii) the value of such property for purposes of chapter 11 as determined with respect to the estate of the decedent with regard to section 2032A.

"(2) NET APPRECIATION IN VALUE.—For purposes of this subsection, the net appreciation in value of any property shall be determined in accordance with section 1023(f)(2) except that—

"(A) the adjusted basis taken into account shall be increased by any adjustment under section 1023,

"(B) the fair market value of such property shall be determined without regard to section 2032A, and

"(C) any net appreciation in value in excess of the amount determined under paragraph (1)(B) shall be disregarded.

"(3) TIME ADJUSTMENT MADE.—Any adjustment under paragraph (1) shall be deemed to have occurred immediately before the compulsory or involuntary conversion.".

(c) CONFORMING AMENDMENT.—Paragraph (1) of section 2032A(f) of such Code (relating to period of limitations) is amended by inserting "(or if later in the case of an involuntary conversion to which an election under subsection (h) applies, 3 years from the date the Secretary is notified of the replacement of the converted property or of an intention not to replace)" immediately before ", and".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to involuntary conversions after December 31, 1976.

Mr. LONG. Mr. President, under present law, certain real property used as a farm for farming purposes or in a closely held trade or business may be valued for Federal estate tax purposes by reference to its actual use—"special use valuation"—rather than at its fair market value determined on the basis of highest and best use.

To assure that special use valuation property continues to be used for farming or for other closely held business uses, a recapture rule is provided. In general, this rule results in recapture of the estate tax benefit of the special valuation if the heir disposes of the property or changes its use within 15 years of the death of the decedent—or, if earlier, prior to the death of the heir.

Under present law, this recapture rule applies to special use valuation property which is involuntarily converted—such as by condemnation—even if the proceeds of the conversion are reinvested in property used for the same special use.

The amendment provides that if an involuntary conversion of qualified real property takes place, no recapture of the estate tax benefit will occur if the property is replaced by other real property of at least equal value to be used for the same use. To the extent involuntarily converted property is not replaced, the recapture tax would be taken into account as a basis adjustment in deter-

mining gain or loss for income tax purposes in a manner similar to the adjustment made on account of estate taxes.

SPECIAL USE VALUATION PROPERTY

Mr. DOLE. Mr. President, the amendment submitted by the chairman relating to the involuntary conversion of special use valuation property is designed to correct an oversight in the Tax Reform Act of 1976. The amendment adopted by the committee incorporates the essential features of a bill I introduced, S. 3125, earlier this year.

INVOLUNTARY CONVERSION

Mr. President, the Tax Reform Act of 1976 provided that certain property used in farming or a closely held business could be held for estate tax purposes according to its current use rather than its best use. Special use valuation provides significant reduction in estate taxes for those estates which have a larger portion of the value tied up in nonliquid assets.

SPECIAL USE VALUATION

The legislation which I introduced on May 22 revises the income and estate tax treatment of property which, after an election has been made under the special use valuation rules, is involuntarily converted. In the past several years, farmers and small businesses have been inflicted with a harsh tax under the valuation rules because of involuntary conversions.

Under the current law, there is a tax recapture rule which insures that the special use valuation property will continue to be used in a manner consistent with the special use valuation, however, an involuntary conversion during the recapture period can produce an unwarranted tax result.

My proposal, incorporated in this committee amendment, provides that there shall be no recapture of the estate tax if like property of equal value and use replaces the involuntary converted property. If property of lesser value replaces the involuntary converted property, there is a proportionate recapture.

Mr. President, S. 3125, as is the amendment reported by the committee, is an immediate technical correction in the law. This provision has benefited from the cooperation of the Treasury Department and will eliminate an unfair and harsh tax result. I urge its immediate consideration by the House.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. Are there further amendments?

If there be no further amendments to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. ROBERT C. BYRD. I move to reconsider the vote by which the bill was passed.

Mr. LONG. I move to lay that motion on the table.

NATIONAL COMMISSION ON UNEMPLOYMENT COMPENSATION

Mr. ROBERT C. BYRD. Mr. President, I call up Calendar Order No. 1024.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 12232) to amend the Unemployment Compensation Amendments of 1976 with respect to the National Commission on Unemployment Compensation, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment to strike all after the enacting clause and insert the following:

SECTION 1. PAY OF MEMBERS OF THE NATIONAL COMMISSION ON UNEMPLOYMENT COMPENSATION

(a) GENERAL RULE.—Paragraph (1) of section 411(e) of the Unemployment Compensation Amendments of 1976 (relating to pay and travel expenses) is amended to read as follows:

"(1) PAY.—

"(A) IN GENERAL.—Members of the Commission who are not full-time officers or employees of the United States shall be paid compensation at a rate not to exceed the per diem equivalent of the rate for GS–18 of the General Schedule under section 5332 of title 5, United States Code, for each day (including traveltime) during which they are engaged in the performance of services for the Commission.

"(B) OFFICERS OR EMPLOYEES OF THE UNITED STATES.—Except as provided in paragraph (2), members of the Commission who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the Commission.".

(b) TECHNICAL AMENDMENT.—Paragraph (2) of such section 411(e) is amended by striking out "section 5703(b)" and inserting in lieu thereof "section 5703".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to services performed on or after October 1, 1978.

SEC. 2. DATES FOR THE SUBMISSION OF REPORTS BY THE NATIONAL COMMISSION ON UNEMPLOYMENT COMPENSATION

(a) INTERIM REPORTS.—Subsection (f) of section 411 of the Unemployment Compensation Amendments of 1976 (relating to interim report) is amended to read as follows:

"(f) INTERIM REPORTS.—The Commission shall transmit to the President and the Congress—

"(1) an initial interim report not later than November 15, 1978, and

"(2) a subsequent interim report not later than November 15, 1979.".

(b) FINAL REPORT.—Subsection (g) of such section 411 (relating to final report) is amended by striking out "July 1, 1979" and inserting in lieu thereof "March 15, 1980".

SEC. 3. EXEMPTION OF NATIONAL COMMISSION ON UNEMPLOYMENT COMPENSATION FROM REQUIREMENTS FOR OFFICE OF MANAGEMENT AND BUDGET CLEARANCE.

(a) EXEMPTION FROM CLEARANCE REQUIREMENTS.—Section 411 of the Unemployment Compensation Amendments of 1976 is amended by adding at the end thereof the following new subsection:

"(j) EXEMPTION FROM REQUIREMENTS FOR OFFICE OF MANAGEMENT AND BUDGET CLEARANCE.—

"(1) FEDERAL REPORTS ACT.—The requirements of chapter 35 of title 44, United States Code, shall not apply to the Commission.

"(2) REPORTS TO CONGRESS.—Any reports submitted to the Congress by the Commission shall be submitted directly to the Congress and shall not be subject to any requirements for clearance of reports by the Office of Management and Eudget.".

(b) EFFECTIVE DATE.—The amendment made by this section shall become effective on the date of the enactment of this Act.

Mr. LONG. Mr. President, in enacting the 1976 amendments to the unemployment compensation laws, the Congress identified a number of issues related to that program which may have to be acted on in the next several years but about which further information is needed. To study these issues, a national commission was created by the 1976 amendments with instruction to report back by the end of 1978. Several delays have been encountered in establishing this commission, however, with the result that it needs additional time to complete its studies. H.R. 12232 would extend the final reporting date for the commission to March 15, 1980, with interim reports being required as of November 15, 1978, and November 15, 1979. The bill would also provide for compensating the members of the commission at a rate not to exceed the GS–18 level for the time they actually spend on commission work, and it would exempt the commission from any requirements that it clear its actions with the Office of Management and Budget.

Solely because of a potential Budget Act problem, the Finance Committee amendment deletes two provisions of the House-passed bill which are not effective until 1980 and can, therefore, be acted on next year when the Budget Act problems would no longer exist. The provisions concern the relationship between unemployment benefits and pensions and the taxation of certain foreign farm workers.

Mr. JAVITS and Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. JAVITS. Mr. President, may I inquire of the manager of the bill whether any amendment is contemplated to this bill at this time?

Mr. EAGLETON. Yes; I have an amendment.

Mr. JAVITS. I should like to address myself to a question, and the Senator will interrupt me if I am dealing with a subject which he has in mind.

I should like to address myself to this question of the compensation for retirees' income as a deduction from unemployment compensation. Does the Senator's amendment affect that?

Mr. EAGLETON. No; it does not.

Mr. LONG. No: it does not.

Mr. JAVITS. Mr. President, the bill which Senator LONG has described extends the reporting deadline for the National Commission on Unemployment Compensation until March 15, 1980. As he has properly stated, the work of the

Commission is critically important and the extension of time is necessary to permit the Commission to develop a thorough and well-documented report.

The problem which arises is the fact that when the Commission was created, it was authorized to study a provision of the Federal unemployment insurance law which reduces unemployment benefits to persons who receive pensions or other retirement benefits by the amount of such benefits they receive, dollar for dollar. Because we were unsure of the impact that new provision might have on older workers, the 1976 amendments which created the National Commission, delayed the effective date of the retirement setoff until September 30, 1979 to allow the National Commission to study the impact of the provision before it went into effect. Earlier this year, Congress delayed the reporting date for the Commission from January 1, to July 1, 1979. At that time the effective date of the retiree's setoff was similarly postponed until March 30, 1980.

I am concerned that the Finance Committee's failure to include a further delay in the effective date of the retiree setoff provision—this new extension and the failure to provide for a delay of the retiree setoff provision will result in the Congress having only 15 days after the Commission makes its final report and the time when the setoff provision will become effective, because it is not further delayed here, as it was in the previous delay of the Commission's report.

The other body did not do that. The other body did include a comparable delay of the retiree setoff in order to accord with what was done before when this report was similarly delayed.

The House of Representaties, in considering this bill, H.R. 12232, included a provision further delaying implementation of the retiree setoff. Many workers of retirement age are compelled to find jobs because of the inadequacy of their pension benefits. For these workers, the wages they receive are necessary to provide themselves and their families with food, clothing, and shelter. Further, we know that older workers often have a far more difficult time finding new employment than younger workers.

The Commission is charged with making a careful study of the impact of this amendment on older workers. Congress should permit itself adequate time to act on the Commission's recommendations.

I had intended to offer an amendment restoring the House provision delaying implementation of the retiree's setoff. I refrain from doing so because I am aware that such an amendment could raise parliamentary questions under the Budget Act in the Senate.

Accordingly, I hope very much that the Senate conferees will consider sympathetically the House provision retaining the linkage between the Commission's reporting date and the effective date of the retiree setoff in view of the humanitarian and social as well as economic considerations which make this, it seems to me, a very just point, exactly as it was the last time that we extended the time for the Commission's report.

As I know Senator LONG's own attitude toward this matter, I hope, if he has any comment, that he could favor us with it.

Mr. LONG. Mr. President, we deleted this from the bill solely because it was subject to a point of order under the Budget Act—at least, some thought it might be. We felt that next year we would be able to take care of this matter and it would not be subject to a point of order at that time. So we intend to take care of it and I hope the Senator will direct our attention to it at that point. If we were able to do it now, we would do it. We were concerned that we might be subject to a point of order.

Mr. JAVITS. I thank the Senator very much.

AMENDMENT NO. 3473

(Purpose: Relating to certain social security taxes paid by the Jefferson County Mental Health Center)

Mr. LONG. Mr. President, on behalf of Senator HASKELL, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG), proposes amendment numbered 3473.

At the end of the Act, add the following new section:

TREATMENT OF CERTAIN SOCIAL SECURITY TAXES AND RELATED MATTERS IN THE CASE OF THE JEFFERSON COUNTY MENTAL HEALTH CENTER

SEC. . (a) The waiver certificate filed by the Jefferson County Mental Health Center (hereinafter in this section referred to as the "health center"), Incorporated (taxpayer identification number 84-047417), under section 3121(k)(1)(A) of the Internal Revenue Code of 1954 (relating to waiver of exemption by certain organizations) shall (except as provided in subsection (e)) be deemed not to be effective in the case of any individual with respect to whom a repayment has been made which is considered, under subsection (b), as an overpayment of tax under section 6413(b) of such Code, for the period for which such individual received the wages (as defined in section 3121(a)) with respect to which such repayment was made.

(b) The Secretary of the Treasury or his delegate, upon proof reasonably satisfactory to him that repayment has been made prior to May 14, 1975, to any individual by the health center, of a sum representing the amount of taxes imposed on such individual under section 3101 of such Code (relating to rate of tax) and deducted and paid by the health center under section 3102 of such Code (relating to deduction of tax from wages) for any period beginning after December 31, 1971, and prior to May 14, 1975, shall consider such sum so repaid to such individual as an overpayment of tax under section 6413(b) of such Code (relating to overpayment of certain employment taxes) and shall approve a claim for a refund, credit, or adjustment filed by the health center prior to or within ninety days after the date of enactment of this Act, under section 6402 of such Code (relating to authority to make credits or refunds) or 6611(a) or (b)(2) of such Code (relating to interest on overpayments).

(c) Any period of limitations for filing a claim for credit or refund under section 6511 of such Code (relating to limitations on credit or refund) shall be waived with respect to any claim for refund, credit, or adjustment made by the health center under subsection (b). Section 6514 of such Code (relating to credits or refunds after a period of limitation) shall not apply to any such claim.

(d)(1) A certificate of waiver filed by the health center under section 3121(k)(1)(A) of such Code shall apply to any individual described in subsection (a) with respect to any period following the period (described in such subsection) which is applicable to such individual under such subsection.

(2) Notwithstanding the provisions of section 3121(k)(1)(B)(iii) of such Code, the health center may not elect to have such certificate of waiver apply to any individual described in subsection (a) with respect to the period (described in such subsection) which is applicable to such individual under such subsection.

(e)(1) In the adminstration of titles II and XVIII of the Social Security Act, the wages (as referred to in subsection (a)) received by an individual described in such section for the period (described in such subsection) which is applicable to such individual shall (except as is otherwise provided in paragraphs (2) and (3)) be deemed not to constitute wages (as defined in section 209 of such Act) for purposes of determining—

(A) entitlement to or amount of any insurance benefit payable to such individual or any person on the basis of the wages and self-employment income of such individual, or

(B) entitlement of such individual to benefits under title XVIII of such Act or entitlement of any other person to such benefits on the basis of wages and self-employment income of such individual.

(2) The provisions of paragraph (1) shall not be applicable in the case of any individual (described in subsection (a)) or any other person claiming any benefit referred to in paragraph (1) on the basis of the wages and self-employment income of such individual, if on or before the date of enactment of this Act, such individual has died or attained age 62, or if on such date such individual is under a disability (as defined in section 216(i) of the Social Security Act) which began prior to such date.

(3)(A) The provisions of paragraph (1) shall not be applicable to any individual who enters into an arrangement with the Secretary of the Treasury or his delegate for paying into the Treasury an amount equal to the sum repaid to him (as described in subsection (b)) by the health center.

(B) The Secretary of the Treasury shall by regulations prescribe the manner in which such an arrangement for payment by an individual shall be made. Any such arrangement shall afford the individual a reasonable time in which such payment shall be made and the amount and time of the installments which will be made toward such repayment, and shall contain appropriate conditions to protect the interests of the United States and to assure equitable treatment to the individual in the event that the individual fails fully to comply with the arrangement.

(C) The Secretary of the Treasury and the Secretary of Health, Education, and Welfare shall cooperate in assuring that, insofar as is practicable, each individual who is eligible to enter into an arrangement under this paragraph will be notified of that fact and given an adequate opportunity to enter into such an arrangement.

(f) Nothing in this section shall be construed to relieve the center of any liability for the payment of the taxes imposed by section 3111 of the Internal Revenue Code of 1954 with respect to any wages paid by it to any individual for any period.

Mr. LONG. Mr. President, at the direction of the Committee on Finance, I am offering an amendment which is designed to provide relief to the Jefferson

County (Colorado) Mental Health Center in connection with certain social security tax liabilities.

In 1975, the Jefferson County Mental Health Center in response to a survey initiated by the Internal Revenue Service was unable to find any indication that it had waived its immunity from social security taxes. As a result, the IRS directed the center to refund those taxes for the prior 3 years to any employees who did not elect to have their social security coverage continued. The center made the refund and applied to IRS to have the amount of those taxes repaid to it. At that point, the IRS discovered that a valid waiver of immunity had, in fact, been filed and that it was therefore unable to refund the taxes to the center. The center is seeking relief only for the employee share of the social security taxes involved and only for the period prior to the time when IRS notified the center that its previous instructions were in error. (This notification occurred on May 14, 1975, and the amount of employee taxes which had been refunded at that point was $74,128.)

The Finance Committee's Subcommittee on Taxation and Debt Management held a hearing on this proposal in October 1977. The administration witnesses indicated agreement that relief to the Jefferson County Mental Health Center is appropriate. However, the administration expressed concern over the possible loss of social security coverage for the affected employees and the possibility that they may not have made an informed choice in opting for the refund.

Under the committee amendment, the Secretary of the Treasury would be directed to refund to the Jefferson County Mental Health Center approximately $74,000 representing the employee social security taxes which it had refunded to its employees on the basis of the IRS misinformation. The wages on which those taxes were paid would not be used for determining social security eligibility or benefit amount. However, the affected employees would be given an opportunity to elect to restore the deleted coverage upon repayment of the refunded taxes. Such repayment could be made in installments over a reasonable period of time as determined by the Secretary of the Treasury. The Department of Health, Education, and Welfare would be required to make a reasonable good faith effort to contact the affected employees and to inform them of the consequences of their decision as to whether or not to repay the taxes. (The exact amount to be refunded to the center will be subject to verification by the Secretary of Treasury of the amount that the center repaid to its employees.)

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. EAGLETON. Mr. President, I have an unprinted amendment at the desk.

Mr. LONG. Let us dispose of this one first.

The amendment was agreed to.

Mr. EAGLETON. Does the distinguished chairman want to complete his series of amendments and then take mine?

Mr. LONG. If the Senator would be so kind.

UP AMENDMENT NO. 1729

(Purpose: Child Support Collection and Paternity Determination Services)

Mr. LONG. I would like to offer this amendment in behalf of the Senator from Georgia (Mr. TALMADGE).

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an unprinted amendment numbered 1729:

At the end of the bill insert the following new section:

CHILD SUPPORT COLLECTION AND PATERNITY DETERMINATION SERVICES

SEC. . Section 455(a) of the Social Security Act is amended—

(1) by striking out the semicolon at the end of paragraph (2), and inserting in lieu of such semicolon a period, and

(2) by striking out all that follows paragraph (2).

Mr. LONG. Mr. President, this amendment has been approved by the committee.

CONTINUED FEDERAL MATCHING FOR NONWELFARE FAMILIES

Mr. President, the child support enforcement program, enacted at the end of the 94th Congress as title IV–D of the Social Security Act required each State to have a program of child support collection and paternity establishment services for both AFDC and non-AFDC families administered by a single and separate organizational unit within the State. The statute provided Federal matching of 75 percent for services to AFDC families on a permanent basis. However, matching for services to non-AFDC families was provided for 1 year, but has been extended through fiscal year 1978.

Mr. President, this matter was discussed in the Finance Committee and we believe the requirement that every State have a program of child support collection and paternity establishment services for families that are not receiving welfare is an essential component of the child support program. The obvious purpose of the requirement is to assure that abandoned families with children have access to child support services before they are forced to apply for welfare. It is the opinion of the committee, supported by the statements of many State child support administrators, that access to these services often means the difference between a family's reliance on welfare support and being supported by a legally responsible parent. Most of the families being served are marginally eligible for AFDC, and without services are likely to end up on the welfare rolls. The fact that these services are in demand and are benefiting families is evident from program statistics.

The new child support enforcement program has reported collections of over $2 billion for all families for the first 32 months of its operation. Of this amount, $987 million was for AFDC families and $1,015 million for families not on welfare. These collections were made at a cost of about 25 cents for each dollar collected.

Mr. President, the child support collections are also affecting the AFDC rolls. In June 1978, the number of AFDC recipients dropped to less than 10.6 million, the lowest number of recipients on the rolls since October 1971.

This reduction can certainly be attributable principally to the two programs which reduce or eliminate financial dependency on welfare. These are the child support enforcement program through collection of child support for all families and the work incentive program through placing AFDC recipients in private employment.

Mr. President, the existing programs of required services for non-AFDC families may flounder if Federal financing for the services is allowed to terminate. Also, Mr. President, States will be more willing to develop and expand the programs if they are convinced that Federal financing will be continued. In addition, it seems reasonable and fair to assist in the financing of a State program which is mandated by Federal law. For these reasons, my amendment would provide for Federal matching for services to non-AFDC families on a permanent basis.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana.

The amendment (UP No. 1729) was agreed to.

UP AMENDMENT NO. 1730

(Purpose: Relating to the date child support requirements become effective in the case of certain States)

Mr. EAGLETON. Mr. President, I have an unprinted amendment at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes an unprinted amendment numbered 1730.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the proper place insert the following new section:

DATE CERTAIN CHILD SUPPORT REQUIREMENTS BECOME EFFECTIVE IN THE CASE OF CERTAIN STATES

SEC. . In the case of any State which established a child support program under part D of title IV of the Social Security Act which became effective on July 1, 1977, the provisions of sections 402(a)(26) and 402(a)(27) of such Act shall not be effective with respect to such State prior to such date, and, in applying the provisions of section 403(h) of such Act to such State the phrase thereof which reads "September 30, 1976 (but, in the case of the fiscal year beginning October 1, 1976, only considering the second, third, and fourth quarters thereof)" shall be deemed to read "September 30, 1977 (but, in the case of fiscal year beginning October 1, 1977, only considering the fourth quarter thereof)".

Mr. EAGLETON. Mr. President, my colleagues will recall that in 1975 Congress enacted the child support enforcement program (Public Law 93–647), which was primarily supported by Senators LONG, TALMADGE, NUNN, CURTIS, and HANSEN. The purpose of this pro-

gram is to establish a cooperative mechanism for the State and Federal Government to enforce support obligations owed by absent parents to their children by locating absent parents, establishing paternity when necessary and obtaining child support. This, the sponsors told us, would result in savings to the taxpayers, because the Federal and State governments would ultimately be required to pay out less in aid to dependent children benefits.

At the time of the debate on this legislation, many so-called experts predicted that the program would be a failure. These experts suggested that one of the main reasons absentee fathers do not make their payments is because they are penniless, and that to try to collect from them would be like trying to squeeze blood from a rock.

The program now is 3 years old. In those 3 years, the record has shown us that the experts were wrong, and that Senators LONG, TALMADGE, NUNN, CURTIS, and HANSEN were right. Health, Education, and Welfare Secretary Califano has termed the program "a success", and projects that we will collect more than $1 billion from absentee fathers in fiscal year 1978. In fiscal year 1977 child support collections by State and local governments increased to $818 million at a cost to government of about $259 million—in other words, more than $3 recovered by every dollar spent. This is truly an outstanding program.

In my own State of Missouri, the child support enforcement program got off to a slow start, but now is functioning with typical success. I will return to our initial problems in a moment, but first I would like to tell my colleagues a little about the record of this program in Missouri thus far.

The program went into full operation in my State on July 1, 1977. There now are seven child support field offices in Missouri, and the statewide staff numbers 145 persons. The early success of this program has been so overwhelming that the Missouri General Assembly has just authorized an additional 91 staff positions. Missouri has approximately 70,000 ADC families; we already have received more than 110,000 child support program assignments and referrals from ADC staff, and after just three quarters of operation in Missouri the program has more than 40,000 open cases. Since the beginning of the program we have collected approximately $1.6 million in delinquent payments, and we expect the next quarters' financial reports to show that the program now is financially self-sufficient. Furthermore, after only two quarters of operation, for every $1 the State of Missouri spent on this program, we received $2 in return. This remarkable record is bound to improve even more as the State gains in experience.

Missouri has a problem with this program, however. It is a historical problem which could end up costing my State about $5 million because we did not initiate the child support program until July 1977.

In 1976, passage of the necessary State enabling child support legislation looked like a sure thing. In his message to the State legislature in January of 1976, former Gov. Christopher Bond termed enactment of a child support enforcement program one of his top priorities. Leaders of both the State house of representatives and the State senate echoed the Governor's sentiment on this, and it looked like the bill would win quick approval in Jefferson City. However, the bill ran afoul of parliamentary maneuvering. Two senators—realizing that passage of the bill was crucial—decided to turn the child support legislation into a "Christmas tree bill," to use one of Senator LONG's favorite expressions. These two State legislators encumbered the bill with a number of nongermane amendments, amendments which made the bill unacceptable to a house-senate conference. When the State house deleted the nongermane amendments and sent the bill back to the senate on the last day of the legislative session, the two State senators filibustered the bill to death.

Needless to say, our State division of family services officials were shocked by this unexpected turn of events. The division already had prepared the policy manual and the statewide staffing and organizational plan for the program, and all was ready for implementation in April of 1976. However, with the authorizing legislation dead, and with the legislature out of session until 1977, there was nothing officially the division could do to bring Missouri into compliance and actually get the program underway. Nonetheless, in 1976 division officials were busy laying groundwork with prosecutors all across the State so that the child support program could be fully implemented as soon as the necessary State legislation was enacted in the 1977 legislative session.

In January of 1977 the legislature returned to Jefferson City, and Governor Teasdale repeated Governor Bond's call for speedy enactment of the child support enforcement program. Again, the leadership of each house of the general assembly included this legislation on its "must" list. This time, however, agreement was reached with the two filibustering senators of 1976, and the bill was enacted into law with an effective date of July 1, 1977.

The administrative machinery for the program had been ready to go for a year, and it thus took very little time for the division of family services to get our child support enforcement program operating at full speed. In fact, startup was so rapid and trouble-free that by the end of the first quarter of operation, cooperative agreements had been signed with all 114 counties and the city of St. Louis. Missouri may have been late in getting its program off of the ground, but once the wheels began to turn progress was very rapid. In fact, Missouri accomplished more during its first quarter of operation than some other States have accomplished to this day.

The problem Missouri faces does not arise out of our operation of the program, but rather out of our delay in getting the program started. As my colleagues are aware, the Department of HEW must conduct an audit of all State child support enforcement programs for the period January 1977, through September 1977. If a State's program is found to have been deficient during this period, HEW will be required to assess a 5-percent penalty against ADC Federal payments to the State. In Missouri's case, such a penalty would amount to about $5 million. Since Missouri's enabling legislation did not allow our program to go into effect until July 1977, it is possible that Missouri cannot successfully complete the audit and could suffer the penalty.

My unprinted amendment would exempt Missouri from the requirement of the January 1977, through September 1977, audit. That is what this amendment treats. As I have outlined to my colleagues, Missouri now has in operation one of the best child support enforcement programs in the country, and I think this is the result Congress wanted when we passed the title IV–D legislation. It would be unfair t penalize the people of my State for the obstructionist actions of the State senators in 1976—which prevented Missouri from getting into this program at the original target date—and I think such an action would be inconsistent with the spirit of Federal-State cooperation which motivates this program. I am hopeful that the Senator from Louisiana, the distinguished chairman of the Senate Finance Committee will agree with this reasoning, and will accept my unprinted amendment to H.R. 12232.

Therefore, I am hopeful the distinguished chairman of the Finance Committee will agree to this amendment and be able to accept same.

Mr. LONG. Mr. President, the amendment is meritorious. I hope the Senate will agree to it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri.

So the amendment (UP No. 1730) was agreed to.

Mr. EAGLETON. I thank my distinguished colleague.

Mr. ROBERT C. BYRD. Vote! Third reading!

The PRESIDING OFFICER. Are there further amendments?

If there be no further amendment to be proposed, the question is on agreeing to the commitee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment, as amended and the third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read a third time, and passed.

The title was amended so as to read:

An Act to amend the Unemployment Compensation Amendments of 1976 with respect to the National Commission on Unemployment Compensation.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNEMPLOYMENT COMPENSATION ELIGIBILITY PERIOD

Mr. ROBERT C. BYRD. Mr. President, I call up Calendar Order No. 1025.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 12380) to amend the Federal-State Extended Unemployment Compensation Act of 1970, with respect to an individual's eligibility period for benefits under such act.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Finance.

Mr. LONG. Mr. President, in times of high unemployment, a Federal-State program of extended unemployment benefits goes into effect to provide additional payments to persons who have exhausted their regular State unemployment benefits. This extended program is now in force in five States. When the extended program was first enacted, it would not have been possible for the program to stay in effect in any State for more than a year or two. Consequently, there was no need to place a limit on how long an individual could retain his eligibility to draw the 13 weeks of benefits he might qualify for under this program. Because of changes in the law, however, the program now can stay in force in some States for many years. If an individual does not use up his entire 13 weeks of benefits, the State is forced to keep his case file open indefinitely even though there is very little chance that he will ever come back to claim the additional benefits.

H.R. 12380, as passed by the House and as reported without amendment by the Finance Committee, would place a reasonable limit on the time within which those 13 weeks of benefits must be used. This limit would be, in general, 3 years after the individual's period of unemployment began. The main result of the bill would be to allow States to discard records which they are now being forced to maintain without any good reason.

AMENDMENT NO. 3472

(Purpose: Relating to the retirement test under social security)

Mr. LONG. Mr. President, I send to the desk the committee amendment and I ask that this amendment be offered on behalf of Senator CURTIS of Nebraska.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG), for Mr. CURTIS, proposes amendment No. 3472.

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, after line 3, insert the following new section:

MODIFICATION OF CRITERIA RESPECTING SELF-EMPLOYMENT INCOME FOR PURPOSES OF SOCIAL SECURITY RETIREMENT TEST

SEC. 4. (a) Section 203(f)(5) of the Social Security Act is amended—

(1) in subparagraph (B)(1), by striking out "subparagraph (D)" and inserting in lieu thereof "subparagraphs (D) and (E)", and

(2) by adding after subparagraph (D) the following new subparagraph:

"(E) For purposes of this subsection, there shall be excluded from the gross income of any individual any amount received by him during any taxable year which ends after December 31, 1977, if—

"(i)(I) such amount constitutes net earnings from self-employment of such individual derived from his engagement in a trade or business which, if such trade or business were carried on exclusively by employees, the major portion of the services involved in the carrying out of such trade or business would constitute agricultural labor as defined in section 210(f), (II) such amount as is derived from the sale of agricultural or horticultural commodities (including livestock, bees, poultry, and fur-bearing animals and wildlife) produced prior to such taxable year in such trade or business, (III) during such taxable year such individual did not render any substantial services (as determined pursuant to methods and criteria which the Secretary shall by regulations prescribe) with respect to any trade or business described in clause (I), and (IV) no amount has been excluded from such individual's gross income pursuant to this clause (i) for any preceding taxable year; or

"(ii)(I) such amount is received, during or after the taxable year in which such individual attains age 65, as a renewal commission from a life insurance policy which was sold, in whole or in part, through such individual's own personal efforts prior to such taxable year, and (II) during such taxable year there was not sold, in whole or in part, through such individual's own personal efforts any new insurance policy on account of the sale of which such individual was or will in the future be paid any commission or other remuneration.".

TREATMENT OF CERTAIN INCOME FROM FARMING AND INSURANCE SALES UNDER THE SOCIAL SECURITY RETIREMENT TEST

Mr. LONG. Mr. President, I am offering an amendment to the bill to correct an anomalous situation which occurs in applying the social security retirement test to certain types of income from farming or from renewal commissions based on prior sales of insurance contracts. This amendment has been considered by the Committee on Finance, and the committee voted to direct that it be offered as an amendment to an appropriate House-passed bill. The amendment is necessary to correct an unintended result of the 1977 Social Security Amendments, which eliminated the monthly exception to the social security retirement test.

Under the former monthly exception, full social security benefits were payable for any month in which an individual had no significant employment or self-employment activity even if they would otherwise have been reduced because of his annual earnings. Without this monthly exception, some farmers and self-employed insurance agents will lose social security benefits even though they may be completely retired. This happens because they technically are considered to have self-employment income on the basis of proceeds from crops produced in a year before retirement or from renewal commissions on insurance policies sold before retirement.

Under the social security program, benefits are payable not on the basis of individual need as measured by an income test but as a matter of social insurance payable in relation to prior earnings upon the occurrence of specified events (disability, death, retirement in old age). The purpose of this provision of the social security law under which benefits are reduced for earnings above a certain amount is to serve as a test of whether one of those events—retirement in old age—has, in fact, occurred.

Since that provision is intended as a retirement test and not as a needs test, it is inappropriate to apply it in a manner which results in the reduction of benefits to persons who have actually completely retired but who continue to receive some of the fruits of their earlier labors. For this reason, the amendment modifies the treatment of two types of income. Under the amendment, there would be no reduction in benefits because of farm income from the sale of a crop produced in a prior year provided that, in the year in which the income is actually received, the retired farmer does not engage in any substantial farming activities. An individual could claim this exemption in only 1 year. The amendment also provides that social security benefits will not be reduced because of renewal premiums from prior-year sales of insurance if they are received after age 65 and in a year in which the individual is not engaged in selling insurance. This provision would apply to the self-employed insurance agents who actually made the sale and also to other individuals who qualify for such renewal premiums because of their contribution to the sales effort.

The costs of this amendment are estimated to be approximately $1 million to $2 million in each of the next 5 fiscal years. The amendment will have negligible impact on the long-range costs of the social security program.

Mr. CURTIS. Mr. President, I urge adoption by the Senate of amendment No. 3472, introduced by Senator LONG on behalf of the Finance Committee, which will redress a serious inequity which has arisen concerning the treatment of certain income of farmers and self-employed life insurance agents under social security.

Last December, as the Members will recall, as a part of the 1977 amendments to the Social Security Act, we changed—as a result of a floor amendment offered by the distinguished Senator from Florida (Mr. CHILES)—from a monthly test of retirement to an annual test. That is, previously we set certain monthly limits on income, and now we set an annual limit. Under the earlier test, it was possible for an individual regularly to group newly earned income into 1 month and still be eligible for social security in the other 11 months.

That amendment was very desirable, in my opinion, because we needed an improved test to determine when an individual truly was retired. We did not

mean, however, to have an adverse effect upon two groups which have come to our attention who share a common problem—certain farmers and self-employed life insurance agents. Though fully retired, they may receive income based upon activities in a prior year—in the case of a farmer, through the sale of a crop, and in the case of a self-employed life insurance agent, through the receipt of renewal commissions on policies written previously, before his retirement. The inequity in this situation is particularly acute, because a self-employed life insurance agent would have his renewal commissions treated as income subject to the annual retirement test, and a life insurance agent employed by a firm would not.

The real test as to whether someone is retired should depend upon a person's activity—whether he has quit working, and whether they no longer perform self-employment. The test should be when the work is performed, not when the money comes in.

Therefore, the amendment which I proposed in the Committee on Finance, and which the committee subsequently endorsed without opposition for inclusion in appropriate House-passed legislation, is very narrowly drawn and would exempt from the annual retirement test, on a one-time basis only for farmers and only if no other continuing sales of life insurance occur for self-employed life insurance agents, income from the sale of agricultural or horticultural commodities (in the case of farmers) or income from renewal commissions on life insurance policies (in the case of self-employed life insurance agents).

I emphasize that in both situations, the individuals indeed are retired and the income at issue was derived from earlier activity.

Mr. President, the practical situation is this: certain farmers retire. They quit working, quit the farm. But after they retired they sold some grain they raised the year before. Under this new test, that eliminated their chance to draw social security. Congress never intended that, and this amendment takes care of it.

The PRESIDING OFFICER (Mr. BUMPERS). The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1731

(Purpose: To treat employment of United States citizens by the Roosevelt Campobello International Park Commission as employment under the Federal Unemployment Tax Act)

Mr. MUSKIE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. MUSKIE) proposes an unprinted amendment numbered 1731.

Mr. MUSKIE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, after line 3, insert the following:

SEC. 2. (a) For purposes of Chapter 23 of the Internal Revenue Code of 1954 (the Federal Unemployment Tax Act), service performed by a citizen of the United States as an employee of the Roosevelt Campobello International Park Commission shall be considered to be employment within the meaning of section 3306(c) of such Code.

(b) This section shall apply with respect to remuneration paid after December 31, 1978, for service performed after such date.

Mr. MUSKIE. Mr. President, this amendment would provide unemployment insurance coverage for U.S. citizen employees of the Roosevelt Campobello International Park Commission. The Roosevelt Campobello International Park was created in 1964 by a Canadian-American Treaty to commemorate and preserve the summer home of Franklin Delano Roosevelt on Campobello Island in New Brunswick, Canada. In accordance with the spirit of that agreement and the statutes which established the park, the Commission has a policy of equal opportunity in employment, compensation, and fringe benefits for both Canadian and American employees.

The Commission currently employs 13 U.S. residents. These employees are subject to U.S. social security taxes and are eligible for old age, survivors, and disability insurance benefits, as well as workmen's compensation. In nearly all ways they are treated as though they were employed on U.S. soil.

However, these U.S. citizens have been unable to secure unemployment insurance coverage in the United States.

This amendment would treat employment of U.S. citizens by the Roosevelt Campobello International Park Commission as employment under the Federal Unemployment Tax Act. The amendment would in turn permit the State of Maine to provide unemployment insurance coverage for these employees pursuant to title 26, section 1043(11)(G) of the Maine revised statutes.

This amendment would insure that United States and Canadian employees of the Commission are employed on an equal basis. It is supported by the Commission and is in accord with the agreement reached between the United States and Canadian Governments on this issue.

I might add, Mr. President, that this matter has been the subject of lengthy discussions between the U.S. Treasury Department and the Canadian Government.

It was the Treasury Department that suggested this amendment as a solution.

Mr. President, in this regard, I ask unanimous consent to have printed at the conclusion of my remarks a letter from Secretary Blumenthal.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MUSKIE. Mr. President, I would like to express my appreciation to the Canadian Government and the U.S. Treasury Department for their assistance in resolving this matter. I would hope the distinguished floor manager would accept this amendment in order that the problem may be finally resolved.

EXHIBIT 1

THE SECRETARY OF THE TREASURY,
Washington, April 6, 1978.

Hon. EDMUND S. MUSKIE,
Chairman Roosevelt Campobello International Park Commission, U.S. Senate, Washington, D.C.

DEAR ED: On October 12, 1977, you wrote me concerning the unemployment insurance situation of the employees of the Roosevelt Campobello International Park Commission. On November 28, I wrote you concerning the results of our preliminary study of the problem, and stated that we would keep you informed of the progress of our further study. We have developed further ideas on ways to resolve this matter, and I thought it would be useful to communicate these to you before the Commission's upcoming meeting April 7–8.

As I indicated in my letter of November 28, it is our understanding that the Canadian Department of National Revenue has taken the position that the employees will be subject to Canadian unemployment insurance premiums until and unless the employees can be brought under unemployment insurance coverage in the United States. The question in light of this position is whether the employees can be brought within the coverage of either the Maine Employment Security Law or the Federal Unemployment Tax Act (FUTA).

We understand from the staff of the Commission that the Maine Employment Security Commission has taken the position that the employees of the Commission cannot be covered under Maine law.

FUTA presently covers services performed by an employee within the United States, services upon an American vessel or aircraft under a contract executed in the United States, and any service "performed after 1971 outside the United States (except in a contiguous country with which the United States has an agreement relating to unemployment compensation) by a citizen of the United States as an employee of an American employer . . ." An "American employer" is defined to include individual residents of the United States; corporations organized under the laws of a state or of the United States; trusts all of the trustees of which are United States residents; and partnerships two-thirds of the partners of which are United States residents.

The Commission employees' situation arguably fails to meet the definition of "employment" because the services are not performed for an "American employer." And in any event, this situation clearly fails to meet the definition because the services are performed "in a contiguous country with which the United States has an agreement relating to unemployment compensation."

It appears therefore that it would be necessary to amend FUTA to cover the Commission specifically. Extension to those employees could be accomplished by adding a provision at the end of section 3306(c) stating that "Notwithstanding any other provision of this subsection, service performed by a citizen of the United States as an employee of an international park commission established under Chapter 22 of Title 16 shall be deemed to be employment for purposes of this chapter." A copy of a draft bill that would accomplish this is enclosed.

I hope this answers the questions you raised in your October 12 letter. Please let us know if we may be of further assistance in this matter.

Sincerely,

W. MICHAEL BLUMENTHAL.

Enclosure.

Mr. LONG. Mr. President, I have not had the opportunity to discuss this amendment with the committee. How-

ever, I have discussed it with our committee staff, and I am of the opinion that the amendment is meritorious, and I have no objection to it. I will be happy to accept it, if the Senate will let me accept it.

Mr. MUSKIE. I thank my good friend, the distinguished floor manager, for his consideration.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 12380) was read a third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EASTERN TELEPHONE SUPPLY & MANUFACTURING, INC.

Mr. ROBERT C. BYRD. Mr. President, I call up Calendar No. 1034.

The PRESIDING OFFICER (Mr. MORGAN). The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 10161) for the relief of Eastern Telephone Supply & Manufacturing, Inc.

The Senate proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment:

On page 2, beginning with line 7, insert the following:

SEC. 2. SUSPENSION OF DUTY ON NATURAL GRAPHITE.

(a) Item 909.01 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by striking out "6/30/78" and inserting in lieu thereof "6/30/81".

(b) The amendment made by subsection (a) shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after June 30, 1978.

(c) Upon request therefor filed with the customs officer concerned on or before the ninetieth day after the date of enactment of this Act, the entry of any article—

(1) which was made on or after June 30, 1978, and before the date of enactment of this Act, and

(2) with respect to which there would have been no duty if the amendment made by subsection (a) of this section applied to such entry

shall, notwithstanding the provisions of section 514 of the Tariff Act of 1930, or any other provisions of law, be liquidated or reliquidated as though such entry has been made on the date of enactment of this Act.

SEC. 3. SUSPENSION OF DUTY ON FREIGHT CARS.

(a) Subpart B of part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding, immediately after item 912.05, the following new item:

" 912.06	Assembled freight cars (provided for in item 690.15, subpart A, part 6, schedule 6).....	Free	No change	On or before 6/30/80".

(b) The amendment made by subsection (a) shall apply with respect to articles entered on or after the date of enactment of this Act if the contract for sale of the article is concluded before March 1, 1978, or after the date of enactment of this Act.

(c) Upon request therefor filed with the customs officer concerned on or before the ninetieth day after the date of enactment of this Act, the entry of any article—

(1) which was made on or after March 1, 1978, and before the date of enactment of this Act, and

(2) for which the contract for sale was concluded prior to March 1, 1978, and

(3) with respect to which there would have been no duty if the amendment made by subsection (a) applied to such entry

shall, notwithstanding the provisions of section 514 of the Tariff Act of 1930, or any other provisions of law, be liquidated or reliquidated as though such entry has been made on the date of enactment of this Act.

Mr. LONG. The first section of H.R. 10161 will provide Eastern Telephone Supply & Manufacturing, Inc., of Newport, R.I., the possibility of administrative and judicial review of alleged errors by the Customs Service. Although the Service agrees they made the errors, they refuse to review the case because Eastern did not file a timely protest in the correct form. In the peculiar circumstances of this case, the committee believes Eastern should be allowed to file a protest and get review.

Mr. President, the Senator from Rhode Island (Mr. PELL) came before the committee and made a very logical argument that these people should have their day in court.

Section 2 would continue duty-free entry of crude and natural graphite until June 30, 1981. Duties of graphite were suspended from October 21, 1975, to June 30, 1978. The annual revenue loss from section 2 will be about $57,000.

Section 3 would permit duty-free entry of assembled freight cars until June 30, 1980. The committee believes temporary elimination of the current 18-percent duty on assembled freight cars may help alleviate the current shortage of freight cars in the United States. The principle beneficiary of the section will be Mexico. The committee estimates the annual revenue loss of section 3 to be $6 million.

Mr. President, this is a good bill. It is not controversial. I recommend to the Senate that it approve H.R. 10161 as reported.

UNFAIR COMPETITION FROM SOVIET WATCHES

Mr. BUMPERS. Mr. President, I feel the tariff schedules of the United States have a loophole which now threatens the few remaining companies and workers still producing watches in the United United, and particularly the employees still producing watches in Arkansas.

We have long had a provision in our tariff schedules permitting the importation of watches from the Virgin Islands and our other insular possessions free of duty if they meet certain requirements for local content and do not exceed one-ninth of total U.S. watch consumption. This duty-free treatment was adopted to assist the economic development of our insular possessions.

Today, however, this exception to the normal tariff treatment of imported watches is being abused, particularly by watch assemblers in the Virgin Islands. They are purchasing virtually complete watches from State-controlled economies, performing a minor amount of work in the islands, and importing them duty free into the United States. They thus totally avoid the higher column 2 rates of our tariff schedules which it has long been the policy of the Congress to apply to countries to whom we do not extend most favored nation (MFN) treatment. They also avoid paying even the duty which watches from MFN countries must normally pay, and thus obtain a preference over normal trade with MFN countries.

But, far more important, they also threaten a struggling U.S. industry—the few domestic producers of watches. These products of controlled economies, coming here through a loophole, are retailing as low as $9.95, and possibly even lower. Thus, they drastically undercut even the least expensive U.S. watch now assembled in Little Rock which retails between $14.95 and $21.95. Moreover, these imported products are the higher-appeal, 17-jewel watches, whereas the Timex watches produced in Arkansas and Connecticut are basic, nonjewelled mechanical products.

Today these imports are apparently assembled primarily from components originating in the U.S.S.R. Watches from the U.S.S.R. are now increasingly penetrating markets of other countries, such as the United Kingdom and Canada, which apply MFN duties to imports from controlled economies. Tomorrow, watches from other state-controlled economies may also benefit from this loophole.

Failure to close this loophole clearly threatens the future production of the millions of Timex watches now assembled in the Continental United States and Puerto Rico. It also threatens the future of thousands of remaining workers in my State and in the State of Connecticut. They are the principal survivors of a once much larger industry. U.S. watch companies have disappeared one by one under the pressure of low-wage competition from abroad. Just 2 weeks ago, one of the other remaining famous names in American watchmaking, Bulova, announced it was closing its last U.S. plant. We must not permit a loophole to add still further competitive pressure on those jobs and plants which still survive.

We can prevent this unfair competition by requiring that watches and components originating in State-controlled economies pay the column 2 duty Congress intended they should pay. I am not suggesting we prohibit imports from them, providing they pay the proper

duty. But we should prevent them from taking advantage of a loophole to funnel artificially priced watches into our country duty free.

Mr. President, I originally intended to propose an amendment to this bill to back up the statement I just made and in support of it. But I have the agreement of the chairman of the subcommittee, Mr. RIBICOFF, that his staff and mine, and they are already working, will work out language to try to redress this problem and hopefully it will be done by the time we come back after the Labor Day recess. There are other tariff bills that I understand have been ordered reported, and perhaps that will be the proper time and it may be possible that the Finance Committee itself could adopt some language to close this loophole.

Obviously thousands of workers in my State have jobs that depend on this because the problem is not going to go away. As a matter of fact, it is going to become exacerbated unless something is done.

I thank the distinguished floor manager for allowing me to make this statement.

Mr. LONG. Mr. President, as the Senator so well stated, we know there is a problem here, and the chairman of the Subcommittee on International Trade, Mr. RIBICOFF, has asked for comments in writing on this subject, and when we know more about it we do expect to recommend action of the Senate.

I thank the Senator.

● Mr. JAVITS. Mr. President, I thank my distinguished colleague, the senior Senator from Louisiana, for his efforts in bringing to the floor this measure to permit temporary duty-free treatment for imports of assembled freight cars.

This measure will help relieve the severe shortage of railroad freight cars that has adversely affected the economies of many sections of the United States, including my own State of New York. It will assist in the revitalization of our rail transportation system, so important to a healthy economy.

By passage of this measure, the Congress is preventing the imposition of an 18-percent tariff. Such a tariff would increase the inflationary pressures that underlie our economy and would add an unnecessary trade barrier. Neither the administration nor the domestic industry objects to this bill because the demand for new cars is greater than the U.S. manufacturers can supply. Therefore, imposing a tariff makes no sense.

I have long been active in promoting economic development in Mexico through the United States-Mexico Quadripartite Commission. I am pleased that the Senate today is fostering economic development in Mexico while relieving a burden from the U.S. economy.●

The PRESIDING OFFICER (Mr. BUMPERS). The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 10161) was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read:

An Act for the relief of Eastern Telephone Supply and Manufacturing, Inc., and other matters.

EDUCATION AMENDMENTS OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair again proceed to the consideration of the elementary and secondary education bill.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1753) to extend the Elementary and Secondary Education Act of 1965, and for other purposes.

The Senate resumed the consideration of S. 1753.

UP AMENDMENT NO. 1722

The PRESIDING OFFICER. The pending amendment on that bill is UP amendment No. 1722.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MORGAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, will the Senator yield briefly for a unanimous-consent request?

Mr. MORGAN. I yield to the Senator.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that Mr. Larry Patton, of my staff, be accorded the privilege of the floor during debate on the education bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a unanimous-consent request? I ask unanimous consent that Elliott Abrams of my staff be given the privileges of the floor during the debate and votes on the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, we hope to have a vote on the pending amendment relative to title XII this evening. Gauging the feeling of my colleagues and the manager of the bill, I think we will not be lengthy about this. Incidentally, if it can be worked out, we have agreed with the Senator from Arizona to set this aside momentarily for an agreed-upon amendment if we got into this for a lengthy time.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. HOLLINGS. Yes.

Mr. ROBERT C. BYRD. It might be well if we can get the yeas and nays on the amendment so that Senators will be alerted that there is going to be a rollcall vote.

Mr. HOLLINGS. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HOLLINGS. Mr. President, with respect to title XII, it is very direct. It is a frontal assignment of Federal grants to the private or in this case, since they are limited to elementary and secondary education, to the parochial schools of America. It goes right to the heart of the constitutional problem. Instead of trying to provide aid in a circuitous manner by saying, "Look, the intent is secular," if you will refer to the bill itself, you will see certain congressional findings on pages 318 and 319, and they find that a Federal program of grants is needed to assist the nonpublic schools.

Then there follows a direct authorization to make grants to the elementary and secondary schools.

So, rather than to state its purpose as being secular in purpose, they, in contrast, make it sectarian; and rather than saying it is not going to aid religion, for all intents and purposes they come now and say "That is our intent."

In fact, if you read the committee report, the only witness quoted is our friend Father Farrell of the Catholic Conference. It was not a hearing in depth with respect to the elementary and secondary schools or the private schools, or with respect to parochial aid. It was rather the Conference itself saying that they needed assistance, and the Senator from Rhode Island agreed with that need.

Instead of saying, as with the tuition tax credit on last week, that it did not involve the entanglement of church and State, in contrast this particular measure comes in and says, "We want to make sure it is entangled. We want to make sure it is bureaucratized, that we institute a bureaucracy for it." To make certain of that particular entanglement, they provide, under section 1203(a), that there shall be in the Office of Education an Office of Nonpublic Education to carry out the various provisions of the title, which office shall be headed by a deputy commissioner for nonpublic education, who shall be appointed by the Commissioner.

And if you refer to the Department of Health, Education, and Welfare's opinion as of June 23, which was earlier filed in this RECORD at the time we called up the amendment, you will see therefrom that the Department of HEW says that for the 18,000 nonpublic schools, it would take at least a staff of 80 persons to carry out the provisions involved.

So you can well understand the feeling of any Senator, after the strong debate and the many rollcalls extending over several days last week. Senators wonder why now we need consider this. The Elementary and Secondary Education Act,

which we support, contains the bypass provisions and the strengthening of the funds in title I for the disadvantaged, and there are some other beefed up portions of this bill, which we also support, and which are generally in the context of the Domenici amendment offered last week when we were winding up action on the tuition tax credits.

Why, after that, do they even come and propose this? The best I can tell at the present time, looking at the opinions, and from my check with the staff, is that this was an add-on at the end of the markup of the Human Resources Committee. Opinions were asked for by HEW, the Congressional Research Service, and the Attorney General's office of the Justice Department, and various Senators did reserve their right at that particular time to act separately on the floor.

Now let us look, for example, at the opinion, if you please, and follow immediately thereon and get into the general merits of the bill.

Earlier the Department of HEW, when it wrote, on June 23, stated that the Department would have to find it unconstitutional and unwise, and that it could not support this particular measure. In a memorandum prepared by the Congressional Research Service, David Ackerman, Legislative Attorney, there is a thorough discussion of the constitutionality of title XII. This memorandum finds the proposal unconstitutional and states changes that would enhance its constitutionality.

The Department of Justice, in a letter signed by John Harmon, Assistant Attorney General, Office of Legal Counsel, also, if you please, Mr. President, goes down the particular provisions, and then they go right into the unconstitutionality, where, in essence, they say "This is clearly more unconstitutional."

You and I know a thing is either constitutional or unconstitutional, but we have to use the comparative sense: more clearly unconstitutional.

It says, among other findings:

Based upon those decisions, it is our view that proposed Title XII fails to meet Establishment Clause standards in several respects. The principal constitutional flaw in the Title XII program is that it would provide grants directly to nonpublic schools. Although the Court has approved particular programs authorizing grants and loans to nonpublic school students and their parents, the Court has consistently indicated that direct grants to sectarian schools are constitutionally impermissible. See *e.g. Wolman* v. *Walter*, 433 U.S. at 253; *Lemon* v. *Kurtzman*, 403 U.S. at 621.

That is ground No. 1 of the Justice Department findings. Then the Department of Justice goes further:

Moreover, any program which authorizes direct government grants to sectarian schools raises serious problems of Church-State entanglement. Efforts by the Government to ensure secular use of the funds provided may result in the "comprehensive, discriminating, and continuing state surveillance" that the Establishment Clause prohibits. *Wolman* v. *Walter*, 433 U.S. at 254; *Lemon* v. *Kurtzman*, 403 U.S. at 619. Such a program also creates the potential for continuing political strife along religious lines. See, *e.g., Meek* v. *Pittenger*, 421 U.S. at 372.

So that is the second ground of entanglement, or, if you please, political strife along religious lines, which is the intent of all kinds of assistance in school fields that Congress tries to avoid. Then, going further, a third ground:

In addition, in those instances where the Court has sustained the grant or loan of materials and services, the statutory program has provided equal benefits to both public and private school students. See, *e.g., Meek* v. *Pittenger*, 421 U.S. at 360 and n. 8, 362 n. 12. Although the report of the Senate Committee on Human Resources refers to "equitable participation" of nonpublic school students, see S. Rep. No. 95-856, 95th Cong., 2d Sess. 87 (1978), portions of Title XII focus solely on aid to private schools without regard to whether public school students are entitled to receive equivalent materials and services.

Remember, on last week, when the tuition tax credit was first submitted to the tax committees, the attempt was to handle that concern in a balanced fashion by making no distinction, if you please, between public and nonpublic school students. But this measure makes a definite distinction.

Finally, and this is the fourth ground:

Finally, the guidance and counseling section of Title XII fails to observe the careful lines drawn by the Court with respect to those forms of aid, as it does not foreclose the possibility that these services may be provided on nonpublic school premises or by personnel employed by the nonpublic school or subject to its influence or control. *Wolman* v. *Walter*, 433 U.S. at 248; *Meek* v. *Pittenger*, 421 U.S. at 371-72.

Mr. PELL. Mr. President, will the Senator yield?

Mr. HOLLINGS. I will yield in just a minute. Let me complete these thoughts, if you please. It will take another 10 minutes or so.

Quoting still:

In short, our review of recent Supreme Court interpretations of the Establishment Clause indicates that the proposed Title XII program of direct grants to nonpublic schools, if challenged in the courts after enactment, would be held to be unconstitutional. I hope that our comments are helpful to you.

That is dated the 22d of August, or yesterday.

Now, Mr. President, I have sent to each of the Senators in my "Dear Colleague" letter a copy of Prof. Paul A. Freund's letter dated August 18, 1978, wherein he goes down the line in several respects, and in only one instance—that having to do with respect to the standardized tests and scoring services—does he find that it could pass the constitutional test. On each of the other six, he found it to be unconstitutional.

So, Mr. President, what are we doing here? What, with respect to the undesirability? What the Senator from Rhode Island as done, in essence, is say, apparently, "Look, if Senators MOYNIHAN and PACKWOOD are going to come along and get by some kind of aid on the tuition tax credit, we might as well go frontally and give it directly to the nonpublic schools."

In doing that, they fly right fully into the face of established and desired principles of Federal aid to education. From the very beginning, really, in 1965, and for the past 13 years, what we have done is try to protect the elementary and secondary school jurisdiction, with principal assistance from the locales in the States, and only give aid at the Federal level to public school or private school students on what? On, No. 1, a stated need.

In title I, the need was disadvantaged students. In title VII, it was under the bilingual provision. In the Vocational and Rehabilitation Act, it was section 504 for the handicapped children.

So in each particular case, the student was the one being granted that particular assistance on the basis of need, and the moneys were going to the very systems by way of a public entity. I think I should emphasize that. Today, the aid goes to the State of South Carolina, to Missouri, to New York, to Rhode Island, to the local educational agency. That has been the procedure in Human Resources Committee, in the Education Subcommittee that our distinguished colleague from Rhode Island has headed so well—the aid always going into the local educational agency to be distributed to the various entities by way of students and student need.

Now comes the Senator from Rhode Island, and he says:

We and the Congress have found the need for a particular school, for a particular set of schools.

And he characterizes them as nonpublic.

In trying to find that there is need in the nonpublic school area he eliminates general aid to the public school, giving aid only to the nonpublic. Of course, from the debate of last week we determined that the nonpublic schools were 90 percent parochial in this country.

It think it should be fixed in each Senator's mind that this is a radical departure from the congressional findings that we have had in all our hearings and approaches in trying to give assistance to school students, be they public or private, in the United States. The new approach says, "Here, let us give general aid. We are going to list all these particular categories."

That is how he proposes to do it: He picks them up one at a time. Evidently one of the staff lawyers tried to find the various decisions to approve various articles of aid, picking out textbooks, standardized tests, psychological testing, speech and hearing diagnostic services, transportation of a limited kind, and what have you.

But then you have to see how they did not do it in a constitutionally careful fashion because they did not change the original thrust. They stuck with that thrust by saying, "Yes, we are going to give it directly to the schools."

So it is as we go down each of the particular provisions in here. All we have to do is to allude to the various findings and decisions as determined by either HEW, the Library of Congress, the Department of Justice, or Professor Freund, and just refer to the first one. secular textbooks. In several cases the Supreme Court has upheld programs in which the State purchases and loans to nonpublic school

children such secular textbooks. They do cite Wolman against Walter and Meek against Pittenger, but they go on to state that in every such program ownership of the books has remained with the State.

The textbook program in title XII is different with schools owning the books under title XII now proposed by the Senator from Rhode Island.

Therefore, Professor Freund, Justice, HEW, and the Legislative Research Service have, of course, come down on the side of the principal opinion in Wolman against Walter that states this aid would be patently unconstitutional.

Again going to the next category listed under title XII, standardized tests and scoring cases, there are two cases concerning that particular item of aid, the Lemon case and the Wolman case. But if the public school system is in control—that is the particular finding in those cases, in the formulation, the execution, the evaluation of those standardized tests and the scoring services—if the public institution remains in control, in that case it would be held constitutional. Professor Freund finds that in that particular case he thinks it can pass that test and would be found constitutional. So does the Congressional Research Service legislative counsel. But even on that score the Justice Department finds differently.

Speech and hearing diagnostic services is next. In the Wolman case the particular persons doing the testing and administration were all employed by the State. The Court has made clear that the Government cannot subsidize the function of personnel likely to engage in religious proselytizing even when the subsidized function has been secular in nature, like secular teaching, guidance counseling, psychological services. The Court has perceived the danger that the personnel involved would become religious advocates because of the pervasively religious atmosphere of sectarian schools.

To go on even further, in Meek against Pittenger this has been true when personnel have been employed by the school itself, and when they have been public employees.

In Wolman against Walter, however, the court found it constitutionally permissible for public personnel to provide diagnostic speech and hearing services on the nonpublic school premises on the grounds that such functions are not closely related to the educational mission of the school, and that the relationship between the diagnostician and the child is limited in nature. However, in Wolman against Walter there were public employees, and under title XII the personnel necessarily would be hired by the sectarian school itself, and the testing presumably would be on the school premises, so it cannot pass constitutional muster there.

We go on to the fourth category of diagnostic psychological services on the nonpublic school premises.

Again, they are employed by the sectarian school, on their own sectarian school premises, and therefore this aid cannot pass constitutional muster.

Point 5, the guidance and counseling service. The objection there again is that it is on the premises and that off the premises it would be indicated the counseling would not be permissible for religious school students because hired by the sectarian body counseling off premises would then be jeopardized by being involved in the sectarian purposes of the school involved and cannot pass the constitutional muster.

On point 6, secular instructional materials and equipment in the Meek decision it was struck down. The loans were struck down because they were made directly to the sectarian school. So here is the same situation, directly to the sectarian schools. No if's, and's, or but's about it and under Wolman and also under Meek it would be set aside.

Finally, transportation cannot pass constitutional muster. The language in 1202(b) permits, of course, the side trips and the field trips, as said in the original decision which started in 1947 when Justice Black came out with his eloquent analysis of the intent of Jefferson in talking about a wall of separation between church and State. The limited transportation to and from the school was fine, but with field trips for sectarian purposes or otherwise it was held unconstitutional there, and again in the Meek decision and again in the Wolman decision.

So what we have is, generally speaking, is a measure to provide aids to the private schools, and all the while, the medium for giving the aid, the administration of the aid, the person employed to conduct the aid, and everything else, are all sectarian or private in purpose and therefore cannot pass constitutional muster. Additionally, it would be undesirable.

Why is it undesirable? We have a $500 million appropriation for this year under title XII and, for 5 years, of $2.5 billion. However, Mr. President, let us look at this very closely, because when the Senator from Maine (Mr. MUSKIE) was giving his budgetary comments, we did not want to interrupt at that particular time. We only have to look at the analysis given the Human Resources Committee back in June. It said that in the Pennsylvania program considered in Meek against Pittenger with $17,560,000 worth of materials—textbook and instruction materials—that was $44 per child. That programed out, for the 5 million nonpublic school students provided for under title XII or the Pell provision here, that would program out to $250 million just for that one item.

Looking again, according to the letter from HEW, they said, you look at the Ohio program under the Wolman case and you program that out for the 5 million schoolchildren for those items and you are looking at $875 million in expenditures.

I think it is reasonably accurate and conservative to say that the $500 million has been diminished by a factor of at least 3, or it would take three times the amount of aid to carry out the intentional aids given under the seven categories by the Senator from Rhode Island to the private schools. So, instead of $2.5 billion, we really have about $7.5 billion.

We are all public Senators, we are going home, and we get back to Maryland, for instance, and the voters are going to say, "We didn't send you up there to start running the private schools, but if you are going to start for the first time, giving general aid, if you can give it to them and they can spend it for all these particular categories, administered, and conducted, and audited by the private schools, and in fact, going to 90 percent parochial schools—if you are going to do that, then, heavens, give us general aid for the public schools.

"If Washington is not running a deficit, as we had heard, but, on the contrary, if they are finding extra moneys, then include us." And we have an additional $7.5 billion there.

So when you vote to balance that budget, as we just did on July 31, by an over two-thirds vote, and then you come back and wonder how did the budget get out of balance, look at this very innocent, well-intentioned, amendment that is just added on as a delightful little title at the end of a bill, by a man of experience and authority in the education field. What does he do? He gives 40 percent more to the private school than is going to be received by the public school student. Using the agreed-upon figure that Senator PELL and I both used in the debates last week of $128 for the public school student and the present amount of $60 for the private school student, we are going to give at least $100 more. I think it would be nearer $300. As I just pointed out, there is no question about it when you carry this provision out.

But let us keep it to the $100 estimate, that is $160 or 20 percent more, and he is going to be doubling what is now received by the private school student, but giving nothing more to the public school student.

Mr. President, the $2.5 billion is obviously a budget buster. We can go in again to the elements—I want to yield now before I complete my comments, because the distinguished Senator is waiting to ask questions or the Senator from Arizona to get in his amendment—whatever the manager of the bill desires. I can only say it is not just financially unsound and clearly unconstitutional itself. But, more than anything else, it is undesirable.

Looking at the hearing record, I find my colleague from Rhode Island mentioning that he could not find any character in the public schools. I am going to have to take exception to the distinguished Senator's comment. On page 260, as he examined the witness, Father Farrell, Senator PELL stated, and I quote:

> As you may have heard before, I am strongly of the view that the strength of our Nation is determined by the education and character of its people. The public schools pay scant attention to character; in fact, virtually zero.

Now, that is my distinguished colleague from Rhode Island.

To emphasize that, again, on page 261, he asked if there were any kind of statistics on jail population of the percentage of those who attended private schools

and parochial schools. So potentially, in the distinguished Senator's mind, you are a jailbird if you get into the public schools.

Going down further, he says:

That is one of the reasons why, as chairman of the subcommittee, I have always sought to do what I can to keep the private school system as healthy and as vigorous as possible, both because of the reliance being placed upon it in my State, and also, from a national viewpoint, there is an emphasis on character, character which you do not find in public schools.

Again, my distinguished friend finds, from a national viewpoint, there is an emphasis on character which you do not find in public schools.

Again, on page 262:

The important thing is that the maximum number of parochial schools exist in kindergarten and prekindergarten and at the grade school level. The character is invited on children when they are very young.

Again, finally, Senator PELL:

Does Catholic education go in for prekindergarten and kindergarten today? That also is where character is formed.

I take exception to that. I find, and I am sure that the Senator would agree with me, that there are honest students in both the private schools and in the public schools, so basically, honesty is adhered to in both levels. But we think in terms of the general educational attainment and understanding of us as American people, the experience that we have. Again, back to James Madison who said popular government without popular education would be a sham and a farce.

Herbert Spencer said:

Education has for its foundation the object and the formation of character.

Then, no better than James Russell Lowell:

It was in the making education not only common to all but, in some sense, compulsory in all, that the destiny of the free republic of America was practically set.

The very character I find in America is premised on public education, popular education, in the public school system. This is not in derogation or disparagement of private education or secular education. They do an outstanding job. I have, as I have stated before, had my children in both types of schools. I have supported both types of schools. I have been a member of a board of trustees of a public institution. I have been also a member of the board of trustees of a Lutheran institution—a parochial institution. There is no prejudice in this, no bigotry, as was charged. I can name particular Senators of the Catholic faith who voted against the tuition tax credit, who would not have stood for one second or voted as they did last week if they had found bigotry in our comments on that debate.

It is the desire, it is the function, it is the responsibility of Government, where we have limited funds and delegated responsibilities under the Constitution, that we do not go unconstitutional and start providing for the private schools, because if we provide for part of the private schools, then let us provide for all of them. If they desire the aid on the premise of the Senator from Rhode Island, in the small amount as he would see it, they deserve it in the total amount, as we would have to see it if we go that route.

If we go that route, we would have to go the entire route for public education. What we would have done is really destroy our school system, our basic public school system in this country, because we do not have the moneys and we do not have the leadership.

We have, further, a divisiveness within education in the struggle during the past 20 years. There have been many private schools, little academies, that have sprung up in the small towns in other parts of America. Now, in those small communities there is naturally only limited civic leadership, not just in education, but on all scores. When that leadership, that interest, and that tax funding support is fragmented and divided between the academy and public education, they are both suffering.

Now, we are getting the proper support it deserves and, heavens, if we come out with private school financing, then everyone, both the public school superintendent and board, the private school board and body, will say, "We have got manna from heaven, it's all coming from Washington."

They will lay down their arms, as it were. They will lay aside their interests and support. They will step down their particular leadership.

What we are going to have is a loss of what was originally intended by our distinguished friend from New York, and that was a diversity and a pluralism. That is found in public education, amongst 107,000 different schools, in over 16,000 different school boards, publicly elected.

Now, that element of bringing everybody together in our society, an open door policy, not selective, not saying, "Take an exam to come in," not saying "No, never, I must say you're bilingual and we don't have a bilingual student," not saying, "Handicapped? We would like to, but we're a ritzy private educational system, we just have not been able to get teachers to divide their attention and we can't provide for the handicapped," and "No, we are not going to take the discipline problem. We are just going to take the public moneys."

Take the poor down in the District of Columbia the Senator is referring to. We would be taxing him to do what? To slam a door in his face?

Now, you can tax, that is right. Those sending children to the private and parochial schools, those parents are paying public taxes. But they have the privilege, as we all in America have the privilege, to get into that public school system. The public school system's doors are open to all and they have the greatness of the American character and public education.

Now, I yield to the distinguished Senator from Arizona.

Mr. DECONCINI. Mr. President, I ask unanimous consent that Alan Parker, Michael Cox, Phil Shenk, and John Saxon, of the Select Committee on Indian Affairs; Pat Coleman of Senator HUMPHREYS staff; and Jim Moers of Senator MOYNIHAN's staff be granted privilege of the floor during the debate and voting on this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I ask unanimous consent at this time that the pending amendment of the Senator from South Carolina be set aside for not to exceed 10 minutes to bring up the printed amendments offered by Senator ABOUREZK, Nos. 3519 and 3520.

The PRESIDING OFFICER. Is there objection?

Mr. DECONCINI, I ask the clerk to call up printed amendments Nos. 3519 and 3520.

The PRESIDING OFFICER. Does the Senator ask the amendments be considered en bloc?

Mr. DECONCINI. Yes; I do.

Mr. JAVITS. Mr. President, reserving the right to object, we generally like to hear the amendments before we consider them en bloc.

The PRESIDING OFFICER. Does the Senator from Arizona object to the Senator from New York hearing the amendments?

Mr. DECONCINI. I have no objection.

AMENDMENTS NOS. 3519 AND 3520

(Purpose of amendment 3519: To promote the attainment of equal education opportunities for Indians)

(Purpose of amendment 3520: To strengthen educational opportunities for Indian adults)

The PRESIDING OFFICER. The clerk will state the amendments.

The second assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI), on behalf of Senator ABOUREZK, proposes amendments numbered 3519 and 3520, en bloc.

Mr. JAVITS. I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

AMENDMENT NO. 3519

On page 355, strike out lines 1 through 23.

On page 356, line 1, strike out "PART C" and insert "PART B",

On page 377, after line 16, insert the following new title:

TITLE V—INDIAN EDUCATION

"PART A—ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES

"AMENDMENT TO PUBLIC LAW 874

"SEC. 501. (a) Effective with respect to fiscal years beginning on or after the date of enactment of this Act, section 3(d)(2) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by adding at the end thereof the following new subparagraph:

"'(D) The amount of the entitlements of any local educational agency under this section for any fiscal year with respect to children who, while in attendance at such agency, resided on Indian lands, as described in clause (A) of section 403(1), shall be the amount determined under paragraph (1) with respect to such children for such fiscal year multiplied by 125 per centum.'.

"(b) Effective with respect to fiscal years beginning on or after the date of enactment

of this Act, section 5(a)(2) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress) is repealed and section 5(a)(1) of such Act is redesignated section 5(a).

"(c) Effective with respect to fiscal years beginning on or after the date of enactment of this Act, section 5(b) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by designating the existing provisions as paragraph (1) and adding the following paragraph:

"'(2)(A) Payments of entitlements under section 3(d)(2)(D) of this Act shall be made only to local educational agencies which have, within one year of the date of enactment of this paragraph, or when local educational agencies are formed after such date of enactment, within one year of their formation, established such policies and procedures with respect to information received from the Indian parents and tribes as required by this paragraph and which have made assurances to the Commissioner, at such time and in such manner as shall be determined by regulation, that such policies and procedures have established. The Commissioner shall have the authority to waive this one-year limit for good cause, and in writing to the Indian parents and tribes.

"'(B) Each local educational agency shall establish such policies and procedures as are necessary to insure that—

"'(i) Indian children claimed under section 3(a) participate on an equal basis in the school program with all other children educated by the local educational agency;

"'(ii) applications, evaluations, and program plans are adequately disseminated to the tribes and parents of Indian children claimed under section 3(a); and

"'(iii) tribes and parents of Indian children claimed under section 3(a) are—

"'(I) afforded an opportunity to present their views with respect to the application, including the opportunity to make recommendations concerning the needs of their children and the ways by which they can assist their children in realizing the benefits to be derived from the educational programs assisted under this paragraph;

"'(II) actively consulted and involved in the planning and development of programs assisted under this paragraph; and

"'(III) afforded a general opportunity to present their overall views on the educational program and the degree of parental participation allowed.

"'(C)(i) Any tribe, or its designee, which has students in attendance at a local educational agency may file a written complaint with the Commissioner regarding any action of a local education agency taken pursuant to, or relevant to, the requirements of subparagraph (B) of this paragraph.

"(ii) Within ten working days from receipt of the complaint, the Commissioner shall—

"'(I) designate a time and place for a hearing into the matters relating to the complaint at a location in close proximity to the local educational agency involved, or, if the Commissioner determines there is good cause, at some other location convenient to both the tribe, or its designee, and the local educational agency;

"'(II) designate a hearing examiner to conduct the hearing; and

"'(III) notify the affected tribe or tribes and the local educational agency involved of the time, place, and nature of the hearing and send copies of the complaint to the local educational agency and the affected tribe or tribes.

"'(iii) The hearing shall be held within thirty days of the designation of a hearing examiner and shall be open to the public.

"(iv) The complaining tribe, or its designee, and the local educational agency shall be entitled to present evidence on matters relevant to the complaint and to make recommendations concerning the appropriate remedial actions. Each party to the hearing shall bear only its own costs in the proceeding.

"'(v) Within thirty days of the completion of the hearing, the hearing examiner shall, on the basis of the record, make written findings of fact and recommendations concerning appropriate remedial actions (if any) which should be taken. The hearing examiner's findings and recommendations, along with the hearing record, shall be forwarded to the Commissioner.

"'(vi) Within thirty days of his receipt of the findings, recommendations, and record, the Commissioner shall, on the basis of the record, make a written determination of the appropriate remedial action, if any, to be taken by the local educational agency, the schedule for completion of the remedial action, and the reasons for his decision.

"'(vii) Upon completion of his final determination, the Commissioner shall provide the complaining tribe, or its designee, and the local education agency with copies of the hearing record, the hearing examiner's findings and recommendations, and the Commissioner's final determination. The final determination of the Commissioner shall be subject to judicial review.

"'(viii) In all actions under this subparagraph, the Commissioner shall have discretion to consolidate complaints involving the same tribe or local educational agency.

"'(D) If the local educational agency rejects the determination of the Commissioner, or if the remedy required is not undertaken within the time established and the Commissioner determines that an extension of the time established will not effectively encourage the remedy required, the Commissioner shall immediately withhold payment of all moneys to which such local agency is entitled under section 3(d)(2)(D) until such time as the remedy required is undertaken, except where the complaining tribe or its designee formally requests that such funds be released to the local educational agency.

"'(E) This paragraph is based upon the special relationship between the Indian nations and the United States and nothing in it shall be deemed to relieve any State of any duty with respect to any citizens of that State.'.

"(d) Effective with respect to fiscal years beginning on or after the date of the enactment of this Act, section 5(c)(2) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by redesignating clauses (B) through (F) as clauses (C) through (G) and by adding after clause (A) the following new clause:

"'(B) to each local educational agency which provides free public education for children who reside on Indian land, as described in clause (A) of section 403(1), which equals 75 per centum of the amount to which such agency is entitled under section 3(d)(2)(D);'.

"PART B—BUREAU OF INDIAN AFFAIRS PROGRAMS

"STANDARDS FOR THE BASIC EDUCATION OF INDIAN CHILDREN IN BUREAU OF INDIAN AFFAIRS SCHOOLS

"SEC. 511. (a) The Secretary, in consultation with the Assistant Secretary of Health, Education, and Welfare for Education, and in active consultation with Indian organizations and tribes, shall carry out or cause to be carried out by contract with an Indian organization such studies and surveys, making the fullest use possible of other existing studies, surveys, and plans, as are necessary to establish and revise standards for the basic education of Indian children attending Bureau schools and Indian controlled contract schools (hereinafter referred to as 'contract schools'). Such studies and surveys shall take into account factors such as academic needs, local cultural differences, type and level of language skills, geographical isolation and appropriate teacher-student ratios for such children, and shall be directed toward the attainment of equal educational opportunity for such children.

"(b)(1) Within fifteen months of the date of enactment of this Act, the Secretary shall propose minimum academic standards for the basic education of Indian children, and shall distribute such proposed standards to the tribes and publish such proposed standards in the Federal Register for the purpose of receiving comments from the tribes and other interested parties. Within eighteen months of the date of enactment of this Act, the Secretary shall establish final standards, distribute such standards to all the tribes and publish such standards in the Federal Register. The Secretary shall revise such standards periodically as necessary. Prior to any revision of such standards, the Secretary shall distribute such proposed revision to all the tribes, and publish such proposed revision in the Federal Register, for the purpose of receiving comments from the tribes and other interested parties.

"(2) Such standards shall apply to Bureau schools, and, subject to subsection (e), to contract schools, and may also serve as a model for educational programs for Indian children in public schools. In establishing and revising such standards, the Secretary shall take into account the special needs of Indian students, and shall place a special emphasis on the support and reinforcement of the specific cultural heritage of each tribe.

"(c) The Secretary shall provide alternative or modified standards in lieu of the standards established under subsection (b), where necessary, so that the programs of each school shall be in compliance with the minimum standards required for accreditation of schools in the State where the school is located.

"(d) A tribal governing body, or the local school board if so designated by the tribal governing body, shall have the local authority to waive, in part or in whole, the standards established under subsections (b) and (c), where such standards are deemed by such body to be inappropriate or ill-conceived, and shall also have the authority to revise such standards to take into account the specific needs of the tribe's children. Such revised standards shall be established by the Secretary unless specifically rejected by the Secretary for good cause and in writing to the affected tribes or local school board, which rejection shall be final and unreviewable.

"(e) The Secretary, through contracting procedures, shall assist school boards of contract schools in the implementation of the standards established under subsections (b) and (c), if the school boards request that such standards, in part or in whole, be implemented. The Secretary shall not refuse to enter into a contract with respect to any contract school on the basis of a failure to meet such standards. At the request of a contract school board, the Secretary shall provide alternative or modified standards for the standards established under subsections (b) and (c) to take into account the needs of the Indian children and the contract school.

"(f) Subject to subsections (d) and (e), the Secretary shall begin to implement the standards established under this section immediately upon the date of their establishment. Within one year of such date, and at each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring all Bureau and contract schools up to the level required by the applicable standards established under this section. Such plan shall include, but not be

limited to, detailed information on the status of each school's educational program in relation to the applicable standards established under this section, specific cost estimates for meeting such standards at each school, and specific time lines for bringing each school up to the level required by such standards.

"(g) There are hereby authorized to be appropriated such sums as may be necessary, for academic program costs, in order to bring all Bureau and contract schools up to the level required by the applicable standards established under this section.

"NATIONAL CRITERIA FOR DORMITORY SITUATIONS

"SEC. 512. (a) The Secretary, in consultation with the Assistant Secretary for Health, Education, and Welfare for Education, and in active consultation with Indian organizations and tribes, shall conduct or cause to be conducted by contract with an Indian organization, a study of the costs applicable to boarding arrangements for Indian students provided in Bureau and contract schools, for the purpose of establishing national criteria for such dormitory situations. Such criteria shall include requirements as to adult-child ratios, needs for counselors (including special needs related to off-reservation boarding arrangements), space, and privacy.

"(b) Within fifteen months of the date of enactment of this Act, the Secretary shall propose such criteria, and shall distribute such proposed criteria to the tribes and publish such proposed criteria in the Federal Register for the purpose of receiving comments from the tribes and other interested parties. Within eighteen months of the date of enactment of this Act, the Secretary shall establish final criteria, distribute such criteria to all the tribes, and publish such criteria in the Federal Register. The Secretary shall revise such criteria periodically as necessary. Prior to any revision of such criteria, the Secretary shall distribute such proposed revision to all the tribes, and publish such proposed revision in the Federal Register, for the purpose of receiving comments from the tribes and other interested parties.

"(c) The Secretary shall begin to implement the criteria established under this section immediately upon the date of their establishment. Within one year of such date, and at each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring all Bureau and contract boarding schools up to the criteria established under this section. Such plan shall include, but not be limited to, predictions for the relative need for each boarding school in the future, detailed information on the status of each school in relation to the criteria established under this section, specific cost estimates for meeting such criteria at each school, and specific time lines for bringing each school up to the level required by such criteria.

"(d) There are hereby authorized to be appropriated such sums as may be necessary in order to bring each school up to the level required by the criteria established under this section.

"REGULATIONS

"SEC. 513. The Secretary shall establish such regulations as are necessary to carry out sections 511 and 512 within eighteen months after the date of enactment of this Act.

"STUDIES

"SEC. 514. There are hereby authorized to be appropriated no more than $1,000,000 to carry out the studies conducted under section 511(a) and section 512(a).

"FACILITIES CONSTRUCTION

"SEC. 515. (a) The Secretary shall immediately begin to bring all schools, dormitories, and other facilities operated by the Bureau or under contract with the Bureau in connection with the education of Indian children into compliance with all applicable Federal, tribal, or State health and safety standards, whichever provide greater protection, and with section 504 of the Vocational Rehabilitation Act (29 U.S.C. 31), except that nothing in this section shall require termination of the operations of any facility which does not comply with such provisions and which is in use on the date of enactment of this Act.

"(b) Within one year of the date of enactment of this Act, and at each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring such facilities into compliance with such standards. Such plan shall include, but not be limited to, detailed information on the status of each facility's compliance with such standards, specific cost estimates for meeting such standards at each school, and specific time lines for bringing each school into compliance with such standards.

"(c) Within six months of the date of enactment of this Act, the Secretary shall submit to the appropriate committees of Congress, and publish in the Federal Register, the system used to establish priorities for school construction projects. At the time any budget request for school construction is presented, the Secretary shall publish in the Federal Register and submit with the budget request the current list of all school construction priorities.

"(d) There are hereby authorized to be appropriated such sums as may be necessary to carry out subsection (a).

"BUREAU OF INDIAN AFFAIRS EDUCATION FUNCTIONS

"SEC. 516. (a) The Secretary shall vest in the Assistant Secretary for Indian Affairs all functions with respect to formulation and establishment of policy and procedure, supervision of programs, and expenditure of Federal funds for the purpose of Indian education. Such functions may not be further delegated to an official other than a Deputy Assistant Secretary for Indian Affairs, or the Director of the Office of Indian Education Programs of the Bureau (hereinafter referred to as the 'Office') and shall be governed by the provisions of this Act, any other provision of law to the contrary notwithstanding. The Director of the Office may be authorized to redelegate such functions to personnel under his direction and supervision.

"(b) The Director of the Office shall direct and supervise the operations of all personnel involved with the provision of educational services by the Bureau. Nothing in this Act shall be construed to require the provision of separate support services for Indian education.

"(c) Education personnel located in Bureau agencies, who are under the direction and supervision of the Director of the Office in accordance with the first sentence of subsection (b), shall—

"(1) monitor and evaluate Bureau education programs, and

"(2) provide technical and coordinating assistance in areas such as procurement, contracting, budgeting, personnel, and curriculum.

However, in the case of boarding schools located off reservation operated by the Bureau, education personnel located in area offices of the Bureau shall provide such services, under the direction and supervision of the Director of the Office.

"(d) For the purpose of this section the term 'functions' includes powers and duties.

"IMPLEMENTATION

"SEC. 517. Within six months after the date of enactment of this Act, the Secretary shall establish and publish in the Federal Register the policies and procedures which are necessary to implement the transfer of functions made under section 516.

"ALLOTMENT FORMULA

"SEC. 518. (a) The Secretary shall establish, by regulation adopted in accordance with section 528, a formula for determining the minimum annual amount of funds necessary to sustain each Bureau or contract school. In establishing such formula, the Secretary shall consider—

"(1) the number of Indian students served and size of the school;

"(2) special cost factors, such as—

"(A) isolation of the school;

"(B) need for special staffing, transportation, or educational programs;

"(C) food and housing costs;

"(D) overhead costs associated with administering contracted education functions; and

"(E) maintenance and repair costs associated with the physical condition of the educational facilities;

"(3) the cost of providing academic services which are at least equivalent to those provided by public schools in the State in which the school is located;

"(4) the cost of bringing the school up to the level of the standards established under sections 511 and 512; and

"(5) such other relevant factors as the Secretary determines are appropriate.

"(b) Notwithstanding any other provisions of law, Federal funds appropriated for the general local operation of Bureau and contract schools, shall be allotted pro rata in accordance with the formula established under subsection (a), except that, in the case of any such school which is located in a school district of a local educational agency which receives from Federal funds under other provisions of law an average payment per Indian child attending such school in that district which is higher than the amount which would be received by such Bureau or contract school under such formula for each Indian child attending such school, the payment to be received by that school under this section for each such child shall be equal to such average payment for an Indian child in public school in that district.

"(c) Notwithstanding subsection (b), the Secretary may provide funds for the general local operation of Bureau and contract schools where necessitated by cases of emergencies or unforeseen contingencies not otherwise provided for under subsection (b). Whenever the Secretary makes funds available under this subsection, the Secretary shall report such action to the appropriate committees of Congress.

"UNIFORM DIRECT FUNDING AND SUPPORT

"SEC. 519. (a) Within six months after the date of enactment of this Act, the Secretary shall establish, by regulation adopted in accordance with section 528, a system for the direct funding and support of all Bureau and contract schools. Such system shall allot funds, in accordance with section 518, and shall provide each affected school with notification of its approximate allotment not later than the end of the school year preceding the year for which the allotment is to be made.

"(b)(1) In the case of all Bureau schools, allotted funds shall be expended on the basis of local financial plans which shall be prepared by the local school supervisor in active consultation with the local school board for each school, and the local school board for each school shall have the authority to ratify, reject, or amend such financial plan, and expenditures thereunder, and, on its own determination or in response to the supervisor of the school, to revise such financial plan to meet needs not foreseen at the time of preparation of the financial plan. The supervisor of the school may appeal any such action by the local school board to the superintendent for education of the Bureau agency, and the

superintendent may, for good cause and in writing to the local school board, overturn the action of the local school board.

"(2) A local school board shall have financial plan authority under paragraph (1) unless the tribe affected (or in the case of a school serving several tribes, all the affected tribes), by formal action of the tribal governing body, determines that such board shall not have such authority. In the case of such a determination, the tribal governing body (or in the case of a school serving several tribes, all the affected tribal governing bodies) shall have such authority.

"(c) In the exercise of its authority under this section, a local school board may request technical assistance and training from the Secretary, and he shall, to the greatest extent possible, provide such services, and make appropriate provisions in the budget of the Office for such services.

"POLICY FOR INDIAN CONTROL OF INDIAN EDUCATION

"SEC. 520. It shall be the policy of the Bureau, in carrying out the functions of the Bureau, to facilitate Indian control of Indian affairs in all matters relating to education.

"EDUCATIONAL PERSONNEL

"SEC. 521. (a)(1) Chapter 51, subchapter III of chapter 53, and chapter 63 of title 5, United States Code, relating to the appointment, promotion, removal, leave, and classification of civil service employees, shall not apply to educators or to education positions (as defined in subsection (m)).

"(2) Paragraph (1) shall take effect one year after the date of enactment of this Act.

"(b) Not later than the effective date of subsection (a)(2), the Secretary shall prescribe regulations to carry out this section. Such regulations shall govern—

"(1) the establishment of education positions,

"(2) the establishment of qualifications for educators,

"(3) the fixing of basic compensation for educators and education positions,

"(4) the appointment of educators,

"(5) the discharge of educators,

"(6) the entitlement of educators to compensation,

"(7) the payment of compensation to educators,

"(8) the conditions of employment of educators,

"(9) the length of the school year applicable to education positions described in subsection (m)(1)(A),

"(10) the leave system for educators, and

"(11) such other matters as may be appropriate.

"(c)(1) In prescribing regulations to govern the qualifications of educators, the Secretary shall require—

"(A)(i) that lists of qualified and interviewed applicants for education positions be maintained in each agency and area office of the Bureau from among individuals who have applied at the agency or area level for an education position or who have applied at the national level and have indicated in such application an interest in working at the agency or area level; and

"(ii) that a list of qualified and interviewed applicants for education positions be maintained in the Office from among individuals who have applied at the national level for an education position and who have expressed interest in working in an education position anywhere in the United States;

"(B) that a local school board shall have the authority to waive on a case-by-case basis, any formal education or degree qualifications established by regulation pursuant to subsection (b)(2), in order for a tribal member to be hired in an education position to teach courses on tribal culture and language and that subject to subsection (d)(2)(A), a determination by a school board that such a person be hired shall be followed by the supervisor; and

"(C) that it shall not be a prerequisite to the employment of an individual in an education position at the local level that such individual's name appear on the national list maintained pursuant to subsection (c)(1)(A)(ii) or that such individual has applied at the national level for an education position.

"(2) The Secretary may authorize the temporary employment in an education position of an individual who has not met the certification standards established pursuant to regulations, if the Secretary determines that failure to do so would result in that position remaining vacant.

"(d)(1) In prescribing regulations to govern the appointment of educators, the Secretary shall require—

"(A)(i) that educators employed in a school (other than the supervisor of the school) shall be hired by the supervisor of the school unless there are no qualified applicants available, in which case the vacant position shall be filled at the national level from the list maintained pursuant to subsection (c)(1)(A)(ii),

"(ii) each school supervisor shall be hired by the superintendent for education of the agency office of the Bureau in which the school is located, and

"(iii) educators employed in an agency office of the Bureau shall be hired by the superintendent for education of the agency office;

"(B) that before an individual is employed in an education position in a school by the supervisor of a school (or, with respect to the position of supervisor, by the appropriate agency superintendent for education), the local school board for the school shall be consulted, and that subject to subsection (d)(2), a determination by the school board that such individual should not be so employed shall be followed by the supervisor (or with respect to the position of supervisor, by the agency superintendent for education); and

"(C) that before an individual may be employed in an education position at the agency level, the appropriate agency school board shall be consulted, and that, subject to subsection (d)(3), a determination by such school board that such individual should or should not be employed shall be followed by the agency superintendent for education.

"(2)(A) The supervisor of a school may appeal to the appropriate agency superintendent for education any determination by the local school board for the school that an individual be employed, or not be employed, in an education position in the school other than that of supervisor. Upon such an appeal, the agency superintendent for education may, for good cause and in writing to the local board, overturn the determination of the local school board with respect to the employment of such individual.

"(B) The superintendent for education of an agency office of the Bureau may appeal to the Director of the Office any determination by the local school board for a school that an individual be employed, or not be employed, as the supervisor of the school. Upon such an appeal, the Director of the Office may, for good cause and in writing to the local school board, overturn the determination of the local school board with respect to the employment of such individual.

"(3) The superintendent for education of an agency office of the Bureau may appeal to the Director of the Office any determination by the agency school board that an individual be employed, or not be employed, in an education position in such agency office. Upon such an appeal, the Director of the Office may, for good cause and in writing to the agency school board, overturn the determination of the agency school board with respect to the employment of such individual.

"(4) Any individual who applies at the local level for an education position shall state on such individual's application whether or not such individual has applied at the national level for an education position in the Bureau. If such individual is employed at the local level, such individual's name shall immediately be forwarded to the Secretary, who shall, as soon as possibe but in no event in more than thirty days, ascertain the accuracy of the statement made by such individual pursuant to the first sentence of this subparagraph. If the individual's statement is found to have been false, such individual, at the Secretary's discretion, may be disciplined or discharged. If the individual had applied at the national level for an education position in the Bureau, the appointment of such individual at the local level shall be conditional for a period of ninety days, during which period the Secretary may appoint a more qualified individual (as determined by the Secretary) from the list maintained at the national level pursuant to subsection (c)(1)(A)(ii) to the position to which such individual was appointed.

"(5) Except as expressly provided, nothing in this section shall be construed as conferring upon local school boards, authority over, or control of, educators.

"(e)(1) In prescribing regulations to govern the discharge and conditions of employment of educators, the Secretary shall require—

"(A) that procedures be established for the rapid and equitable resolution of grievances of educators; and

"(B) that no educator may be discharged without notice of the reasons therefor and opportunity for a hearing under procedures that comport with the requirements of due process.

"(2) The supervisor of a Bureau school may discharge (subject to procedures established under subsection (e)(1)(B)) for cause (as determined under regulations prescribed by the Secretary) any educator employed in such school. Upon giving notice of proposed discharge to an educator, the supervisor involved shall immediately notify the local school board for the school of such action. A determination by the local school board that such educator not be discharged shall be followed by the supervisor. The supervisor shall have the right to appeal such action to the superintendent for education of the appropriate agency office of the Bureau. Upon such an appeal, the agency superintendent for education may, for good cause and in writing to the local school board, overturn the determination of the local school board with respect to the employment of such individual.

"(3) Each local school board for a Bureau school shall have the right (A) to recommend to the supervisor of such school that an educator employed in the school be discharged, and (B) to recommend to the superintendent of education of the appropriate agency office of the Bureau and to the Director of the Office, that the supervisor of the school be discharged.

"(f) Subject to the authority of the Civil Service Commission to determine finally the applicability of chapter 51 of title 5, United States Code, to specific positions and employees in the executive branch, the Secretary shall determine in accordance with subsection (a)(1) the applicability or inapplicability of such chapter to positions in the Bureau.

"(g)(1) The Secretary shall fix the basic compensation or annual salary rate for educators and education positions at rates comparable to the rates in effect under the General Schedule for individuals with comparable qualifications, and holding comparable positions, to whom chapter 51 is applicable.

"(2) Each educator employed in an education position in Alaska shall be paid a cost-of-living allowance equal to 25 per centum of the rate of basic compensation to which such educator is entitled.

"(3) The Secretary may pay a postdifferential not to exceed 25 per centum of the rate of basic compensation, on the basis of conditions of environment or work which warrant additional pay as a recruitment and retention incentive.

"(h) Any individual—

"(1) who on the date of enactment of this Act is holding a position which is determined under subsection (f) to be an education position and who elects under subsection (n)(2) to be covered under the provisions of this section, or

"(2) who is an employee of the Federal Government or the municipal government of the District of Columbia and is transferred, promoted, or reappointed, without break in service, from a position under a different leave system to an education position,

shall be credited for the purposes of the leave system provided under regulations prescribed pursuant to subsection (b)(10), with the annual and sick leave to his credit immediately before the effective date of such election, transfer, promotion, or reappointment.

"(i) Upon termination of employment with the Bureau, any annual leave remaining to the credit of an individual within the purview of this section shall be liquidated in accordance with sections 5551(a) and 6306 of title 5, United States Code, except that leave earned or included under regulations prescribed pursuant to subsection (b)(10) shall not be so liquidated.

"(j) In the case of any educator who is transferred, promoted, or reappointed, without break in service, to a position in the Federal Government under a different leave system, any remaining leave to the credit of such person earned or credited under the regulations prescribed pursuant to subsection (b)(10) shall be transferred to his credit in the employing agency on an adjusted basis in accordance with regulations which shall be prescribed by the Civil Service Commission.

"(k) An educator who voluntarily terminates employment with the Bureau before the expiration of the existing employment contract between such educator and the Bureau shall not be eligible to be employed in another education position in the Bureau during the remainder of the term of such contract.

"(1) In the case of any educator employed in an education position described in subsection (m)(1)(A) who—

"(1) is employed at the close of a school year,

"(2) agrees in writing to serve in such a position for the next school year, and

"(3) is employed in another position during the recess period immediately preceding such next school year, or during such recess period receives additional compensation referred to in subsection (g)(2) or (g)(3), section 5533 of title 5, United States Code, relating to dual compensation, shall not apply to such educator by reason of any such employment during a recess period for any such receipt of additional compensation.

"(m) For the purpose of this section—

"(1) The term 'education position' means a position in the Bureau the duties and responsibilities of which—

"(A) are performed on a school-year basis principally in a Bureau school and involve—

"(i) classroom or other instruction or the supervision or direction of classroom or other instruction;

"(ii) any activity (other than teaching) which requires academic credits in educational theory and practice equal to the academic credits in educational theory and practice required for a bachelor's degree in education from an accredited institution of higher education; or

"(iii) any activity in or related to the field of education notwithstanding that academic credits in educational theory and practice are not a formal requirement for the conduct of such activity; or

"(B) are performed at the agency level of the Bureau and involve the implementation of education-related programs other than the position of agency superintendent for education.

"(2) The term 'educator' means an individual whose services are required, or who is employed, in an education position.

"(n)(1) This section shall apply with respect to any individual hired after the effective date of subsection (a)(2) for employment in an education position and to the position in which such individual is employed. Subject to paragraph (2), the enactment of this Act shall not affect the continued employment of any individual employed immediately before the effective date of subsection (a)(2) in an education position, or such individual's right to receive the compensation attached to such position.

"(2) Any individual employed in an education position immediately before the effective date of subsection (a)(2) may, within five years of the date of enactment of this Act, make an irrevocable election to be covered under the provisions of this section.

"MANAGEMENT INFORMATION SYSTEM

"SEC. 522. The Secretary shall establish within the Bureau, within one year after the date of the enactment of this Act, a management information system, which shall provide information to all agency and area offices of the Bureau, and to the Office. Such information shall include but shall not be limited to—

"(1) student enrollment;
"(2) curriculum;
"(3) staff;
"(4) facilities;
"(5) community demographics; and
"(6) student assessment information.

"BUREAU EDUCATION POLICIES

"SEC. 523. Within one hundred and eighty days of the date of enactment of this Act, the Secretary shall develop, publish in the Federal Register, and submit to all agency and area offices of the Bureau, all tribal governments, and the appropriate committees of the Congress, a draft set of education policies, procedures, and practices for education-related action of the Bureau. The Secretary shall, within one year of the date of enactment of this Act, provide that such uniform policies, procedures, and practices shall be finalized and promulgated. Thereafter, such policies, procedures, and practices and their periodic revisions, shall serve as the foundation for future Bureau actions in education.

"UNIFORM EDUCATION PROCEDURES AND PRACTICES

"SEC. 524. The Secretary shall cause the various divisions of the Bureau to formulate uniform procedures and practices with respect to such concerns of those divisions as relate to education, and shall report such practices and procedures to the Congress.

"RECRUITMENT OF INDIAN EDUCATORS

"SEC. 525. The Secretary shall institute a policy for the recruitment of qualified Indian educators and a detailed plan to promote employees from within the Bureau. Such plan shall include opportunities for acquiring work experience prior to actual work assignment.

"ANNUAL REPORT

"SEC. 526. The Secretary shall submit to each appropriate committee of the Congress a detailed annual report on the state of education within the Bureau and any problems encountered in the field of education during the year. Such report shall contain suggestions for improving the Bureau educational system and increasing local Indian control of such system.

"RIGHTS OF INDIAN STUDENTS

"SEC. 527. Within six months of the date of enactment of this Act, the Secretary shall prescribe such rules and regulations as are necessary to insure the constitutional and civil rights of Indian students attending Bureau schools, including their right to privacy under the laws of the United States, their right to freedom of religion and expression and their right to due process in connection with disciplinary actions, suspensions, and expulsions.

"REGULATIONS

"SEC. 528. Regulations required to be adopted under sections 516 through 527 of this Act shall be deemed rules of general applicability prescribed for the administration of an applicable program for the purposes of section 431 of the General Education Provisions Act and shall be promulgated, submitted for congressional review, and take effect in accordance with the provisions of such section.

"DEFINITIONS

"SEC. 529. For the purpose of this title—

"(1) the term 'local educational agency' means a board of education or other legally constituted local school authority having administrative control and direction of free public education in a county, township, independent, or other school district located within a State, and includes any State agency which directly operates and maintains facilities for providing free public education;

"(2) the term 'Commissioner' means the Commissioner of Education;

"(3) the term 'Secretary' means the Secretary of the Interior;

"(4) the term 'Bureau' means the Bureau of Indian Affairs of the Department of the Interior;

"(5) the term 'local school board', when used with respect to a Bureau school, means a body, the members of which are appointed by the governing bodies of any affected tribes, or if so designated by such tribes, elected by the parents of the Indian children attending the school; and the number of such members shall be determined by the Secretary in consultation with such tribes;

"(6) the term 'agency school board', means a body, the members of which are appointed by the governing bodies of any affected tribes, or if so designated by such tribes, elected by the parents of the Indian students in Bureau schools under such agency; and the number of such members shall be determined by the Secretary in consultation with such tribes;

"(7) the term 'supervisor' means the individual in the position of ultimate authority at a Bureau school;

"(8) the term 'financial plan' means a plan of services to be provided by each Bureau school;

"(9) the term 'Indian organization' means any group, association, partnership, corporation, or other legal entity owned or controlled by a federally recognized Indian tribe or tribes, or a majority of whose members are members of federally recognized Indian tribes; and

"(10) The term 'tribe' means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

"PART C—AMENDMENTS TO VARIOUS EDUCATION ACTS

"EXTENSION OF PROGRAMS FOR THE EDUCATION OF INDIAN CHILDREN

"SEC. 531. (a) Section 810(g) of the Elementary and Secondary Education Act of 1965 is amended by striking out 'July 1, 1978' and inserting in lieu thereof 'October 1, 1983'.

"(b) Section 303(a)(1) of the Act of Sep-

tember 30, 1950 (Public Law 874, Eighty-first Congress) as added by the Indian Education Act, is amended by striking out 'October 1, 1978' and inserting in lieu thereof 'October 1, 1983'.

"(c)(1) Section 422 of the Indian Education Act is amended by striking out 'each of the three succeeding fiscal years' and inserting in lieu thereof 'each of the succeeding fiscal years ending prior to October 1, 1983'.

"(2) Section 423(a) of such Act is amended by striking out 'each of the three succeeding fiscal years' and inserting in lieu thereof 'each of the succeeding fiscal years ending prior to October 1, 1983'.

"(3) Section 442(a) of such Act is amended by striking out 'October 1, 1978' and inserting in lieu thereof 'October 1, 1983'.

"CULTURALLY RELATED ACADEMIC NEEDS

"SEC. 532. (a) Section 302(a) of the Indian Elementary and Secondary School Assistance Act is amended—

"(1) by striking out 'special educational needs of Indian students' and inserting in lieu thereof 'special educational and culturally related academic needs of Indian students'; and

"(2) by striking out 'those special educational needs' and inserting in lieu thereof 'these special educational or culturally related academic needs, or both'.

"(b) Section 304 of such Act is amended by striking out 'special educational needs' each place it appears in paragraphs (1) and (2) and inserting in lieu thereof 'special educational or culturally related academic needs, or both'.

"DEMONSTRATION PROJECTS

"SEC. 533. Section 303 of the Indian Elementary and Secondary School Assistance Act is amended by adding at the end thereof the following new subsection:

"'(c) In addition to the sums appropriated for any fiscal year for grants to local educational agencies under this title, there is hereby authorized to be appropriated for any fiscal year an amount not in excess of 10 per centum of the amount appropriated for payments on the basis of entitlements computed under subsection (a) for that fiscal year, for the purpose of enabling the Commissioner to make grants on a competitive basis to local educational agencies to support demonstration projects and programs which are designed to plan for and improve education opportunities for Indian children, except that the Commissioner shall reserve a portion not to exceed 25 per centum of such funds to make grants for demonstration projects examining the special educational and culturally related academic needs that arise in school districts with high concentrations of Indian children.'.

"PARENT COMMITTEES

"SEC. 534. Section 305(b) of the Indian Elementary and Secondary School Assistance Act is amended—

"(1) by inserting '(including persons acting in loco parentis other than school administrators or officials)' after 'Indian children' in paragraph (2)(B)(i) and after 'children participating in the program' in paragraph (2)(B)(ii);

"(2) by inserting ', including the hiring of personnel,' after 'policies and procedures' in paragraph (2)(C); and

"(3) by striking out the period at the end of paragraph (2)(C) and inserting in lieu thereof a semicolon and by adding at the end thereof the following new paragraph:

"'(3) provides that the parent committee formed pursuant to paragraph (2)(B)(ii) will adopt and abide by reasonable bylaws for the conduct of the program for which assistance is sought.'.

"ALLOCATION ADJUSTMENTS

"SEC. 535. Section 307(b) of the Indian Elementary and Secondary School Assistance Act is amended to read as follows:

"'(b) In the case of any fiscal year in which the maximum amounts for which local educational agencies are eligible have been reduced under the first sentence of subsection (a), and in which additional funds have not been made available to pay in full the total of such maximum amounts under the second sentence of such subsection, the Commissioner may reallot, in such manner as he determines will best assist in advancing the purposes of this title, any amount awarded to a local education agency in excess of the amount to which it is entitled under section 303(a) and subsection (a) of this section, or any amount which the Commissioner determines, based upon estimates made by local education agencies, will not be needed by any such agency to carry out its approved project.'.

"TRIBAL SCHOOLS

"SEC. 536. Notwithstanding any other provisions of law, any Indian tribe or organization which is controlled or sanctioned by an Indian tribal government and which operates any school for the children of that tribe shall be deemed to be a local educational agency for purposes of section 303(a) of the Indian Elementary and Secondary School Assistance Act (title III of Public Law 874, Eighty-first Congress) if each such school, as determined by the Commissioner, operated by that tribe or organization provides its students an educational program which meets the standards established under section 111 for the basic education of Indian children, or is a school operated under contract by that tribe or organization in accordance with the provisions of the Indian Self-Determination and Education Assistance Act.

"AMENDMENTS TO TITLE VIII OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

"SEC. 537. (a) Section 810(c)(1)(E) of the Elementary and Secondary Education Act of 1965 is amended by inserting 'and gifted and talented Indian children' after 'handicapped'.

"(b)(1) Section 810(c)(1)(F) of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"'(F) early childhood programs, including kindergarten;'.

"(2)(A) Section 810(d) of the Elementary and Secondary Education Act of 1965 is amended—

"(i) by striking out 'children' in paragraphs (1) and (2) of such section and by inserting in lieu thereof 'students' each time it appears; and

"(ii) by inserting after 'teachers' a comma and the following: 'administrators'.

"(B) The section heading of section 810 of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"'IMPROVEMENT OF EDUCATIONAL OPPORTUNITIES FOR INDIAN STUDENTS'

"(c) Section 810(e) of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"(e)(1) The Commissioner is also authorized to make grants to and contracts with public agencies, State educational agencies in States in which more than five thousand Indian children are enrolled in public elementary and secondary schools, Indian tribes, Indian institutions, Indian organizations, or to make contracts with private institutions and organizations, to establish, on a regional basis, information centers to—

"'(A) evaluate programs assisted under this part, under the Indian Elementary and Secondary School Assistance Act, under section 316 of the Adult Education Act, and other Indian education programs in order to determine their effectiveness in meeting the special educational and culturally related academic needs of Indian children and to conduct research to determine those needs;

"'(B) provide technical assistance upon request to local educational agencies and Indian tribes, Indian organizations, Indian institutions, and parent committees created pursuant to section 305(b)(2)(B)(ii) of the Indian Elementary and Secondary School Assistance Act in evaluating and carrying out programs assisted under this part, under such Act, and under section 316 of the Adult Education Act through the provision of materials and personnel resources; and

"'(C) disseminate information upon request to the parties described in subparagraph (B) concerning all Federal education programs which affect the education of Indian children including information on successful models and programs designed to meet the special educational needs of Indian children.

"'(2) Grants or contracts made pursuant to this subsection may be made for a term not to exceed three years (renewable at the end of that period subject to the approval of the Commissioner) provided that provision is made to insure annual review of the projects.'.

"(d) Section 810(f) of the Elementary and Secondary Education Act of 1965 is amended by inserting '(1)' after '(f)', by redesignating clauses (1), (2), (3), and (4) as clauses (A), (B), (C), and (D) respectively, and by adding at the end thereof the following:

"'(2) The Commissioner shall not approve an application for a grant under subsection (e) of this section unless he is satisfied that the funds made available under that subsection will be so used as to supplement the level of funds from State, local, and other Federal sources that would, in the absence of Federal funds under this subsection, be made available by the State or local educational agency for the activities described in this subsection, and in no case will be used so as to supplant those funds.'.

"(e) Section 810(g) of the Elementary and Secondary Education Act of 1965 is amended by inserting '(1)' after '(g)' and by adding at the end thereof the following:

"'(2) For the purpose of making grants under subsection (e) of this section there are hereby authorized to be appropriated $8,000,000 for each of the fiscal years ending prior to October 1, 1983. The sum of the grants made to State educational agencies under subsection (e) of this section shall not exceed 15 per centum in any fiscal year of the sums appropriated for that year.'.

"(f) Section 306(a) of the Indian Elementary and Secondary School Assistance Act is amended by inserting 'estimated to be' after 'equal to the amount'.

"TEACHER TRAINING AND FELLOWSHIPS

"SEC. 538. (a) The first sentence of section 422(a) of the Indian Education Act is amended by striking out 'children' and inserting in lieu thereof 'people'.

"(b) Section 423(a) of the Indian Education Act is amended—

"(1) by striking out 'less than three, nor'; and

"(2) by striking out 'professional or graduate degree in engineering, medicine, law, business, forestry, and related field' and inserting in lieu thereof 'post-baccalaureate degree in medicine, law, education, and related fields or leading to an undergraduate or graduate degree in engineering, business administration, natural resources, and related fields.' ".

On page 20, in the table of contents, strike out part B and items section 321.

On page 20, in the table of contents, redesignate part C as part B.

On page 21, in the table of contents, insert after item section 409 the following:

"TITLE V—INDIAN EDUCATION

"PART A—ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES

"Sec. 501. Amendment to Public Law 874.

"PART B—BUREAU OF INDIAN AFFAIRS PROGRAMS

"Sec. 511. Standards for the basic education of Indian children in Bureau of Indian Affairs schools.

"Sec. 512. National criteria for dormitory situations.
"Sec. 513. Regulations.
"Sec. 514. Studies.
"Sec. 515. Facilities construction.
"Sec. 516. Bureau of Indian Affairs education functions.
"Sec. 517. Implementation.
"Sec. 518. Allotment formula.
"Sec. 519. Uniform direct funding and support.
"Sec. 520. Policy for Indian control of Indian education.
"Sec. 521. Educational personnel.
"Sec. 522. Management information system.
"Sec. 523. Bureau education policies.
"Sec. 524. Uniform education procedures and practices.
"Sec. 525. Recruitment of Indian educators.
"Sec. 526. Annual report.
"Sec. 527. Rights of Indian students.
"Sec. 528. Regulations.
"Sec. 529. Definitions.

"PART C—AMENDMENTS TO VARIOUS EDUCATION ACTS

"Sec. 531. Extension of programs for the education of Indian children.
"Sec. 532. Culturally related academic needs.
"Sec. 533. Demonstration projects.
"Sec. 534. Parent committees.
"Sec. 535. Allocation adjustments.
"Sec. 536. Tribal schools.
"Sec. 537. Amendments to title VIII of the Elementary and Secondary Education Act of 1965.
"Sec. 538. Teacher training and fellowships."

AMENDMENT NO. 3520

On page 352, between lines 15 and 16, insert the following:

"SEC. 311. (a)(1) Section 314(a)(4) of the Act (as redesignated by section 307) is amended by striking out 'on Indian reservations' and inserting in lieu thereof 'among Indians'.

"(2) Section 314 of the Act (as redesignated by section 307) is amended by redesignating subsections (b), (c), and (d) as subsections (c), (d), and (e), respectively, and by inserting immediately after subsection (a) the following new subsection:

"(b) The Commissioner is also authorized to make grants to Indian tribes, Indian institutions, and Indian organizations to develop and establish educational services and programs specifically designed to improve educational opportunities for Indian adults.".

On page 352, line 16, strike out "SEC. 311." and insert in lieu thereof "(b)".

On page 352, line 16, strike out "(d)" and insert in lieu thereof "(e)".

Mr. JAVITS. Mr. President, may I ask if these are the amendments as printed?

Mr. DECONCINI. Yes; they are.

Mr. JAVITS. Fine. I thank the Senator. I have no objection to the consideration en bloc, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I ask unanimous consent that Senators BARTLETT, KENNEDY, CRANSTON, GOLDWATER, MARK O. HATFIELD, HART, and myself be added as cosponsors to these amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, these amendments have been drafted and consolidated as an additional title 5 to the bill. They are similar to what is now title XI of H.R. 15, the House companion bill to ESEA which passed last month.

Mr. President, these amendments address serious deficiences in the educational programs administered by the Departments of HEW and Interior for Indian people which have been repeatedly documented in study after study. By implementing these long-needed reforms and by providing direction and additional resources for these educational programs, we can take the steps necessary to realize the attainment of equal educational opportunity for all Indian children.

These amendments were submitted Monday, August 21, 1978, and were printed in full in the CONGRESSIONAL RECORD along with a section-by-section analysis. In addition, Senator BARTLETT and Senator ABOUREZK sent a Dear Colleague to all the Members of the Senate which contained the text of these amendments with additional background material.

UP AMENDMENT 1732

(Purpose: To minimize the negative effect on on-going instructional programs by withholding of impact aid payments, and to require a sixty day written notice prior to the dismissal of educational personnel)

Mr. DECONCINI. Mr. President, I send to the desk at this time two modifying amendments and ask that the amendment be modified. These have been cleared both with the managers and the ranking minority member. I urge my colleagues to support these amendments.

The PRESIDING OFFICER. Is there objection?

Mr. JAVITS. Reserving the right to object, Mr. President, we are trying to figure out now what is being done because, if I may be heard, it is a fact that the Abourezk amendments are printed, but my staff says it has had no notice of these two modifications. We need a minute to look them over. Therefore, may I ask Senator HOLLINGS, if he is here, if not, that we may have a quorum, if the Senator would just proceed, or withhold this unanimous consent until we can look at these.

The PRESIDING OFFICER. Does the Senator suggest the absence of a quorum?

Mr. JAVITS. I would think the Senator could go ahead. We do not want to take undue time, unless he wants to——

Mr. DECONCINI. I need no further time.

Mr. JAVITS. Mr. President, if it is agreeable to Senator DECONCINI, we will just take a minute. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I ask that the amendment be considered at this time as modified.

The PRESIDING OFFICER. Is there objection to the modification? Without objection, it is so ordered.

The question is on agreeing to the amendment, as modified.

Mr. PELL. Mr. President, I have had a chance to go over this, and there is no objection on the majority side.

Mr. JAVITS. Mr. President, we are prepared to accept the Abourezk-Bartlett amendment. We have examined the modifications and find them not objectionable, as well.

The PRESIDING OFFICER. The question is on agreeing to the amendments, as modified.

The amendments, as modified, were agreed to.

The modifications are as follows:

MODIFICATIONS TO AMENDMENT NO. 3519

On page 6, line 25, strike "immediately", and on page 7, line 4, strike the period, and insert a colon and the following: "provided that the Commissioner may not withhold such moneys during the course of the school year if he determines that it would substantially disrupt the educational programs of the local educational agency.".

On page 25, after line 25, insert the following new subsection:

"(C) educators employed in Bureau schools shall be notified sixty days prior to the end of the school year whether their employment contract will be renewed for the coming year.".

Mr. DECONCINI. Mr. President, I thank the manager of the bill and the ranking minority member.

Mr. PELL. Mr. President, I ask unanimous consent that Sarah Turner and Carlton Betenbaugh, of the staff of Senator ALLEN, have the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, I make the same request for David Morse.

The PRESIDING OFFICER (Mr. LEAHY). Without objection, it is so ordered.

UP AMENDMENT NO. 1722

The question recurs on the unprinted amendment by the Senator from South Carolina (Mr. HOLLINGS).

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the names of the Senator from Texas (Mr. BENTSEN) and the Senator from North Carolina (Mr. HELMS) be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, I listened with great interest to the words of my friend from South Carolina.

I point out that this amendment was not the invention of one member of that committee. It actually was a committee amendment, approved by the whole committee.

It happens that title 12 could equally have been title I in lieu of title XII. We sought to do something to help youngsters in the private schools. In the country as a whole, 9 percent of our youngsters are being educated in nonpublic schools. In my own State, 15 percent are being educated in nonpublic schools.

Our political parties, at their conventions, made many pious statements of which we were reminded in the debate by the junior Senator from New York, to the effect that something should be done to help youngsters in nonpublic schools.

The pattern we followed in the com-

mittee was to seek only to do those things that were constitutional. Obviously, there are two sides to every question.

We believe that the tests were, one, that a proposal must have a secular purpose; two, its principal or primary effect must be one that neither advances nor inhibits religion; and, three, it must not foster an excessive government entanglement with religion.

We were very concerned that the aid we provided through title XII follow closely the decision in Wolman against Walter.

In Wolman, as all those who followed this case know, the Court said that purchasing textbooks for nonpublic schools was constitutional; that supplying standardized tests and scoring services to nonpublic schools was constitutional; that providing speech and hearing services and diagnostic psychological services to nonpublic schools was constitutional. So we had arguments that would indicate that these provisions were constitutional. On the other hand, other lawyers said they were not. For that reason, we added to title XII a provision for an expedited review of that title's constitutionality and a severability provision. Because, in the final analysis, the judgment of whether or not something is constitutional is not in one Senator's hands or in the Senate's hands. It is in the Court's hands.

This expedited review provision would mean that any questioning of the constitutionality of the provisions of title XII could be judged in the courts.

Touching for a moment on the point the Senator raised concerning character, I do stick to my guns. I would agree that you will find crooks emerging from nonpublic schools and you will find men of the finest character emerging from public schools. But on the average, I would say, particularly in the earlier grades, there is more emphasis on character in nonpublic schools than in public schools. I wish that were not the case.

With respect to building character, every one of our Founding Fathers, every signer of the Declaration, was educated in a nonpublic school.

I think the evidence would show that in the average nonpublic school there is a bit more emphasis on character than in the public schools. Maybe we can change that, and I would like to do it. But we are dealing with things as they are.

Mr. President, I think title XII is distinguishable from all of the most recent Supreme Court cases which hold that different types of aid programs to nonpublic schools are unconstitutional. And, I think the differences between title XII and these programs make title XII presumably constitutional.

The first of these most recent cases was decided in 1971. This was the case of *Lemon* v. *Kurtzman*, 403 U.S. 602. The Lemon case was a salary supplement case which considered State laws in Rhode Island and Pennsylvania. Rhode Island supplemented the salary of private school teachers who taught courses that were offered in the public schools. These teachers could not teach religion. The Pennsylvania statute allowed the purchase by the State of certain "secular educational services" from private schools, directly reimbursing those schools for salaries, textbooks, and instructional materials.

The Court found both of these statutes to be unconstitutional. They said the Rhode Island statute would bring about an excessive government entanglement with religion. They said a teacher who was under the control and discipline of a church-related school posed a serious problem to the separation of religious from purely secular aspects of the school; to assure that such a separation did occur would require continuing State surveillance and inspection of school and its activity, and this would result in entanglement.

The Court decided the Pennsylvania case on the entanglement theory also. Pennsylvania had a postaudit financial record inspection authority in the statute. Such an inspection procedure created an intimate and continuing relationship between the church and State, and thus entanglement. The Pennsylvania statute explicitly defined what the schools had to do with respect to the inspection. This fact raised the specter of entanglement.

Title XII can be definitely distinguished from both of these decisions. Unlike the Rhode Island statutes, title XII does not subsidize the salaries of nonpublic school teachers. Title XII does not pose an entanglement problem such as the Rhode Island statute posed.

And, title XII is distinguishable from the Pennsylvania law. The Pennsylvania statute caused the Court to fear that comprehensive measures of State surveillance into the affairs of the church-related school would follow the law. This was a fear of the Court, not only in the Lemon case, but in the case of *Walz* v. *Tax Commissioner*, 397 U.S. 664 (1970). The Court seemed to indicate in Lemon that a direct grant program to nonpublic schools would inevitably lead to entanglement. And, the postaudit record inspection powers of the Pennsylvania statute seemed to support the Court's fears. However, title XII has no such entanglement implication. In fact, every effort was made to remove any suggestion of entanglement.

It is also important to realize that the Court did not say in Lemon that direct aid to nonpublic schools was wrong per se. All the Court said was that the Pennsylvania statute in question had the potential of entanglement, and that the statute had the added defect of the postaudit procedure, which was strong evidence of potential entanglement. Title XII has no such defect.

The next set of cases were decided in 1973. Among these was the famous case of the *Committee for Public Education* v. *Nyquist*, 413 U.S. 756 (1973). The Nyquist case concerned a New York statute that provided three types of financial aid to nonpublic schools. First, the New York statute provided direct money grants to nonpublic schools for maintenance and repair of facilities and equipment to insure the health, welfare, and safety of the students. Second, it provided a tuition reimbursement plan for parents of nonpublic school children if the parents' income were less than $5,000. And, third, it provided tuition tax relief to parents not eligible for reimbursement.

The Court found all three provisions to be unconstitutional based on an advancement of religion theory. It said the inevitable effect of the maintenance and repair grants was to subsidize and advance the religious mission of sectarian schools. The facilities and equipment had no limit in their use, and could be used for religious as well as secular purposes. The Court also said that the tuition credit and reimbursement plans had the effect of providing financial support to nonpublic, sectarian institutions, and that the provisions had no restrictions to assure that their use would not advance religion.

Title XII does not have these problems. None of the assistance that would be provided under the act could be used to advance religion. The materials and equipment section of title XII has a requirement that such materials and equipment could not become affixed to the school facility, and had to be capable of being taken to and from school by the students. Thus, such materials and equipment could not be converted to a religious purpose. And, title XII does not have a tuition credit or reimbursement provision.

It is important to consider what the Court did not say in the Nyquist case, as well as what it did say. The Court did not say that public aid to nonpublic schools was unconstitutional per se. Although the Court did not decide Nyquist on the entanglement theory, it did discuss this theory. The Court said that any type of aid program to nonpublic schools carries with it a grave potential for entanglement in the broad sense of political strife over aid to religion. But, the Court went on to say that the prospect of such divisiveness may not alone warrant the invalidation of State laws that otherwise survive the careful scrutiny required in decisions concerning public aid to nonpublic schools. This admission by the Court implies that some aid programs to nonpublic schools are valid.

The most recent case of *Wolman* v. *Walter*, 97 S. Ct. 2593 (1977), seems to outline the kinds of aid that would be considered valid. And, title XII patterns its assistance on the Wolman case. Under Wolman, textbooks, testing services, speech, and hearing services, and diagnostic psychological services were all held to be constitutional. Title XII would provide transportation services to nonpublic school students to and from the school facility. This type of assistance has been upheld in a long series of cases from *Everson* v. *Board of Education*, 330 U.S. 1 (1947) through *Board of Education* v. *Allen*, 392 U.S. 236 (1968). In this series of cases, the Court has ruled that transportation, school lunches, public health services, and textbooks could all be constitutionally provided to nonpublic schools.

Title XII distinguishes itself from Wolman in its provision of guidance and counseling services and instructional ma-

terials and equipment. However, title XII is drafted in such a way that it should answer the Court's concern in these two areas. With respect to guidance and counseling, this provision is taken from title V, part A of the National Defense Education Act of 1958. The Supreme Court has never ruled that a Federal program providing guidance and counseling services to nonpublic schools is invalid. Also, title XII is tightly drafted to insure that the guidance and counseling services provided would be strictly secular, and could not be used for a religious purpose.

With respect to materials and equipment, the Court's concern in Wolman was that such materials and equipment would become a permanent part of the school facility, and as such, would be capable of being used to advance a religious purpose. Title XII should answer this concern. The only materials and equipment which could be purchased under title XII would be those that were incapable of being converted to a religious use and which could not be affixed to the nonpublic school facility. Also, these materials and equipment would have to be capable of being taken home from the school by the students. By drafting title XII in this manner, it will hopefully answer the concerns of the Court.

Thus, title XII is distinguishable from those cases which hold public aid to nonpublic schools invalid, while it is at the same time consistent with the Court's decision in the most recent case concerning this issue. Title XII patterns the aid it provides after the decision of Wolman versus Walter. This is the Supreme Court's last pronouncement in this area. And, since the Court has never ruled on the question of Federal aid to nonpublic schools, it is virtually impossible to predict what the Court will say with respect to any type of Federal program in this area. However, since title XII follows the Wolman guidelines, it has a presumption of constitutionality.

Also, it is important to point out that the issue of entanglement can be raised with any question of aid to nonpublic schools, whether that aid be in the form of tax credits, indirect aid through the student, or direct aid. We think we have taken all the steps necessary to avoid the entanglement issue with respect to title XII.

Mr. President, I yield the floor to the Senator from New York.

Mr. MOYNIHAN. I thank the distinguished chairman of the committee.

Mr. President, I support this important innovation in national educational policy, and I will speak—I hope it will not be at excessive length—to some of the earlier comments of our friend, the Senator from South Carolina.

Mr. President, we deal here with what is perhaps the last frontier of civil rights in this Nation. We do so at the beginning of a debate that very well will take up a generation.

It is characteristic of this beginning, as I suspect it has been of other such beginnings, that there are few Senators on the floor, with hardly anyone in the galleries, and what we say here will not be reported in the press nor much noted even among ourselves.

But I do think we should know that we have made a beginning in this Congress, for the first time in the history of this Republic, in debating these issues.

We stand at an intersection between a legacy of religious bigotry in this Nation and a new but increasingly formed tendency to what is perhaps best described as statism—the conviction that that which is not public is somehow suspect.

I am not surprised that there are few Senators present in the Chamber. I think that from the debates of the previous week we could describe the Senate as divided into roughly three parts.

About a third of the Senate cannot imagine that anything we say might be so. It is an impermeable prejudice on the point that does not even attain to the condition of doubt, and they do not come to listen to what they can imagine need not be heard.

There is another third which begins to fear that what we say might in fact be soundly based and does not wish to hear.

Then, lastly, I should think there is about a third of the Senate that commenced to see the nature of the arguments and the validity of some of them at least, and that is perhaps about the number of votes we will receive this evening.

But even though, I wish to restate some of the points I made earlier in the tuition tax credit debate in which the Senator from Rhode Island was generously supportive even though he could not actually associate himself with that particular form of support which he now promises he will do.

Mr. PELL. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I am happy to yield.

Mr. PELL. I add that one of the reasons why I did not vote with the Senator from New York was because I had this as a position to which to fall back. But I believe that something must be done to help the private schools, and I must say that if this is rejected my sympathy for the plight of the private nonpublic school will still remain great and I will be very sympathetic to the tax credit approach, although as a whole I do not prefer the tax credit approach.

Mr. MOYNIHAN. I say the Senator has proven his sympathy and demonstrated his mastery of the subject in the legislation before us which comes not from him in an idiosyncratic manner but from that great committee over which he reports at this time, and it is an honor to this Chamber that he brought this legislation.

I wish to turn now to the comments which the Senator from South Carolina has offered and to say what he knows. I accept fully the good faith in which they are offered and the ability with which they are argued.

But to repeat our earlier assertion, his opposition is based upon the weakest possible argument in this area which is that recent Supreme Court decisions indicate that he would not be accepted by the Court.

I say that as with tuition tax credits. If this is sound educational policy, in our judgment we should endorse it and present it to the Court for decision because, Mr. President, the Supreme Court's decisions in this area now make no sense. They are erratic. They constitute fiat more than law.

It was a great understatement which Mr. Justice Powell said at the outset of his dissent in Wolman:

> Our decisions in this troubling area draw lines that often must seem arbitrary.

Well, arbitrary indeed they are.

The key decision in Wolman, and I ask such as may hear me just to listen to these words:

> In summary, we hold constitutional those portions of the Ohio statute authorizing the State to provide nonpublic school pupils with books.

Then I leave out a few other items.

> We hold unconstitutional those portions relating to instructional materials.

We are stolidly required by the Court to suppose that there is a constitutional distinction between textbooks and instructional materials. If Senators will believe that that is to be found in the first amendment, I suggest they will believe anything, and the Court made no effort to defend its distinction. It is perhaps as embarrassed by it as it should be.

Are we to assume in the face of this embarrassment, which the Justices themselves increasingly acknowledge, that we should not exercise a clear constitutional right to state in legislation what we believe to be constitutional and await the judgment of the Court in the matter?

During the last debate Senators may recall, some of them, the statement which Phillip Kurland offered in this matter when he said:

> These cases have not been decided on principle but rather on the personal predilections of the judges.

And he earlier stated:

> Anyone suggesting that the answer as a matter of constitutional law is clear one way or the other is either deluding or deluded.

Let me offer, in the hopes that there might be four Senators in this Chamber to hear me, two items.

In Wolman against Walter, the majority spoke of the necessity that any aid to nonpublic schools may not have, and I quote: The impermissible effect of advancing religion.

The impermissible effect of advancing religion? It sounds like something one can read on the wall in the state museum of atheism in Leningrad. It is an archaic notion.

I am not here suggesting that there is something horrible about atheists, not in the least. I am suggesting that that kind of notion, that the advancement of religion was the retardation of progress, is a 19th century idea already quaint in itself in no way reflecting the sensibilities of this anguished and uncertain age and culture in which we live.

It belongs in the glossary of the Scopes trial and not in the rhetoric and debate of the last quarter of the 20th century.

I give Senators another example, just an example.

In this decision in the Lemon case, Mr.

Justice Douglas, as brilliant and wonderful a man as we have had on the court in our time, cited as an argument against aid to nonpublic schools, to Catholic schools, a text from a passage from a book on Roman Catholicism by Mr. Boettner, Mr. Boettner who argues inter alia, as the judges say, that no Roman Catholic should be allowed to teach in the public schools. Such is the subversive nature of their doctrine.

But what is it subversive of? Mr. Boettner goes on at great length and says:

History, literature, geography, civics, and science are all given a Roman Catholic slant.

And then he says:

Their purpose is not so much to educate, but to indoctrinate and train, not to teach scripture truths and Americanism, but to make loyal Roman Catholics.

Mr. Justice Douglas asked us to believe that the failing of the Catholic schools is that they do not teach Scripture truths, meaning a particular mode of Scripture truths.

This belongs in the era of the debates over Darwin.

Mr. President, in the face of the intellectual demise of the Court's standards surely we should have the sense of authority in ourselves to do what we think is constitutional and await the Court.

I say to Senators that it is argued that this provision violates the Court's decisions in the area involved.

I suggest that these decisions are illogical, unpersuasive, arbitrary, and mutually inconsistent.

We are not bound to spare the Court yet another confrontation with its own embarrassing work in this area of constitutional law. Indeed, I would argue the contrary, that we are bound to make them face it again and again until they bring to those principles of logic and consistency which must underlie constitutional law if it is to earn our respect as well as it should our obedience.

I would remind this Chamber that we are today the only English-speaking nation in the world that does not freely provide public educational assistance to the public and the nonpublic schools alike. We are the only one. Nations which fully share our inheritance of the Reformation and the difficulties of subsequent centuries have put that all behind them. In Canada, Australia, New Zealand, Great Britain, and Ireland, the nonpublic schools receive, as a matter of right, pretty much the same or sometimes precisely the same public support as the government schools. We are dealing with an archaism in our thoughts, somehow intersecting with a growing feeling that that which government does not control may not be permitted.

That is precisely the animating principle of the HEW bureaucracy.

It will be a generation, I suspect—and the question may be moot by that time—before what we say is understood, what we have said here tonight is understood.

I hope the Senator from Rhode Island will be looked back upon as the first man to bring to the floor of the Senate an amendment to our basic Education Act calling for equity in these matters, as he has done.

I would remind him that in the previous couple of days we have had in the back of our Chamber large blowups of the Republican and Democratic platform commitments in another matter on civil rights or very near to civil rights. That is absent here because we are embarrassed by it, because we will not keep faith with the commitments we made.

But, Mr. President, this is an old Republic and, with the grace of God—if I may invoke that term without offending—we will be older yet and, perhaps, in time the equity and justice and the law of the case we made will come to be seen better than it is today.

I conclude by once again thanking the Senator from Rhode Island for his courage in this matter and his prophecy in this matter, that this day will one day be remembered.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I have three amendments——

The PRESIDING OFFICER. There is an amendment pending.

Mr. HEINZ. I thank the Chair. I was not aware of it. I yield the floor.

Mr. HOLLINGS. What did the Senator say? We have an amendment pending and we have the yeas and nays. I think the Senator from Rhode Island and I——

Mr. PELL. I am prepared to vote. I thought the Senator wanted to speak on it.

The PRESIDING OFFICER. The question is on agreeing to the amendment on the amendment——

Mr. JAVITS addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. JAVITS. I shall be very brief, but I do want to say a word.

Mr. President, I shall vote with Senator PELL on title XII, and for this reason: It is a fact—I am too much of a lawyer to gild that lily—that there are constitutional questions as to the provisions, the detailed provisions, of title XII.

But let us remember we are going to conference in this matter and that title XII does not exist in the House bill and that, therefore, we will be able to work out the individual detailed applications of the use of $500 million, if that is the amount that the Senate finally authorizes here under this title.

I also point out that a section of title XII deals with an expedited consideration by the courts, recognizing the fact that this matter, some parts of it, may have to be submitted to the courts.

One of the reasons why I sought the floor and, as I say, I shall be very brief, is it has not been sufficiently noted that what title XII does is to back up other provisions of the bill. The fact is that throughout the bill there are provisions which materially firm up the proposition that nonpublic schools shall be entitled to participate in funds under ESEAA to the extent that the Constitution will allow.

That is spelled out in great detail under three categories: One, consultation is required between nonpublic and public school officials to insure that needs of nonpublic students are reflected in the design of the funding proposals; second, that there is assurance of alternative arrangements, passthroughs, and otherwise, for services to nonpublic students when the local educational agency is unwilling or unable through State law to comply with the requirements we put in the bill; and, third, that we establish procedures for nonpublic school representatives to achieve satisfactory resolution of their complaints by the process of complaint and hearing to the Commissioner of Education.

These are critically important changes. The fact is that nonpublic school students have not received their due, not that it is anybody's fault but just in the way matters have been set up under the ESEAA, and we propose that they should, and, therefore, title XII represents, as I say, notwithstanding its constitutional problems, a backup for the general actions taken in the rest of the bill.

Mr. President, in substantiation of that position, I ask unanimous consent that a table may be included as part of my remarks which show as to the various titles of the bill, other than title XII, the present law and the new requirements which are proposed by S. 1753, designed along the line which I have described.

There being no objection, the comparison was ordered to be printed in the RECORD, as follows:

PARTICIPATION OF NONPUBLIC SCHOOL STUDENTS IN MAJOR ESPA PROGRAMS

COMPARISON OF CURRENT LAW WITH S. 1753, EDUCATION AMENDMENTS OF 1978—Continued

Title I

Current Law	S. 1753
Requires LEA to extend Title I services to nonpublic students on equitable basis.	Requires equal expenditures (based on numbers and need) for nonpublic students.
Only 43 percent of Title I school districts serve nonpublic students.	All Title I districts should serve eligible nonpublic students.
2 percent of students served are nonpublic students.	Effect should be that closer to 10 percent of students served are nonpublic.
Nonpublic students served an average of 1 hour per week, compared with 5 hours per week for public school students.	Nonpublic students should receive 4 more hours of instruction per week.

COMPARISON OF CURRENT LAW WITH S. 1753, EDUCATION AMENDMENTS OF 1978—Continued

Title I

Current Law	S. 1753
State files assurances with U.S.O.E. re nonpublic school participation.	SEA files detailed plan for actively monitoring and enforcing nonpublic participation.
No comparable provision.	SEA must establish procedures for resolving complaints re insufficient nonpublic school participation.
When LEA fails to comply with law, U.S.O.E. must arrange by-pass of LEA to serve nonpublic students.	By-pass remains effective until U.S. Commissioner of Education determines LEA will provide required services.
Title I teachers travel to public schools; or nonpublic students transported with Title I funds to public school projects; or nonpublic students served in neutral site, such as mobile unit.	Continued.
LEA loans equipment and materials to nonpublic schools.	Continued.

Title IV

Current Law	S. 1753
IV–B: School libraries and learning resources	
Nonpublic students participate only when LEA receives funds.	If LEA not funded, nonpublic schools can receive services through alternative arrangements.
Nonpublic students often participate only to extent LEA program is suitable to their needs.	LEA must consult with nonpublic school officials to provide for nonpublic students in initial program design.
7% of funds go to nonpublic students.	Effect should be that closer to 10% of funds go to nonpublic students.
LEA loans books, instructional supplies, and equipment to nonpublic schools.	Continued.
IV–C: Innovation	
No comparable provision.	Funds can be used to diagnose learning problems and assess educational problems of nonpublic students.
Nonpublic students participate directly in innovative projects operated by LEA.	Continued.
Nonpublic teachers participate in staff training projects.	Continued.
IV–D: Guidance, counseling, testing	
Nonpublic students receive guidance and counseling from LEA staff and participate in testing programs.	Increased level of participation.
No comparable provision.	Incorporates provisions enacted in 1976 for in-service training for nonpublic school teachers and counselors.
IV–E: Gifted and talented	
Nonpublic students participate in small grants under Special Projects Act and to limited extent under Innovative Projects (IV–C).	Substantially expanded program requires equitable participation of nonpublic students.
No comparable provision.	LEA must consult with nonpublic school officials to provide for nonpublic students in program design.
Bilingual Education Act	
Estimated 6% of project students are nonpublic students.	Effect should be increased percentage to reflect number of eligible nonpublic students.
LEA required to serve nonpublic students whose educational needs are those addressed by LEA project.	If LEA fails to comply, U.S. Commissioner of Education may reduce LEA grant by amount needed to assess needs of nonpublic students and carry out program for them.
Nonpublic students attend classes in public school, or on neutral site; LEA may loan equipment and materials for life of project.	Continued.
LEA provides resource staff to aid nonpublic teachers; nonpublic teachers participate in training programs.	Continued.
Emergency School Aid Act
